Then others would crowd around and compare the time with their watches. The face of the dial was made up of white asters in a solid mass, while the figures were marked out in helichrysums, the so-called everlastings. While a good display of flowers and plants always attracts attention, a special feature like this inevitably draws a bigger crowd.

---

It seems to me that there ought to be an opportunity to dispose of many more flowers for decorative purposes at a show like the one mentioned. Here and there the visitor found booths decorated with vases of roses or carnations, or possibly a palm or fern. These booths stood out conspicuously among the others, and it would seem as though the right kind

An Excellent Basket Arrangement

of salesmanship could bring about a much larger use of flowers and plants in this way, especially at a time when flowers are as cheap as they are now. It behooves the florist to keep up a constant effort for the greater extension of flowers along these lines. There's a good market here if it were properly handled.

---

Walking through the Henry Robinson establishment in Boston recently I was struck with the tremendous number of baskets being sent out. Great quantities of these baskets have been imported from Germany, and have sold readily at a lower price than has prevailed for several years. Their use among retail florists is increasing. They are very decorative when properly used. This fact was well illustrated at a recent wedding in a Boston hotel where the decorations were very lavish and beautiful. There were baskets everywhere filled with flowers of different kinds, and the effect was singularly good.

Some of the different ways in which baskets can be used were shown at the Waltham, Mass., Fair, where Sydney Hoffman exhibited them filled with "glads," asters, combinations of fruits and flowers and similar combinations of flowers and vegetables. Mr. Hoffman is an adept in work of this kind, and his baskets attracted no little attention.

---

It is a question, though, whether the growers will find much consolation in the growing use of baskets. It is a fact, which must be admitted, that fewer flowers are needed for baskets than for making up any other kind of a display. A basket containing half a dozen roses is fully as effective as a bouquet of two dozen roses used alone. There can be no question that the use of baskets is cutting down the use of flowers to some extent. But, on the other hand, they are so adaptable and so appealing that they may increase the demand for flowers to such an extent as to offer complete compensation. In that case the growers will be just as well off, while the retailers will make more money, and the jobbers, of course, will smile more broadly than ever.

---

A much larger fern business is done in Massachusetts and Vermont than is realized by most people in the trade. In North Adams Robert Groves, Inc., have recently constructed a new storage house 98x54 feet in size, and costing $40,000. There are three large cold storage rooms, each with a floor space of 1,750 square feet, where the temperature is kept at 30 degrees. The plant has a storage capacity of 6,000 cases of ferns, or a total of 42,000,000 ferns, which is practically a year's supply. The refrigerating system is electrically operated, pipes carrying a heavy brine ammonia solution to each storage room, and in order to insulate the storage rooms the walls, floors and ceilings are completely sealed with a cork sheeting, having a coat of plaster inside and out. The cork alone cost nearly $9,000. The upper part of the building is devoted to a general store room, and is lighted by large windows set into the sloping roof. The building was constructed under the direction of Mr. Robert Groves.

---

The Breck Robinson Nursery, at Lexington, Mass., had a very interesting garden at the Eastern States Exposition in Springfield. It was arranged under the personal direction of Miss Mabel Keyes Babcock, director of the firm's landscape department, and was a replica of a garden constructed by her some time ago for an estate outside Chicago. The frame of the garden was the same as that used at the big rose show in Boston this spring. The garden was much admired, and added not a little to the success of the exposition.

---

Caplan, the florist of Boston, has a fertile brain which frequently shows itself in interesting and unique window displays. For some time past this window has been attracting much attention as a result of a very unusual display arranged under his direction. In the center of the window is a concrete pool, and at one side a garden seat. At the other side stands a tree and a roosting device for birds. In itself the window would attract more than passing attention, but when the crowds discovered live birds flying about or resting in the trees, they packed the sidewalk and overflowed into the street. Some canaries were used, but most of the birds were parrakeets, which look like diminutive parrots and which are not familiar to the average person. These unusual little birds are fascinating, and helped to make the window display complete.

---

Mr. Caplan is having much success in handling birds and especially canaries, for which there is a constant demand. Besides the bird department he has another department given over to goldfish. At one side of the store there is a large tank through which water is constantly flowing. Here the goldfish are kept. It is impossible to make a success of the goldfish business if the fish are kept only in aquariums, especially the smaller sizes. In a tank under fairly normal conditions they thrive and remain in good health.

There is a steady demand for goldfish, but they require much more care and attention, Mr. Caplan says, than might be expected. No florist can hope to succeed with a goldfish department unless he goes at the matter in a careful and painstaking way. One man's entire attention is given in this establishment to the birds and the goldfish. Mr. Caplan expects to move to his new location two doors above the present store next spring, at which time he will build a greenhouse at the rear and provide special quarters for the birds and the goldfish.

---

I have expressed myself before in favor of the new gladiolus "Lily White," and a few days ago had another chance to see this variety which serves to strengthen my opinion of it as an all round commercial sort. I think it is the whitest so-called white gladiolus on the market. It's true that just now there is a little trace of color, but everyone knows that is natural with any white flower when the weather gets cool. I saw "Lily White" at Mr. Meader's place in Dover, N. H., and of course they are having cold nights there. In fact, it's bordering on frost, and any white flower is apt to show color under those conditions. I am particularly impressed with "Lily White" because first of all it's early and secondly it positively does throw a fine percentage of blooms. Even from small flowering bulbs, the results are good, and I was surprised at the flowering qualities from 3-4-inch bulbs. It's a nicely built flower as an individual bloom; well set up on the spikes, and is always straight stemmed.

I can't help mentioning another sort which I saw at Mr. Meader's place. I didn't ask him what he thought of it as a commercial flower, but I believe that he considers it one of the good ones. This variety is Dr. Norton. It's a heavy grower, throwing strong, well set up flower spikes, but it's hard to describe the color. I don't know if I can make myself understood, but the best I can say is that it is an orchid pink. The pink is clear and striking, with just a little lavender tint, a mighty attractive flower in every way. I don't think it is particularly early, but I do think that it will bear watching, that is, for those who are not acquainted with this variety.

## SOME EUROPEAN NOTES

### And a Tribute to the Memory of the Late John Farquhar

By S. S. Pennock

Upon leaving Germany, Sept. 11, in going about the western parts of Germany, generally the western, as that is where my work mostly lies, the scenery is wonderful, hilly and mountainous in some parts, beautiful Rhine country, [illegible] to the Belgian, British, French and American troops, all most interesting, teeming with historical events, present and past, [illegible]

Samuel S. Pennock

[illegible] of the [illegible] where we [illegible] a small little town, centrally located in Germany just [illegible] the "Greatest World" in Europe, with its Parsons and several others, we [illegible] the gardens of the palace of the Grand Duke of Saxony, Gotha and Coburg. [illegible] splendidly situated public park well kept [illegible], one is very nice [illegible] particularly nice planting of evergreens [illegible] many specimens of [illegible] be seen in the grounds.

[illegible] the bedding of the gardens [illegible] and second [illegible] thought of my visit to Stuttgart in the gardens of the palace of the former King of Wurtemberg, which I visited early in July, some tropical grounds. It brought back to my memory our dear old friend, John F. [illegible] Farquhar, and I [illegible] attention to some of his plantings in Stuttgart and other parts of Germany. To me it was an [illegible] and one that was best and [illegible] one of our strong pillars in the business, always ready to do his share in any undertaking, throwing his energy into our flower shows and exhibitions in an unstinted way, not only contributing to the exhibits, but giving his time and ability, helping to make those exhibits a real success.

It has been some time since he passed on to the unknown and I do feel I want to add a line to those who have written so finely of him and his life. A few weeks before I left for Germany last March, he gave me some very fine letters of introduction and also wrote me a very nice letter wishing me a safe journey and God's blessing. These are the kind of things, as we grow [illegible] that make it [illegible] and I am proud to have [illegible] man we all [illegible]

## ECHOES FROM THE FERN SHOW.

[illegible] that [illegible] the [illegible] Brooklyn [illegible] the [illegible] Fern Show [illegible] the [illegible] Gardens [illegible] the [illegible] and [illegible] the [illegible] the trade. [illegible] the general public. Without [illegible] the attendance could have been doubled or trebled with a little more publicity. Indeed, [illegible] hundreds of people were [illegible] to [illegible] from the [illegible] of the [illegible] [illegible] it. How could [illegible] Anyone [illegible] the show in time to [illegible] arrangements to attend it.

Much credit is due the Brooklyn Botanic Garden for the extensive exhibit which was made by that institution. Dr. B. O. Dunlap of the Garden was a guest and speaker at the meeting of the Horticultural Club, Boston in the Parker House, at which F. R. Pierson of Tarrytown, N. Y. presided in the absence of the president, Mr. E. H. Wilson who is now in China for the Arnold Arboretum.

Mr. W. A. Manda, whose exhibit represented a tremendous amount of work and no little expense, won $1,150 in cash prizes, as well as many gold and silver medals. Mr. Manda sold his remarkable group exhibit to Wollworth & Sons, of Waltham. This gives the Wollraths, without doubt, the largest collection of cacti in New England, and one of the most complete in the country.

Several other sales were made after the show. Samuel Quint bought all of the ferns shown by F. R. Pierson and turned them over to his brother, Harry Quint.

The entire orchid exhibit of George E. Baldwin & Co., of Mamaroneck, N. Y., was sold to Mr. L. D. Towle, of Newton, Mass., who is rapidly forming one of the finest collections in America. This group received the Apple Tree gold medal, and contained the following varieties:

C. Mossiæ, Maggie, Raephael alba, Victory, Fabia, Fabia alba, Mantini, Hardyana and Petersii; L. C. Linda and H. Greenwood; B. C. Carmen and Veitchii.

# ADVERTISING AND SELLING

It pays to cater to the autumn bride. Wedding decorations are profitable, and the florist can do no kind of work which will give him more gratuitous advertising. Flowers at a funeral seldom seem to attract more than passing attention, but they often make a deep impression at weddings, and it is common to have those present make inquiries as to the name of the florist supplying the flowers. Henry Penn, of Boston, is making a bid for wedding trade in an interesting and effective way. He has had attractive show cards made which are being displayed in the street cars. The cards are divided into two sections, one of which contains a large photographic picture of a bride and a shower bouquet made of valleys. A member of the O'Brien Girl cast posed for the print, and did her part exceedingly well. On the other side of the card appears in large letters the words: "A Shower Bouquet by Penn the Florist. Say It with Flowers." We think this is effective advertising, and will help to bring trade.

WHOLESALE PRICE LIST FREE

MICHELL'S SEED HOUSE
518-516 Market St., Philadelphia, Pa.

Baumgarten, Inc., of Milwaukee, Wis., has been seeking the same kind of trade by means of a novel window display, and in order that every prospective bride might see this display an invitation card was mailed to all of them whose names could be obtained. Gray silk curtains draped the large window, while the floor was covered with white felt. At the back were two wide steps with a dark blue velvet runner, and in the background blue flower boxes and tall white vases were displayed, these receptacles being filled with fresh flowers each day.

Scattered about the window were potted ferns and large wrought iron candelabra, each with five candles. These accessories made the setting of the main feature of the display, which consisted of a large doll in full bridal attire, with a shower bouquet of ferns, baby's breath and sweet peas. This doll stood on the top step and on the step below were two maids of honor in orchid and green tulle, with hats to match. One of these maids carried a shower bouquet of sweet peas and pansies; the other a bouquet of sweet peas and roses. Near the front was a flower girl in blue and carrying a basket of forget-me-nots. Apparently this girl was scattering small pink roses in the pathway of the bride.

This store has its salesmen trained to take full advantage of whatever direct business the store window may bring, but the concern does not rest there. It goes out after business, and seeks it systematically. The whole store force is encouraged to pass on any information it may receive as to engagements, weddings and receptions. The columns in the daily papers are carefully watched for announcements. A polite invitation is sent to bride or groom to visit the store and pick out personally the wedding bouquet and the decorations.

This is not the end, either, for the salesman, being carefully trained, learns if possible whether the happy couple are to live in the town or in the country. If he finds that they are to have a little ground available, he suggests the planting of vegetables and flowers. He mentions the seeding down of a lawn, and calls attention to the fact that the necessary implements for all garden operations are carried by the store.

If, on the other hand, a town house is to be the domicile of the newly-weds, house plants, cut flowers, canaries and goldfish are suggested. It is quite true, of course, that the bride and groom are not likely to be particularly interested in garden making and house plants at the moment, but later on, when married life begins to become a bit more prosaic, they remember these things and go back to the Baumgarten store as a matter of course.

It is a fact, a good salesman has it in his power to make steady customers for any store by the tact and diplomacy as well as the perseverance which he shows when he has a bridal couple to deal with.

---

Speaking of window displays leads me to think of Penn of Boston again, because Penn tries to make his windows bring him actual business, as well as pleasing the fancy of the passersby. During the past week he has been featuring Dutch bulbs. There is nothing unique in this fact, of course. Most florists are featuring bulbs just now. But Penn put human interest into his display by introducing an attractive young lady dressed in typical Dutch garb. The window was trimmed attractively so as to provide the proper setting for the human figure, and the girl spent the hours from 10 to 5 in going over the bulbs with which the window was piled, and removing the outer coverings. In this way she practically earned the amount which was paid her.

While the window full of bulbs would have attracted a certain amount of attention in any event, the presence of the young woman was sufficient to block the sidewalks. And immediate results were obtained, for men and women alike were reminded that they had planned the planting of bulbs in their gardens or the forcing of them indoors and accordingly came in to give their orders.

---

### BRIDE'S BOUQUET

The bride's bouquet illustrated on the opposite page is an excellent example of what can be done to secure an artistic effect with comparatively few flowers. In this bouquet were three dozen double white Killarney roses, 50 white sweet peas, 25 sprays of Adiantum, 20 yards of baby ribbon and 3 yards of satin. The piece was made up by Mr. B. Levenson, of the Copley Florist, Fishelson & Co., Boston, Mass.

---

Mrs. Stephen G. Vanhoesen, of Fanwood, N. J., won the bronze medal offered by the American Dahlia Society to the exhibitors at the Dahlia Show of the Plainfield, N. J., Dahlia Club.

Tegelaar Bros., florists, have been incorporated in Manhattan for $5,000.

# AMERICAN DAHLIA SOCIETY

## Echoes of the Show in New York---The New Officers.

There can be no question as to the tremendous popularity of the dahlia. No other flower is being so universally grown, and no other seems capable of so many endless subdivisions. Dahlia shows are always crowded, and the seventh annual exhibition held at the Hotel Pennsylvania, in New York, was no exception. It was the biggest show ever held in the city, from what I can judge. It was so big, in fact, that there was a certain amount of confusion at first, with the result that judging was somewhat delayed.

Never before, perhaps, has so much attention been given the staging of flowers in an attempt to create an artistic effect as well as to show the individual blossoms.

John Scheepers & Co., as well as Stumpp & Walter, deserve special credit for what they did along this line. I think that more attention is going to be given in the future to the growing of dahlias which are useful for decorative effects, and which will last well when so used.

As was to be expected, R. Vincent, Jr., and Sons, of Whitemarsh, Md., did themselves proud. For several years the Vincents have occupied a leading place among dahlia growers, and have been fortunate in possessing some rarely beautiful varieties. At this show a special feature was made of Patrick O'Mara, which will certainly become a widely planted variety if the efforts of the Vincents count for anything.

I have spoken several times about the fault which some of the most widely advertised dahlias have in hanging their heads. Plenty of such dahlias were shown in New York, and some of them given much prominence. I don't believe that the public will stand for them, and I am sure that the trade will not.

Herbert Alexander was in charge of J. K. Alexander's group, which included 3,000 blooms, with between 600 and 700 varieties. Mr. Alexander is making a special feature of dahlias for cutting, dahlias which are likely to find friends in the trade. Among those which he showed were Frank A. Walker, Attraction, Maude Adams, King of the Autumn and George Walters.

The dahlias of the Peacock Dahlia Farms, Berlin, N. J., were notable for their long stems and their attractive grouping in baskets and vases.

As usual, George L. Stillman, of Westerly, R. I., confined himself largely to varieties of his own creation. Mr. Stillman occupies a unique position in the dahlia world, and his exhibits invariably attract attention from growers who are loking for novelties.

The most conspicuous exhibit in the Henry A. Dreer display was the orange decorative dahlia, Mabel F. Taft; the orange cactus, Gay Paree; the red decorative, Gloire de Verdun; the pure white cactus, Nevada; and the decorative, Pink Perfection.

H. F. Michell & Co. showed a number of new varieties, including Mrs. George W. Elkins, Jr., a hybrid decorative, gold overlaid with salmon; J. W. Davies, hybrid decorative, cerise pink; and Laddie, hybrid decorative, shrimp pink overlaid with sulphur yellow.

R. Vincent, Jr.

President of the American Dahlia Society

## AMERICAN DAHLIA SOCIETY OFFICERS

At the meeting of the American Dahlia Society in New York, the following officers were elected for the ensuing year:

Richard Vincent, Jr., president; William Rathgeber, secretary-treasurer; G. W. Kerr, first vice-president; James Duthie, second vice-president; W. W. Wilmore, third vice-president; J. K. Alexander, fourth vice-president; and J. W. Davis, fifth vice-president.

J. K. Alexander
4th vice-president, American Dahlia Society

## NEWS NOTES

Herrick, the florist of Hacketstown, N. J., is an enterprising florist, as well as a dahlia enthusiast. He has carried out an excellent plan this season which has helped to push the dahlia, while giving him a lot of worthwhile advertising. He arranged for ten different dahlia shows to be given in nearby New Jersey and Pennsylvania towns, working with the local societies. He attracted further attention by exhibiting for the first time the dahlias originated by Mrs. Charles H. Stout, of Short Hills. Mrs. Stout, who is an amateur, has won much fame with her dahlias, having taken twenty-three silver cups, ten medals and innumerable certificates in open competition with the best foreign and domestic varieties. Mr. Herrick offered silver cups for local amateurs displaying the largest flowers.

George E. M. Stumpp, the florist of New York, has filed suit against Mrs. Helen Haggin to recover $374.70 alleged to represent the value of flowers purchased this year.

Considerable damage was done by a fire due to spontaneous combustion which broke out in the coal shed of the United States Cut Flower Co. at Elmira Heights. It is the second fire of this kind within a short time.

The new conservatories being erected by the City of Boston at Franklin Park are almost completed. The city's outside plants will be stored in the old greenhouses at Dorchester for the last time this winter.

# RAMBLING OBSERVATIONS OF A ROVING GARDENER

There's no doubt about the value of mulching in garden practice. Leaves, straw, hay and even pine needles are more or less familiar as mulching material, but it is only recently that I heard of tea leaves being used in this way. It seems that at a big tennis tournament in England many thousands of visitors were present, and of course, being English, they regaled themselves frequently with tea. As a result there was a great accumulation of tea leaves, and some ingenious person conceived the happy idea of utilizing these leaves for mulching the numerous small trees and shrubs which had been planted in proximity to the refreshments pavilion. A writer in one of the English papers was interested enough to examine the soil underneath the tea leaves to see what effect this unique mulch had. He found this soil pleasantly moist, and believes that doubtless the trees will be benefited by it. Although tea leaves will never probably become standard material for mulching, it is worth while to remember that it is not necessary to depend upon straw or hay.

---

In an issue of last May the Gardeners' Chronicle (England) referred to an article previously published in Horticulture descriptive of Mr. Thomas Cook's Rose Library, and expressed doubt as to the possibility of Lord Carmichael's library having escaped from England. In a recent number of the Chronicle, a member of the Arnold Arboretum staff takes issue with the writer of this article, and says:

"Unfortunate as it may be for English collectors, the 'Castle Craig Collection of 233 volumes and pamphlets on roses and rose culture, bound in 73 volumes,' as described by Captain Quaritch, was purchased by Mr. Cook in 1916, and with one or two exceptions still rests upon his shelves. One of these exceptions is Rossig's Die Rosen. Upon learning that it was not in the library of the Arnold Arboretum, which probably possesses the largest collection of rose books in America, Mr. Cook presented the Castlecraig copy, and with an interest in the Arboretum's rose collection, second only to that in his own, Mr. Cook has added much other rich material."

The writer goes on to point out one or two mistakes in the original article which Horticulture published, among them the mis-spelling of Redouté, and then continues:

"For forty years Mr. Thomas Cook has spared no pains or expense in hunting out and securing the choicest and most valuable literature on the rose (not everything ever published), and has succeeded in acquiring nearly all of the important works, as well as a large share of less important ones. This noteworthy collection is growing as rapidly as the books not already included can be procured. While it is, perhaps, needless to say that the article in Horticulture was published entirely without Mr. Cook's knowledge or approval, his Rose Library is, nevertheless, one in which he may justly take pride and satisfaction."

---

I am glad to see that definite action is to be taken at last toward developing the Back Bay Fens in Boston. This is a part of the park system which has great possibilities, and Bostonians who take pride in their city have long felt ashamed when they have been obliged to take their visitors from other parts of the country through this section. The Mayor has appointed A. H. Shurtleff and Olmstead Bros. as architects to prepare plans for making the Fens what they ought to be. Former Mayor Curley at one time desired to have a sunken garden effect carried out, but that was before the Charles River basin had been dammed. This plan has now been entirely abandoned, I understand. In the hands of such men as the landscape architects mentioned, the development of the Fens will no doubt be worked out in a way that will be a credit to the city.

---

## AMERICAN ORCHID SOCIETY

### Important Matters Taken Up at a Meeting of the Trustees.

A meeting of the trustees of the American Orchid Society was held on Thursday, September 22nd, at the Algonquin Club, Boston, Mass., where the President, Mr. Albert C. Burrage, delightfully entertained at dinner, during which much good work was done in mutually talking over those things which would be the greatest help in promoting the best interests of the society.

The occasion was opportune, the society just having enrolled its first hundred members, and being in a position to make progress along the lines suggested by the constitution.

It was also important as showing the deep interest taken in the proposed work of the society by those responsible for its development. The full Board of Trustees was present, as well as the officers ex-officio.

The development of such a society must necessarily be a gradual process, until the membership becomes large enough to deal with the important questions which confront the orchid world.

The strict quarantine is causing much annoyance to those commercially interested in orchids and is undoubtedly keeping many beautiful varieties out of the country and

Dahlia Albert Manda

apparently can serve no useful purpose under present conditions.

Mr. Oakes Ames and Mr. W. A. Manda were elected Vice-Presidents.

It was voted to appoint a committee to secure a list of all American raised hybrid orchids, of which some reliable printed record was available, as proof that they had been raised and flowered in the United States.

A committee of four was also appointed, consisting of Edward Roehrs, Joseph Manda, George E. Baldwin, and John E. Lager to consider the advisability of holding an orchid exhibition at some central point, in the near future.

It was also decided to publish a Symposium on the Native Orchids of America, this being appropriate as the first publication of the American Orchid Society, and the great interest manifested in native orchids wonderfully presented in all their natural beauty by our president, Mr. A. C. Burrage, in Horticultural Hall, Boston, on April 7th, 1921, seeming to warrant such an effort.

It was also decided to publish a permanent set of by-laws to replace those hurriedly printed for immediate use. The advisability of offering a silver cup for the best orchid exhibit during the year was also considered.

Each trustee pledged ten new members for the next meeting. A rising vote of thanks to President Burrage for his hospitality brought the first meeting of the trustees to a close. They will meet again in New York City on Friday, November 4th.

ALFRED J. LOVELESS,
Secretary.

## NEW STORE IN WINCHESTER, MASS.

An attractive new flower store has just been opened at Winchester, Mass., by H. W. Crockford, an experienced and businesslike young man who already has a store at Winthrop. The Winchester store has an exceptionally pleasing decorative scheme. The walls for two-thirds of the way to the top are gray, being white for the rest of the distance. The tables, chairs and other furniture are painted gray to match the walls. Mr. Crockford was overseas with the American troops and has a great many friends among the Legionaries as well as outside.

## THE CARNATION CONVENTION

There will be an important meeting of the Hartford, Conn., Florists' Club, Wednesday evening, October 12, at which time plans will be taken up for the convention of the National Carnation Society to be held in January.

## VANDA LOWII

By Albert C. Burrage

This most extraordinary and exceedingly rare orchid is a native of Borneo, where it was discovered in 1845 by Sir Hugh Low, growing on the higher branches of the loftiest trees in the dense swampy tropical jungles on the coast of Sarawak. By Lindley it was named Vanda Lowii in honor of the discoverer, but was afterwards transferred by Reichenbach to the genus Renanthera and therefore called Renanthera Lowii. Later by Veitch, it was called Arachnanthe Lowii, and in 1919 Rolfe suggested it be called Dimorphorchis Lowii; but throughout the orchid world it is still best known as Vanda Lowii.

The most difficult and dangerous of all orchids to gather, it is also the most difficult to transplant, for in spite of its robust stem and leathery leaves it is easily bruised and is very sensitive to atmospheric changes. Many plants were shipped to England, but few survived the voyage, so that this has always been one of the scarcest orchids in Europe.

It is distinct from any other known Vanda and is easily distinguished by its dark green foliage, thick, fleshy roots and remarkably long drooping flower spikes. In its native habitat and also where thoroughly established and happy in a new home, Vanda Lowii often bears four spikes on one stem, each over 10 feet long and each carrying 40 or 50 flowers.

The most remarkable feature of the plant is the dimorphism of the flowers—that is, the production of two kinds of flowers on the same spike—flowers entirely distinct in size, form and color. It is not so much the unusual appearance of the inflorescence itself that attracts the beholder as the constant occurrence of two kinds of flowers on the same stem, the lowermost (1, 2 or 3) being somewhat larger than the others and of a bright orange or tawny yellow dotted with red-purple, while all the others are deep chocolate brown bordered and streaked with yellow.

## TO TRAIN NURSERYMEN

### A Practical Course in Nursery Practice to be Given at Amherst

Last winter the New England Association of Nurserymen appointed a standing committee on education with Mr. Richard Wyman of Framingham, Massachusetts, as chairman. Other members of the committee are Theodore L. Borst of Framingham, Mass., and W. E. Campbell of New Haven, Conn. This committee has taken up with Professor Frank A. Waugh of the Massachusetts Agricultural College at Amherst a proposition for a special course for nurserymen.

Arrangements have now been made whereby such a course will be given by the Massachusetts Agricultural College the present winter, beginning January 2, 1922, and continuing for a period of ten weeks. The following subjects will be offered:

1. Horticultural botany, the identification of plants, their correct names, the science of nomenclature, etc., by Professor C. H. Thompson.

2. Soils and fertilizers, a fundamental course.

3. Propagation and nursery practice.

4. Landscape construction,—how landscape plans are made and carried out, including grading, planting, roadmaking, etc., direction of F. A. Waugh.

5. Special lectures by practical nurserymen.

This course is designed to meet the needs especially of craftsmen—those actually at work in the nursery rows. No entrance examinations will be required, but it is expected that every applicant will have had more or less practical nursery experience as a foundation for his work at the college.

No tuition charge will be made. There will be a registration fee of $5 and each man will be obliged to buy his own books which will cost about $5 more. Board and room will cost about the same in Amherst as elsewhere, say $9-$10 a week.

Those who desire further information regarding this course should communicate with Mr. Richard Wyman, chairman of the committee, Framingham, Mass., or with Professor Frank A. Waugh, Amherst, Mass. The class will be limited to 25 members, so that early application is desirable.

## ADVERTISING RUINED HIS BUSINESS.

A chap told me the other day that advertising had ruined his business.

"Advertising ruined your business?" I said aghast. "Why, good heavens, man, I hardly know of a business which is successful to a large way that doesn't owe practically its entire success to advertising."

"Well you see," he replied rather limply, "my competitors advertised and I didn't."

## FLORISTS OF EUROPE

### Interesting Interview With Mr. Frank J. Dolansky on the Situation as He Found It

Mr. Dolansky, the florist and orchid grower of Lynn and Boston, has just returned from his third trip to Europe. He spent about three months traveling through England, France, Germany and other countries. While it was not a business trip, he was naturally interested to learn the extent to which the florists across the water had been hurt by wartime conditions.

"In Germany," said Mr. Dolansky, "I found the situation very much better than I had expected. Of course there is much unrest, and people hardly know where they stand politically. There are four different parties pulling against each other, and some of the Germans would like to see the old monarchial government restored. I do not think, however, that there is any reason to expect that the republic will be overthrown.

"There were flowers everywhere in Germany, and all the florists seemed to be busy. Even the poorer people were buying flowers when I was there. They seemed to consider them one of the necessities of life, and the presence of flower boxes all along the streets did much to add to the general appearance of the cities. These flower boxes were especially noticeable in Berlin and Hamburg.

"I found a great many dahlias being used, and was surprised at their keeping qualities. They were used largely in baskets, and I think had their stems in moss.

"The Germans do not make up their bouquets in the same open way which prevails here. They make them very tight, even with dahlias. I do not think the plan is quite as good as the one we follow, and yet the bouquets do not look bad. One dahlia which I saw used everywhere, and a very pleasing one, has a small red and white flower.

"The growers of France are coming back, although they are handicapped by the high price of glass and other supplies. I didn't get around as much in France as in Germany, because the French people seemed to dislike using the English language, while English is spoken freely in Germany.

"The English situation, so far as the florist is concerned, is not very favorable. The English people are terribly burdened by taxes, especially the wealthier classes. If a man has an income of 6,000 pounds, the government gets about 4,000 pounds, which doesn't leave very much for luxuries. As a result the people who formerly patronized the flower shops largely are not buying, and the florists are crying hard times. The poorer people in England do not buy flowers as they do in Germany, possibly because they are higher in price.

"It seems to me that the German competition is going to be difficult to meet, although the English people now blacklist German-made articles. In England I bought some florists' knives which cost me close to $2.00 apiece. In Germany I found knives which were just as good in every essential feature at 25 cents or less.

**The F. T. D. Convention** When the F. T. D. convention opens at Toronto tomorrow (October 11) it will find a hospitable welcome from the Canadian Florists. The latter are feeling proud of the fact that the Association has come across the line, and the United States members, for their part, are determined to show by their presence that the bonds of friendship between florists on each side of the border are constantly growing stronger.

The program is along the same lines as those which have been carried out by the Association for the past year or two. There are comparatively few set speeches to be heard, but there will be a great amount of discussion on practical subjects pertaining to the trade by practical men who have threshed out all the various programs which come to the florist in each day's business. There is no better way to get at facts than by swapping experiences in this way. A lot of men who can never be induced to prepare a long paper to be read at such a convention, or are not sufficiently experienced to make a prepared address, have, nevertheless, a tremendous fund of experience from which they will gladly draw in a gathering where they can talk in an impromptu way and without the restraint which comes when the sessions are too formal.

Some very important matters are to be considered, among them uniforming accounting and bookkeeping. Many members are more or less at sea on this subject, especially now that they have to give so much attention to income tax reports, and will be glad to know of more approved methods. The standardization of flower boxes, co-operation in delivery, and difference in cost between natural ice and ice making machines, are to be considered. The matter will be brought up also of having a week throughout the United States and Canada when all the florists shall combine to feature special "Say It with Flowers" window displays.

The matter of Sunday closing will be again taken up. Likewise the question of filling F. T. D. orders for less than $5.00. Many of the members will give their experience in local advertising, and the grading of flowers as it ought to be done will be taken up by two prominent florists who have been investigating this matter for some time.

**Quarantine Results** In the National Nurseryman, Mr. N. T. Nutt says that Quarantine 37 has precipitated a craze for propagating evergreens, and that nurserymen who never grew any evergreens before are now propagating them at the rate of from 100,000 to 200,000 and look upon them as war brides. He predicts that in five years salable sizes will be as plentiful as mosquitoes in Jersey.

We think that Mr. Nutt exagerates a little. At the same time it is true that evergreens are being propagated on a very extensive scale. As a result the nursery trade finds itself in a very different position as regards quarantine 37 from that which prevailed a few years ago. They have staked everything on the assumption that the quarantine will stand. Some of the nurserymen who formerly were loud in their condemnation of the quarantine are now trusting that it will last, because if it does not, they stand to lose a large amount of money. It seems to be a situation where the Federal Horticultural Board is winning out on an economic basis.

## KEEP FISHIN'

Hi Somers was the durnest cuss
  Fer catchin' fish—he sure was great!
He never used to make a fuss
  About the kind of pole, or bait,
Er weather, neither; he'd just say,
"I got to catch a mess today."
  An' toward the creek you'd see him slide,
  A-whistlin' soft and walkin' wide
I says one day to Hi, says I,
  "How do you always ketch 'em, Hi?"
  He gave his bait another switch in,
An' chucklin', says, "I just keep fishin'."

Hi took to readin' law at night
  An' pretty soon, the first he knowed,
He had a lawsuit, won his fight,
  An' was a lawyer, I'll be blowed!
He knowed more law than Squire McKnab!
An', though he had no gift of gab
  To brag about, somehow he made
  A sober sort of talk that played
The mischief with the other side.
One day, when some one asked if Hi'd
  Explain how he got in condishion,
  He laughed and said, "I just kept fishin'."

Well, Hi is Gov'nor Somers now;
  A big man round the state, you bet—
To me the same old Hi, somehow;
  The same old champion fisher yet,
It wasn't so much the fishin' pole,
It wasn't so much the fishin' hole,
  That won for Hi his big success;
  'Twas just his fishin' on, I guess;
A cheerful stiddy, hopeful kind
Of keepin' at it—don't you mind?
  And that is why I can't help wishin'
  That more of us would just keep fishin'.

—Ray Clarke Rose.

# "Montgomery's Friscilla"

That's the name of the new pink rose! The name will be "Priscilla" probably after the public has had it a while, but we have had to add the prefix to cover the rules of nomenclature.

In order to get someone who knows more about roses than we do to give an unbiased, honest opinion on the merits of this rose, we have placed 12 plants of it with each of the following rose growers:

E. G. HILL CO., Richmond, Ind.
DAILLEDOUZE BROS., Brooklyn, N. Y.
ALBERT H. AMLING CO., Maywood, Ill.
DUCKHAM-PIERSON CO., Madison, N. J.
ROWAYTON GREENHOUSES, Rowayton, Conn.
MILLER FLORAL CO., Farmington, Utah
WELLWORTH FARM GREENHOUSES, Downers Grove, Ill.
A. S. BURNS, JR., Spring Valley, N. Y.
ROBT. SIMPSON, Clifton, N. J.
CHAS. H. TOTTY CO., Madison, N. J.
NOE-RUZICKA CO., Madison, N. J.
WM. H. ELLIOTT CO., Madbury, N. H.
ANTHONY RUZICKA, Madison, N. J.
W. J. PILCHER, Kirkwood, Mo.
JOS. HEACOCK CO., Roeloffs, Pa.
WENDLAND & KEIMEL, Elmhurst, Ill.
JOY FLORAL CO., Nashville, Tenn.
ROBERTS ROSE CO., Denver, Colo.
GEO. C. WEILAND, Evanston, Ill.
LAKEVIEW ROSE GARDENS, Jamestown, N. Y.
BASSETT & WASHBURN, Hinsdale, Ill.
HARRY O. MAY, Summit, N. J.
F. R. PIERSON, Tarrytown, N. Y.
L. B. CODDINGTON, Murray Hill, N. J.
JOS. H. HILL CO., Richmond, Ind.
STEPHEN MORTENSEN, Southampton, Pa.

Ask them about it, if you will, at any time. They have our permission to tell the truth. We are going to let this rose sell itself! We shall be simply order takers.

A. N. PIERSON, Inc. Cromwell, Conn.

## FLORISTS OF EUROPE

(Continued from Page 169)

I had already bought two dozen knives in England, but when I got to Germany I bought fifty more. The custom house inspector was curious to know what I was going to do with so many knives, but I made a satisfactory explanation when I told him that all the men in my greenhouses had asked me for them and there wouldn't be more than two or three apiece when they were distributed."

Although Mr. Dolansky had a very pleasant trip, he was glad to get back to America once more and into the company of his beloved orchids.

To The Trade—

Thos. F. Galvin, himself, will give your orders his personal attention at his son's store.

**Thomas F. Galvin, Jr.**

BOSTON, MASS.

## George Watson's Corner

"You in your small corner and me in mine."

Sept. 30th Robert Craig had not yet started on his trip to Porto Rico. Laid up in bed with bronchitis or asthma or something. Hope he will be all right again soon. Charles Sim is thinking of making a sojourn down that warm and sunny winter pathway about the same time. Maybe the two young old boys can make it in company. They expect to sail Oct. 8th.

A. B. Cartledge is home again after his victorious cruise on the "Diana" which crowned him with glory! She is some boat, and Bert has a right to be proud of her! Some day we hope to show you a good picture of her; but, so far, nothing doing. As for her owner, he says he hasn't had his "picter took" in twenty years, and don't intend to start now! What do you know about that? Is he some awful bandit afraid to show himself to the outside world? Looks suspicious. He is really a good looking fellow. I have a good picture of his father, Thomas, and Bert is very like him in many ways. So why he should think he is a disgrace to the family is more than I can understand.

What does a florist know about glass, anyway? Single U on single thick may mean all right. But single U on machine made means something else. The point is: they can hand him most anything on single thick—as far as brands and terms are concerned. But on double thick. Ah! on double thick! There's where the slick artists have to bid on the real thing. No camouflage there. Be on your guard, boys, on the single thick. They will hand you a lot of high toned words you don't understand, and get you if you don't watch out. But not on double thick. There's no danger in the double thick. Their quotations there are on the level, and you can depend upon them. I got this from long hours of listening (under the table) where the glass manufacturers had no suspicion of me, and I hand it along to my friends. What does a florist know about glass anyway? Better stick to double thick!

The changes around Hatfield since my last call there some ten years ago seem to have been quite extensive. In the old days there was only the George Samptman place. Now there is H. A. Aafjes (Samptman's successor); Ellwood Siter (late Didden & Siter); F. Maeller and George Didden; four of them—all within a stone's throw. Mr. Didden sold out to Mr. Siter, and is just commencing to build nearby. Mr. Aafjes will build an extensive addition next spring. So that Hatfield seems to be developing into quite a floricultural center.

Not much doing in 'mums the last two weeks of September this year.

AMPELOPSIS Quinquefolia, 5½-in. pots, at $35.00 per 100.

A. L. MILLER, Jamaica, N. Y.

Evidently the 'mum boys feel they'd better wait a little until the dahlia hooray has subsided a bit. Later on—the first and second week of October, they can get better prices. Seems a sound business idea; and yet, we see 'mums in the retailers' places—Battle's and Pennock's and Habermehl's, etc.; but probably these boys are willing to pay a little extra, just for the ad. That, however, does not cut any figure in the big outside wholesale market. It is only a little side issue, hardly worth mentioning. While the swashbuckler dahlia rages around, dainty Miss Chrysanthemum stays modestly in the background. She will have her innings all in good time.

The Growers' Cut Flower Co. is the latest in the Philadelphia wholesale market. William C. Lynch is the manager, and he is backed by some good growers, among them Leonard and Doemling. They have located right in the wholesale center, on Mole street, near Meehan, Baker, Heacock, and Gannon—so that will make the spot all the brighter for the buyer. Nearby is the Bernheimer place, and in a swing of the arm, as it were, we have the Pennock Market, and Reid's and Deutzcher's—then Berger's and Anegele's and Campbell's. You certainly can get a lot for your money—within a stone's throw of Broad Street Station.

The aster crop has been troubled with blight in some directions but to judge from the wholesale flower markets in Philadelphia you would wonder what they were talking about. Most of the time the supply of cut flowers from day to day was far ahead of the demand, and many went unsold. So the blight—but what's the use of talking. Those boys who got the blight will still think their stuff would have beat the other fellow to it, and netted them a handsome profit.

The Ross Flower Store had a grand opening on October 1st. This was the fourth link in their great chain; and the celebration was worthy of the occasion. Celebrities from far and near came to see Frank, and his fine staff of enthusiastic helpers. That two dollar fern for sixty cents was a winner, of course, but the personality behind it all was the great thing. Broad and Girard avenue is a corner for a live florist. Frank Ross is a far seeing man. We wish also to add a word of commendation to the builder, Raymond Raff. He has done a fine job. Both outside and inside. The whole enterprise is a credit to the neighborhood, and to the aspiring spirit which is always on the outlook to conquer new worlds. And that means Frank Ross. Our hats off to him!

The last we heard of Samuel S. Pennock was from Essen, September 15th. He was still on his Friendly Service Commission and very busy. To relieve the monotony, his good lady, Mrs. Pennock, had paid him a visit and this was appreciated. She will stay near him most of the remaining time, and take the same steamer home, which will probably be about mid-October.

Brother Liggitt started on a Western trip October 3rd. Would not say

anything about how far west. Pittsburgh is slightly west; Chicago is another sleep; and then there's Ioway, and Nebrasky, and Colorado, and Salt Lake; but we fancy our enterprising pioneer will stop before he gets among the Mormons. He's a married man and has to be careful! The Pacific has its charms, of course, and San Francisco is a charming outlook for Hawaii, and Oahu, and Japan; but too far west is East—and the International parallelogram—which the Dreer boys talk about (Thilow and Parsons) will doubtless stop him in his headlong march—somewhere! Let us hope for the best. We need all our live wires right here at home in Old Philly.

### WATCH YOUR CREDITS.

It is very essential that retail florists pay particular attention to credit sales at the present time. Here and there failures are being reported which can be accounted for in large measure through the failure of florists to escape bad debts. When a man is hard put to it for funds he is pretty likely to leave his florist bills until last, if he is not frequently jacked up. No florist can keep his own credit good if he has a lot of bad bills on his books. It is better to lose an occasional customer than to pile up a lot of accounts, many of which are likely to run for years, if they are ever paid.

### NEWS NOTES

The greenhouse and flower business of Dobbs & Sons, at Auburn, N. Y., has been purchased by Earl S. Shaw and Winfield H. Boehler, two Cornell graduates, who will continue the business under the name of Shaw & Boehler. Mr. Shaw was formerly superintendent of the estate of George W. Perkins, in New York, while Mr. Boehler was assistant superintendent. They plan to take up landscape gardening in addition to their other work.

## CHICAGO HAS A MORTGAGE ON IT

A writer in one of the Boston newspapers relates an amusing anecdote of a visit to one of the public gardens in Chicago. Finding a flower the identity of which was not quite clear, he said to a nearby caretaker, "Does this plant belong to the orchid family?" "Nawsir," was the prompt reply, "everything in here belongs to the City of Chicago."

Stewart Sharp has remodeled the old Corbett Greenhouses at Mt. Sterling, Ct., and has rented them to Mrs. E. L. Brockway. These greenhouses are now among the most modern in the state.

### FIFTH NATIONAL FLOWER SHOW

The work of preparation for the Fifth National Flower Show is being vigorously pushed. The cut flower schedule has been prepared, and the premiums covering the rose section published. The premiums in the carnation section will be made known this week

Space in the trade section is being taken up satisfactorily. Among those who have recently made reservations are L. C. Stroh & Sons, Batavia, N. Y.; Joseph G. Neidinger Co., Philadelphia, Pa.; The Florists' Exchange, N. Y.; Henry A Dreer Inc., Riverton, N. J.; Carl Hagenburger, West Mentor, O., and B Hammond Tracy, Wenham, Mass

The official guide to the show is now under way, and there has been a nice response to the requests for trade patronage in the advertising section The publication will be fully up to the standard of its predecessors, replete with information of value to lovers of flowers and plants

JOHN YOUNG, Secretary.

The Leavenworth, Kans., Floral Co., which has long been engaged in the wholesale florist business, has now opened a retail store at 506 Delaware street.

GREENHOUSE NOZZLE

The new Manaway greenhouse nozzle is a decided advance over any greenhouse nozzle heretofore made. By its peculiar construction the side spray is thrown out which applies the water evenly from the pipe outward. Our long-throw nozzles cover a space up to 18 feet from the pipe. We can supply nozzles that will cover any space desired. If you will advise us under what pressure your system operates and the width of space you desire to cover, we will mail without charge a sample nozzle. C. W. SKINNER, Newfield, N. J.

END NOZZLE

Every one who is using the Manaway System without the end nozzles can now fit their lines with our new 3-outlet end nozzles which take the place of not only the regular nozzle but also furnish 2 streams, one 4 and the other 8 foot out of true. One of these nozzles placed at the beginning or end of the line has the effect of lengthening the line 8 feet at each end. These nozzles can also be used in other systems which use a large nozzle. The price is 15c each, postpaid. C. W. SKINNER, Newfield, N. J.

BULBS

C. KEUR & SONS, HILLEGOM, Holland. Bulbs of all descriptions. Write for prices.

SKINNER SYSTEM OF IRRIGATION.

**Costs You Nothing**

although you have to pay for it. It costs you nothing, because

**It Pays For Itself**

Send for facts and figures.

The Skinner Irrigation Co.
100 CANAL ST. TROY, OHIO

When you combine attractiveness with practicalness, as is done in our Semi-Curvilinear House, you come pretty close to getting a 100 per cent greenhouse.

# Some More "Just So's"

Isn't it so that most 18 by 50 ft. houses look about the same, when you FIRST look?

Then, when you look again, things about it begin to look up, that you had never looked for.

Take the question of height of sides.

From the outside, there is not so much difference in appearance.

But, from the inside, you at once see that our eave curve is decidedly different

Different both in height and sweep of the curve

One means: a lot more head room on those side benches

The other means an impression of a much larger house, with its attendant feeling of airiness

All of which is because we went about the design of our house just the other way about from other greenhouse concerns

Instead of taking the old curved eave house, without any side ventilation, and simply adding a gutter at the bottom of the curve and attaching a sash to it, we went back to the splendid, graceful lines of the curvilinear house.

It always had a gutter and side sash.

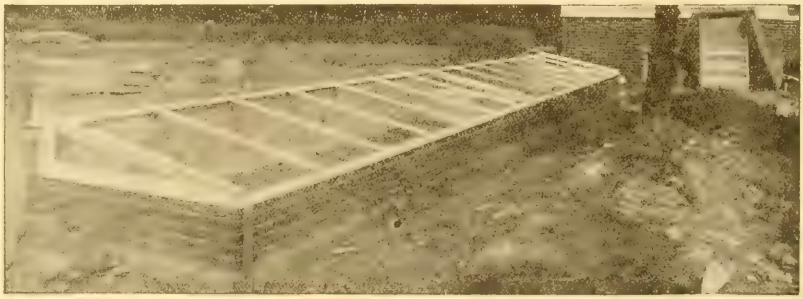
So, what we did, was simply straighten out the curve in the main part of the roof and modify it somewhat at the eave

All of which gave you our attractive Semi-Curvilinear house

So you see, with greenhouses, as with everything else, what you start with has a lot to do with what you end with

All of which you at once admit is "just so."

Furthermore, you know we go anywhere for business.



Or to talk business.

## Hitchings and Company

### A WORD FOR OUR WILD FLOWERS

Will you permit me to present, through your columns, a flower-lover's thanks to Mrs. Case for her kind words in favor of our native plants, and to add a few words of my own to her plea for more recognition of their fine qualities as garden plants—there are in our woods so many varieties that are decorative as plants as well as the large group that bear beautiful blossoms. You rarely see any of these in the smaller gardens, even in those where an effort has been made for rustic effect.

And there are so many that repay generously the most trifling attention. I once put in a garden a small group of New England asters and during the late summer they became the glory of the garden, and there are others—many of them—that repay generously for the gardener's care.

Many amateurs think that these wild plants are difficult to transplant and to get established, but that is not the case. Dig up a ball of earth around the roots and keep this earth moist until it is put in the new home, and after that give the plant plenty of water. This summer I transplanted a dozen asters while they were in bloom—an awful crime, you will say, but I was desperate—there would be no other opportunity to perform the operation. Well, despite the theories to the contrary, these plants lived and thrived and kept on blooming!

By the way I chanced on two asters that were new to me, during a ramble in mid-New Hampshire woods this summer. One bore a medium sized blossom of a rare and rich tint of blue lavender. I met but a few of the plants and all were of low size with a branching habit. They grew on the dry hillsides. Did I chance on something rare or were these beautiful blossoms a freak of a common plant?

The other beauty I make out to be A. Spectabilis and I agree with Mrs. Dana's verdict that it is "the loveliest of all the tribe." I differ with that authority on the nomenclature of its color for while she pronounces it a violet purple I call it pink lavender.

Again I think it is misleading to make it appear that the New England asters are found chiefly amid the swamps for the New Hampshire hillsides were ablaze with them as I rode through recently.

MONTAGUE CHAMBERLAIN.

Boston, Mass.

### NEW ENGLAND

Charles T. Stevens, the florist of Plymouth, Mass., attended the F. T. D. Convention at Toronto, making the trip by automobile. He reports a pleasant journey and a convention which was a hummer.

Harry Quint, the Boston florist, had his automobile stolen recently. To be sure, the man who took it claims that he only borrowed it, but the judge evidently didn't agree with him, for he gave him a sentence of one year in the house of correction.

Miss Ethel Lura Adams, of Springfield, Mass., was recently married to Elmer Matthew Kling, of the same city. Miss Adams is the daughter of Mr. Walter Adams, and has been employed by her father at the J. W. Adams Nursery, being well known to many members of the trade.

Vol. XXXIV OCTOBER 25, 1921 No. 8

## THE TALK OF THE TRADE

No other grower in New England can come anywhere near William Elliott, of Brighton, Mass., in the growing of pot chrysanthemums. Indeed, there are few men anywhere in the country who produce as many plants each season. For 28 years Mr. Elliott has specialized in pot mums, and never before, he says, has he got them exactly as he wanted them. This year they are pretty nearly perfect, as the result of very careful attention throughout the season.

Potted mums are not easy to grow successfully unless the grower is willing to actually live with them, watering them three or four times a day when the weather is hot. Mr. Elliott has one very long house at Brighton which is completely filled with pot chrysanthemums, which stand on temporary platforms placed over beds of asparagus sprengeri. There are 3,500 plants in this one house, or were before the selling campaign began. Now they are fast melting away, big lots going into the co-operative market in Boston every day.

Altogether, Mr. Elliott is putting out about 5,000 plants, large and small, this season, and has timed them so that they will last over many weeks, some being in full flower while others have not begun to show flower. He has, or did have, 700 plants of Mrs. Frank Ben. This is a variety which has also been developed, I believe, in quite a large way by Poehlmann in the west. He has "Caps" in large variety, and some magnificent plants of white Oconto, as well as the new yellow Parr. As usual there are plenty of roses at the Brighton establishment, although chrysanthemums hold the center of the stage just now.

---

Strout's carnation, Maine Sunshine, has been winning honor abroad. It was shown by Mr. C. Engelmann, of Saffron Walden, at a meeting of the Royal Horticultural Society, held on September 20, and received an award of merit. Apparently the carnation aroused considerable enthusiasm among the British growers who saw it.

I recently had an opportunity to go through Mr. Strout's plant at Biddeford, and found Maine Sunshine abundant, as well as his other new varieties, the pink Rosalind and White Delight. Mr. Strout's new Lord & Burnham house, 300x60 feet, devoted wholly to carnations, is worth making a long trip to see. It's a fine house, and filled with fine stock. Mr. Strout also has several other good houses, including one which is given over to roses. He is also going in for cyclamen this year, having 4,000 plants which look very good. He has a seedling carnation called Snow White, which is remarkable for its fragrance. He is giving a trial to Crystal White, which he calls very fancy, although not as good as other kinds for the regular trade.

One carnation which is being given quite a prominent place in the Strout houses is the old Lady Northcliffe. I believe that Mr. Pembroke, of Beverly, once made a great feature of this carnation. Mr. Strout's stock is somewhat improved, apparently, being larger than it used to grow for Mr. Pembroke, and is thought very highly of as a businesslike flower. It is salmon pink in color, and a good keeper.

Mr. Strout has a fine bench of Donald, which he thinks highly of as a red carnation. He is also growing Aviator. He took his three pets, White Delight, Maine Sunshine and Rosalind, to the Toronto Show. He says that Mr. Niessen, of Philadelphia, is encouraging growers around Philadelphia to stock up with White Delight, so that he can have it for that market, considering it of special value as a commercial flower.

---

For a long while commercial rose growers have striven for a better white rose than those now offered. It is true that the double white Killarney fills the bill very much better than the single white Killarney but even at that it leaves much to be desired. What has been most wanted is a free blooming white that can be sold at a medium price. Now comes Angelus, which seems to meet all of the requirements. A very large stock has been worked up, and is being disseminated by some of the biggest men in the country, including Fred Lemon, the originator, Totty, J. H. Hill and E. G. Hill. Much is heard about it wherever rose growers meet, and those who have seen it give a very favorable verdict.

---

The new rose will be especially popular with the florists because of its long lasting qualities, which make it especially desirable for weddings and decorations. Its form is excellent and it has considerable fragrance. It has a creamy tinted center, which adds to its beauty. These are things which will appeal to the retailer, while the exceeding freedom with which the plant blooms will recommend it to the grower. Growers who have studied this rose say that it promises to prove adaptable for garden cultivation as well as for forcing. Being an American seedling, it probably is in better shape to stand our extremes of heat and cold than are the imported and more delicate varieties.

New White Rose "Angelus"

---

Old timers are familiar with the success which Mr. Skidelsky has had

in getting new varieties before the trade. It is very entertaining to read in his remarkable little book the experiences which have attended his efforts along this line. He has had his failures, of course, but when he takes hold of a new variety, whatever the species may be, one may feel certain that he thoroughly believes in it. The way in which he is pushing the new geranium Mrs. Buxton, being put out by George E. Buxton, of Nashua, and named for his wife, indicates that it is probably an unusually good flower.

I feel certain that he is right about this because the other day I had the pleasure of looking over a bench of the plants. They were blooming well, and made a very fine appeaarnce. It seems to me that this flower has about everything which a pink geranium should have. Anyhow, the trade has taken to it well. The parent plant still occupies a conspicuous position in one of the greenhouses and undoubtedly will be kept as long as there is any life in it. It is a huge plant, and may well be the father of a new race.

---

Some years ago Mr. Buxton gave up the retail end of the business to go into the growing end, but so much retail trade has continued to come his way that he has concluded to meet it in a more open-handed manner than in the past. Accordingly he is enlarging the office at the front of his greenhouse and will make it a retail store. He is putting in a new ice box where he will display roses and other flowers which he buys. Of course the carnations, of which he grows a great many, will be cut fresh.

---

Perhaps there is no line of work in which warmer friendships are made than in the florist business. I got to thinking about this after my talk with Mr. Buxton. On the mantel in his office was a picture of Mr. M. A. Patten, of Tewksbury, whose name has long been a very familiar one among carnation growers. Mr. Patten and Mr. Buxton have been the warmest of friends for years. The same sort of friendship exists between Mr. Buxton and Mr. Skidelsky, who has been visiting Nashua on his various trips for at least thirty years. Mr. Buxton believes that Mr. Skidelsky is a prince among men, and when he can say that after thirty years of business dealings, it is pretty good proof that his opinion is justified. The late William J. Stewart, founder of Horticulture, was another frequent visitor to the Buxton establishment, where he often met leading spirits in the trade.

Sam Goddard and Mr. Buxton are continually visiting back and forth, and every little while Mr. Goddard takes a run down to Biddeford to see his friend, Mr. Strout, one of the most prominent men among the carnation growers, even if he is a little off the beaten track. It would be possible to go on and name many other friendships of this kind. It is pleasant to dwell upon them. "They are among the things, as one goes through life, that make it worth while," as Mr. S. S. Pennock said in his recent letter printed in Horticulture regarding his friendship for the late John K. M. L. Farquhar.

---

Talking with Mr. Powers, the other Nashua florist, I was interested to hear him say that there had been a tremendous demand for gladioli this season. He has bought most of his flowers from local growers, and has used Primulinus hybrids quite extensively. I was rather surprised to find so large a sale as he reported of outdoor flowers in a small city like Nashua.

"Isn't it true," I asked Mr. Powers, "that most of the people here have gardens of their own?"

"Yes," he said, "but few of them grow flowers enough to last through the season. As a matter of fact, home gardens seem to stimulate the florist business. After people have been accustomed to having flowers in the house, they are not willing to be without them. Accordingly they come and buy."

Two new people have started growing gladioli in an extensive way in the adjoining town of Hudson. One is Mrs. Sanford P. Hardy, and the other Mr. John R. Kimball. Mr. Kimball has covered a wide range of business this season, motoring not only to Nashua but also to Lawrence, Andover and other cities, selling his flowers to the florists and taking orders for bulbs. It seems quite possible that the growing of gladioli will be overdone, at least so far as the sale of flowers is concerned. The Boston market was swamped with them this season. In the smaller towns they have sold more readily, but it is certain that when they are used in great quantities and at low prices, they will interfere with the sale of what are more strictly florist's flowers. This is one of the new developments of the business which will have to be given consideration by florists within a few years.

---

When I was in Mrs. MacManmon's florist shop in Lowell, a gentleman came in and ordered ferns enough to fill half a dozen window boxes. I find that use of ferns in this way is growing. It is one of the indications of the remarkable popularity of the fern just at present. Apparently there is to be a good sale of indoor window boxes filled with ferns, and florists will be wise to make them up and call them to the attention of their clientele.

I imagine that a printed card or a type-written letter written to a selected list of names, calling attention to the advantages of ferns for window boxes, would bring good results.

## The Younger Generation

There's an old saying, "Old men for counsel and young men for war," which has much in it of truth. It would be impossible in the florist business to do without the old timers who are familiar with every detail of the

WILLIAM F. GALGAY

industry, and can be depended upon to keep it on an even keel. At the same time the younger generation must not be neglected, for in due time the men now starting in business will be the old stagers.

After some valuable experience with Penn, of Boston, William F. Galgay opened a store in Cambridge, where he has built up a nice substantial business. Mr. Galgay deliberately chose the flower business for his life work. Being an athlete, he probably thought that business would give him plenty of exercise. Mr. Galgay is a well known baseball player and can take any position on the team. He has also gained local renown as a basketball player. He has many friends, both in and out of the trade.

# WHAT'S DOING IN BOSTON

## THE ROSARY'S NEW STORE

The Rosary, of which James J. Casey is the well known proprietor, will be located in its new and permanent quarters in the Kensington Building on Boylston street, just below Exeter, before the end of the week, as work on the new store is about completed. Most of the furnishings have already been removed from the temporary store further up the street. In its new location The Rosary will have one of the handsomest florist shops in Boston, with two entrances and a very large show window. The store is a commodious one, with a large balcony for the display of baskets, pottery and other accessories.

## THE FLOWER GROWERS' ASSOCIATION

The eastern section of the National Flower Growers' Association is planning for a busy winter. The first meeting of the season was held at Hotel Bellevue, October 8, with Thomas Roland presiding, the president, Samuel Goddard, being in attendance at the convention at Toronto. Many matters of interest to the trade were considered. It was a very businesslike session, and much emphasis was given to the necessity of co-operation among the members of the trade. Those present were outspoken in their condemnation of artificial flowers, the statement being made that Boston was using these flowers to a particularly large degree. It is the general impression that greater activity should be shown by the trade in and around Boston, especially in publicity work. Major P. F. O'Keefe was present and gave a talk on publicity work. The next meeting is to be held at the same place at 6.30 o'clock, Saturday evening, October 29.

## MARKET CHANGES

There has been a marked influx of new stall holders at the Boston Flower Exchange, some of them having come over from the Co-operative Market. The list includes the following: Eric R. Anderson, Natick, Mass., salesman, I. Mirsky; Quidnick Greenhouses, Quidnick, R. I., Wm. Hannon & Son and Thomas Powers, Dorchester, Mass., salesman, Bernard McGinty; Robert McGorum, Natick, Mass., Edward Nejlander, Anderson Bros. and Gus Berglund, Woburn, Mass., salesman, Robert Koppelman; Terrace Hall Conservatories, Burlington, Mass., salesman, Robert McKone; Chester B. Coburn, Dracut, Mass., Sharon Gladiolus Co., Sharon, Mass., Garrison Hill Greenhouses, Dover, N. H., Medfield Farm & Greenhouse Co., Medfield, Mass., Raymond J. Leach, Attleboro, Mass., salesman, William Hastings; Patten & Co., Tewksbury, Mass., salesman, George Noyes; Charles W. Freeman, North Beverly, Mass., salesman, M. Liebman; John Marshall, Providence, R. I., Victor B. Olson, Taunton, Mass., salesman, William Carr; Mrs. E. S. Rumney, Stoughton, Mass., Robert R. Walker, Mansfield, Mass., salesman, Mann Co.

## NEWS NOTES

The Massachusetts Horticultural Society has awarded the George Robert White medal of honor for the year 1921 to Mrs. Louisa Yeomans King, of Alma, Mich., in recognition of her service to horticulture in increasing the love of plants and gardens among the women of the United States, by her success as an organizer and manager of garden clubs, by her public addresses and books about gardens, and by the example of her enthusiasm and industry.

John S. Ames has been appointed treasurer of the Massachusetts Horticultural Society to succeed Walter Hunnewell, deceased.

Joseph Mahoney, for a number of years with Galvin, Inc., and well known in the trade, has become connected with the Allston Floral Co., of which Stephen G. Burke is proprietor. This store, which has an excellent location on Brighton avenue, has been having a big run lately on pottery of different kinds. An unusual demand for accessories of this kind is reported. Just now this store is featuring ferns.

## MR. PENN COINS A NEW WORD

Henry Penn is out with a new advertisement which is bound to cause talk. The eye is first caught by the picture of a pretty girl with an armful of "mums," and thus is led to the text matter, which reads:

**"Phonortel" Your Flowers!**

By the Penn "Phonortel" system of delivery you can insure getting flowers to the one who is to receive them at just the right time. The phone, if within a few hundred miles, and the telegraph, if at a greater distance. Correspondent florists in nearly every city in the world.

Mr. Penn says. "The word 'Phonortel' is a new one, and it seems to cover the ground well. This euphonious word will undoubtedly be taken up by those now using our original phrase, 'flowerphone.' I hope it will meet with the approval of florists, who are at liberty to use it as expressing the good will for further business from Penn."

## "A HOUSE WITH A HEART"

The trade is talking about a bit of enterprise on the part of the Henry Robinson Co. a few days ago—not the kind of enterprise which claims immediate financial returns, but the kind that helps to build up a big business. It seems that the Robinsons had an order for a floral piece to consist of roses and valleys, to be delivered in Falmouth, Mass., for a wedding to take place at 2.30. The piece was made up and given to a boy to put on an early morning train, but the boy, being new at the game, forgot the location of Falmouth, and took the piece to the North Station. By the time he learned his mistake the train from the South Station had gone. What was to be done then? The piece was to bring only $13.50, but the Robinsons determined it should be delivered at any cost. Accordingly they put John in a machine and told him to step on the gas. It is 152 miles to Falmouth, but the floral tribute reached the house where the wedding was to take place at a quarter of twelve, in ample time. John says the mother of the bride was so pleased that she kissed him. Henry Robinson, when asked about the matter, says, "Oh, well, you know this is a house with a heart, and of course we couldn't think of disappointing that woman."

## GARDENERS AND FLORISTS' CLUB

At the next meeting of the Gardeners and Florists' Club of Boston the evening of October 25, Robert Cameron, who has just been elected president of the National Association of Gardeners, will speak. Mr. Cameron succeeds W. N. Craig, who is secretary of the club. The next convention of the national association is to be held in Boston, and the club is expected to do much in the way of providing entertainment for the visitors.

# ADVERTISING AND SELLING

Battles, the florist of Philadelphia, has made such a conspicuous success of his business that the trade is always interested in learning of his methods. For that reason an article which appeared recently in the Retail Ledger, of Philadelphia, is of special importance. It has to do with a unique window decoration, and reads as follows:

### Tiny Display Window Builds Business for Phila. Flower Shop

"Battles, the florist, on Twelfth street below Chestnut, has a display window that measures approximately 3 by 2 feet.

"It is in reality a window within a window, though it serves the same purpose as though the florist had extra frontage.

"It wasn't incorporated into the facade by the architect or builder. There's nothing elaborate about it. It's the sort of thing that any store employe of taste and handy with tools could make. The materials required would be a few pieces of lumber, some burlap, a saw, hammer, tacks and nails.

"Battles' store is on the west side of the street. He has one big display window and one door, which is recessed in such a manner as to give the display window a side pane at an angle of about forty-five degrees to that which parallels the front. The door is to the north of the window.

"The relative positions of the door and the window are important, owing to the direction in which the crowd travels.

"Battles has a rather ornate and solid background for his main window display, the side walls being set inward; that is, coming closer together as they touch the back. It is in the triangular space formed by one of these side walls to the main display and the side pane of the big window that the miniature, adjustable window display is set.

"A framework, covered neatly with burlap and having a rectangular opening of the desired size just a trifle below the level of the eye of the person of average height is set flush against the glass. Back of this opening is placed a burlap-covered shelf, with side and back walls. The top of the miniature window, which could only be seen by a person stooping down, is left open, and just above it, but, of course, concealed from the pedestrian, is an ordinary electric bulb and reflector.

"A typical display is one or two small vases of rare flowers, with perhaps an exquisitely bound and illustrated little volume on horticulture opened at the page describing that particular variety, and a little card inviting one to step into the store and see the blooms on display there.

"But perhaps it is desired to show some flowers with very long stems and the opening in the little window is not high enough. The answer is simple. A new combination of burlap-covered frames is laid against the glass with an opening of the correct size to frame the desired display. These various sets, once made, may be kept for future use as occasion requires.

"By no means the least important advantage of the little window is that it permits the display, as a unit, of the average-sized purchase. A dozen roses will appear generous by themselves, but unless the greatest care is used in dressing a large window they will look miserly in the midst of hundreds of other blooms. Possibly this will induce a larger purchase from the customer with a fat purse, but it will often make the customer with but a moderately filled one give up the idea of buying altogether.

"To summarize there are eight points of outstanding advantage in the little window.

"First. The display can be changed easily and often.

"Second. The frame can be made to fit the display.

"Third. It attracts customers before they have passed the door.

"Fourth. It naturally leads them into the door.

"Fifth. It gives the store two windows in the space of one.

"Sixth. It displays the average-sized purchase.

"Seventh. It enables people to examine the flowers at a distance of a few inches.

"Eighth. Its novelty catches the eye where an ordinary window might not."

### STANDING WREATH

The standing wreath illustrated on the opposite page is a good example of a well-made piece at a moderate price. It is made up as follows: Base, 18 Columbia roses and about two dozen white asters; top, three dozen roses and about three dozen asters; one 50-cent bunch of plumosus and the same amount of gypsophila. A few gladioli were added, as they happened to be in season, but were not essential. This piece was made up by The Rosary, Boston, Mass.

## BACK FROM EUROPE

### Mr. W. J. Collins, of Carter's Tested Seeds, Inc., Tells About His Trip

Mr. W. J. Collins, manager of the Boston office of Carter's Tested Seeds, Inc., recently returned from an extended trip in Europe, largely as a matter of business. He kept his eyes open, and some of his observations were very interesting. In the course of the conversation with Mr. Collins, he said:

"Yes, I am very pleased; I had a very enjoyable time in Great Britain, and on the continent. Seemingly the world war and the depressing effects it had on all individuals while it lasted were soon forgotten for matters of more interest and less irritating. In Scotland perhaps the effect of the war is more noticeable than in any other country west of Germany, and even then it is only in the more outlying and country districts where the noticeable grief is encountered. The death toll in some of Scotland's small towns and villages is appalling; that is accounted for perhaps through the male population of the larger towns and cities being so largely engaged in the manufacture of war materials.

"In England, there is, like in Scotland, a great deal of idleness and I might venture to say much that would, in this country, be called laziness. However, I feel that the system of paying a weekly dollar allowance to each man or woman unable to find employment has much to do with this condition, as many can get along nicely on the government's weekly allowance and are not any too eager to find employment. The frequent strikes which Britain has had during the past two years has evidently greatly hurt the general industry of the nation and a great many of the workers themselves recognize this fact, and will not be so ready in the future to strike on the moment they learn their demands are not granted. Britain as a whole is, however, a very fine country and there is not much fear of her becoming stagnated as many people predict.

"Conditions on the continent, France, Belgium and Holland, are, all things considered, very fair. Belgium is busy reconstructing her devastated area and is doing a pretty good job. To me, Belgium seemed the busiest country of all and, outside of the fighting area, there is not much sign of the war. France does not seem to recover quite so quickly but is, nevertheless, making considerable progress. It was encouraging to note that in all four of the nations at war so long, namely, Great Britain, Belgium, France and Germany, farming and seed growing seemed to be the indus-

try least affected. This year, however, the extreme early drought in all the above mentioned countries has been very damaging, especially to root and cereal crops. The continental countries perhaps suffered less on account of their more flat and regular surface and low elevation.

"A great many losses have been experienced this year in the seed raising industry and the effect of this will be felt again next year, for in many cases growers did not harvest hardly enough of some lines to supply them with stock seed. The effect of the extreme drought was especially noticeable in all establishments maintaining trial grounds. In a number of these places where I was, I saw many and many complete failures of stock which was evidently sown or planted in the usual manner and with extreme care, but on account of no watering system or rains the result was complete failure. This applied to both flower and vegetables. In one establishment I visited, I saw what had been a beautiful hedge or wind break of English holly and, on account of it being on a rather high and exposed position, it had become so dry the leaves dried up completely and became so crisp that when you picked them they cracked and broke up just like mica.

"I met some very fine American people while travelling down through the battle lines in Belgium and France, all bent on the same errand. Needless to say, one is not very long in the devastated area before he or she sees more than they bargained for. I am very glad I saw what I did at the time I did, because in a few more years it will not be as it is now and I feel sure will be better to look at, but whether or not more interesting, I don't know."

## ALBERT L. WARNER

Albert L. Warner, of Pawtucket, one of the oldest florists of Rhode Island, died recently at the age of 87. Mr. Warner was born in Webster, Mass., but lived in Pawtucket for 55 years, establishing his business on East street. He was prominent as a musician as well as a florist, having been connected for a number of years with Gilmore's Band and Lawton's orchestra. He was well known in Masonic circles, being Past Grand Master of the Grand Lodge of Rhode Island.

Abbott P. Smith is erecting a new greenhouse of very handsome design at New Bedford, Mass. The work is being done by the Hitchings Co.

The Boston Traveler in its birthday columns recently contained the name of William Penn, who is yet young enough to be perfectly willing that we should mention the date, 1878.

# RAMBLING OBSERVATIONS OF A ROVING GARDENER

I can't remember a season when frost has held off so long as has been the case in New England this year. As this is written, dahlias are still blooming and making a fine appearance. I have a note from J. K. Alexander, in which he says that he has never had dahlias in flower so late. Almost always the plants are killed back before harvesting is begun, but that is not the case this year. Some people have an idea that the tubers should not be dug until after frost has killed the foliage. This, of course, is not true. But it is seldom indeed that the tops can be cut off while still covered with blossoms.

---

Like many other men who are now growing flowers commercially, Mr. W. A. Gumm, of Remington, Ind., well known as a peony specialist, is a business man having large interests in other lines. Still Mr. Gumm has been interested in peonies for a long time, having begun their cultivation way back in 1880. Having the money to spend, he has invested in many of the best varieties now known, and has nearly a thousand different kinds in his collection.

He is especially well known among peony growers for what he has done to popularize the Lady Alexander Duff, which ranks among the best of varieties for American gardens. Mr. Gumm claims to have the largest stock of this variety in America, and probably he is justified in making that claim. The accompanying photograph shows the genial grower among his flowers. The flowers in the row directly in front of him are Lady Alexander Duff, while those at the left of the center are Lillian Gumm.

---

There can be no question about the growing popularity of the peony. I doubt if there ever was a fall when so many roots were put into the ground as has been the case this season. Undoubtedly there will be some failures, for many people have not learned just how to care for these plants. After all, though, they need but little coddling, and when once established are among the most dependable of all border plants. Some suggestions from a writer in Gardening Illustrated in regard to the care of peonies may be of interest here. This writer says:

"Where the established plants can be afforded liquid-manure during the autumn and winter, when the ground is moist enough to retain the value of the liquid about the roots, a greatly increased vigor will follow, as also larger and handsomer blooms. It is also an excellent plan in spring to flood the bed with water, and thus assist the plants to produce the very finest blossoms possible. I consider it almost impossible to supply peonies too liberally with liquid-manure. Those who cannot command a liberal supply of liquid-manure should afford the plants each autumn a goodly dressing of well-decayed manure. In this way the newly-forming roots will receive assistance when this is most required.

"Blossoms of ordinary size and beauty are, of course, freely produced by the established plants by the ordinary methods of cultivation, but these will in no sense compare with those produced by the best methods of culture. Next to an abundance of rich food-supplies, the supply of root-moisture is the most important. This fact is, I feel sure, not appreciated at its full worth, especially by those resident in districts where light soils overlying gravel and sand obtain. Such soils are invariably shallow, and gravel and sand are usually reached at about two feet from the surface. Where the subsoil is chiefly sand, the latter, by its greater depth, preserves a coolness for the roots unknown where the subsoil is of a gravelly nature.

"In each case the plants can hardly be overfed. The case is different where the soil is of a loamy nature and of great depth, for in these the peony will grow vigorously, often sending down its roots to a depth of 2 feet or more. Frequently, in the more retentive soils, like the heavy clay soils, for example, the peony, while taking longer to become established, often develops a species of root-canker, rare when the plants are grown in the lighter soils. Thus it would appear that a medium light loam is generally best for the peony.

"The best season for the planting and transplanting of peonies is a limited one. September and October are by far the best months of the year; indeed, peonies may safely be regarded on much the same lines as bulbous-rooted plants, which, to secure the best results, must be in their places before rooting begins. In the case of the peony the new roots appear usually about September, and

Mr. W. L. Gumm

The Peony Specialist Among His Choicest Blooms at Bennington, Ind.

by planting at the time stated a minimum of loss both of vigor and a return to the flowering stage are experienced. The sellers of plants realize the importance of this early planting, but are not always able to impress their customers of the fact, hence by a sort of compromise—viz., lifting and heeling in a given number of plants of saleable size each year, root action is checked, and the planting season considerably prolonged, with but little harm. It is another matter, however, when an attempt is made to plant these things after new growth has been made in late spring, without doubt the worst period of the year, as the miserable top growth and diminutive crown buds will clearly indicate later on if the plants are examined.

"Peonies are said to be impatient of removal or frequent disturbance, and they certainly are if the disturbance takes place at an unseasonable time.

"Where the transplanting is being done at home, it is a decided disadvantage to attempt to transplant large clumps intact. Big clumps may have their larger roots shortened considerably before dividing them up. By laying a big clump on its side, thrusting two garden forks placed back to back into the clump, and giving each fork an outward wrench, a big lump can be severed without loss of root or crown. By repeating the process, plants of moderate size, and such as possess three or four crowns result, and these are the most useful to plant. Hacking the plants to pieces with the spade is so crude a method, and so injurious withal, that no intelligent grower would consider it for a moment. Peonies always display their good qualities best when grouped together, and for this purpose a number of moderately-sized plants, with free room for development, should be arranged together. It is important that the crowns be placed about 2½" below crowns."

## NOTES ON THE F. T. D. CONVENTION

New England delegates from the F. T. D. Convention at Toronto are loud in their praise of the hospitality extended to them by the Canadian florists. Mr. C. S. Strout, of Biddeford, who has been a consistent attendant at the different conventions for years, says that it will be a long time before any city in the States is able to outdo the Toronto boys. Mr. Strout also speaks well of the golfing possibilities around the Ontario city, he having a friendly eye for a good golf course wherever it is found.

One of the lady florists to attend the convention from New England was Miss Louise Palmer, of Brookline. Miss Palmer says that she was impressed particularly with the broad gauged methods of doing business which were discussed. It seemed to be the general feeling, she said, that florists should make a greater attempt than ever before to give to customers their money's worth, and to discountenance all of the small and petty practices which have injured the business in the past. She found that the florists in general were trying to put their business on a higher plane. She was also impressed, she said, by the lectures and demonstrations in the making up of flower pieces which were given by Messrs. Fox and Schling.

She said that apparently there was a growing tendency to do away with the more grotesque designs and to use flowers in a more natural way. Less wiring is being done, for example, with the result that the pieces do not have the stiff, artificial appearance of former days. She said that this was quite in line with the practice followed at the Palmer store, where comparatively little use was made of wires or toothpicks. She said that the basket pillow made up by Mr. Fox, of Philadelphia, in the method which he has perfected, wasn't a pillow at all in the old sense, the flowers being comparatively loose and placed in a basket filled with moss. Mr. Fox made up this pillow in ten minutes.

George E. Buxton of Nashua attended the Convention with his wife and had a grand time. He reports that the florists were guests of the Kiwanis club at a dinner there which will long be remembered. Goodfellowship between the American and Canadian members of the organization was one of the features of the gathering. Shortly after the opening session of Tuesday, George Dicks, of London, Ont., entered on one side of the hall, carrying the American flag, while on the other side, Frank Schram of Toledo, O., entered bearing the Canadian flag. Meeting at the center aisle both marched side by side to the tune of appropriate music. Immediately following them came Miss Amelia Gude of Washington, D. C., proudly supporting the F. T. D. banner, on which was represented Faith, Truth and Determination.

"Another incident of the gathering," said Mr. Buxton, "was the sending of a message to a London firm authorizing the delivery of flowers to King George as per the regular service of the association. Within a short time came a message in reply with thanks, showing that the service had been perfect."

All who returned from the convention spoke well of Pres. Breitmeyer's address. Many of those present agreed with Mr. Max Schling in his report on the standardization of flower boxes. He said that the 85 different sizes that are now carried might well be reduced to 21. Most of the delegates seemed to be pleased with the choice of the next convention city. Baltimore won over St. Louis by a vote of 110 to 49.

The election of officers resulted as follows:

Philip Breitmeyer, Detroit, President.

Charles Feast, Baltimore, Vice-president.

Alfred Pochelon, Detroit, Secretary.

William L. Rock, Kansas City, Treasurer.

Charles A. Grakelow, Philadelphia, William J. Palmer, Buffalo, and A. F. Broden, Los Angeles, Directors.

## CAMERON PRESIDENT

### Convention of National Association of Gardeners in New York City

Mr. Robert Cameron, formerly in charge of the Harvard Botanical Gardens, and now superintendent of the Crane estate at Ipswich, Mass., was elected president of the National Association of Gardeners at the convention in New York. The other officers chosen were as follows: Vice-president, Joseph Barnett, superintendent of the estate of Mrs. J. Lyons, Sewickley, Pa.; secretary, Martin C. Ebel, of New York City; Treasurer, Montague Free, of the Brooklyn Botanic Gardens. Mr. Ebel was re-elected for the eleventh consecutive year.

About 150 members were in attendance at the convention, and much important business was transacted.

One of the subjects to which the convention gave consideration was the movement to rid the country of signboards along highways. They hope to educate the public and to persuade them not to purchase articles advertised in this way.

Another object to be undertaken by the association will be the plan to found a school where young men may be trained to become superintendents of large estates, as there is a great need for men. It was pointed out by the secretary of the association that only five per cent of the men who are engaged in this kind of work are Americans, the others being English and Scotchmen, who received their training on the other side.

### Pres. Craig's Address

Among other things Mr. Craig said:

Owing to existing economic conditions, the calls on our Service Bureau by men out of employment have been quite numerous, but because of the reduction on some estates and the development of but few new ones, it has not been possible to place as many applicants as we could wish. In this respect we are not greatly dissimilar to other professions, all of which are feeling the present period of readjustment. It has been found that the necessary advance in the cost of our annual dues, made at the St. Louis convention, has not greatly affected our numerical strength, while the additional dues help quite materially in popularizing and strengthening this valuable feature of our association.

I cannot refrain from again touching on Quarantine No. 37. There have been additional orders from the powers that be in Washington, but Quarantine No. 37 has dealt the heaviest blow to horticulture of any. As an organization we have endeavored in every possible way to secure modification but so far without avail. We were told that the quarantine when placed on the statute books would, like the laws of the Medes and Persians, remain forever, but I still have faith that a measure so manifestly unfair which has had so stultifying an influence on horticulture in its broadest sense will ere long be modified. Our commercial friends, the nurserymen particularly, who at one time vehemently opposed this quarantine seem to have concluded that hopes of revision are slender and with fear of being disciplined, if they continue their opposition, seem resigned to their fate.

Pres Robt. Cameron

Not a few are now propagating roses, azaleas, rhododendrons, and various other debarred plants in large quantities, which proves the quarantine to have some redeeming features, but for it, we would have continued to import many plants easily propagated here. However, it is unfortunate that the Chinese wall built up against plants from abroad, while it has stimulated some home production, has at the same time very materially advanced the cost of all these plants to the garden lover. It is surely a narrow and regrettable policy which compels us to purchase such plants as can easily be propagated at home and denies to us interesting plants and bulbs raised by painstaking hybridists abroad. We are aware that permits can be secured after much red tape for plant novelties but when such a world noted institution as the Arnold

Arboretum has regretfully decided that it is useless to attempt the importation of any more plants under existing conditions, there is little encouragement for amateurs to attempt to do so.

I feel that our association should continue to place itself on record as opposed to Quarantine No. 37. We as gardeners are perhaps more deeply concerned with insect pests and diseases than any other class of men, but we feel that the virtual embargo on all plants and many charming and harmless bulbs from our gardens must not be allowed to stand, even though we be offered bulbs of the debarred bulbs and plants produced at home at several times their cost abroad.

And when we consider that such dangerous and destructive insect foes as the gypsy moth, European corn borer, boll weevil, and others I might name, did not come in on plants or bulbs, that there is no possibility of quarantining winds, birds, aeroplanes, railroad trains, automobiles, or even the sea itself, all of which have been and are distributors of both insect pests and diseases, we believe that a rigid but sure inspection at points of shipment as well as at points of entry, should surely safeguard the horticultural, agricultural, and arboricultural interests of America.

I believe some members of our association think we might well drop the sign board nuisance campaign, but I entirely disagree with them. Surely such an organization as ours should stand most emphatically for the elimination as far as possible of the ghastly advertising boards which mar so much of the picturesque country scenery. Our action has received the endorsement of the Park Superintendents of America, garden clubs, various civic bodies, and individuals, while we have had some commendatory newspaper publicity. When civic consciousness will be aroused from its present torpidity, we may accomplish more. We should stand firmly for America the beautiful and refuse patronage to firms which persistently employ these advertising methods, no matter whether we are urged to buy tires, soap, pills, or near beer, not even when the boards display the catchy slogan, "Say It With Flowers."

## NEWS NOTES

C. A. Davis, the veteran florist of Dover, N. H., recently severely injured his left eye while trimming a tree.

Albrecht Bros., of No. Germantown, N. Y., have erected a new greenhouse for the growing of sweet peas.

An unusual floral piece in the form of a locomotive was designed by the Union Floral Co., of Gary, Ind., and has been displayed in a window of that city. With the tender it was seven feet long, and required 1,000 flowers to make.

The Arcade Florists and Seedsmen, of Poughkeepsie, have been incorporated at Albany. The capital is given as $30,000. The incorporators are W. E. Bock, C. R. Riedinger, and J. E. Andrews. C. W. Garrison is the attorney.

Says Sam—If you don't think co-operation is necessary, watch what happens to your car when one wheel comes off.

**Trade Exhibits** We think that the plan which has been followed at recent conventions of the F. T. D., by which there have been fewer formal addresses and more discussion from the floor, has proved its value in many ways. For one thing, it has brought about a greater willingness on the part of those present to express their opinions. Less restraint seems to be felt than at some of the conventions, and as a result men who have much expert knowledge, but are more diffident than some of their fellows in expressing themselves, have been induced to give out many worth-while views.

This fact was illustrated, we think, in the discussion which had to do with trade exhibits. Some of the leaders in the activities of the organization were in favor of doing away with trade exhibits at future conventions. They stated frankly that in their opinion the exhibits interfered somewhat with the sessions, and were of no special value to the members. Their views were coincided with by a number of florists from the larger cities, but immediately afterwards a different aspect was put upon the whole matter when florists from the smaller places made themselves heard.

Those who spoke first were from the smaller towns of the Dominion, but later similar opinions were voiced by florists in the States. These men,—we believe they were backed up by several women in the trade, for women had a real part in this convention,—urged that the trade exhibits be retained, explaining that they were among the important features of the conventions, so far as the small town florists were concerned. They called attention to the fact that while members of the trade in the larger cities had easy access to the various accessories shown, the only time that the florists in more remote sections could view these things was at some such gathering.

Many florists came, it was stated, with the idea in view of paying particular attention to the trade exhibits in order to pick up new ideas and decide whether or not they needed some of the things shown. It is one thing to read about an article in the catalogues and another thing to handle it and give it personal inspection. After the viewpoints of these smaller florists had been fully set forth, most of the members from the bigger cities were willing to admit that they had gained a somewhat mistaken impression as to the importance of the trade exhibits at conventions. The discussion was well worth while, and went far to help those present get a better appreciation of the standpoints from which florists in different sections have to work.

**Is Boston Slow?** The word has gone forth that Boston is particularly slow in the matter of getting together for the advancement of trade interests. The fact is pointed out that she is far behind many of the other large cities in the country in co-operative effort among florists, and that much less is being done here in the way of gaining publicity, both local and otherwise, than seems to be the case in other cities.

The fact must be admitted that progress in Boston along the lines mentioned seems to have been slow. There have been spurts which gave much promise, but they have been only temporary. Then a reaction has followed which has been most oppressing to those members of the trade who are in touch with other cities and other organizations, and are alert to the possibilities of the florist business.

Yet it is not fair, we think, to say bluntly that these conditions are caused by the fact that Boston is slow. The truth is that the situation in Boston is different in many ways from that which exists in other cities. There are few large towns, we think, where there are so many complexities and complications as there are here. One of the chief difficulties lies in the apparent disposition of the different organizations to keep themselves apart. We feel that if there could be some sort of representative body, possibly a committee of a dozen or less, with delegates from each organization, it might be possible to smooth out many of the misunderstandings and establish a definite program.

**Outdoor Flowers** Seldom has there been a season when outdoor flowers have lasted so long Usually a frost in September cuts off the supply and leaves the field for greenhouse material. There's no doubt of the fact that the florists have suffered by the outside competition, and this competition comes not alone from private gardens. Within the last year or two scores of people have gone into the business of raising flowers to be sold by the roadsides, in department stores, and in other ways which conflict with the business of the florist. This has had a marked effect in depressing prices.

It is a condition, too, which apparently is going to grow, and is creating a real problem for florists, especially those in the smaller towns. To be sure, some of the florists take an optimistic view. They believe that the growing use of outdoor flowers is going to stimulate a desire which will be reflected in the increased sales of indoor material when winter comes. Other florists, we find, are explaining to their customers that most of the flowers which they buy at wayside stands are inferior in quality, and that by buying from legitimate florists they can get goods which will last longer and prove more satisfactory, even though they cost more

# "Montgomery's Priscilla"

That's the name of the new pink rose! The name will be "Priscilla" probably after the public has had it a while, but we have had to add the prefix to cover the rules of nomenclature.

In order to get someone who knows more about roses than we do to give an unbiased, honest opinion on the merits of this rose, we have placed 12 plants of it with each of the following rose growers:

E. G. HILL CO., Richmond, Ind.
DAILLEDOUZE BROS., Brooklyn, N. Y.
ALBERT H. AMLING CO., Maywood, Ill.
DUCKHAM-PIERSON CO., Madison, N. J.
ROWAYTON GREENHOUSES, Rowayton, Conn.
MILLER FLORAL CO., Farmington, Utah
WELLWORTH FARM GREENHOUSES, Downers Grove, Ill.
A. S. BURNS, JR., Spring Valley, N. Y.
ROBT. SIMPSON, Clifton, N. J.
CHAS. H. TOTTY CO., Madison, N. J.
NOE-RUZICKA CO., Madison, N. J.
WM. H. ELLIOTT CO., Madbury, N. H.
ANTHONY RUZICKA, Madison, N. J.
W. J. PILCHER, Kirkwood, Mo.
JOS. HEACOCK CO., Roeloffs, Pa.
WENDLAND & KEIMEL, Elmhurst, Ill.
JOY FLORAL CO., Nashville, Tenn.
ROBERTS ROSE CO., Denver, Colo.
GEO. C. WEILAND, Evanston, Ill.
LAKEVIEW ROSE GARDENS, Jamestown, N. Y.
BASSETT & WASHBURN, Hinsdale, Ill.
HARRY O. MAY, Summit, N. J.
F. R. PIERSON, Tarrytown, N. Y.
L. B. CODDINGTON, Murray Hill, N. J.
JOS. H. HILL CO., Richmond, Ind.
STEPHEN MORTENSEN, Southampton, Pa.

Ask them about it, if you will, at any time. They have our permission to tell the truth. We are going to let this rose sell itself! We shall be simply order takers.

A. N. PIERSON, Inc. Cromwell, Conn.

## HORTICULTURAL CLUB OF BOSTON

The Horticultural Club of Bostoin held its annual meeting October 19 at the Parker House, and re-elected the following officers: President, E. H. Wilson; first vice-president, F. R. Pierson; second vice-president, P. Welch; secretary, Fred E. Wilson; treasurer, E. Allan Peirce.

The rest of the evening after the usual dinner was given over to a discussion of wild flowers and foliage plants, many specimens of which were brought in by members of the Club.

To The Trade—

Thos. F. Galvin, himself, will give your orders his personal attention at his son's store.

**Thomas F. Galvin, Jr.**
226 DEVONSHIRE STREET
BOSTON, MASS.

## George Watson's Corner

"You in your small corner and me in mine."

The boys at Toronto had their nerve with them, all right. If they were to cable President-elect Pennock a bunch of roses in honor of the occasion—why not King George, also! Which the sons of guns did! And they had an acknowledgment by cable from both of them inside twenty-four hours. What do you know about that! Gee whiz—we are going some these days. The S. A. F. has many chickens; but the F. T. D. is certainly one of her liveliest roosters—take it from me! Good stuff. All hail to them.

Alfred Burton reports his daughter, Elizabeth, to be on the mend after the typhoid siege. The family moved up from the shore on the 17th inst.

John Burton is still confined to the house, this time with a severe attack of neuritis in his right leg. Can't walk. The last we heard from him it was lumbago. But that seems to have gone, thanks to good advice.

Thomas Foy, son of the well known Patrick Foy, landscape gardener for the Norfolk & Western R. R. system, is through with the Westinghouse, and will return to gardening. There was big money in the mechanical line, but hard on the eyes—and gardening now looks better—even if it does not pay so much.

E. J. Fancourt, secretary of the S. S. Pennock Co., reports the Toronto

Mamaroneck, N. Y.

meeting one of the best he ever attended; and is cordial in his praise for the Canadian enthusiasm and enterprise. He thinks our brothers across the line are wonders and can give us cards and spades on many things. They certainly took care of the F. T. D., all right, and left no stone unturned.

According to Henry F. Michell the most important thing in life is to make Market street the most important street in the world. So the boys have elected him to be the president of the Market Street Business Men's Association. And Henry is doing his best to make good. He has a fine interview in the Evening Ledger in which he tells the boys all about it. See issue of October 13th. It's good stuff and worth reading. Of course, we don't agree with him about putting the Delaware River Bridge at as far North as Spring Garden Street instead of Market street, but of course, also, the Burpee people have to be taken into consideration.

The report that W. A. Leonard was one of the backers of the new growers' commission market seems to have been an error. Mr. Leonard advises me that he has quite enough on his hands backing the one he already had established, and that he has nothing whatever to do with the new concern.

J. D. Eisels is home again after his far west trip, which was largely a vacation, and reports that he had a splendid time and feels as fit as a fiddle. So all you boys who may feel like taking a run up to Dreer's at Riverton may look for a smiling welcome.

## TENNESSEE FLORISTS' ASSOCIATION

The Tennessee Florists' Association has the plans made for its 8th annual convention, which will be held at Chattanooga, Tenn., November 1 and 2. Some of the interesting papers to be read are as follows:

Essential Details for a Successful Florist in the South, Dan Horgan, Macon, Ga.

New Features of Greenhouse Construction, Phil Foley, Chicago, Ill.

Possibilities of Bulb Growing in the South, Charles L. Baum, Knoxville, Tenn.

Necessary Essentials for Pot Plants in the South, Wallace R. Patterson. Montgomery, Ala.

What Our Government Thinks of the Florist Business, Wm. F. Gude, Washington, D. C.

## HARTLAND MAKES A CHANGE

Mr. Ernest A. Hartland, for over eight years sales and advertising manager for Vaughan's Seed Store of Chicago and New York, has joined the advertising staff of Sternfield, Godley Adv. Agency, Inc., of New York. He is to specialize in rendering advertising service to seedsmen, nurserymen, and florists.

## NEWS NOTES

One of the newspapers has an interesting account of a visit to the greenhouse of William D. True, of Amesbury, Mass. Mr. True is almost eighty-nine years old, and yet conducts one of the largest greenhouses in the town. Part of the house is given over to cucumbers, and the rest to chrysanthemums, of which he grows thousands, among them some choice specimens for the shows.

The state florists of Indiana have appointed a committee to report on the advisability of trying to have the Chrysanthemum Society of America meet in Indianapolis next year. Mr. Fred Lemon, of Richmond, is one of the members of the committee.

**GLASS CLOTH**

### NEW YORK'S FLOWER SHOW

Unless all signs fail the Ninth Annual International Flower Show to be held in New York, March 13-19 of next year, will be a hummer. Probably it will suffer somewhat from competition with the big show in Cleveland the same month, but at the same time there is sure to be a big exhibit, for the preparations are in the hands of the kinds of men to whom failure seldom comes.

The flower show committee consists of T. A. Havemeyer, chairman; John Young, secretary; Frederic R. Newbold, treasurer, and the following well known gentlemen: F. R. Pierson, James Stuart, Joseph Manda, John Canning, F. L. Atkins, John G. Scheepers, F. W. Payne, C. H. Totty, Frank H. Traendly, W. R. Pierson, John Young, Max Schling, A. L. Miller, W. H. Duckman, I. S. Hendrickson, Arthur Herrington.

The trade will be particularly interested in the display of cut roses in the commercial growers' competition. It

calls for a display covering three hundred square feet, and containing not less than 500 or more than a thousand blooms. It is interesting to note that decorative greens of any kind, including plants, are permitted, and that artistic arrangements and general effect, as well as quality of bloom, will be considered in making the awards.

The preliminary schedule is now out, and attention is attracted by a special open class to consist of an exhibit covering 1000 square feet which may include lawns, flower beds, gardens, shrubbery borders, rose beds, bulb beds, or any exhibit that the artistic ability of the exhibitor may suggest, as the widest latitude will be allowed in this class. Special gold medals will also be awarded for special merit in this class.

## TAKES OVER THORBURNS

### Carter's Tested Seeds, Inc., Acquires Long Established Business

With the acquisition by Carter's Tested Seeds of the well-known business and interests of J. M. Thorburn & Co., Seedsmen, of New York, the final chapter has been written in the history of what was perhaps the first seed business of importance, devoted entirely to the sale of selected seed stocks in America.

Sealed bids were invited for the sale of the firm of J. M. Thorburn & Co., and through these, the control of the business has passed into the hands of Carter's Tested Seeds, Inc., they having taken possession October 19th. The seedsmen of America and Europe will feel a sense of sincere gratification that the work accomplished and service rendered by the firm of Thorburn & Co. is to be carried on by another old established and reliable firm, whose existence reaches back for 85 years.

Carter's Tested Seeds, Inc., is the American Branch of the now famous and well-known firm of James Carter & Co. of Raynes Park, London, England. Ten years ago the first branch office in America was opened and operated at the Chamber of Commerce Bldg., Boston, Mass. From then on their business has had a steady growth, so that at present they have branches or offices at New York, Boston, Glen Cove, L. I., Philadelphia, Chicago, Detroit, Toronto and Montreal. By acquiring the J. M. Thorburn & Co. business, they will be in a position to give a greater and more active service to their own and the Thorburn patrons and customers.

James Carter & Co., the founder of Carter's Tested Seeds, Inc., began business 85 years ago. He was the first seedman to guarantee the germination of seeds. This practice is still in operation but has the advantage of the much improved scientific and up-to-date methods now in use.

---

Miss Nellie Nolan, a well known florist of Holyoke, Mass., has returned to her home from a hospital after seven months of illness, and is being congratulated on her recovery.

T. C. Thurlow's Sons, Inc., owners of Cherry Hill Nurseries, at West Newbury, Mass., have recently purchased a tractor for use in their fields.

WHEN WRITING TO ADVERTISERS
PLEASE MENTION
HORTICULTURE

The John C. Meyer Thread Co. were the first to introduce the Meyer green Florists' threads that would not fade or change color for Florists' use. Ask any of the wholesale Florists or growers about the Meyer green Florists' thread and they will tell you it is the best.. It will go twice as far as ordinary thread and the Florist can do better work with it. Write for prices and samples and we will see that you get the best thread in the world.

**GREENHOUSE NOZZLE**

The new Manaway greenhouse nozzle is a decided advance over any greenhouse nozzle heretofore made. By its peculiar construction the side spray is thrown out which applies the water evenly from the pipe outward. Our long-throw nozzles cover a space up to 18 feet from the pipe. We can supply nozzles that will cover any space desired. If you will advise us under what pressure your system operates and the width of space you desire to cover, we will mail without charge a sample nozzle. C. W. SKINNER, Newfield, N. J.

**END NOZZLE**

Every one who is using the Manaway System without the end nozzles can now fit their lines with our new 3-outlet end nozzles which take the place of not only the regular nozzle but also furnish 2 streams, one 4 and the other 8 foot out of true. One of these nozzles placed at the beginning or end of the line has the effect of lengthening the line 8 feet at each end. These nozzles can also be used in other systems which use a large nozzle. The price is 15c each, postpaid.
C. W. SKINNER, Newfield, N. J.

### PENNOCK DINNER IN NEW YORK

The honor of welcoming Samuel S. Pennock, president elect of the S. A. F., on his return from seven months spent in Germany, as representative of the American Friends' Service Committee, was given to the members of the trade in New York City. A very delightful dinner and reception was held last Friday evening, at the Hotel Pennsylvania. W. R. Pierson was chairman and toastmaster. In his opening remarks he paid a fine tribute to Mr. Pennock, and afterwards in his usual ready way called upon others present to speak. Mr. Pennock outlined the work which he had been doing abroad. The other speakers included Thomas Roland, W. A. Manda, J. C. Vaughan, John Young and Leonard Barron.

### BOSTON NOTES

Forty thousand tulip bulbs have been planted in the Boston Public Gardens. Commissioner James B. Shea says that the bulbs are the first to be imported by the city from Holland since the war. $5,000 were paid for them.

William Sim, the well known carnation grower, reported to the police a few days ago that his paint shop had been entered by thieves and twenty-five pounds of white lead, a quantity of lamp black and some metal roofing paint stolen.

Abe Daniels, after long service with Penn, The Florist, has left that concern to take a position in New York.

The next meeting of the Gardeners' and Florists' Club will be held Tuesday evening of next week. It will be orchid night.

A new Hitchings house, 60x70 feet, has been added to the range of George T. Butterworth, the noted orchid grower of Framingham. Mr. Butterworth also has a new office and display room.

### NEW ENGLAND NOTES.

William Thomas Graham, of the Bon Ton Flower Shop, South Manchester, Connecticut, has recently returned from Norfolk, Va., where he was sent as a delegate to the National Convention by the Brotherhood of St. Andrew.

Mr. George W. Fraser, for eleven years in charge of the landscape and floriculture department in the Connecticut Agricultural College, has been put at the head of a new landscape department which has been established by Dawson, the Florist, of Willimantic, Ct. Mr. Dawson expects that he will develop a large amount of business along this line for which there is a good field in Willimantic.

Mr. James B. Judd, a well known gardener of Newport, R. I., died recently after a brief illness. He was fifty years old, a native of England, and had lived in Newport more than twenty years.

Charles Kieft, who has been conducting a greenhouse and florist business in Middletown, Ct., has moved to Cromwell.

Burtt, the Florist, has purchased the Welch Block at Turners Falls, Mass.

Herbert Gates, a well known florist of Springfield, Mass., was recently married to Miss Harriet Hatch.

## THE TALK OF THE TRADE

According to what I hear, the retail florists in New England, and particularly in Boston, have an idea that cut flowers are going to sell this season at a much lower price than for the last few years. Now I may be away off in my judgment, but I believe there is going to be some disappointment along this line. I cannot see any legitimate reason why there should be any material cut in prices. In fact, there are, I believe, outstanding conditions which will prevent such a drop as seems to be expected in some quarters. It is true that the market at present is below what it should be, from the standpoint of the grower. In many instances the latter are not making their expenses.

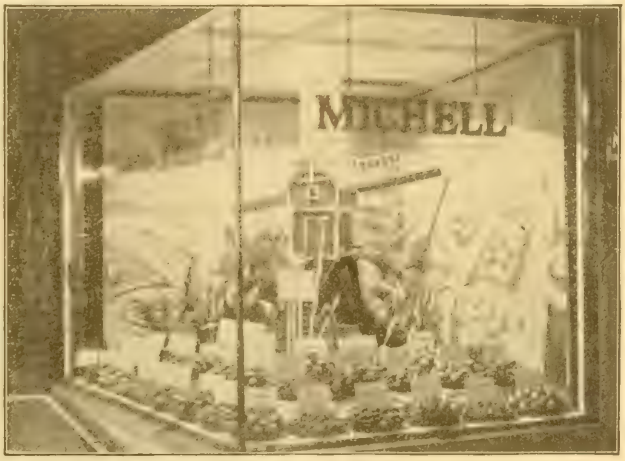
Of course there are very definite causes for the low market. No one needs to be told that the season is very late. Out-door flowers have but just disappeared. Furthermore, the public has been receiving an education from the florists for years past through their publicity campaign along the lines of flowers, more flowers, and flowers all the time. Naturally, they are growing their own blooms in increasing quantities. Then just now there is a heavy crop of "mums," which helps to depress the market.

---

Now as to what we many expect in the future. Please think for a minute along the lines of supply. No one can dispute that there will be less than the normal quantity of lilies. That applies all the way through from Harrisi and Formosum and lastly Giganteum, of which the last are now arriving. Regardless of how the different growers may feel about Paperwhites as a profitable crop, there is no disputing the fact that the supply is below normal.

How about Dutch bulbs? For years past we have been hearing that they were responsible for a slack market during their season. But it still remains true that they are in short supply. Freesias are hardly above a normal crop, if they reach normal.

And last, but by all means the most important to my mind, is the carnation. There are a few instances where carnations are in excellent condition, but I have heard the estimate made by several people who are considered to have good judgment that a 75 to 80 per cent crop of cut carnations will about cover the yield this year. The reason for the low percentage is, first of all, difficulties that have been encountered in the field, particularly red spider and stem rot. I know several growers who felt sure they would have a good surplus of field grown plants to sell. In some cases these growers were obliged to buy in order to fill their houses, while in others they substituted other crops.



No one in the carnation business questions the reason for a short supply. The early part of the season was so dry that the plants were badly hit by red spider. Then there was an abrupt change to rain and nothing but rain for weeks. The result was stem rot. I know of growers who are losing carnations from stem rot even at this late day. In short, in the majority of houses, the crop is lighter than usual, and later on during the short days when the real test comes, the crop will be lowered still more.

In many cases there was a fair number of buds, which came along earlier in the fall and during the quick growing season, but now that these are cut off the plants are left tall and skinny, with no great prospects in sight.

---

It is only fair to say a word about the rose crop. I will grant that this may come up to normal, but I don't see how in the world it is going to make up for the shortcomings of the other crops. It is fair to believe, therefore, that everything in the cut flower line, beginning with roses and running through carnations, will bring its full, legitimate price.

Anyway, the warm, muggy, soft fall that we have gone through will probably result in a short crop of cut roses through January and February. If it does not work out this way, it will be

**Michell's Bulb Window**

The Henry F. Michell Co., of Philadelphia, achieved a masterpiece in the window shown here, which has attracted a great amount of attention. It is a reproduction of a Dutch scene, and was designed, of course, to increase the sale of bulbs, something which it certainly has accomplished.

an exception to a rule which I have watched for several years. As to prices the growers have a right to expect, how can they do business on a market much lower, if any, than the one which has existed the past few years?

---

I had heard from a number of visitors who had called on Patten & Co., of Tewksbury, Mass., that their range was in particularly good shape. Now I have seen for myself, and have come to the conclusion that it stands with the best in the east. From one end to the other the plants are in fine shape.

Of course, everyone is interested in the new white carnation, T. C. Joy. As grown at the Patten place it gives every promise of being a good commercial white. Naturally enough, the early planted stock shows up in good form, but even the late stock is coming along in such a way as to prove that it has a right to travel in competition with any of the other whites. Matchless is, of course, the stand-by. Still, there are many growers who are becoming dissatisfied with this variety. They are taking hold of T. C. Joy with the idea that it may displace Matchless.

---

Another variety on trial at the Patten range is the pink Natalie. This name has not been registered, and may not carry through. But for the time being, at least, it is the name under which this new seedling will travel. It looks like an excellent variety. Many carnation growers are eagerly awaiting a variety to take the place of Ward. Natalie is very close to that color, and quite as large a flower. It has a fine stem, and a promising habit of growth. Mr. Harold Patten is very enthusiastic over Natalie, and I hope that it will come up to his expectations, as it is badly needed.

It is interesting to note that after a period of thirty years the products of this range are being sold through a salesman in the market, namely, George Noyes, instead of directly to the stores.

---

Much has been said about Angelus and its prospects as a white rose to displace the White Killarney or the Double White Killarney. I will not venture to make any prediction, but I personally have been much impressed with it as I have seen it growing. A pretty safe way to gauge the prospects of any variety is to take into consideration the way it sells. Growers are not in the habit of stocking up with a thing just because it is new. The advance sales of Angelus are so heavy that I am sure the growers ordering it believe thoroughly in its merits.

---

After saying so much about the prospects for cut flowers this season, it is only fair to speak of the plant outlook, which I would summarize as follows: Poinsettias, plentiful; Cyclamen, not better than in fair supply; Begonias of the Lorraine type, not quite up to normal; Primroses, plentiful; pot-grown Ferns, a better crop and in better condition than usual; Rubber plants, enough to go around. Such decorative things as Ardesias, Crotons and fancy Dracaenas are short.

Just a word further about Poinsettias. The supply is excellent in small sizes, which will mean an ample amount of pans. Also there are a plenty of the larger sizes in branched plants. Among the growers whose places I have seen and who are well stocked up are W. T. Walke of Salem, and Frank Edgar and W. W. Edgar Co. of Waltham.

---

It is not too early now to predict a pretty good result from the Bermuda Harrisi crop this season. The growers are all very much encouraged, and hope that these bulbs will continue to run of such good quality. There is a place for them, without a doubt. They come in around the first of August, which means a very early crop, and the possibility of cutting out the late storage Giganteums. No doubt the Bermuda Harrisi this year will be a more profitable crop than the late Gigs.

---

## The Younger Generation

Among the best known of the younger generation in the florist trade in Greater Boston are the Wollrath boys, of Waltham. They have done wonders with their plant, which was formerly the Matherson range of greenhouses, having now about 35,000 square feet of glass.

They specialize in plants of many kinds, and are particularly famous for their success with cyclamens.

All three of the boys are very young men, and they still have the advice and assistance of their father, Mr. John Wollrath. The names of the three boys are Henry J., Ernest and Albert J. Ernest probably meets more members of the trade than the other two brothers, as he is out on the road much of the time. Just now he is taking particular delight in the big new White truck with a special body which he is driving. All three boys are expert growers, with long training, and though young in years have made a splendid name for themselves in the florist world.

The Wollraths, Father and Sons

# WHAT'S DOING IN BOSTON

It doesn't often happen that a school suspends its sessions in order that the pupils may visit a florist shop. Such an event took place in Allston, Mass., a suburb of Boston, the day before Hallowe'en. Rogers the Florist had arranged a striking autumn scene in one of his windows. There was a real corn shock, with autumn leaves scattered around it to give color, and plenty of good yellow pumpkins. Several of the pumpkins were cut to make faces in the usual Hallowe'en way, and lights inside them, shaded by red paper, gave the proper effect. At one side of the window was a little imitation bonfire, with colored lights to resemble flames. The window was admirably done, and so impressed the head of the local kindergarten that she closed the school for an hour or two in order that the children might visit the shop and look at the display. For some time the sidewalk in front of the store was blocked with gleeful, shouting children. As one of the clerks expressed it: "We couldn't even see the street cars go by there were so many children there." Of course it was splendid advertising for Mr. Rogers.

## NEW ENGLAND GROWERS' ASSOCIATION

At the regular meeting of the New England Branch of the National Flower Growers' Association, which was held the evening of October 29, at the Bellevue Hotel, Pres. Samuel Goddard in the chair, considerable time was spent in discussing the business situation. W. N. Craig started the discussion, and dealt at length with the misunderstandings common between growers and retailers. He suggested the plan of giving a suitable offering of flowers to Marshall Foch on the occasion of his visit to Boston, November 14. He also vigorously protested the use of sign boards on the part of the florists as well as other advertisers.

At the dinner flowers were provided by Pres. Goddard, who had on the table a handsome vase of The Lark, Dorner's new carnation.

The election of officers resulted as follows: President, Samuel J. Goddard; Vice-presidents, Thomas Roland and William H. Elliott; Secretary, E. Alan Peirce; Directors, Frank Edgar, William Sim, Herman Bartsch, George Butterworth, Andrew Christensen and Gordon Fisher. The next meeting and dinner will be held Nov. 26 at Hotel Bellevue.

## OPENED TO THE PUBLIC.

### Retail Buying to be Allowed in the Wholesale Markets in Boston

A sensation was sprung in Boston, Tuesday, when the announcement was made that the directors of both markets had voted to throw them open to the public after 9 o'clock in the morning. This agreement was reached after a long session, participated in by members of each market and the Flower Growers' Association. Pres. Goddard, of the Flower Growers, presided. The Growers had previously met and decided unanimously upon this action, believing that it was essential for relieving the present glut. Advertising was begun in the daily newspapers for the purpose of attracting the public to the market. Whether or not bunches shall be split, and other details about handling the flowers at retail, will be left largely to the salesmen. Undoubtedly this experiment will be watched with great interest throughout the country.

## WINDOWS OF THE WEEK

Two unique windows on Tremont street have been attracting much attention this week. One is that of Penn, and the other that of Houghton-Gorney. They are entirely different, and yet equally interesting. Penn has a window given over entirely to cactus plants obtained from the Wollrath establishment in Waltham. There are 110 different varieties in the window, mostly from Mexico and the border states. In order to have a proper setting, pure white sand has been used to simulate the desert in which cactus plants naturally grow. Mr. Penn is famous for the unique character of his window displays, but few have attracted larger crowds than these odd-looking cacti.

In Houghton-Gorney's window is a church interior shown in miniature. At the back are apparent stained glass windows through which the light pours, casting a warm glow over the sanctuary. The church is decorated for a wedding, of course, and all of the participants in such a ceremony are shown, small but cleverly made figures being used. The bridegroom and his bride with all their various attendants, the clergyman in his robes, and the well wishers of the happy couple are all to be seen. It was rather an expensive window to make up, but it is serving its purpose, for it attracts crowds of people.

Thomas Galvin, Inc., have an excellent opportunity in their new store in Copley Square for window decorations, and are making the most of it. During the fall they have been relying largely upon chrysanthemums, and it is a chrysanthemum window which they have this week. The window is marked by restraint, comparatively little material being used, but the color harmony is perfect. The flowers are cut yellow "mums" of the larger type, and smaller bronze flowers. At each side of the window is a good sized statuette of Hebe.

## CO-OPERATIVE MARKET OFFICERS

The Boston Co-operative Flower Market held its annual meeting last Saturday. The report showed the market to be in good financial condition. Those present were almost unanimous in approving the idea of opening the market for retail trade. The following directors were elected: Messrs. Wood, Carr, McFarland, Elliott, Cooney, Hunt, Holden, Lein and Hannan. John McFarland was elected secretary and Donald C. Carmichael, treasurer. The president will be chosen at a meeting of the directors, Saturday.

## QUINCY STORE CHANGES HANDS

Johnson's flower store in Quincy has been sold to Max Lakin, who took possession the first of November. Mr. Lakin is well known to the trade, having been connected with the Boston Supply Co. for several years, and is an experienced florist.

## HANDLING COMPLAINTS

### Dealing With Cranky Customers—Hospital Orders

At the recent F. T. D. convention in Toronto, Mr. A. M. Terrill, of Calgary, read a paper on "Managing the Retail Florist's Business," which brought out many interesting points, among which was the necessity for accurate information and reliable advice on the part of the employee. He said that customers trust absolutely the advice given by store salespeople as to what flowers would be most desirable for different occasions. If such orders are not properly filled the customer loses confidence in the integrity of the management and service. Said Mr. Terrill:

"I am strongly of the opinion that this reason is the cause of more failures among florists than any other. Therefore, the successful manager of a retail florist business will always be most watchful to see that all customers are dealt with honestly, and that any grievances from customers, for any cause whatever, are at once adjusted to their satisfaction, as well as to that of the person to whom the buyer may have sent the flowers or plants. I am firmly convinced that the replacing of flowers or plants for a dissatisfied customer so that he is perfectly satisfied, even though there is doubt about the complaint beng justified, is the best advertising a retail florist can get."

### Discussion on Mr. Terrill's Paper

In the discussion following Mr. Terrill's paper, H. G. Dillemuth, Toronto, commended his attitude on customer's grievances. "I do not always think," he said, "that when a customer comes in with a complaint, it should be adjusted at once. I find there are certain customers who make a practice of complaining about almost every article they receive. I have one customer in Toronto whom it is absolutely impossible to satisfy."

Mr. Dillemuth stated that he tries to adjust complaints. Flowers when returned to the store, however, are sometimes wrapped in wax paper, with other paper on the outside, placed in a deep receptacle in the refrigerator, and then sent back to the customer 24 hours later. The trouble is that many people have not the proper facilities for keeping flowers, and the failure is largely due to the temperature. The florist should explain as fully as possible, the proper care and treatment.

Mr. Terrill thought that when a person complains, the matter should be taken up with him at once, as carefully as possible, in order to protect the prestige of the store. Frequently complaints are unjustified but the customer thinks he is right. An explanation that the flowers were fresh, but that possibly the room was somewhat warm, lets the customer know that the store has done the best possible for them. "At the same time," said Mr. Terrill, "I think it is a good thing to replace flowers and not criticise the customer so as to let him think the neglect is too much his."

In reply to a question regarding hospital orders, Mr. Terrill stated that they frequently create difficulty. Often the flowers sent are not received until the person sending them visits the hospital. It has been his experience that there is no use 'phoning the hospital, and that the best way is to adjust the matter with the customer, perhaps sending another lot.

C. J. Hay, Brockville, stated that they had been receiving some complaints regarding hospital flowers. On investigation they found that the flowers were all taken from the rooms in the evenings, and returned in the morning. The superintendent of the local hospital asked that flowers be sent only in the morning, for if delivered at night, they would be left in the reception room till the next morning.

## HERBERT ALEXANDER MARRIED

Herbert Alexander, son of J. K. Alexander, the dahlia specialist of East Bridgewater, Mass., and himself a prominent grower, was married Sunday, October 30, to Miss Ferna Sweney, of Whitman. The wedding took place in the Episcopal Church, which was elaborately decorated with chrysanthemums. The church was crowded to the doors with the friends of the happy couple, and the full Episcopal service was used, the vested choir of the church assisting. After the ceremony Mr. Alexander and his bride were driven to the latter's home where a wedding reception was held. The couple received a great number of beautiful gifts which attested to their popularity. Late in the afternoon they left on a wedding journey, without revealing their destination.

## THE BULB SITUATION.

Mr. C. J. Speelman, of Legarde & Speelman, New York City, is quoted as saying that there has been no surplus of bulbs shipped to the United States. He says that French bulbs are scarce, and that the demand exceeds that of any previous year. M. Van Waveren & Sons, 26 Cortland St., confirm this view. They say that Dutch shipments have been normal. Charles F. Meyer, 97 Warren St., says that there is no Japanese surplus, as the crop is shorter than last year. Charles Schwake & Co., 90 W. Broadway, declare that French and Dutch bulbs have arrived only in sufficient quantities to supply the trade. Segers Bros. Ltd., 1165 Broadway, find French bulbs are short by 25 per cent.

## BRIDAL FLOWERS

The illustration on the opposite page shows a complete bridal outfit, the flowers for which are available at the present time. These designs were made up by Gude Bros. of Washington, D. C., who are artists in this line. They might be duplicated in any part of the country with the following material:

Bride's bouquet, 5 white Cattleyas, 10 sprays of Phalaenopsis, and 125 Valleys.

Bridesmaid's crook, 1½ doz. Columbia roses, 1 dox. Bouvardias.

Flower Girl's baskets, 2 doz. Bouvardias and 50 Sweet Peas.

## STUDENT FLORISTS TRY SKILL

### Keen Competition at the Massachusetts Aggie Fair

A year ago the custom of a real old-fashioned "Country Fair" was established at M. A. C. This year, under the name of "The Aggie Fair," it was increased in size and in quality of exhibits.

G. H. Sinclair of Holyoke exhibited a vase of fine yellow chrysanthemums, also Enchantress carnations. Mark Aitken of Springfield displayed four vases of excellent roses, Ophelia, White Killarney, Columbia, and Frank W. Dunlop; also yellow and white chrysanthemums, Hunnemania, and a mixed bouquet of ruscus, purple beech, and Chinese Lantern Plant; the latter attracted much attention because it is not commonly seen.

In the competitive student exhibits, considerable competition was evident. There were seventeen basket arrangements of roses staged by the members of the class in Greenhouse Management, all of which were very good. In table decorations both the two-year and four-year classes in Commercial Floriculture competed separately, the two-year class using roses while the four-year students used carnations in various combinations with greens. These displays were all closely contested. Prizes consisted of ribbons given by the college and cash prizes offered by the Massachusetts Department of Agriculture. The decisions were as follows:

Basket Arrangements of Roses—First, R. D. Fuller, Woburn, Mass.; Ophelia and Maidenhair Fern. Second, R. J. Drexel, Tifton, Ga.; Ophelia and Asparagus plumosus. Third, A. B. Marshall, Greenwich, Conn.; Montgomery's Priscilla and Maidenhair Fern.

Table Decorations Using Roses, by the Two-Year Class—First, J. Balmayne, East Milton, Mass.; black bowl with White Killarney and Maidenhair Fern. Second, A. Wells; natural color willow basket, with White Killarney, Crusader, and Maidenhair Fern. Third, Miss K. L. Powell, Newton Center, Mass.; gray bowl with Premier.

Table Decorations, Using Carnations, by Senior Four-Year Students—First, V. S. Anderson, South Manchester, Conn.; cream-white bowl with Eureka and Asparagus plumosus. Second, Miss Elizabeth Coleman, Scranton, Pa.; gray basket with Enchantress and Maidenhair Fern. Third, Miss R. W. Hurder, Milton, Mass.; cream-white bowl with Enchantress and Asparagus Sprengeri.

MISS RUTH W. HURDER.

## CHICAGO RETAILERS TO EXHIBIT

The Chicago Florists' Club is planning for a fall flower show which is to be held in connection with the annual exhibition and meeting of the Chrysanthemum Society of America at the Auditorium Hotel, in Chicago, November 16 and 17. It is expected that there will be numerous large displays by Chicago's leading retailers. New and novel floral arrangements of many

kinds will be shown. Admission to the flower show will be by tickets which have been distributed by the retail florists of the city. One of the large establishments has ordered 10,000 tickets for its customers.

### FLOWER SHOW IN DENVER

An elaborate flower show was conducted in Denver, November 2, 3 and 4. It was held in the auditorium under the auspices of the Denver Society of Ornamental Horticulture, in connection with the Colorado florists. Chrysanthemums formed the main feature. Cut flowers and plants were shown in great numbers. A special department was given to floral arrangement, consisting of table decorations, baskets and bouquets. The show was in the hands of Mr. A. Kohankie, superintendent of Washington Park; Mr. E. P. Neiman of the Park Floral Company, and Mr. J. T. Roberts of the Roberts Rose Company. Mr. Robert Miller, of the Miller Floral Company, Salt Lake City, was chosen as judge for the exhibits.

### MRS. FRANCIS KING IN BOSTON

Mrs. Francis King, of Alma, Mich., who was recently awarded the George Robert White medal by the Massachusetts Horticultural Society, this being the first occasion that the medal has been awarded to a woman, has been visiting in Boston. While here she visited the Arnold Arboretum and inspected the orchid houses of Mr. Burrage of Beverly Farms. The medal given Mrs. King is of solid gold, made in a Philadelphia mint, from a design of John Hannigan, the noted medalist.

Mrs. King (Louise Yeomans) was born in Washington, N. J., on Oct. 17, 1863, the daughter of Rev. Alfred Yeomans, D. D., and Elizabeth Blythe (Ramsay) Yeomans. She was married to Mr. King in Chicago on June 12, 1890. She was president of the Garden Club of Michigan from 1912 to 1915, and was among the eight organizers of the Woman's National Farm and Garden Association, and is now its honorary president, Mrs. Russell Tyson of Chicago succeeding her last year. She is a vice-president of the Garden Club of America, and a member of the American Civic Association, American Dahlia Society, American Rose Society, American Gladiolus Society, Royal Horticultural Society of Great Britain, National Tulip Society of England and American Society of Fine Arts.

# RAMBLING OBSERVATIONS OF A ROVING GARDENER

I have just been spending an evening with "A Book of Gardens," published by John Scheepers, Inc., New York City. It has been out for some time, I know, but its interest is perennial, and at this season, when thoughts of garden makers naturally return to bulbous plants, it is a treasure trove. It is gotten out undoubtedly to sell the Scheepers products and yet it can hardly be called a catalogue. It serves the purposes of a catalogue, to be sure, because it lists a great number of plants, and gives the prices charged for them. In addition, however, it abounds with literary features never before found, I am certain, in any advertising literature. Likewise it contains a vast number of illustrations, not merely photographs, although there are many of them, but remarkably well executed drawings as well.

Mr. Scheepers calls it a treatise on American and foreign bulbs. This is a term, however, which is likely to frighten people away from the book. One inevitably thinks of a treatise as rather dry and heavy. There is nothing of the sort in this book, however, as may well be understood when I say that much of the writing is done by Mrs. Edward Harding, of peony fame; Mrs. Francis King, Mrs. Louise Beebe Wilder, and the Rev. Joseph Jacob, all of whom are as facile with the pen as they are familiar with garden lore.

In writing about bulbs for rock gardens, Mrs. Wilder makes an interesting suggestion. She says:

"Lilies are not always included as rock-garden plants but the dwarfer varieties are finely available for such usage, and their needs are often more easily ministered to than in less-restricted regions. One of the most striking Lilies for the rock-garden is Lilium tenuifolium, with dazzling scarlet 'Turk's Caps' carried on a slender stem. It likes a sunny situation in rather dry soil. Its beautiful variety, Golden Gleam, a fine apricot-yellow in color, is somewhat taller and more robust, but may be grown in a more open portion of the rock garden; a situation in partial shade where the soil is slightly damp is best suited to it. Lilium rubellum, with pink flowers, makes a lovely picture grown among ferns in soil containing a good deal of sand and leaf-mold. Other Lilies that will thrive and blossom under the same conditions are, L. philadelphicum, L. concolor, L. coridion, L. chalcedonicum, L. pyrenaicum, and L. japonicum (Krameri)."

Mrs. Wilder makes the additional point that lilies grown in a rock garden should have their stems protected by ferns or low shrubs, and suggests dwarf Lavender, Hyssop, Sun Roses, low-growing Daphnes, Vacciniums, and Andromedas.

Good Specimen of Rhododendron Carolinianum

The Rev. Mr. Jacob has some interesting ideas about planting crocuses. He says:

"Crocuses should be splashed upon the landscape with a broad brush—great irregular patches of purple ones, softening to lavender, then the striped sorts, like Mme. Mina, then pure white ones flashing into burning yellows. They grow and increase wonderfully in grassy places and nowhere show to better advantage, but the planting must be free and natural. A good way is to take a basket filled with the bulbs and walk about over the area it is desired to plant, casting the bulbs hither and yon, and dibbling them in where they fall. Much of their lovely effect is lost if they are planted 'mixed.' The varieties should be kept to themselves and blended, one into the other. The bulbs should be planted only about an inch beneath the soil."

---

Mr. Jacob evidently sees a great future for Freesias when he writes: "Both in America and in England, Holland and Italy, the genus has been seriously taken in hand, and, in my humble opinion, the end is by no means as yet in sight. What have the Van Fleets and Fishers of America, and the Van Tubergens, Raggioneris, Chapmans, Dalrymples and Jacobs of Europe got up their sleeves? And what may they have in two or three years' time? We may confidently expect developments, not only in color, but in the shape, style and size of bloom, and in the height and habit of the plant as a whole."

---

One writer in this manual, for that is what it actually is, has some very decided ideas about the right way to handle irises. He says:

"The best time to plant or to transplant Irises is immediately after they have flowered. At this time the new growth of lateral rootlets is just starting, and removal may be accomplished without appreciable check to the preparations of the plant for the coming year's flowering. On the other hand, if the removal takes place in autumn, these rootlets have by then matured and laid firm hold upon the soil, so that in the lifting they must inevitably be torn and severed, and a year is lost before the plant recovers itself sufficiently to bloom. Where it is not possible to procure plants at this most propitious time, early spring planting will be found more satisfactory than that carried out in autumn."

"In planting Irises of the Bearded section, the stout rhizome common to these plants should be set firmly, but

only part way, in the soil. The upper half of it should remain exposed, for the reason that the health of the plant is dependent upon the thorough ripening of this rhizome, and this is accomplished by exposure to the sun. It is a common practice to cover the rhizome with soil, and though in time it will work itself up to light and air, in the meantime the growth will be weak and flowers few and insignificant. For the same reason it is necessary to see that Irises planted in mixed borders should not be pressed upon and overshadowed by taller plants, nor the clumps invaded by scrambling cover plants."

Of course, much attention is given to peonies. Mrs. Harding has an excellent article on "Peonies for Connoisseurs." I like the tribute she pays to Soulange when she says:

"If Lemoine, creator of a wealth of horticultural splendor, had in all his life accomplished only the production of this one Peony, the flower-loving world would still be his endless, grateful debtor. This incredibly beautiful flower is difficult to describe adequately. It is high-built, compact, and composed of large, thick petals which closely overlap. The color is deep cream, tinged with amber throughout, and with a touch of soft salmon-pink glowing from its heart. This rare coloring, in combination with the heavy texture of the petalage, gives the bloom a radiance of beauty equaled only by pearls of finest orient."

I ought to refer also to what is said about Lilies, for they are treated with unusual detail, and the list comprises practically every Lily which can be grown in this part of the world. Space is limited, however, and I think that I have said enough to assure other garden makers a pleasant evening before the fireplace with this bit of the broad outdoors brought into the library. After all, it is one of the beauties of gardening that we can enjoy it vicariously, as it were, in the middle of winter, when the ground outside is blanketed with snow, as well as in midsummer, when we can come into direct contact with our garden favorites.

# ORCHIDS

## ONCIDIUMS FOR FLORISTS

This is the season when some of the showy Oncidiums are in flower. What florist or layman has not admired the long, graceful sprays of Oncidium varicosium, and its variety Rogersii, probably the most intense yellow of any flower. Oncidium Forbesii and crispum are now at their best, both beautiful but now comparatively rare Orchids.

The Oncidium is a member of an extremely numerous genus numbering some 300 species, all epiphytal. The geographical distribution of this interesting genus is exclusively tropical America, some are found growing near the hot coastal regions, whilst others grow at an elevation of over 12,000 feet above sea level.

It is estimated there are or have been at different times 180 species under cultivation, most of which are noticeable for their long graceful sprays, the brilliancy of their coloring, and the grotesqueness of their flowers.

Probably the best varieties for the florist to grow are Oncidium varicosum, O. splendidum one of the best keepers of them all; O. ampliatum, O. Cavendishianum, O. Marshallianum, and O. Sarcodes.

Most of the varieties are of easy culture and delight in an intermediate temperature. Plenty of moisture should be given the plants whilst growing, but after the flowers have been cut the plants should be kept on the dry side until new growth commences.

## THE CYMBIDIUMS

There are about 50 species included in the genus Cymbidium. Most of the varieties in cultivation come from tropical Asia, a few from Africa and Australia. The plants have beautiful foliage and contrary to most Orchids are quite decorative even when out of flower. The flowers are borne on long upright stems numbering from 5 to 30 according to variety. One of the most remarkable things about this wonderful genus is the length of time the flowers will remain fresh either on the plant or cut, thus they make an ideal florists' flower. The hybrids that have been derived through artificial hybridization number some 30 or 40 varieties and contain some of the most beautiful combinations both in form and colors. Cybidium Insigne Sanderae, the beautiful pink variety introduced by Sander and Sons of St. Albans, England, some fourteen years ago and found by their collector growing at an elevation of 5000 feet above sea level, in the mountain ranges in northern India, has been used extensively as a parent in hybridizing, the hybrids derived from this particular species are amongst the finest in cultivation.

The cultivation of this unusual species is very easy compared to some other varieties of Orchids, providing a few fundamentals are observed. The plants should never be allowed to become dry at the roots, more water must naturally be given when the plants are growing than when they have completed their growth. Compost should consist of one third Osmunda fibre, one third sphagnum moss, and one third turfy loam. Temperature 55 degrees for species, with a rise of 10 per cent by day, with a 5 per cent higher temperature for all hybrids. Air should be freely admitted on all favorable occasions.

It is my firm belief that the Cymbidium is one of the coming flowers and will be grown generally wherever the public demand a flower that is beautiful, an extraordinary keeper and shipper, and a plant that is easy to grow.

DOUGLAS ECCLESTON.

## RHODODENDRON CAROLINIANUM

This rhododendron which, as its name indicates, is a native American plant, is rapidly coming into favor as it becomes better known. The Cherry Hill Nurseries, at West Newbury, Mass., are growing a generous block of this rhododendron, and expect that it will be used in a large way by nurserymen. R. carolinianum, while it sometimes grows to a shrub six feet high, is usually low and compact, which makes it well adapted to foundation planting and for use in other ways. The flowers are about 1½ inches across and borne in dense heads. They are pale rosy-purple in color and quite ornamental. It is a shrub which deserves to be widely propagated, a fact which nurserymen are beginning to realize.

## ORCHIDS AND MUMS

### An Excellent Show Staged by the Massachusetts Horticultural Society

Boston is establishing an enviable reputation for the high character of its flower shows. The chrysanthemum show, which lasted from Wednesday to Sunday, was no exception. Although the number of exhibits was not large, the displays were staged with unusual taste. Instead of long rows of tables containing bottles of individual blooms, the main hall had two splendidly arranged groups as the central feature. One of them was put up by Loren D. Towle, of Newton, who is a new exhibitor, but who had a number of entries, and did much to make the show a success. Mr. Towle at his home in Brookline is building one of the finest ranges to be found on any private estate in New England, and is filling it with plants of the finest character, including orchids. Mr. Towle's group won him first prize, although his nearest competitor, Mrs. Homer Gage, of Shrewsbury, Allan J. Jenkins, superintendent, put up a group of such splendid character that the judges had considerable difficulty in making a decision. Another new exhibitor whose display aroused comment was Prof. A. Michael, of Newton. Mr. Michael showed two potted plants, one trained, of great size and surpassing beauty.

An exhibitor who has been at the show for several years, and whose chrysanthemums this year were as good as ever, is James Nicol, of Quincy, who is eighty years old. The flowers are grown only for his own satisfaction, in a small private greenhouse. There were some excellent Nerines from Faulkner Farm.

For the last two days Mr. Towle put up a special group at one end of the hall containing a large number of greenhouse flowers in variety, a display which illustrated the unusual resources of his range.

Perhaps no exhibit in the main hall attracted more attention than the begonias from the Thomas E. Proctor estate, Topsfield, Mass., James Marlborough, superintendent. These winter-flowering begonias, of immense size and in a variety of red with few lighter shades, were splendidly grown. It seemed hard to believe that they were produced from leaf cuttings made a year ago, as Mr. Marlborough stated to be a fact. This race of begonias has been in existence for about twenty years, the first crosses having been made in England. They are little known as yet in this country, and probably will never have any value commercially because of the expense of growing them, but they are ideal plants for private estates. Another lot of very fine plants came from the Webster estate in Brookline.

In the lecture hall the principal exhibit was made by A. C. Burrage, who had a large group of orchids. Mr Douglas Eccleston, the superintendent, had arranged them in order to make the most of the color values, a fact which aroused much favorable comment. L. B. Dane and Mr. Towle also had a good showing of orchids.

It was a pleasure to find the retail florists of Boston helping to make this show a success. A. S. Caplan had a large exhibit which included cut flowers, flanking a well arranged miniature landscape. The whole thing was very well done, and reflected much credit on Mr. Caplan's ingenuity.

Henry Penn had an unusual and very effective display. At the back was tapestry of rare beauty, with a bowl of flowers standing on a pedestal in front of it. It was an excellent example of what can be done with a little material skilfully used.

John J. O'Brien had a table of chrysanthemums, including designs for different purposes. This table attracted more than usual comment because of the rare taste shown in the use of the colors. The blending of flowers, ribbons and holders was exquisite. Comley also had a pretty table.

In the larger hall Patten & Co., of Tewksbury, showed the two new carnations which they are featuring, the white T. C. Joy and the pink Natalie.

Vegetables and fruits made an excellent show in one of the smaller halls. The T. J. Grey Co. made an exhibit which reflected much credit upon them. They showed a large number of splendidly grown vegetables.

The awards follow:

**AWARDS FOR PLANTS. Society's Prize. .Begonias**—Group of winter-flowering varieties to cover not exceeding 200 sq. ft.: 1st, Thomas E. Proctor. Any winter-flowering varieties, 6 plants: 1st, Thomas E. Proctor; 2d, Edwin S. Webster. Any winter-flowering varieties, 3 plants: 1st, Thomas E. Proctor; 2d, Edwin S. Webster. Chrysanthemums—Group, to cover 300 sq. ft.; 1st, Loren D. Towle; 2d, Iristhorpe. Group, to cover 150 sq. ft.: 1st, A. J. Jenkins. One trained specimen plant, Pink: 1st, Prof. A. Michael. Best Chrysanthemum plant on exhibition: Prof. A. Michael. Orchids—Group of Orchid plants in bloom, to cover not less than 200 sq. ft.: 1st, Albert C. Burrage. Group of Orchid plants in bloom, to cover not less than 50 sq. ft.: 1st, Ernest B. Dane; 2d, Loren D. Towle.

**AWARDS FOR FLOWERS. John Allen French Fund.** Carnations—One hundred blooms, mixed varieties: 1st, Loren D. Towle. Twenty-five blooms, mixed varieties; 1st, Loren D. Towle. Nerines—Display of cut blooms: 1st, Faulkner Farm.

**Henry A. Gane Memorial Fund.** Chrysanthemums—Twenty-five blooms, of twenty-five distinct varieties, named: 1st, Loren D. Towle. Twelve blooms, Japanese, named: 1st, Iristhorpe. Twelve

blooms, Japanese Incurved, named: 1st, Iristhorpe. Vase of twenty-five blooms, one or more varieties: James Nicol.

**Society's Prizes.** For the best display showing the various ways flowers can be used in home decoration: Caplan the Florist.

**Gratuities.** Loren D. Towle, decorative display of Chrysanthemums and foliage plants; James Nicol, four vases of large blooms of Chrysanthemums; Henry Stewart, Oncidium varicosum, Rogersii.

**Silver Medal, Cultural.** James Marlborough, Begonia Emily Cilbran.

**First Class Certificate of Merit.** Patten & Co., Carnation Thomas C. Joy.

**Honorable Mention.** Patten & Co., Carnation Natalie; Thomas Roland, display of decorative plants in pots; Caplan the Florist, artificial landscape display; Henry R. Comley, artistic display of cut flowers.

AWARDS FOR FRUITS. **Samuel Appleton Fund.** Apples—Baldwin, 12 specimens: 1st, E. C. Howard; 2d, George V. Fletcher. Bellflower: 1st, W. A. Stone. Delicious: 1st, E. C. Howard; 2d, H. A. Clark. Fameuse: 1st, E. C. Howard. Gravenstein: 1st, E. C. Howard. Jonathan: 1st, E. C. Howard. McIntosh: 1st, E. C. Howard; 2d, Wm. H. Atkins. Northern Spy: 1st, H. A. Clark; 2d, George V. Fletcher. Rhode Island Greening: 1st, E. C. Howard; 2d, Wm. H. Atkins. Roxbury Russet: 1st, E. C. Howard. Sutton: 1st, E. C. Howard.

**John A. Lowell Fund.** Apples—Tolman Sweet, 12 specimens: 1st, E. C. Howard. Wagener: 1st, E. C. Howard. Any other variety: 1st, E. C. Howard, Rome Beauty; 2d, E. C. Howard, Scarlet Beauty. Baldwin, 50 specimens: 1st, E. C. Howard. Any other variety, 50 specimens: 1st, E. C. Howard, King David.

**Theodore Lyman Fund, No. 1.** Crab apples—Hyslop, 25 specimens: 1st, E. C. Howard.

**John S. Farlow Newton Horticultural Society Fund.** Pears—Anjou, 12 specimens: 2d, George V. Fletcher. Bosc: 1st, Mrs. R. Goodnough; 2d, W. G. Kendall. Clairgeau 1st H. A. Clark; 2d, Warren H. Heustis. Comice: 2d, George V. Fletcher. Dana Hovey: 1st, Warren H. Heustis; 2d, W. G. Kendall. Lawrence: 1st, Edward B. Wilder; 2d, George V. Fletcher. Seckel: 1st, H. A. Clark. Sheldon 1st, H. A. Clark; 2d, George V. Fletcher. Vicar: 2d, E. C. Howard. Winter Nelis: 2d, E. C. Howard. Any other variety: 1st, Warren H. Heustis, Merriam; 2d, E. C. Howard, Keiffer.

**Marshall P. Wilder Fund.** Grapes—Native, 6 bunches, black: 1st, John Bauernfeind, Concord; 2d, Edward A. Adams, Wilder. Six bunches, white 1st, John Bauernfeind, Niagara; 2d, Charles W. Libby, Moore's Diamond. Six bunches, red 1st, John Bauernfeind, Brighton; 2d, John Bauernfeind, Delaware.

**Society's Prizes. Cranberries**—One peck 1st, Lucian J. Fosdick, McFarlin; 2d, Lucian J. Fosdick, Middleboro variety.

**Gratuity:** Mrs. R. Goodnough, basket of Bose Pears.

AWARDS FOR VEGETABLES. **Society's Prizes.** Onions—Allsa Craig, 12 specimens: 1st, Thomas W. Little. Any other yellow or straw-colored variety: 1st, E. A. Clark, Cranston's Excelsior. Any red variety: 1st, J. Arthur Nixon. Parsley—Four qts. 1st, J. Arthur Nixon. Parsnips—12 specimens: 1st, Thomas W. Little; 2d, J. Arthur Nixon.

**Levi Whitcomb Fund.** Potatoes—Green Mountain, 12 specimens: 1st, Edwin H. Lewis; 2d, Hillcrest Gardens. Irish Cobbler: 1st, Mrs. C. E. Cotting; 2d, Thomas W. Little. Vermont Gold Coin: 1st, Edwin L. Lewis; 2d, Thomas W. Little. Early Ohio: 1st, Thomas W. Little. Any other variety: 1st, Thomas W. Little, Spaulding Rose; 2d, Thomas W. Little, Norcross. Salsify 12 specimens: 1st, J. Arthur Nixon; 2d, Hillcrest Gardens. Squash—Hubbard, 2 specimens: 1st, Warren H. Heustis, Green Hubbard; 2d, Warren H. Heustis, Blue Hubbard. Any other variety: 1st, Thomas W. Little, Vegetable Marrow. Turnips—Rutabaga type, 6 specimens: 1st, Edwin L. Lewis.

**Society's Prizes.** Collection of Vegetables—12 varieties: 1st, Thomas W. Little; 2d, Hillcrest Gardens. Collection of Vegetables—6 varieties: 1st, J. Arthur Nixon; 2d, Mrs. E. C. Cotting.

**Gratuities.** J. Arthur Nixon, 2 dishes of Peppers; Edwin L. Lewis, bushel Green Mountain Potatoes; Leo Amendolio, Italian Squashes; Warren H. Heustis, Giant Pascal Celery; Thomas J. Grey Co., collection of vegetables.

**Silver Medal.** Thomas J. Grey Co., Collection of Vegetables.

**Honorable Mention.** Howard Marston, Display of Peanuts.

# Ferd. Fischer's

## Special Offer of Cyclamen Seed

### Important Announcement For You

## 20% Reduction

We are in receipt of advice from Mr. Ferd. Fischer authorizing us to make a reduction of 20% from the list enclosed on his well known, celebrated strain of **CYCLAMEN SEED**. Mr. Fischer is desirous of having you plant some seed this month, or about the first part of November, as seed planted at this date will develop stock for your next Christmas trade in 5-, 6-, 7- and 8-inch pots.

**Note**—Many seeds have come over to this country, supposed to be German grown, that in reality were grown in other countries. Many of the diseases now complained about among the florists are due to lack of good strain.

**Robert Craig**, of Norwood, Pennsylvania, has now for your inspection, 50,000 plants in 5-, 6-, 7-, 8- and 10-inch pots, all well established, true in color and healthy, all grown from Mr. Fischer's seed supplied by us.

When securing seed for October and November planting, we ask that you keep our seed separate from other strains and you can then determine for yourself the quality, and the vigorous growth that Mr. Fischer's strain makes.

This 20% reduction is an inducement for you to plant some now. Send us your order today. It is important and it will pay you to make this experiment.

**Please enter our order for the following varieties of**
**FERD FISCHER'S CYCLAMEN SEED**
Subject to 20% Discount from List Price

| Amt. | | Per 1000 Seed |

## AMERICAN BULB COMPANY

**IMPORTERS OF FLORISTS' NECESSITIES**

**172 N. Wabash Avenue, Chicago, Illinois**

**Cable Address "Bulbs"** **Phone Randolph 3316**

*Every Reader of "Horticulture" Needs*

**DR. L. H. BAILEY'S**

# Standard Cyclopedia of Horticulture

Six large quarto volumes. More than 3,600 pages. 24 full page exquisite color plates. 96 beautiful full page halftones. More than 4,000 text engravings. 500 Collaborators. Approximately 4,000 genera, 20,000 species and 40,000 plant names.

**IMPORTANT NEW FEATURES**

**KEY TO IDENTIFICATION OF PLANTS.** This is a device to enable one to find the name of a plant. The name thus found is quickly referred to under its alphabetical location, where full information will be found in regard to it.

**SYNOPSIS OF PLANT KINGDOM.** This is one of the most important features of the new edition. It constitutes a general running account of the classes, orders, and groups of plants, with a brief sketch or characterization of 215 of the leading families comprising those that yield practically all the cultivated plants. These family descriptions give the botanical characters; the number of genera and species and the ranges; a list of the important genera; brief statements in regard to the useful plants; and diagrammatic illustrations.

**ILLUSTRATIONS.** There are 24 colored plates; 96 full page half-tones; and more than 4,000 engravings which serve as guides in the text.

**THE GLOSSARY.** This is an analysis of all technical terms that are used in the work and in similar works. It comprises botanical and horticultural terms with brief definitions.

**TRANSLATION AND PRONUNCIATION OF LATIN NAMES.** In Volume I is inserted a list of between 2,000 and 3,000 Latin words used as species—names of plants, giving the English equivalent or translation and the pronunciation.

**CLASS ARTICLES.** Special effort has been made to secure the best cultural advices for the plants requiring peculiar or particular handling. Here are some of the titles of these articles; Ants; Autumn Gardening; Bedding; Diseases; Drainage; Floral Designs; Formal Gardening; Hotbeds and Coldframes; Insects; Landscape Gardening; Lawn Planting; Orchards; Rock Gardening; Subtropical Gardening; Tools and Implements; Village Improvements; Window Boxes, etc.

**GENERAL INDEX.** The final volume contains a complete index to the entire work, enabling the reader to locate volume and page of any subject he has in mind.

WE ARE MAKING A SPECIAL CASH PRICE FOR THE COMPLETE SET OF $45.00

*Further Particulars Sent on Request*

## BULB ORDERS HEAVY

### McHutchison & Co. of New York Have Had to Refuse Many Orders

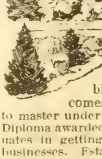
There have been many conflicting reports about the bulb situation so that an authoritative statement from McHutchison & Co., who handle great numbers of bulbs every year, is of special interest. They say:

"To date 14 carloads of Japanese lily bulbs have been distributed, but 8 more are en route, with others still to come. Since Sept. 1st we have been refusing orders for Giganteum, as we may receive not more than enough to take care of advance orders. In general we figure that only about 70% of American requirements in Giganteum will arrive from Japan, the shortage being fully 60% in the 8-10 and larger sizes. Every case must be paid for in full before it leaves Japan.

"On French bulbs we were sold up clean very early, as we were short-shipped several hundred cases. Paper Whites were very scarce in standard sizes, many small bulbs being forced on the market due to manipulation and shortage. True Soleil d'Or were abnormally high in price. Lilium Candidum and White Romans were also very scarce..

"Prices on Dutch bulbs were very reasonable and the quality extra fine this season. We were cleaned up very early, and had to refuse hundreds of orders. There seems to be no surplus of first size forcing bulbs anywhere. This season has demonstrated to many buyers that they can get better bulbs at lower prices from reliable American importers, most of whom advertise in the trade papers, than by importing direct from Holland themselves.

"Shipments of Kentia and Areca seeds are now en route, and the first shipments of Manetti stocks are soon due to arrive.



"We have seen nothing of 'the business depression' we read so much about. On Nov. 1st we were 480 orders ahead of the same date last year —and last year was our largest in 20 years. On collections we have nothing to complain of, though less bills are being discounted than in former years."

## GOOD PUBLICITY FOR GALVIN

The Boston Post recently published a flattering notice of the Galvin family. It reads in part as follows:

Four generations of the Galvins have been successful florists in New England.

Mr. John Galvin, grandfather of Mr. Thos. F. Galvin, Jr., opened a florist shop in Newport, R. I., in 1820. In 1847, his son, now Thos. F. Galvin, Sr., opened the first flower shop in Boston at the corner of Washington and Winter streets, and continued in the business at various locations until recently, when he severed his connection permanently with the Thos. F. Galvin, Inc., of Boston and New York, with the intention of retiring from the business, but in response to the earnest solicitation of his son, Thos. F. Galvin, Jr., became associated with him at 226 Devonshire street, which is their only place of business, he consented to give his long experience with flowers for the benefit of his son's business.

Among the work done by the Galvins in and about Boston has been the laying out of lawns and gardens for many of the large summer estates at Newport and other nearby resorts. The famous "Lawson Pink," one of the most successful and popular of carnations, was developed and brought out by Mr. Galvin. The idea of ordering flowers by telegraph originated in the fertile brain of the Galvin family, and has since been adopted by all leading florists of this country and abroad. Mr. Galvin has made 14 trips to Europe for the purpose of enlarging his acquaintances, establishing agencies and perfecting his experience in the flower business.

The present store of Thos. F. Galvin, Jr., which is in the heart of the flower market, is admirably located to accommodate the business man of today who can drop into the store on his way from his office to the station and order flowers with the assurance that they will be the freshest and best obtainable and delivered and arranged in keeping with the best possible taste.

## NEWS NOTES

Henry F. Fife, an employe of the Adams Nursery Co., of Springfield, Mass., has gone into politics, having taken out nomination papers as a candidate for Congress.

Trepel, the florist, of Brooklyn, has increased his capital stock from $10,000 to $100,000.

W. J. Guille, formerly head of the bulb department at the J. C. Vaughan store in New York, has been appointed store manager in place of E. A. Hartland, who has recently resigned.

P. W. Popp has joined the forces of W. E. Marshall & Co., 116 West 23d street, New York City. Mr. Popp has had long experience as a private gardener as well as a traveling salesman.

William F. Gude, of Washington, has been reappointed a member of the District Rent Commission of that city. The original appointment of Mr. Gude was made last June by Pres. Harding.

One Year, in advance, $1.00; To Foreign Countries, $2.00; To Canada, $1.50.

Says Sam: If the folks who are always throwing cold water would only join the fire department, maybe somebody would be glad to see them once in a while.

**Growers and Retailers.** Is it possible for growers and retailers to see things from the same viewpoint? We do not think that it is, any more than it is possible for farmers and store keepers to see eye to eye. With the present methods of the business world, the average business man buys as cheaply as he can, and when he sells, endeavors to get as much as he can. There is a never ceasing struggle between the producer and the seller along these lines. It is no more possible for the two to get together on a mutual basis than it is for the lion to lie down with the lamb in the present state of the world's progress, unless, of course, the lamb be inside the lion.

* * *

Does this mean that there can be no co-operation between growers and retailers? We do not think so. We believe that a little reflection will show both classes of florists that they have certain things in common, and should work together along the lines of their development. In other words, they can co-operate in creating a greater demand for flowers, because both of them will profit from that increased demand. If there is any campaign for educating the public to buy more freely, then everybody who has to do with the growing or marketing of flowers should help bear the expense. All this can be done without overlooking the fact that the rivalry between the growers and the retailers will still go on. Whatever either class can do along lines of legitimate endeavor is justifiable, we believe, even though it may not meet with the approval from the selfish standpoint of the other class. These things should not prevent a general getting together in regard to matters which affect all classes alike.

We do not think that retail prices can be expected to fluctuate as widely as wholesale prices. If they did there would be a constant disturbance in lines of retail trade. Gradual changes and a fairly well sustained average are more likely to hold the trade of flower buyers in about the same volume. It is difficult for the public to understand continual changes if they are very marked. Properly speaking, retailers should be allowed a liberal profit when flowers are cheap, and a much narrower margin of profit when they are high. If they should reduce their prices commensurate with the falling off of prices at wholesale, they would necessarily have to charge at the same rate when flowers are scarce, which would increase the price to the consumer, making it almost prohibitive. This is a point often overlooked, but one of importance.

* * *

There is another matter to be considered, and it relates to special sales. In one way flowers are different from other commodities. They are perishable, and must be used at once. When a bargain sale is advertised of gloves, hammers or shirts, buyers feel justified in purchasing them for future use, putting them away until they are needed. This obviously cannot be done with flowers, and puts a different complexion on the matter of bargain sales.

People as a rule buy flowers for special occasions, like weddings and funerals, although, of course, there is a certain steady sale of flowers for household decoration. When a man or a woman is buying funeral flowers or wedding flowers, he or she seldom "shops around," as the saying is. They are more likely to go to a shop with which they are familiar and leave their order. You can't imagine the average person going to one store and asking "What is your price on crosses, wreaths, or gates ajar today?" and then going down the street to the next florist and asking him the same question, and buying from the lowest bidder.

* * *

At the same time there is no question but what special sales can be featured with success. Their chief purpose is to relieve a temporary glut. Now it is the grower who suffers from such a glut, and not the retailer. Consequently it is the grower who needs the special sale. Retailers often deprecate such sales, believing that they have a tendency toward lowering prices. Here is a rock on which the two classes of florists are certain to split. Nevertheless, the retailer, if he is a thinking man, should realize that the success of his business depends largely upon the success of the grower who furnishes him with flowers. He should be willing to stage special sales on occasion, with that thought in view. A little argument will often show a retailer why he should co-operate in such a plan. Then it is necessary to take the public into the confidence of the florists, and to tell them in well prepared advertising that a temporary over-supply of flowers makes it possible to sell them at a reduced price for a limited season, and urging them to use flowers more plentifully for gifts, remembrances and in the home. In the end publicity of this kind is certain to have a good effect all along the line by creating a permanent increased demand for cut blooms.

# "Montgomery's Priscilla"

That's the name of the new pink rose! The name will be "Priscilla" probably after the public has had it a while, but we have had to add the prefix to cover the rules of nomenclature.

In order to get someone who knows more about roses than we do to give an unbiased, honest opinion on the merits of this rose, we have placed 12 plants of it with each of the following rose growers:

E. G. HILL CO., Richmond, Ind.
DAILLEDOUZE BROS., Brooklyn, N. Y.
ALBERT H. AMLING CO., Maywood, Ill.
DUCKHAM-PIERSON CO., Madison, N. J.
ROWAYTON GREENHOUSES, Rowayton, Conn.
MILLER FLORAL CO., Farmington, Utah
WELLWORTH FARM GREENHOUSES, Downers Grove, Ill.
A. S. BURNS, JR., Spring Valley, N. Y.
ROBT. SIMPSON, Clifton, N. J.
CHAS. H. TOTTY CO., Madison, N. J.
NOE-RUZICKA CO., Madison, N. J.
WM. H. ELLIOTT CO., Madbury, N. H.
ANTHONY RUZICKA, Madison, N. J.
W. J. PILCHER, Kirkwood, Mo.
JOS. HEACOCK CO., Roeloffs, Pa.
WENDLAND & KEIMEL, Elmhurst, Ill.
JOY FLORAL CO., Nashville, Tenn.
ROBERTS ROSE CO., Denver, Colo.
GEO. C. WEILAND, Evanston, Ill.
LAKEVIEW ROSE GARDENS, Jamestown, N. Y.
BASSETT & WASHBURN, Hinsdale, Ill.
HARRY O. MAY, Summit, N. J.
F. R. PIERSON, Tarrytown, N. Y.
L. B. CODDINGTON, Murray Hill, N. J.
JOS. H. HILL CO., Richmond, Ind.
STEPHEN MORTENSEN, Southampton, Pa.

Ask them about it, if you will, at any time. They have our permission to tell the truth. We are going to let this rose sell itself! We shall be simply order takers.

A. N. PIERSON, Inc. Cromwell, Conn.

## THATCHER GOES ABROAD

The many friends of A. E. Thatcher will be pained to learn that he has been obliged to give up his position at Oyster Bay, owing to ill health, and leave for England. Mr. Thatcher has been in charge of the large estate of William R. Coe. He was formerly at the Arnold Arboretum, Boston, and afterwards in charge of the Mt. Desert Nurseries at Bar Harbor.

A. J. Loder, the well known florist of Bangor, Me., has purchased a lot of land at the corner of Center and Somerset Sts., where he will build a new modern dwelling.

To The Trade—

Thos. F. Galvin, himself, will give your orders his personal attention at his son's store.

**Thomas F. Galvin, Jr.**
226 DEVONSHIRE STREET
BOSTON, MASS.

## George Watson's Corner

"You in your small corner and me in mine."

Among the chrysanthemums noticeable among the topnotchers in the market at present are: Rose Perfection, which is said to be an Improved Chieftain, and is a very beautiful light pink, of fine incurved form. Another good pink, of a darker shade and of a rather rugged, reflex formation, is the McNiese. Richmond is about the best among the yellows, and Charles Rieger among the whites. Both of the latter are of incurved formation, and very large and fine.

The retail cut flower business in the United States is, perhaps, more highly developed than in most other countries. This is especially so in regard to the big holidays, such as Christmas, Easter, Memorial and Thanksgiving. But we have not reached the limit by any means, and the trade is well aware of it, as is shown by its vim and spirit at the Society meetings, such as the S. A. F. and F. T. D. have recently held. In this connection, a very good suggestion has just been made by Samuel S. Pennock, who has just returned from a six months' visit in Europe. He says over there they have developed birthday greetings very much more than we have on this side of the water. Henry Penn will no doubt make a note of this and hand out a good program to his fellow workers as to how best to go about a better development along this particular branch of their business.

MADISON - NEW JERSEY

IRIS and PEONIES

We aim to give more than you expect. Then you tell your friends, they tell their friends and our business grows. Thank you.

GEORGE N. SMITH
Wellesley Hills, Mass.

John Jensen and George Watson are both sixty-oners—and kind of pride themselves about nothing. But really, being a sixty-oner does sometimes mean something. I was handed an envelope the other day because of my sixtieth, and it had sixty crisp new ones in it! I don't know just who to thank for this, so I take this public opportunity of expressing my feelings to the bashful ambassadors. Yes, I was sixty, sixth of October last—and my mother once told me as a joke that I was also born on the sixth day of the week and at six in the morning. Also, I started my apprenticeship to the seed business Dec. 6th, 1876—so six must be my lucky number. It's great, in some ways, to be a sixty-oner, and John Jensen and I took the advice of one of many verses accompanying the memento:—

"Then here's a hand my trusty friend
And gies a hand o' thine
And we'll tak a richt guid willy waucht
For the days o' auld lang syne."

As to where we got the "willie waucht," I refuse to answer, as I do not want to get into any trouble with our dear friend, Cotton Mather Volstead. There are a few tunnels, leading to the sea beach and the off-shore pirates, which we must keep strictly to ourselves.

John Jensen is a Daring Dane from Denmark, who braved the unknown wilds and proved himself a Dandy Boy some thirty years ago. Today he is a Dandy American, with a Dandy Business of his own and a Dandy American Family. He may not be able to get me on "the sixes," but he sure has me locoed on the sevens. As for the ace, I can't even show a queen to his slam-down. So John wins!

Mark Mills has been doing noble work on behalf of the "Say it with Flowers" campaign in the city and surrounding territory. He has been going the rounds in his auto for weeks, and his persuasive voice and keen arguments have made most of them come across. The easy ones like to sit still and see the live fellows spend their money and do the work, and they chuckle as their business increases. But it takes men like Mr. Mills to bring them to time and make them cough up their share. To their credit, however, it must be said that Mr. Mills finds only about one in a hundred—when properly approached; but will give his fair share—knowing that he is getting full value. Costs money, but it pays to keep the ball a rolling.

Of course it is needless to add that all this time, energy and expense on Mr. Mills' part is free gratis and a part of his contribution to the gen-

eral good. We must give him full credit for his fine work which is beyond money and beyond price. So, boys, get your check books out, when Mark comes along, and be as generous as you can.

---

Samuel S. Pennock blew into his home burg, Philadelphia, about noon Saturday, the day after the boys in New York City had taken our thunder at their reception in that little village on his landing. Of course Sam couldn't help himself! But we Philadelphians will wait our turn, just the same, and maybe we will make our hearts bubble up as humanly as the New Yorkers did. They did the right thing, anyway, and did it well—even if they did steal a little of our Philadelphia thunder. We extend to them our sincere and distinguished congratulations.

---

David O'Connell, for 40 years superintendent of the Maple Avenue Nurseries at West Chester, Pa., died October 24th, aged 60 years.

## TARRYTOWN HORTICULTURAL SOCIETY

The twenty-third annual floral exhibition of the Tarrytown Horticultural Society was held in Music Hall on November 2nd to 4th. The hall was turned into a bower of flowers, the boxes being decorated with Southern Smilax.

On the stage was located the plant exhibit of Mr. William B. Thompson, and in the rear of the hall was the fine exhibit of Mr. John D. Rockefeller. In the front of the hall was the very decorative exhibit of Mr. F. R. Pierson of Roses, Chrysanthemums, and Ferns, which together with the plants on the stage and the very beautiful exhibits in the hall made it one of the finest exhibits that has ever been given by the Society. The quality of the exhibits was unsurpassed. While the show was not large, the quality was of the very best.

uled to take place in the building before our exhibition is a big automobile show, and a public reception to Marshal Foch and other notables.

Reservations of trade space in the Show are continually being made, and there is much correspondence passing between the Secretary's office and prospective exhibitors. Up to date the following have contracted for space:

Pittsburgh Cut Flower Co., Pittsburgh
Henshaw Floral Co., New York City
A. N. Pierson, Inc., Cromwell, Conn.
Schloss Bros. Ribbons, Inc., New York City
Mead-Suydam Co., Newark, N. J.
American Bulb Co., Chicago, Ill.
Walter E. Cook, Inc., Cleveland, Ohio
Vaughan's Seed Store, Chicago, Ill.
Ideal Power Lawn Mower Co., Lansing, Mich.
H. Bayersdorfer & Co., Philadelphia, Pa.
The Zane Pottery Co., South Zanesville, Ohio.
W. Atlee Burpee Co., Philadelphia, Pa.
L. C. Stroh & Sons, Batavia, N. Y.
Joseph G. Neidinger Co., Philadelphia, Pa.
Florists Exchange, New York City
Henry A. Dreer, Inc., Riverton, N. J.
Carl Hagenburger, W. Mentor, Ohio
B. Hammond Tracy, Inc., Wenham, Mass.
The Basket Shop, Bellefonte, Pa.
J. A. Evans Co., Richmond, Ind.
Pulverized Poultry Manure Co., Chicago, Ill.
Quincy Art Willow Ware Co., Quincy, Ill.
Muller-Sealey Co., Inc., New York City
The McCallum Co., Inc., Pittsburgh, Pa.
Lord & Burnham Co., Chicago, Ill.
Roman J. Irwin, New York City.

The National Flower Show Committee is to meet in Cleveland on November 17 and 18. At the meeting also will be present Robert Pyle, president of the American Rose Society; Wallace R. Pierson, chairman of the same Society's committee on Commercial Growers' interests, and A. F. J. Baur, secretary of the American Carnation Society, who will discuss with the committee their plans for co-operation in the Show. On Thursday, November 17, the committee will be guests at luncheon of the Rotary Club.

JOHN YOUNG,
Secretary.

GREENHOUSE NOZZLE

The new Manaway greenhouse nozzle is a decided advance over any greenhouse nozzle heretofore made. By its peculiar construction the side spray is thrown out which applies the water evenly from the pipe outward. Our long-throw nozzles cover a space up to 18 feet from the pipe. We can supply nozzles that will cover any space desired. If you will advise us under what pressure your system operates and the width of space you desire to cover, we will mail without charge a sample nozzle. C. W. SKINNER, Newfield, N. J.

END NOZZLE

Every one who is using the Manaway System without the end nozzles can now fit their lines with our new 3-outlet end nozzles which take the place of not only the regular nozzle but also furnish 2 streams, one 4 and the other 8 foot out of true. One of these nozzles placed at the beginning or end of the line has the effect of lengthening the line 8 feet at each end. These nozzles can also be used in other systems which use a large nozzle. The price is 15c each, postpaid. C. W. SKINNER, Newfield, N. J.

### AN OLD FLORIST PASSES AWAY

Thursday evening, November 10, Mr. George W. Marshall, a retired florist, passed away at his home in Medfield, Mass., after an illness of over six months. He was born in Yorkshire, Eng., November 7, 1841, and came to this country with his parents when a small boy. He learned his business partly in Troy, N. Y., afterwards with James Fleming, Yonge street, Toronto, Can., a florist and seedsman.

Mr. Marshall served in the Civil War, and was under Gen. Thomas at Nashville, Tenn., when President Lincoln was shot. He worked on many private estates in greenhouses and also landscape gardening. He had at one time greenhouses in Natick and a small store on Boylston street, Boston. In 1855 he bought land in Everett, opposite Woodlawn cemetery, and erected a number of greenhouses and a large store, where he did business for a number of years. This business was given up owing to ill health, but Mr. Marshall was always interested in the trade, and kept well informed in regard to it.

He leaves a widow, five daughters, one son, a world war veteran, and one brother, ex-superintendent of Woodlawn cemetery.

A new store in North Attleboro has been opened by A. H. Dolan, who for several years was with Howard Vose, at Attleboro.

### NEW ENGLAND NOTES

Walke, the florist, of Salem, Mass., has purchased the handsome greenhouse of Frederick McQuesten, of Marblehead, and has moved it to a new location at the Walke Conservatories on Loring avenue.

Hubert M. Canning has taken over the business of his father, the late Edward J. Canning, of Northampton. In the future the business will be conducted under the name of the Edward J. Canning Co. The younger Mr. Canning has had a great deal of horticultural training, and for some time has been his father's right-hand man in carrying on the nursery at Northampton. His father was one of the best known nurserymen and gardeners in New England, and his death is widely lamented.

### NURSERY COURSE AT AMHERST

Much interest is being shown in the special course for men engaged in nursery work which is to be given at the Massachusetts Agricultural College, beginning January 2, and continuing through ten weeks to March 10. This course has been arranged for through the activity of the New England Nurserymen's Association, the committee in charge being Richard Wyman of the Framingham Nurseries, Theodore F. Borst of Little Tree Farms, and W. E. Campbell of the Elm City Nurseries. The Massachusetts Nurserymen's Association is represented by Harlan P. Kelsey. Only 25 students can be enrolled this year, owing to limited facilities, and there will be no tuition fee. In fact, apart from the cost of board and room, there will be no charges except the $5.00 for registration and $5.00 for books. This course should be of no little value to young men who want to make the nursery business their life work.

### FLOWERS SHIPPED TO BOSTON

It is reported that some of the retail florists in Boston are now buying quite heavily in New York. According to one statement 60 cases of cut flowers came over by express on Monday and Tuesday.

### THE MARKET

The market still remains very dull in spite of Thanksgiving buying. Chrysanthemums are far too plentiful, and the market is swamped with Pompons. Roses and carnations have shown a slight advance over last week, but are still cheap.

## CHRISTMAS PLANTS

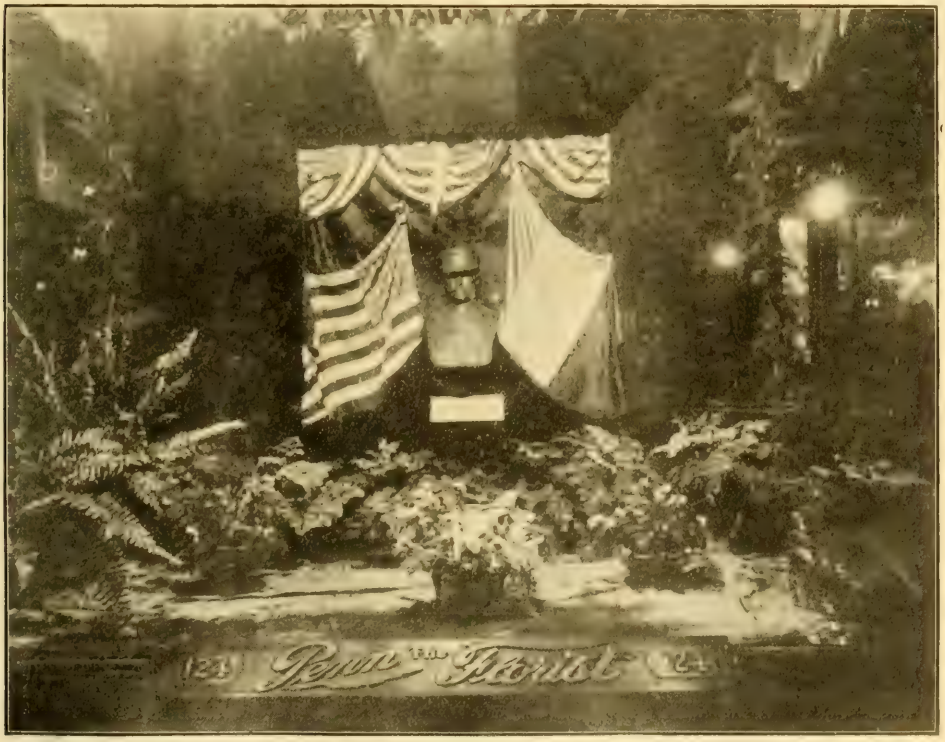
Vol. XXXIV NOVEMBER 25, 1921 No. 10

## THE TALK OF THE TRADE

Up in Madbury, N. H., John Elliott is growing a wonderful crop of roses. During the war some difficulty was experienced in keeping the immense Elliott range up to the standard, but conditions have righted themselves now, and Mr. William Elliott, who has been keeping pretty close to the Brighton establishment of late, is well satisfied with the reports which come from his son.



Mr. Elliott is having splendid success with Butterfly. Twenty thousand plants are growing in the Madbury greenhouses. Undoubtedly this is the largest amount of Butterfly to be found anywhere in New England. Butterfly when well grown always commands a high price. According to John Elliott, it has been easy enough to average ten cents apiece for Butterflies at certain seasons.

Another rose which he grows in large numbers is Columbia, and some of the Columbias sent to Boston have been so good that they have brought even more than Butterfly. Naturally there is a big stock of Ophelia, which has come to be the biggest money-making rose in the New England market. Hadley is also grown in a large way, being still the best red that has been given any extended trial at Madbury.

The Madbury houses have never looked better than they do at the present time, and the younger Elliott seems to have demonstrated his ability to follow worthily in his father's footsteps.

---

Over in Dover, N. H., the Garrison Hill Greenhouses have been given a thorough overhauling, and one which has cost quite a pot of money. New boilers have been installed in a new house at the foot of the range, while new cement foundations have been put under most of the house. This range is a very unique one, being erected on the side of a steep slope,

Henry Penn's Window on the Occasion of Marshal Foch's Visit to Boston

so that the houses make a series of steps. Houses of this kind are not particularly easy to work in, but on the other hand they are particularly easy to heat. The open exposure to the sunlight, and the protection which the hill gives them makes it possible to run much lower on steam than would otherwise be the case. The houses here are well filled, roses and carnations being the principal crops. Considerable shipping of roses is done to the florists in Portland and other parts of Maine. Ophelia is proving by all odds the most popular rose.

---

A rather unusual situation exists at Portland, Me., where at least four of the retail florists' establishments are conducted by women. From the general appearance of the different establishments, women are quite as competent to run the florist business as are men. One of the leading stores in the city is that conducted by the Vose-Smith Co. It was established by Mrs. Smith several years ago, after she had gained thorough training by long experience in other local establishments. Few florists in the Portland district are better known than Mrs. Smith, who has a large amount of wedding work to look after. She is very successful with her decorations and floral pieces.

Mrs. Hayes is in charge of the Harmony Shop, and makes a fine success of her work. Miss Lizzie Dennett has a shop of her own, and so has Miss Bertha Lougee.

---

I was talking a few days ago with Mr. John C. Meyer, of Lowell, who makes the thread used by florists the country over, and was interested in what he said about his recent trip through Canada. According to Mr. Meyer the florists in the Dominion, and particularly in the larger cities, are having a fine business and feeling very prosperous. They have the advantage of being able to sell many of the good things which are barred out of this country by quarantine regulations. Mr. Meyer was very well satisfied with his trip, and with the attention which he received from the Canadian florists.

---

Miss Lougee's flower shop has a different aspect from most stores of the kind because one side is given over to decorated china, palm baskets, embroidery and other novelties produced by the arts and crafts league. This material is handled by Miss Lougee for the league, and while it brings in some profit, also helps her florist business, as people who come in to buy the various novelties offered are often attracted by the flowers. While Miss Lougee has no greenhouse as yet, she grows a considerable quantity of out-door material, particularly sweet peas and asters. She sometimes increases her sales by standing up a broad, neatly prepared board at one side of the entrance, to which are fastened bouquets of sweet peas. A card is printed giving the price of the bunches. Many flowers are sold in this way to passersby whose eyes are attracted by the flowers, but who otherwise would not have entered the store.

---

Mr. A. E. Kunderd, the well-known gladiolus grower of Goshen, Ind., has just issued his first wholesale catalogue. It contains seventeen ruffled varieties which are now available for seedsmen and growers, and also a choice list of plain petaled kinds, as well as a collection of the Primulinus type. It is interesting to find that Mr. Kunderd advocates the use of the Primulinus gladioli for cut flower purposes. He feels that when the florists become more familiar with these glads, they will grow them in greater quantities, and I feel sure that he is right. The Primulinus hybrids have everything to recommend them for florist work, and are particularly useful for weddings. We have stressed this point before, and are glad to find that growers are beginning to dwell upon this fact when dealing with the trade. The Primulinus hybrid is particularly a florist flower, and is going to prove a money maker when that fact is fully appreciated.

---

It appears that flower buyers and especially women are becoming more particular about the variety of flowers which they buy. Formerly they have usually bought flowers by color, and this still holds true to a large extent in regard to carnations. With roses, however, there seems to be a decided tendency to specify a particular kind. Perhaps this is true to a larger extent in the smaller cities than in the big places. In any event, Mr. Solon R. Baker, of Concord, N. H., told me only a few days ago that the tendency was very marked in his city. His customers, he said, were very likely to call for Ophelia or Columbia or perhaps for Hadley. These are roses which Mr. Baker has encouraged his patrons to buy. When they want a white rose he gives them White Killarney.

In towns some distance from wholesale markets, roses are needed which have particularly good keeping qualities, which is one reason why Mr. Baker chooses the kinds named. Concord, he says, is a good rose buying community, with the result that he sells a great number for all occasions, and particularly during the season when the legislature is in session.

---

There has been a great variation in the quality of the cyclamens to be found in New England this season. As a matter of fact, it is only here and there that a lot of cyclamens of outstanding quality can be discovered. Probably one of the best lots in the east is at the Dedham greenhouses of the R. & J. Farquhar Co. This company has made a ten-strike with cyclamens this year. It has about 10,000 of as fine plants as one would care to see. They are using methods somewhat different from those of most of the other growers. Instead of forcing their cyclamens they keep them cool, with the expectation of producing plants which will be of the finest quality when the Christmas trade opens.

---

Joseph Schlagheck, of Toledo, Ohio, seems to have hit upon an idea which has been overlooked by most other dealers in florists' accessories. He purchased a whole carload of seashells picked up on the beaches of Florida and has had them shipped to his store, reselling them to florists and seedsmen to be retailed as a substitute for pebbles when bulbs are being grown in bowls of water. It is claimed that the shells have a special virtue on account of the lime they contain. In any event, they no doubt will sell readily because of their novelty as compared with pebbles. Larger shells are being used as ornaments in aquariums; and when hung by three chains or cords make unusual flower holders. Mr. Schlagheck has long been prominent as a goldfish dealer.

---

Penn featured a Foch window last week which excited much comment. The bronze figure of the Marshal was surrounded by the tricolors and the stars and stripes, emphasized by a black velvet background. A spot light illuminated the window day and night. In the foreground were baskets of roses and orchids, while deeper in the window were palms and ferns. Altogether the window was well conceived and equally well executed.

---

The Boston Chapter of the Society of Landscape Architects held their first fall meeting November 15, at Hotel Bellevue, with President Percival Gallagher presiding. The speakers included H. V. Hubbard and Stephen Child, the latter having recently returned from Europe.

# WHAT'S DOING IN BOSTON

## RETAILERS REORGANIZE

### An Important Meeting of the Boston Florists—Officers Elected

As was expected, the retail florists of Boston did not look very favorably upon the action of the growers in opening the wholesale markets in Winthrop Square to the public after 9 o'clock in the morning. Many of them feel, however, that some very important matters affecting the whole industry are involved, and that there should be a way of overcoming the difficulties without resorting to drastic measures on either side. In order to bind the retailers closer together and get the views of all concerned, the old Boston Florists' Club has been reorganized. A meeting was held at the City Club, with about fifty retailers represented. This included practically all of the retail stores in Boston. It was voted to keep the organization exclusively for retailers, but not to limit the membership to Boston. Accordingly it was voted to call the organization the New England Retailers' Club.

Officers were elected as follows: President, C. F. Boyle, of Galvin, Inc.; Vice-president, John J. O'Brien; Recording Secretary, Elijah F. Gorney; Financial Secretary, Harold Ryan; Treasurer, Julius Zinn.

Much time was given to discussing the retail business as it relates to the opening of the markets to the public. Finally a committee was appointed to meet a committee from the growers' organization for the purpose of thrashing out the general situation. Another meeting of the Retailers' Club is to be held next week.

## FLOWERS FOR FOCH

The coming of Marshall Foch meant much to the florists of Boston, as many flowers were used. The task of decorating the Copley Plaza, where the distinguished guest made his headquarters, was given to Thomas F. Galvin, Inc. Much use was made of begonia plants. Roses and chrysanthemums were also used generously. In the evening a feature of the decorations was a mammoth basket five feet high, filled with chrysanthemums and roses, which was sent with the compliments of the New England Growers' Association. On the next day several of the papers contained a picture of this immense basket, with President Samuel J. Goddard standing beside it.

## JAMES NICOL

The many friends of James Nicol were pained to hear of his death in Quincy. Mr. Nichol, who was 82 years old, had an exhibit at the recent Chrysanthemum Show, and grieved that he could not be present to see it. He has been a consistent exhibitor for many years, and has won many prizes. For a quarter of a century Mr. Nicol was superintendent of Mt. Wollaston cemetery.

## BOSTON NOTES

Every year Harold A. Ryan, Inc., of Cambridge, opposite the Mt. Auburn Cemetery, has a flower show of his own. He sends out a great number of invitations and incidentally holds a special sale of ferns or some special flower. The show this year was attended by a great number of people who thronged the ten greenhouses, giving expression to many exclamations of surprise and delight at the immense chrysanthemums, cyclamens and other plants. This exhibit is proving fine advertising for Mr Ryan, and is made especially successful by his prominent location and the modern character of his houses.

At the last meeting of the Horticultural Club of Boston, at the Parker House, Mr. Christian Vander Voet, superintendent of the Arnold Arboretum, talked on winter fruiting shrubs, and was listened to with much interest. Thomas Roland presided and several of the new members were present for the first time.

The New England Growers' Association will have its next meeting at Hotel Bellevue, Saturday evening, November 26. It will be preceded by a dinner, and many matters of importance are coming up for discussion.

Henry Penn has opened an annex at 5 Hamilton Place. The new store, which has been attractively decorated, will be given over entirely to the sale of baskets, jardinieres, ornaments and other accessories. No flowers will be sold at this store, which is filled with attractive articles, both domestic and imported.

## JOHN T. COOKE'S NEW STORE.

The friends of John T. Cooke are congratulating him on the opening of his new store at 360 Commonwealth Ave., near Massachusetts Ave. Mr. Cooke is one of the best known young florists in the business, having been for several years with Carbone when the latter had his Cambridge store, later with The Rosary, and afterwards with O'Brien. He has a pretty store and his location is one of the best for high class trade.

Basket Presented Marshal Foch by New England Growers' Association

# ADVERTISING AND SELLING

### MAKING THE MOST OF THE TELEPHONE

Of course every florist carries a telephone for the convenience of his patrons, but how many dealers make the 'phone not only pay for its keep, but show a profit as well? In order to do this it is necessary to advertise it the same as any other line—or perhaps it might be better to say, advertise it as a part of your regular service. A number of merchants in different parts of the country are doing this, and their progressive style could be adopted to advantage by many who now consider the telephone "something to be endured" rather than a money-maker.

C. A. Meigs, Fort Wayne, Ind., says a writer in the Seed World, recently took a quarter page in the paper, in which, surrounded by plenty of white space, was the following:

EMERGENCY CALLS
Fire Department 19
Police Department 38
Garden Supplies 1122

Of course the latter number was that of his own establishment.

A firm in the middle west recently ran this catchy ad:

"WHO HAS THE LUCKIEST 'PHONE NUMBER IN TOWN?

"Over in Japan the telephone number 8 is considered the luckiest number. It costs the subscriber who holds it nearly $500 yearly.

"Another lucky number is 357.

"Nos. 42 and 49 are said to be unlucky, and are usually assigned to police—very appropriate.

"The telephone number of ANDERSON'S is Main 551. As he has such a large assortment of seeds and garden supplies, and his goods can always be depended upon, many people consider Main 551 the luckiest number in the telephone book."

---

Ads such as the above tend to fix your telephone number in the public mind, while the telephone service itself is advertised in the two following—the first is Loebs, of Memphis, Tenn.:

"DO YOU TELEPHONE 90? IF NOT, WHY NOT?

"We don't have to advertise to our patrons, because they know the quality of our lines and are satisfied. We're merely letting the other folks know what they're missing when they don't TELEPHONE 90—LOEBS."

Another was that of James McPhillips, New Orleans, La., who asked:

"IS YOUR TIME WORTH SAVING?

"If so, you will take advantage of our delivery service and order your goods by telephone. We furnish what you want, not 'something just as good.' You'll find real economy in our prices, too."

A third ad, used by a Michigan firm, was so catchy in its appearance that it needed very little wording to make it effective. It showed the cut of a telephone receiver, and in front of it a pencil and a pad. On the latter was printed:

"MEMO—IMPORTANT

"Order from Harman, Hockinridge & Company today

"1 Sickle,

"1 Oil Can,

"1 Package Plant Food."

The ad could be changed to suit any season—cut flowers for Thanksgiving, bulbs for fall, grass seed for spring, etc.

Not only individual, but co-operative telephone advertising has been found decidedly advantageous, as it is not only cheaper, but gains added force from the number of firms employing it A number of the leading firms of Ottawa, Canada, recently took an entire page in which to conduct their "order by telephone" campaign. Across the top was the heading:

"FIRMS WHO CO-OPERATE FOR BETTER BUSINESS

"The firms whose announcements appear on this page are ready to serve you at all times. Your telephone gives you direct connection and each advertiser stands ready to assure you the same pleasing service on your telephone order as though you called personally at his place of business.

"TELEPHONE ORDERS RECEIVE PROMPT AND COURTEOUS ATTENTION."

The page was then divided into thirty little squares, each containing an individual ad. In each ad was the cut of a telephone receiver, and the effect on picking up the paper was so unusual that it is safe to say that the majority of readers proceeded to give it closer inspection. In doing so it was noted that beneath each telephone was the number of the firm's whose individual announcement was printed

---

### FLORIST'S WREATH

An unusually good example of a simply made wreath is shown on the opposite page. This wreath is made entirely of white sweet peas and adiantum. A masterly touch is shown in the light and graceful way in which the flowers are introduced. A wreath of this kind made on a twenty-inch frame should have 350 or 400 sweet peas and about 100 sprays of adiantum. If the flowers are wired in a loose way so that the bunches hang apart at the top, fewer sweet peas will be required than if they are wired tightly together, and the success of such a wreath lies largely in its loose, open appearance.

## *The Phenomenal Giant Everbearing Red Raspberry*

**Superior to any other Raspberry; produces large, juicy berries of finest aroma; very prolific, heavy bearer, absolutely hardy and free from disease.**

**Produced in the New England States, succeeds well in all sections.**

**Retails now at $6.00 per dozen, $49.00 per hundred. Strong field-grown plants.**

**Awarded First-Class Certificate by Massachusetts Horticultural Society and by all other Horticultural and Agricultural Organizations before whom it was exhibited.**

**Make reservation now with your dealer for Fall or Spring delivery.**

## DESCRIBES MANY ROSES

### S. S. Pennock Reports on a Visit to the Sparrieshoop Rose Fields

By S. S. Pennock

In August I visited W. Kordes Sons' place at Sparrieshoop, going over their rose fields, not far from Hamburg. The nursery was founded in 1888 by the father of the present brothers, and taken over by them in 1919. This year they are growing 200,000 roses on their own place, and have contracts with smaller growers for 300,000, mostly hybrid teas. In Europe nearly every garden has its standard roses, and the Kordes make rather a specialty of the standards, growing 12,000 of them annually.

The roses here are planted in long rows across the field, rows about 500 feet long. With one or two exceptions, no disease is to be found on the roses. These exceptions include Mrs. George Shawyer, which had quite a bad dose of mildew. My time was short but I jotted down a few varieties which stood out prominently.

Freiberg Zwei. H. T. had a color very much like the La France. Looks as if it would be a good forcer. A beautiful clear pink, better shaped than La France; and rather more pointed bud, very free and strong grower.

Reinhard Baedecker. (Pernettianas) (Kordes seedling) (Yellow Druschki) not quite as large as Druschki, a trifle shorter petal, but better shaped, rather more pointed bud, but still not what one would call pointed either. Color is rich golden yellow; color is held until the petals drop. Flowers are borne on good, long, heavy, well foliaged stems; unusually strong grower, could almost be called rank-grower. As far as I could see it should certainly have a place along with Druschki. Some claim that it is not quite as free a bloomer as it should be, but I think it would be worth while giving a trial.

Adolf Koschel. (Kordes Seedling) (Pernettiana blood) a robust grower, rather thorny, good stems, the thorns are quite red, giving it a distinction that is quite noticeable. It has a pointed bud—color yellow with a suffused salmon pink towards the outer edges of petals. Looks as if it might be a forcer. If so, it would certainly be a valuable rose for anyone to grow. Of course, one cannot tell, seeing it growing out-of-doors, whether it would be a forcer or not; seems to have characteristics of a forcing rose. This was a rose that was immediately admired by the ladies and picked out as something out of the ordinary.

Eduard Behrens a H. T. (Kordes seedling) dark red, very attractive but little inclined to have weak neck; but this probably could be overcome, —very free and a good bloomer.

W. C. Gount. H. T. improved Richmond, a littlé darker than Richmond, very attractive.

Madame Jules Bouche H. T. This is the second or third time I have seen this rose, which is considered an improvement over Kaiserin, splendid strong grower, good flower, trifle larger than Kaiserin, long stem. Fine forcer.

Golden Emblem. Was in wonderful shape, but Mr. Kordes said it is sometimes a big disappointment, as the plant the second year is poorer than the first on account of black spot.

J. C. N. Forestier. Pernettiana. A shrimp-pink or coral red, very clear color. This was a beautiful flower, unusual shade, different from any rose I can recall. Is a good free grower, perfectly free from mildew or black spot.

Willomere. Pernettiana. Is in splendid shape, as good as I ever saw.

Adolf Kaerger. Pernettiana. A "Sunburst" seedling, looked like a very promising yellow, good grower, and might have possibilities as a forcer. A seedling of W. Kordes.

Etoile de Hollande H. T. In very good shape indeed, made a red streak across the fields, is doubtless the first rose that is in some respect an improvement on Hadley rose. It never blues and is rust proof. Was in full bloom, very attractive.

Red Letter Day. Showed up very fine in full bloom.

Mrs. Wymes Quin. Pernettiana. Rather a disappointment. Mr. Kordes thinks it would not be of much account as a forcer, very attractive, though, outside.

Gorgeous. Was in fine shape.

Madame Charles Lutand H. T. Was in very good shape. This is a sister to "Sunburst" and is a pity it does not amount to anything as a forcer. It is certainly attractive.

Golden Ophelia H. T. Showed up very good.

Mrs. Henry Morse H. T. A delicate pink; very similar to Stanley in shade. Some would not call Stanley shade a delicate pink. I consider it one of the most refined pinks among the roses.

H. E. Richardson H. P. A dark crimson, very good rose; a rose to be recommended for poor soil, does much better than in rich soil; in rich soil it is a failure. A good flower for a rose grower that is catering to a country where the soil is unusually poor.

(To be Continued)

## LASSIE LOOKS GOOD

### Members of Lancaster County Florists' Association Visit Girvin's Place

The November meeting was held at the greenhouses of the president, W. B. Girvin, of Leola. About a dozen members took the early cars to allow an inspection of this, one of the big establishments of the county.

The big carnation house was full of good stock. Matchless was, perhaps, the poorest of the lot, but even these will pay their keep all right. Supreme and others are coming along fine with "Lassie" (Eicholz) as the best and most promising one on the place. This variety is making a record for itself in this section and a good future is predicted for it. While not quite in the same class as Mrs. C. W. Ward it will come pretty near filling the place of that variety and a certain grower comparing the two said the only difference between them was that Ward represented a one dollar bill in return and Lassie a ten dollar bill, not because it individually is better than a good Ward but because it is productive and constant from early until late. Beyond this carnation house is the new rose house, a model house of King construction and filled with model roses of Girvin quality.

The heating plant of this establishment has been overhauled the past summer and is the best in this section and the cost a five-figure proposition. The stack has a draft so strong that when A. F. Strickler put his head in the door at the bottom he had to be held by his feet to keep from being drawn to the top and disappearing in the clouds.

# CARNATION CUTTINGS

**NEW AND STANDARD VARIETIES**
**For December and Later Delivery**

**THOMAS C. JOY.** We believe this one to be the best all-round pure white Carnation offered. It has been tested and tried in different sections of the country and without exception has made good. December and later delivery. Rooted Cuttings, $12.00 per 100, $100.00 per 1000.

**MAINE SUNSHINE.** Seedling of **Ward** and **Crystal White.** Good yellow Carnations are always in demand. **Maine Sunshine** is a good, clear yellow. Rooted Cuttings, $15.00 per 100, $120.00 per 1000.

**LASSIE (Ward x Alice).** A commercial Carnation of exquisite shade of cerise. Very free bloomer. A decided improvement on **Ward.** Rooted Cuttings, $12.00 per 100, $100.00 per 1000.

**WHITE DELIGHT.** It is an improved **Pink Delight** in all but color. Rooted Cuttings, $12.00 per 100, $100.00 per 1000.

**REDHEAD (Aviator x Alice).** The finest scarlet Carnation today. Exceptionally free bloomer. Rooted Cuttings, $12.00 per 100, $100.00 per 1000.

**RED MATCHLESS (Matchless).** Scarlet just a little stronger in growth than parent. Rooted Cuttings, $12.00 per 100, $100.00 per 1000.

**HARVESTER.** A cross between **White Wonder** and **Matchless.** Pure white. Rooted Cuttings, $10.00 per 100, $90.00 per 1000.

**SUPER SUPREME.** An improved **Enchantress Supreme.** Rooted Cuttings, $8.00 per 100, $75.00 per 1000.

**HAPPY DAY.** A very fine red. Rooted Cuttings, $10.00 per 100, $90.00 per 1000.

**LADDIE.** The best of them all. Rooted Cuttings, $12.00 per 100, $100.00 per 1000

**All the standard varieties, prices on application.**

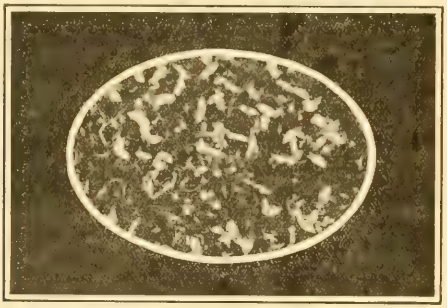
# RAMBLING OBSERVATIONS OF A ROVING GARDENER



It isn't often that as attractive an orchid catalogue is gotten out as the Ten-Ten Book of the Julius Roehrs Co. While this book also deals with palms, ferns and other decorative plants, the first half is given over to orchids, and in such a way that the interest of the amateur as well as that of the professional grower is excited at once. This is due partly to the pictures and partly to the simple divisions made. There are groups of ten cool house orchids, ten yellow flowered orchids, ten Cymbidiums, ten large flowering Cypripediums, ten large flowering Cattleyas, and so on. One feature which is sure to attract attention is a series of illustrations showing the development of the seedling Cattleyas. These pictures, which are herewith reproduced through the courtesy of the Julius Roehrs Co., illustrate Cattleyas six months old, and show the seedlings at the end of one year, three years, four years and five years, the plant of the latter date having burst into bloom.

Putting aside the poppy of Flanders fields, around which so much of the sentiment of our soldiers' service in the Great War clustered, the American Legion, at its convention at Kansas City, has chosen the daisy as its official flower. The poppy, we are told, had many partisans, on account of its association with French battlefields. So indeed it must have had. The gay flower that resisted the ravage of war, and nodded and smiled on the very brink of the shell-scourged trenches, must have grown very dear to the soldier's heart. But the Legion is nothing if not American, and the poppy is not an American flower. It does not grow in our fields or by our waysides. The young soldiers looked for a flower dearer to their mothers and sisters than the poppy of far-away Europe. And for this reason, and out of this sentiment, they have chosen the daisy.

The soldiers of the Legion probably did not consider, in making this choice, that their daisy, in point of nativity, is not an American flower, either. It is botanically the Leucanthemum vulgare of Gray, the Chrysanthemum leucanthemum of Linnaeus, the "whiteweed" of the New England farmer—but just "the daisy" of the American millions. And the fact that it is of European origin does not seem to bar the flower from being regarded as American by our people.

At five it bursts into such lovely blooms that the five years of waiting are all forgotten.

Here is a pot of Seedling Cattleya that are six months old, or about the size of two radish leaves a week after planting. Literally thousands of seeds are planted to get a few hundred worthy plants.

After one year the tiny seedling has grown only to this size.

At the end of three years the plant begins to look more its part.

When four years have passed, it has quite asserted itself and is full of promise.

---

Once a year about this time I always get an interesting little catalogue from Alessandro Squadrilli, of Naples, Italy. It is especially interesting because it always features novelties, some of which are familiar to me, while others are as yet unknown. Among the newer plants which Mr. Squadrilli thinks much of are several of the sunflowers, which are being grown here, and the double flowering cosmos. By the way, one of the florists near Boston has been growing cosmos of this type the past season and has found them quite acceptable as cut flowers for the trade.

Mr. Squadrilli is introducing Thunbergia Gibsoni, which is said to have flowers double the size of Thunbergia alata. It is to be used apparently as a greenhouse climber, and originated in tropical Africa. Some years ago this Italian grower introduced Pentstemon isophyllus from Mexico, and has crossed it with Pentstemon gentianoides, giving a hybrid with very large flowers in rich colors.

Apparently much less attention has been paid to Bellis perennis in this country than abroad, for I have never seen here flowers of any such size as those which Mr. Squadrilli advertises. He has a pink quilled mammoth daisy, with light pink blooms and rigid stems, which is recommended for cut flower work. In Bellis perennis tubulosa flore pleno, he has a variety pro-

# FANCY DAGGER FERNS

**Boston, Mass.**

ducing daisies of many different shades, running from the blood red to delicate pink. As the perfect flowers do not produce any seed, it is necessary to leave in the bed some plants with one-half double and some three-quarters double flowers.

Because of the late fall there were roses in my garden until the first of November, and I was interested to note those which seemed most persistent in their late flowering habits. I think the very last rose to go was the new Dutch Grootendorst, a cross between the Wichuriana and the Baby Rambler. The pink Killarney also tarried very late, and so did the Frau Karl Druschki.

There were other roses, too, that braved the autumn winds. Perhaps we might have expected such heroism from General McArthur, with its military name and brilliant red hue, but it was even more satisfying to find the dainty Lady Alice Stanley and Mrs. Aaron Ward keeping him company. The last rose of summer may lack something of gorgeousness and perfume. It may look a little pinched and weak, and yet we say with the poet:

"A rose it is, though least and last of all,
A rose to me, though at the fall."

In New England had been a most unusual fall in that the frosts delayed their coming (at least in many sections) for many weeks later than the date of their usual visits. So while the leaves were dropping from the trees we found our dahlias, our gladioli and our cosmos still blooming happily and freely. In such a season the Lady Lenox cosmos has an opportunity to display its charms. All too often it is cut down before it has an opportunity to bloom, but this year its nodding pink and white flowers topped the tall and feathery plants like a delicate cloud.

### THE CHRISTMAS MARKET.

On the sixth, seventh and eighth of December, Horticultural Hall, Boston, will be astir with the gay greetings amidst Christmas greens, of the Market of the Woman's National Farm and Garden Association, where country producer and city buyer meet in friendly exchange and intercourse.

The market shows the sale of work done winter evenings in many a lonely farmhouse. At our country fairs this season where samples of our goods have been exhibited we have learned how the Farm and Garden Association can reach the women in the mountains of Kentucky and in their far western homes.

The spirit of today is loving service and co-operation, when we are told that a woman has good eggs to sell we ask her to send some to our Christmas Market. If she makes good cheese we can also dispose of that. Does someone want a delicious mince pie for a Christmas dinner, we can have it made and sampled, for we have good cooks among the consignors to our Market.

The picture shows our tent at the Waltham Fair for Middlesex County, where we served waffles, coffee, cider and milk to those who came to hear about our Christmas Market. We had many visitors who left our tent with more interest in their needlework, gardens and farms, for we sat at the tables with them and told them of the opportunities we had to offer for the sale of their productions. How interesting it is to do good work along any line if there are those who care to get what we produce. Come and buy at our Christmas Market.

Sault Ste. Marie, Michigan,
October 29, 1921.

F. H. Lemon & Co.,
Richmond, Ind.

Dear Sirs:

I have been anxiously waiting for some of your Mildew cure which you spoke of when we were riding out to Miller Bros. while at Toronto. Please send me ten pounds at once, and directions if any particular way of applying.

Also please increase my order for the Angelus to 250 plants. I went to Tale's the following morning and saw it in all its glory. It certainly looked all that could be expected of a rose. Had Mr. Tale give me a bloom to take with me. We still have it and looks pretty good after 18 days.

Yours truly,

(Signed) WILLIAM E. F. WEBBER.

White with cream tinted center. A big rounded rose, like Premier in form but with higher center; very lasting, and fragrant. Foliage dark green, disease-resistant. A vigorous, upright grower and free in bloom. Resembles Kaiserin Augusta, but it blooms freely in Winter and is a good keeper. Was awarded Certificate of Merit of the Chicago Flower Growers' Association in 1921; also Silver Medal of the New York Flower Show, Spring 1921.

## HOW DO YOU WANT YOUR ORDER SHIPPED?

Frequently our customers and in fact everybody's customers complain that wrong judgment is used in shipping their orders. It is in the mutual interest of the seller and the buyer to ship just as the buyer wants and when specific instructions are not given by the buyer we and other shippers endeavor to use our "BEST JUDGMENT." Still, it is amazing how frequently our (the shippers) judgment is not the judgment of the customers.

The methods, of course, refer to freight, boat or express. No seed merchant that we know of owns any stock in the express companies and his own shipments coming in to him often make him think bad things, if he doesn't say them, when he has to pay big charges for expressage. These charges are high enough and we have no desire to enrich the express company. It is true freight and boat charges are much higher than they formerly were, so that no matter what method is used, it is a factor in determining the cost of merchandise.

In order to be fair to yourself and the merchant with whom you deal, always specify each time you order from out of town points by mail or from salesmen just how you want your goods shipped, taking of course into consideration the nature thereof, the distance from which they must come and in how great need you are for them, and when you do not specify how to ship, please don't be too hard in your remarks about your dealer if his "best judgment" does not select the forwarding method you would have chosen.

Remember, it is in his best interests to serve you well, he needs your influence as well as your business and you can render him as well as yourself a real service if you will co-operate.—A Prominent Seed House.

## AMERICAN ORCHID SOCIETY

At a recent meeting of the trustees of the American Orchid Society in New York it was voted that the Society's premier award should be a gold medal. It was decided also that only experts should be engaged as judges at the orchid shows. Oakes Ames, of Massachusetts, long famous as an orchid enthusiast, submitted a list of native orchids which is probably the most complete ever made. It is probable that the Society will issue a book on native orchids, a book which will be, no doubt, of rare value and great interest.

**Says Sam: Too many young florists are speaking of perspiration with the emphasis on the "Shun."**

---

**To Stick Or Be Stuck.** There is a motto well worth considering in any trade where co-operation is a factor. It is "Together we stick, divided we're stuck." In one of his articles in the Country Gentleman, Stewart Blythe tells about the reputed disinclination of farmers to work in double harness. He says that a visitor to an insane asylum found a somewhat undersized keeper in charge of twenty or more husky inmates.

"Wouldn't it be possible for them to overpower you?" he was asked. "Oh, yes," he replied, "but you see they can't get together. They are crazy." Perhaps the story applies to florists as well as to farmers. Now we do not mean to insinuate by this that the florists are in any way mentally deficient. That would be hitting too near home. There does, however, seem to be a difficulty in getting together, especially in spots.

We feel, however, that, after all, this difficulty is more imaginary than real. Many misunderstandings have developed between growers and retailers, but they are misunderstandings which can be wiped out by the exercise of a little diplomacy on each side, and a manifest willingness to make concessions in the interests of the common good.

There are mighty few differences, we are sure, between the members of any branch of the trade, which cannot be erased by a frank and friendly conference between representatives of these branches. It is difficult to accomplish very much at a mass meeting or at any large gathering, but when half a dozen intelligent representatives sit down in a business conference they can marshal the facts quickly and can usually reach a decision which will be satisfactory to all parties.

We do not believe that the present situation in Boston will last. Whatever may be said and done, in the long run co-operation must win, and it is not to be believed that growers and retailers cannot adopt a working basis on which to arrange such matters as co-operative advertising, the handling of gluts and the settlement of market conditions.

There is a charge that retailers deliberately wait until the afternoon before buying, with the expectation of forcing prices down. To meet this, some of the more prominent retailers say frankly, "Why not close the market at noon or earlier so that all buying must be done before that hour?"

The growers say sometimes that the retailers expect them to spend their money while they, the retailers, reap the benefit. The latter say in rebuttal that they are perfectly willing to pool an advertising appropriation with that of the growers if they are consulted as to when and how the money should be used. The time is coming, we feel sure, when at least a majority of growers and a majority of retailers will co-operate, at least to the extent of obtaining greater publicity and wiping out the evils which are admitted on both sides to exist.

---

**Helping The Customer.** Should a nurseryman give advice and information to his customer? This is a question one of the English trade papers has been discussing. It seems that some of the nurserymen have a liking to emulate the oyster, and keep their mouths closed, on the ground that there is no sense in teaching their trade to their customers. Their argument seems to be that if the customers learn how to grow plants, instead of killing them, they will not need to buy so many.

Now the confession must be made that on this side of the water, too, there are nurserymen and florists who feel that they shouldn't give any gratuitous information about the care of plants and flowers to the people who buy their goods. They say, and perhaps with some degree of truth, that in no other trade is a man expected to do this. Still, we believe, that the attitude is all wrong, and we are justified in our belief by the fact that some of the most successful nurserymen go to extraordinary pains to give their clients all the information possible about the best way to select plants and care for the material they buy.

The more success people have in growing things, the greater their interest becomes. If they make a small beginning and lose what they plant they lose their interest at the same time. If, on the other hand, what they plant thrives and grows, it inspires them with a desire for more.

# REGARDING PRISCILLA!

**The Montgomery Company** and **A. N. Pierson, Inc.,** believing that **Priscilla** would make good as a forcing Rose, and having no desire to sell to the **Rose growers of America** a Rose inferior to those varieties already in commerce, placed **Priscilla** with the best Rose growers of the country for trial.

On this date, November 10th, there has been expressed by those who handle it and who are growing it, the opinion that the color is not satisfactory and that the flower lacks substance to such an extent that **Priscilla** will not be a desirable Rose to grow. It is regretted by ourselves as introducers of Roses that this is the case but we feel more satisfaction than regret, due to the fact that the general test given **Priscilla** has disclosed this weakness which might have been overlooked were the Rose not placed in the hands of this unprejudiced jury of Rose men.

**Priscilla will not be offered to the trade** and is hereby formally withdrawn from sale. Over 150,000 have been sold in advance, but these orders are hereby cancelled. Both the **Montgomery Company** and **A. N. Pierson, Inc.,** are satisfied that the judgment on **Priscilla** is fair and that honesty of purpose and fairness of business methods justify this withdrawal of **Priscilla.**

Signed { A. N. PIERSON, Inc., Cromwell, Conn.
THE MONTGOMERY CO., Hadley, Mass.

## BUSY DAYS IN WASHINGTON

There have seldom been busier days for the florists at Washington than those which preceded Armistice Day. Gude Brothers prepared fifty wreaths representing every state in the Union, Alaska and the District of Columbia, for the unknown soldier. These wreaths were all ready and placed in position by 8 o'clock on the morning of the 10th. Altogether, the firm made 150 pieces for Armistice Day. At the opening of the disarmament conference a large basket of American Beauty roses was delivered in the name of the Society of American Florists and Ornamental Horticulturists.

To The Trade—

Thos. F. Galvin, himself, will give your orders his personal attention at his son's store.

BOSTON, MASS.

## George Watson's Corner

"You in your small corner and me in mine."

David Rust reports the Chrysanthemum Show a success and his Society is satisfied that the Academy of Music is a good building to hold it in next year. One improvement suggested is to cut out the tea-room function in the foyer so as to give more room for exhibits of cut flowers, etc. While more room can be had at the Armories, the public is hard to attract to points away from the center of the city.

Leo Niessen thinks that giving flowers to charitable institutions is a mistake. Better give them the money. At the price the vendors sell them, the flowers would bring the grower twice as much at wholesale; so the grower is not only that much out of pocket, but it hurts the business.

George Edmondson got the laugh on yours truly the other day. He asked me to step into the Chevrolet and take a little ride. In an unguarded, thoughtless moment, I did so. We drove out the Parkway and through the Wissahickon Drive to Chestnut Hill, and back. Ran into one car, and scared about five thousand others, but escaped jail by the skin of our teeth. Got back to Broad Street station, all safe. So I take it all back—what I've been thinking, about that hundred-mile-an-hour car being only a tin lizzie. She's some car, all right—that Chevrolet! But George won't get me into her again. I'm too nervous. No, sirree!

GEORGE N. SMITH
Wellesley Hills, Mass.

eight hundred dollars, and the delegation that came along with this splendid display of fraternity did the personal honors and presentations in most fitting style. Here in Philadelphia we had the pleasure of meeting Mr. Stevens on his way back after superintending the floral end at Washington. He had met Mr. Pennock in London before starting over. Mr. Fancourt got out his flivver, and showed him a few of the sights of our fair city. He was much impressed with the flower stores—especially that of the Battles organization—also with the Wissahickon Drive, and the fine points.

---

The outlook for Thanksgiving week is fine at this writing (Nov. 19). Prices are more reasonable than a year ago, and orders are coming in from all points in encouraging style. One of the features is the demand for Cattleyas. There were very few in sight. Then, they took the fancy Cypripediums, such as Harefield Hall, and others of that type. Now, even these, and the less wanted Oncidiums, are mostly taken up, and the orchid market is throwing up its hands and saying "nothing doing." On high-toned roses, chrysanthemums, and carnations, the demand was also very good; but could be supplied in one way or another, and at some kind of a price. But on orchids—no matter what the price—the goods were not there! If it's as bad as that for Thanksgiving, what will it be when Christmas comes around!

---

Jack Mills is still on the warpath, and he says: "George, it's simply wonderful how they are anteing up. Your little story about them getting their checkbook ready was a great help. It takes a good deal of talking to make some of them understand. That's the big thing—to make them understand. Good Lord! It isn't the money! No, sir, if you can only make them understand—out comes the checkbook, right away." So Mark is still hard at it, and all who are in favor of the great slogan, "Say it with flowers," not only help the business but help themselves when they hand out their little check to Mark to help spread the good news. Mark works for nothing. If the other fellows don't work, they ought at least cough up their little share.

---

Mr. Pennock's speech to members of the Chrysanthemum Society of America at their annual gathering in Chicago, Nov. 16 and 17, was certainly a good one. The points he brought out are of great importance and if properly followed up will be of great benefit all along the line.

## FLORISTS SHOULD PROTEST

Dear Sir:—

On November the 15th the following bill was introduced in the Congress of the United States, and reported favorably by the Interstate Commerce Commission.

A BILL

Relating to Special Delivery of Mail Matter

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Postmaster General is hereby authorized, in his discretion, to restrict the application of the special delivery stamp or equivalent stamps and the special service rendered in connection therewith to mail matter of the first class.

This would either mean that the thousands of people who receive packages from florists daily by special delivery parcel post would be denied the privilege of the mail or we would have to get a special privilege. Don't you think it wise to have every florist in the United States to write to his congressman not to disturb the special delivery business which the florists and druggists now enjoy. To say nothing of the other interests we are not so interested in.

Very truly yours,
WM. F. GUDE,
Washington Representative of the S. A. F. & O. H.

---

## NEW ENGLAND NURSERIES LAYING OUT BIG ESTATE

There is under construction in West Newton on the estate of Mr. G. F. Redmond, a garden that bids fair to become one of the most interesting and beautiful of all the many on the large estates west of Boston. Under the direction of the New England Nurseries Company a labyrinth covering more than ten thousand square feet, containing more than a quarter of mile of hidden walks, and planted with upwards of 800 large evergreen trees has already been completed, while the work of excavating for a large artificial lake with an interesting miniature island reached over quaint arched bridges is now under construction.

Mr. Redmond, who has recently acquired a tract of undeveloped land adjacent to his already spacious and attractive grounds, is now transforming into pleasing rolling lawns what formerly was an area attractive in its natural beauty, but unfinished. Overlooked from the residence, and nestled among stately trees, is to be erected a sunken garden. Hundreds of rare evergreens have already been selected, and when completed with its statuary and carefully studied color scheme in dwarf plants, the garden will be one to be enjoyed by all who are fortunate enough to visit the estate.

Winding walks, leading through delightful valleys and over hillsides bordered with masses of rhododendrons, mountain laurels and hardy azaleas, will take one over seemingly interminable distance through the grounds where one pleasant surprise is offered after another as the traveler rambles on. In motoring westward from Boston over Commonwealth Avenue beautiful estates are seen all along the journey, but when Mr. Redmond's estate is reached one can not but slow up, stop, look and admire.

### GREENHOUSE NOZZLE

The new Manaway greenhouse nozzle is a decided advance over any greenhouse nozzle heretofore made. By its peculiar construction the side spray is thrown out which applies the water evenly from the pipe outward. Our long-throw nozzles cover a space up to 18 feet from the pipe. We can supply nozzles that will cover any space desired. If you will advise us under what pressure your system operates and the width of space you desire to cover, we will mail without charge a sample nozzle. C. W. SKINNER, Newfield, N. J.

### END NOZZLE

Every one who is using the Manaway System without the end nozzles can now fit their lines with our new 3-outlet end nozzles which take the place of not only the regular nozzle but also furnish 2 streams, one 4 and the other 8 foot out of true. One of these nozzles placed at the beginning or end of the line has the effect of lengthening the line 8 feet at each end. These nozzles can also be used in other systems which use a large nozzle. The price is 15c each, postpaid. C. W. SKINNER, Newfield, N. J.

Mastica is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass than occur with hard putty. Last longer than putty. Easy to apply.

SKINNER SYSTEM OF IRRIGATION

*When writing to advertisers kindly mention HORTICULTURE*

From the ruins of Howard's first house, rose this top-notch one shown above, of our latest construction; 36 feet wide and 219 feet long. Howard ships his carnations to both the Boston and New York markets.

# Howard of Milford, Mass.

A quarter of a century ago, W. D. Howard broke ground for his first greenhouse at Milford, Mass. It was 25x150 feet.

Old Father Time played such merry hob with it, that this summer, down it came and up went a full fledged Hitchings house.

Unless all signs fail, that house will still be staunch and strong when Mr. Howard's son, Ray, is a grand-daddy. Another Hitchings house was also erected this year to commemorate the event of Mr. Howard as President of the A. C. S.

Keeping it company, will be two other Hitchings houses, and nobody knows how many more besides.

Again, unless all signs fail, Ray being a true son of his Dad, and a regular Go-Getter, you'll hear some day, of the firm of Howard & Son, and hear folks say; "they are one of New England's finest growers and most wide awake business men."

Which, of course, means they will build Hitchings houses; which in turn makes us decidedly happy in having the Howards as our friends.

You know some hard-as-nails business men say "there is no sentiment in business."

I say there is not much business that ever amounts to much, over a period of years, if it lacks sentiment.

If, having a feeling of genuine friendliness for our customers is sentiment, then we gladly admit being decidedly sentimental.

Furthermore we go anywhere for business.

Or to talk business.

### ICE STORM EFFECTS

#### Nurserymen Lose, But Not So Heavily as at First Feared

The ice storm which worked much havoc throughout the northern part of Massachusetts naturally hit some of the nurserymen pretty hard. At the same time, the damage was not as great as was at first feared, as was shown when the ice had melted off. There was a scene of devastation in many nurseries. As Winthrop H. Thurlow, of the Cherry Hill Nurseries at West Newbury, Mass., expressed it, the trees looked as though they had been under shell fire, limbs six or eight inches in diameter being broken short off. Many of the fine old trees at this nursery were broken, some so badly that years will be required for them to grow up again. Elms, sugar maples and even hickories lost limbs up to twelve inches in diameter. Small twigs a quarter of an inch in diameter were coated over until the ice was two inches thick. An interesting feature of the storm was the fact that the evergreens were not broken down nearly as much as the deciduous trees. Fortunately the large spruce hedges at Cherry Hill, which are famous throughout the country, were practically unharmed.

At the Eastern Nurseries in Hollis-ton, Mass., where it was feared the loss would be heavy, there was little damage to nursery stock, save that a few rhododendrons in the woods were injured by falling branches. Large trees on the place, however, especially some fine old elms, were badly wrecked.

### THE ICE STORM

On the twenty-seventh of November a dear little girl asked me to go with her to fairyland. She told me to go into my garden at nine o'clock in the evening, and there I would stumble over something and so find the entrance to the fairies' grotto. I always loved the tiny folk from the time I was a little child and felt if I were very good the fairies' spells would bring my wooden horses into life. I knew they danced with the bumble-bees and drank dew out of the acorn cups. So I was glad to go to fairyland.

But I mistook my little friend's directions, for at twelve o'clock that night I was among the giants. They were playing ninepins with out beautiful trees, breaking them into kindling wood, throwing them down on the ground with a crash, crash, crash. The next morning we looked for our trees, which Mother Ceres and Father Time had for years been cherishing, telling the little birds to nest in their branches and the little squirrels to run from bough to bough with a glad alacrity of life, and they were gone. The pines had lost their branches, the elms looked as if the giants had borrowed bombs from some inimical power, the maples and oaks were cleft in two. The beauty of our woods had gone. No, the Norway spruce had braved the blast, the sentinel pines, though reft of branches, still towered above the gray stone wall, the cedars and birches were bent to the ground but would spring again to life, and some faithful old appletrees were lifting up their boughs with a promise of again bearing fruit for us. Many of our dear friends among the trees had gone, never to be replaced—but from under the pine needles I heard the whisper of the flowers: "Be not forlorn; we, too, will miss the beautiful trees, but we will blossom brighter for you next year, for the fall of the trees will let the sunshine in to warm us under these brown needles. Mother Ceres and her daughter, Proserpine, will make pretty, gay dresses for us to dance in at the fairies' ball, Pan will come again to the woods and Orpheus will play his music there."

M. R. CASE.

Hillcrest Gardens, Weston.
December 2, 1921.

## THE TALK OF THE TRADE

Many times we hear the question asked as to how much new glass is being erected or being planned for the near future. I believe it is a fact that there is more activity in that line than has been shown for a number of years past, or at least since the beginning of the war. I think it is true, however, that all the building in sight through New York State and New England as a total is not enough to make any appreciable effect on the market. It certainly cannot come near at all to taking care of the old houses being closed down on account of being too expensive to operate, and there is more of that class than one realizes. Also the natural and normal increase in new flower buyers must be considered. This does not apply so much to the larger flower markets but to the smaller or medium size towns and cities in New England and that spreading out of trade easily can take care of increased output.

Another thing in connection with this question of supply is a point which is continually coming to my notice. That is the matter of production. Is not production now below the normal? I believe that it is. Of course, the majority of ranges of glass are up to the peak of production or near to it, but I also see a lot of places with more waste space than usual or more bench area not producing all it should.

I am strengthened in my conviction stated four or five weeks ago that stock will be short and it is right now on the way to that point.

---

The way the growers around Buffalo, Rochester, Syracuse and other New York State cities grow the Cleveland Cherry and its various sports is all to their credit. They certainly know how to finish them in the size that sells well and gives the best results. Not 6" and 7" pot stock with plants all the way from the size of a peck measure to a bushel basket, but fine dwarf compact plants, mostly in 4"-4½" and some 5" pots and well loaded with berries. It is not a difficult plant to do right and I never could see why so many growers load themselves up with an over-supply of great coarse-looking plants which are hard to handle, take a lot of room and move slower than the small plants.

---

I don't know of a Pompon chrysanthemum that seems to give the same good results as the Pompon Anemone Sunshine, rich yellow in color, finely formed flowers, a good grower, easy to handle and with a finish to the flower that can hardly be beaten. I noticed in particular some excellent stock of this variety at David Scott's greenhouses in Corfu, N. Y., and another fine lot was grown by Hugo Teute, Syracuse, N. Y. Mr. Teute grew a block of them, four to six blooms to the plant, disbudded, one flower to the stem. They were fine. Try it out for something a little different.

---

It is welcome news to many florists that the Joy Floral Co.'s new carnation, Natalie, is to be sent out season of 1923. I predict for this variety a record breaking sale. Here's hoping the introducers will have a big block of stock to work on.

As is the case with the new white, T. C. Joy, Patten & Co., of Tewksbury, will assist in the introduction. Carnation growers in general are ready to welcome Natalie as one to take the place of Ward. It has all points in its favor, color, stem, habit and, a very important point, productiveness.

The Late M. A. Patten

The greenhouses of Gibbs Bros., Holyoke street, Lynn, Mass., are filled with well grown stock. While not growers of extra large quantities of pot plants, they do stand right up with the leaders. In two lines in particular they shine. They are Cyclamen and Melior and Peterson begonias. A house of carnations is also in fine shape and I think their Hope Henshaw is as good if not a little better than any I have seen anywhere. It evidently likes their treatment.

William Sim, of Cliftondale, Mass., is one of the few growers in the north growing the carnation Lassie, and I have been interested in watching this variety since early summer. The color is good, a little darker than Ward, average commercial size, good stem and, best of all, it grows like a weed. Mr. Sim says he hasn't a carnation on his place which will produce more flowers than Lassie. It sells well in the wholesale market and should be a money maker for the florist who retails his own stock.

The first shipment of German Valley pips has just arrived via Holland. In spite of the drought in Europe the quality is equally as good as last season, but the price considerably less. The first shipments direct from Germany will arrive during the next two weeks.

The first shipments of English Manetti stocks are now en route. The drought in England continues, and the ground is so hard that most shippers prefer to await rain before digging. Prices are moderate, with no present fear of a shortage.

Shipments of Phoenix Roebelenii seeds are now en route, the first substantial shipments since the war began—but it will likely be late in December before they arrive. The new crop of Cocos Weddeliana seeds is now in.

Calla Elliottiana from the west is now arriving on the market in New York. The California shippers still have much to learn with regard to packing and grading, also with regard to the general execution of orders.

### NO BULB SURPLUS

Among the arrivals per steamer "Noordam" at New York recently were Mr. C. Westerbeek and J. P. Schmal of The General Bulb Company. Mr. Westerbeek reports no surplus of bulbs after the shipping season and tells us that the fall planting has been accomplished under ideal weather conditions.

## WHAT'S DOING IN BOSTON

### EVANS GREENHOUSES SOLD

Charles Evans, of Watertown, who has been in the market for 25 years, has leased his greenhouses to Thomas Coffey, who will use them for vegetable growing. Although Mr. Evans is retiring from the greenhouse business, he will continue to grow out-door stock, making a specialty of Peonies and Gypsophila. Mr. Evans will be missed in the market, but his friends believe that he has earned the right to take life a little easier.

### AN UNUSUAL DECORATION

Sidney Hoffman was recently called upon to put up a very unusual decoration in the Copley Plaza Hotel. The occasion was the wedding anniversary of the manager. As the latter had just returned from a hunting trip, it was decided to put up a replica of a woods camp. Mr. Hoffman secured a number of very tall evergreens for a background. Then he had a carpenter make a rough frame showing the front of the cabin. The frame was filled in with paper boards and painted over to resemble an old camp. Some poles across what looked like stumps carried a weight of pheasants, partridges and other game, while close to the hut a wild deer was suspended. A few tree ferns on the stumps added to the general lay-out, and the floor was covered with pine needles and cones, which were kicked about by the guests just as would be the case in the woods.

While the work was done quickly, the result was so effective that it aroused a great amount of comment and brought Mr. Hoffman many congratulations.

### CARTERS' PLANS

The statement has been published that Carters' Tested Seeds, Inc., was to close its Boston office. This is not true. While the headquarters have been moved to the New York office, the store on South Market street, Boston, is to be maintained. It will be carried on mostly for retail business, as the Carters have built up a fine trade in New England. Mr. W. J. Collins will spend most of his time in New York, however, instead of in Boston. The New York store of the Thorburn Co., which has been taken over by the Carter people, is being remodeled, many changes being made. There is to be a new golf department, among other things, and much attention will be paid to grass seeds for golf courses.

### MARCELLUS A. PATTEN DEAD

#### Passes Away at His Home in Florida

Marcellus A. Patten died Monday, December 5, at his home in Lakeland, Fla. Mr. Patten was a former president of the American Carnation Society and one of the best known carnation growers in the country. For a great many years he was located at Tewksbury, Mass., and only recently sold the business to his son, Harold Joseph Patten, who now carries it on.

Mr. Patten retired from active business several years ago and bought his Florida home where he has spent his winters. Two weeks ago he fell, but apparently had recovered from the injury, when stomach and bowel trouble intervened and he passed away. With him was his wife, Genevieve Susan Patten. Besides his son Harold, he also leaves another son, Wilbur Allen Patten, who is superintendent of the United States Experiment Station at Brookville, Fla.

Mr. Patten was a native of Lowell, Mass., having been born in that city in 1849. His first experience in floriculture was with W. C. Strong & Co., Brighton, Mass., and later with Weil and Bros., Cambridge, after which he went into the florist business on his own account in Lowell. Subsequently he disposed of his Lowell interests and built a range of houses at Tewksbury, where his abilities as a carnation grower soon commanded wide attention at the exhibitions of the Massachusetts Horticultural Society, the American Carnation Society, and the Gardeners' and Florists' Club of Boston, with all of which organizations he had long been identified. His flowers won high honors and he was accounted one of the most skilful carnation growers for the Boston Market.

In 1908 Mr. Patten was elected president of the American Carnation Society. Fitted by nature with the intellectual gifts and manly attributes, and by experience with the skill and practical knowledge which go to make up the ideal chief officer of such an institution, Mr. Patten brought to the office that dignity, character and fitness which made his term a notable one.

### TRIBUTE FROM PRES. HOWARD

I have known Mr. Patten for the past 25 years and more, having met him at the conventions of the American Carnation Society. He was well liked, always willing to attend the meetings and to carry exhibits, and to

do all that he could for it. He was very well known through the west and middle west, and will be missed very much.

W. D. HOWARD,
President, American Carnation Society.

### TRIBUTE FROM S. J. GODDARD

Our dear friend, Patten, has passed on to his reward.

How we shall miss his brotherly love and affection, his counsel and companionship, loved and respected by all with whom he was acquainted.

The memory of having been one of his many friends will be a lasting pleasure that time will only increase.

S. J. GODDARD.

### FUNERAL OF MR. PATTEN

The body of the late M. A. Patten was brought from Florida to his home in Tewksbury, Mass., for burial. The funeral was held at 2 o'clock, Thursday afternoon, and was attended by a great number of friends in the trade.

### CHRISTMAS GREENS

It is reported that there is a shortage of Princess Pine in the Pennsylvania mountain section from which the florists receive much of their supply for Christmas and the holiday season. It seems that there have been heavy early snow falls which cut the harvest season short. Princess Pine is harvested as soon as a good frost has cured the foliage and put it in condition for shipping. If snows come soon after, there is but little time to gather the crop.

The shortage of Princess Pine will not be felt so seriously as would have been the case a few years ago. In some parts of the country, at least, it is being used to a very much less extent. Mr. Charles Robinson, of the Henry Robinson Co., of Boston, said recently: "We do not use a great amount of Princess Pine here in New England compared with former days. This green has been replaced to a very large extent by boxwood, great quantities of which are sent to us from Virginia. Boxwood makes an ideal green for holiday decorations, being satisfactory in color and texture. Prices for Boxwood range a trifle higher than was the case last season. It is the same with holly, of which a great amount is used in the north. Some holly coming in from the far south is well berried, but on the whole berried stock is much harder to get than usual.

VAN GINHOVEN & CO.

NEW YORK 117 W. 28th Street | PHILADELPHIA 1608-1620 Ludlow St | BALTIMORE Franklin, St. Paul Sts. | WASHINGTON 1216 H Street

### TRYING TO GET TOGETHER

A determined effort is being made to bring the growers and retailers of Boston together in a plan which shall do away with selling at retail in wholesale markets and inaugurate co-operative advertising. Meetings of the different associations are being held and some sort of agreement is expected soon. The growers have suspended advertising for the time being, but much retail selling is going on in the market.

The retailers have passed the following resolutions:

#### THE RESOLUTIONS

WHEREAS the Boston Wholesale markets are opened to the public for retailing flowers:

WHEREAS said action has been duly authorized by the directors of said markets:

WHEREAS said action is ruinous to the retail flower trade of New England and a menace to the entire structure commercializing flowers,—both morally and financially.

RESOLVED, therefore: That the New England Retail Florists' Association collectively, and its members individually, protest such action of directors of said markets as against the principles of justice and against all interests of the flower business represented by the growers, wholesalers and retailers.

RESOLVED, therefore: That a committee be empowered to represent this organization, whose members pledge full support to take immediate action to remove this menace.

NEW ENGLAND RETAIL FLORISTS' ASSN.
CHARLES F. BOYLE, President.
ELIJAH S. Gorney, Secy.

Committee: John O'Brien, chairman; William Penn, Carl Becker, Charles F. Boyle, Sydney Hoffman.

### FRANK L. BUDLONG DEAD

#### Famous Rose Grower Passes Away Suddenly While in Florida

Mr. Frank L. Budlong, the famous rose grower and greenhouse man of Rhode Island, passed away suddenly Tuesday night at Fort Meyers, Fla., where he was spending the winter. Mr. Budlong was 71 years old. He built up near Providence one of the largest establishments in the country. While he has not been actively engaged in business of late years, he never lost his interest in flowers, and especially roses. The body will be brought north for burial, the funeral being at his late home in Auburn, R. I., Sunday afternoon.

### THE MARKET

The flower market is extremely dull and prices are lower than they were last week. It is hard to get four cents for carnations, while roses are selling from six to sixteen. Some of the salesmen think that the slump is due in part to direct buying which has been taken up by some of the retailers.

HENRY PENN'S CHRISTMAS MESSAGE:

This year, more than ever, have an outlined advertising program to be used in the local newspapers to stimulate more sales. More energy is being directed in this channel by all other lines. Why shouldn't flowers receive the same support as all other commodities?

Penn The Florist

# ADVERTISING AND SELLING

Sustained advertising which is effective embraces many methods. One of them embodies the use of cards of some kind to be placed in boxes of flowers for customers. A particularly attractive card goes out from the Houghton Gorney Flower Shop in Boston. The card is embellished with a very attractive border, including a picture of the famous spire of the Park Street Church, which Mr. Gorney has come to use as a trade mark. The reading matter on the card is as follows:

**To All Recipients of Houghton Gorney Flowers:**

Our way of showing appreciation of an order is not merely thanking the customer, but trying to fill the order better than was expected.

We are always careful to check over and inspect every order before shipping, but regardless of the fact that we are operating the best inspection system we can invent, errors will occur in a business which handles hundreds of orders daily, as we do.

We therefore suggest that you examine these flowers as soon as received and make sure that they are satisfactory. If not, notify us at once, as we desire every recipient of Houghton Gorney flowers to be a little more than satisfied.

It is this desire to serve that has built our business.

---

In a recent issue Horticulture published a picture of Henry Michell's attractive bulb window. Mr. Philip Freud, display manager for the Michell Co., has been telling a writer in the Seed World some of the secrets of his success in window decoration. Some of the hints which he gives are as follows:

"Make a special point of good backgrounds that can be used again.

"Have enough high-grade accesories or 'props' that will harmonize with the theme being staged.

"'Stand in' with department stores, so that they will loan their lay-figures and other articles needed.

"A good spot-lighting system helps in the windows.

"Don't use plain signs in the window by themselves, or without introducing them in an attractive way.

"Seasonable displays are the most result-producing.

"Life-size lay-figures are particularly effective."

Asked what he considers the essentials of a good show-window arrangement for the seed business, Mr. Freud answered in his own way:

"In the first place I am a firm believer in good backgrounds; but they must be very good. For many of my display themes I use scenes painted especially for Michell's by a skilled scene painter. Nobody would be attracted to a window containing plain seeds or bulbs, so it is necessary to have something not only attractive, but in harmony with the idea of seeds and bulbs and in keeping with the season for which they are to be planted. Then the 'props,' or accessories used in the staging of a scene must also be in keeping with the central idea.

"I have learned that, as a rule, the public will not read a plain sign in a show window attentively when it merely stands by itself, carrying out the function of a label, or announcement. It simply doesn't stir their interest effectively. A sign must be presented in an enticing way. One of the most effective ways, I have found, is to place it in the hand of a lay-figure that fits into the scheme of things. Another equally result-producing method is to fasten it to, or hang it upon, some property used in staging the scene, where it would be most natural to ap-

pear. I am much in favor of the use of lay-figures, or dummies, wherever they can be used to advantage as 'acting out' the scene. Everyone likes to see a 'show' and the more lifelike it can be made, the more interest in it is apparent. If a scene is foreign, which is readily possible in our business, so much the better; foreigners, their ways and their merchandise always are entertaining to the public.

"I have just said that the more lifelike the 'show,' the more interest is evidenced in it. This is one reason why we make use, to a large extent, of life-size lay-figures. We have, for instance, two very handsome, life-size manikins from Japan, both figures of women. The pair cost the house $375 to import, and the duty on them amounted to $107, but the expense was worth while. They can be used over and over again, in many guises. This, to a large extent, is true of the painted backgrounds, just as backgrounds, 'grips,' 'flies' and 'wings' are repeatedly used in the theater

Charles D. Adams, the proprietor of a greenhouse at Cherokee, Ia., died recently at the age of 67.

## DESCRIBES MANY ROSES

### S. S. Pennock Reports on a Visit to the Sparrieshoop Rose Fields

By S. S. Pennock

(Continued from November 25.)

S. S. Pennock H. T. (Mr. Kordes' description.) Seedling of Lieutenant Chaure's Mrs. George Shawyer. The bud comes pointed long and thick. Opens well in every weather to a big, high-centred, well-shaped flower. Its keeping qualities are at least those of Shawyer, but the color is clear pink with intense apricot shadings. As full as Shawyer, but freer, we counted 6-10 single stemmed good flowers on the plants at the same time—as they stood in the field as against Shawyer 4-6. The flower always stands single on very long stiff stems. Good in Spring under glass. Probably a good forcer also. Kordes seedling to be distributed in fall 1922.

Wilhelm Kordes. Pernettiana. Seedling of Adolf Koschel & Gorgeous. The bud comes a long, pointed, almost always single. Bud color is a little yellow with scarlet red. The flower is medium sized, but of ideal shape, and opens in the worst of weather. Color difficult to describe. In cool weather glowing scarlet with gold yellow centre—in hot sunny weather golden yellow with deep red stripes and veins. Perhaps up to now the most distinct of all the bicolored roses. Distribution Fall 1922. No mildew or black spot.

Camillo Schneider. A seedling of Lieutenant Chaure and Comte G. de Rochennor. Bud thick, pointed, dark red. Opens to a well built medium sized clear crimson colored flower. Good in every weather. Will be much admired on account of its well formed, clear colored, erect borne, freely produced flowers. Makes strong healthy plants. Fall 1922.

Hortulanus Fiet (verschuren) Pernettiana. A wonderful rose. Bud thick, pointed, mostly white opening to a splendid clear massive golden yellow. Ideal shape and very strong petals make it a rose that is perhaps one of the most admired when known. Perfectly pestfree.

Miss Willmot. H. T. A very distinct white or sulphur white rose, bud thick, pointed, greenish-white. Opens to a well formed full flower. Most of the buds have a light pink centre on the tip of the opening flower, but this disappears and the open flower has a really fine color.

Gloire de Holland H. T. A much-needed rose for beds in the open. Blackish crimson—very rare color. Buds very dark, opens to a well formed cup-shaped big flower.

## CHRISTMAS PLANTS

### Jerusalem Cherries, Pans for the Table and Paper Whites

The ever-popular Jerusalem cherry is a plant that appeals to the average buyer and a good specimen will always find ready sale for the holidays. Unlike the cyclamen, primula, or azalea, there is little demand for them after Christmas. Therefore, it is up to the grower to unload all possible at this season of the year.

The mild fall has ripened the berries considerably earlier this year, but with careful watering no difficulty will be experienced in keeping them in good shape. If the berries are somewhat green, keep on the dry side for a while. This will ripen them at least two weeks earlier than when thoroughly watered.

Pans for the table use are becoming more popular every year. The demand in the last few years has increased 100 per cent. Pteris ferns, and small begonias, cherries, or primula sinensis make a cheap attractive pan. In fact, anything that has color enough to make contrast with green ferns. Brightness for the table must always be the aim of the person making up for Christmas. The writer has not found it advisable to make up pans too far in advance, but rather a few days before needed.

Bringing along paper whites is usually an easy matter with most growers, as little forcing is required, provided the bulbs are well-rooted. It is a good plan to have enough to meet your requirements in the event of a shortage of Christmas stock. Carnations, roses, etc., are high in price, and many sales are lost at this season of the year, because of the high cost of made-up work, whereas with a few paper whites to help out a creditable showing can be made at reasonable cost to the purchaser.

Roman hyacinths and red tulips are also popular for pans. Duc Van Tholl is perhaps the best variety to use for Christmas forcing. It is doubtful, however, whether it is a paying proposition for the small grower, as considerable experience is required to get good saleable stock. The most important item in the production and finishing of stock for the Christmas trade is temperature and careful watering.

## FLORISTS' HAIL ASSESSMENT

The Florists' Hail Association will levy its 34th assessment on January 1, 1922, due February 1, 1922. The Association has paid 43 losses since its annual meeting in August last.

# CARNATION CUTTINGS

**NEW AND STANDARD VARIETIES**
**For December and Later Delivery**

**THOMAS C. JOY.** We believe this one to be the best all-round pure white Carnation offered. It has been tested and tried in different sections of the country and without exception has made good. December and later delivery. Rooted Cuttings, $12.00 per 100, $100.00 per 1000.

**MAINE SUNSHINE.** Seedling of Ward and Crystal White. Good yellow Carnations are always in demand. Maine Sunshine is a good, clear yellow. Rooted Cuttings, $15.00 per 100, $120.00 per 1000.

**LASSIE (Ward x Alice).** A commercial Carnation of exquisite shade of cerise. Very free bloomer. A decided improvement on Ward. Rooted Cuttings, $12.00 per 100, $100.00 per 1000.

**WHITE DELIGHT.** It is an improved Pink Delight in all but color. Rooted Cuttings, $12.00 per 100, $100.00 per 1000.

**REDHEAD (Aviator x Alice).** The finest scarlet Carnation today. Exceptionally free bloomer. Rooted Cuttings, $12.00 per 100, $100.00 per 1000.

**RED MATCHLESS (Matchless).** Scarlet just a little stronger in growth than parent. Rooted Cuttings, $12.00 per 100, $100.00 per 1000.

**HARVESTER.** A cross between White Wonder and Matchless. Pure white. Rooted Cuttings, $10.00 per 100, $90.00 per 1000.

**HAPPY DAY.** A very fine red. Rooted Cuttings, $10.00 per 100, $90.00 per 1000.

**LADDIE.** The best of them all. Rooted Cuttings, $15.00 per 100, $125.00 per 1000.

**All the standard varieties, prices on application.**

# NEW GERANIUMS

**Mrs. George E. Buxton.** Has every indication of being the best commercial double Geranium in the market. Very strong grower, producing exceptionally large trusses. A most beautiful shade of Bridesmaid Pink. Equally good for pots or bedding. Rooted cuttings, $15.00 per 100, $125 per 1000.

**Elmira.** Color of the rose Premier. Produces large truss and has every appearance of a good commercial variety. 2-inch pots, $15.00 per 100, $125 per 1000.

# REX BEGONIAS

# RAMBLING OBSERVATIONS OF A ROVING GARDENER

Scores of people mention the fact that the section of the country north of Boston just after the recent sleet storm must have looked very much like devastated France after the war. The damage to big trees was great. Thousands of trees were broken beyond recovery. Many thousands, too, will be cut down, no doubt, because of the expense required to save them. It is pleasant to find, though, that great numbers of householders and citizens in general are making great efforts to repair the damage and preserve the trees. It has been an excellent opportunity for so-called tree repair men who pass as experts but who, in reality, know little about the business, to get in their work. As a matter of fact, tree repairing is a job for trained men only. The Davey people, who are known for the excellence of their tree work, were on the job early, placing large advertisements in the Boston papers, and a great amount of work was turned over to them.

In a bulletin sent out by the Massachusetts Forestry Association, the statement was made that an average shade tree is worth $1.00 per square inch of cross section at breast height. This means that a tree one foot in diameter at a point four and a half feet from the ground contains in its cross section 113 square inches, and so is worth $113. Gardeners who want to repair the trees on their places without resort to outside assistance will get much good advice from "Practical Tree Repair," by Peets.

---

Mr. Theodore F. Borst, of Little Tree Farms, has called my attention to several interesting matters in connection with the great ice storm. He pointed out that the evergreens had suffered but little. These trees, as he says, have a habit of growth which makes them able to withstand storms which badly damage deciduous trees. It is a fact, I believe, that greater care should be exercised in the selection of trees for exposed positions. In several instances plantings of ornamental deciduous trees on hillsides have proved disastrous. The trees have been continually damaged by winter storms, while evergreens would have gone through without loss. This is a point for both nurserymen and landscape architects to keep in mind.

Another point is the need of pruning some of the trees which make a lot of wood, the sugar maple being a good example. This tree throws out a great number of long slender branches if left to itself. Good practice means thinning which will reduce the amount of wood and produce shorter, sturdier lateral growths. According to Mr. Borst, the trimming of sugar maples should be done before the sap starts to flow, but with oaks and some other trees, the work can be left until much later.

Some of the advice about trimming back the trees damaged by the ice storm doesn't seem to be very well chosen. If the damaged limbs are cut back to the trunk, as is being advised, the trees will look like flag poles, and there will be no opportunity for new branches to fill in the open spaces. What is really needed is corrective pruning such as is done in nurseries.

---

Apparently Burpee's Sweet Peas are going strong this year. The interest in sweet peas seems as keen as ever, and much is expected from some of the Burpee novelties. A recent circular issued by the Burpee Co. shows several of these new sweet peas in colors. The work is exceedingly well done typographically, and the flowers themselves are remarkably attractive. It seems to me that Floradale Purple and Rosalind should win special favor. As a crimson sweet pea it is hard to surpass Rosalind, and I can well understand why it was awarded a certificate of merit by both the American Sweet Pea Society and the Pennsylvania Horticultural Society.

A Fine Cypripedium Hybrid

# ORCHIDS

## CYPRIPEDIUMS

The Cypripedium, or so-called Lady-slipper, is a terrestrial Orchid, or in other words, an Orchid that grows in the earth. It is the most widely distributed of all Orchids and numbers some 90 species and literally thousands of varieties. One section comes from the north temperate zone, one from the northern part of South America, and another section from Asia.

The Eastern section we generally term Cypripediums, the South American Selenipediums, on account of the structural difference in the flowers of the latter.

Cypripedium species in their native

FANCY DAGGER FERNS

HENRY M. ROBINSON & CO., Inc.

2 Winthrop Square 32 Otis Street

Boston, Mass.

habitats the world over are slowly but surely becoming extinct because the sexual apparatus is so situated that self-fertilization is practically impossible; it is also difficult to find an insect capable of effecting the necessary fertilization.

October and November are probably the two months when the majority of Cypripediums are in flower, although some flower earlier and some later than the preceding months. This is the Orchid that ought to be grown above all others by the beginner on account of the simplicity of its culture, as the plants can be grown satisfactorily in any greenhouse where an ordinary plant will grow.

The Cypripedium is an ideal plant for the florist to grow as it is not only easy of culture but is very free flowering. It is also a wonderful keeper and a good seller. The common Cypripedium Insigne used to be grown in quantity years ago but has now been discarded by most growers for newer and better varieties. C. Insigne Harefield Hall is one of the very best varieties to grow; this is simply an enlarged form of Insigne with a bold upright dorsal sepal. Who is there who has not admired the golden yellow Ladyslipper? Cypripedium Insigne Sanderae is probably one of the finest all 'round Cypripedium in cultivation today, and doubtless one of the best sellers of them all. Then we have the Leeanum section, the members of which are all good commercial varieties. C. Leeanum giganteum, C. Leeanum Clinkaberryanum, C. Leeanum pallens, all with bold upright dorsal sepals and long stems.

For later flowering we have Cypripedium aureum and C. aureum Odippe. Both these ought to be included in a commercial collection, as they are some of the last to flower, and can be usually had in flower for Easter. Most Cypripediums will thrive in an intermediate temperature, say 60 degrees at night, with a rise of ten by day, but some few of the East Indian section delight in a warmer temperature. Sixty-five to 67 at night is ideal for the latter. An abundance of water should be given the plants whilst in growth, and at no time should they be allowed to become dry at the roots.

The Insigne section, with a few exceptions, will take plenty of water at all times, but care should be taken with the Leeanum and aureum sections when they are starting to make their new growths, as an over-supply of water at this period is liable to dampen the young growths so that they rot off. Air should be admitted freely to the plants on all favorable occasions, but more sparingly with the East Indian section.

Cypripediums require a moderately heavy shade during the summer but as fall advances this should be reduced.

Compost should consist of two-thirds peat and one-third fibrous loam, with a liberal sprinkling of spagnum moss mixed in.—Douglas Eccleston.

BECOME A LANDSCAPE ARCHITECT

Dignified, Exclusive Profession not overrun with competitors. Crowded with opportunity for money making and big fees. $5,000 to $10,000 incomes attained by experts. Easy to master under our correspondence methods. Diploma awarded. We assist students and graduates in getting started and developing their businesses. Established 1906. # CRAIG SPECIALTIES FOR IMMEDIATE AND XMAS DELIVERY

**Never before have we offered such a complete line of stock, nor of such high quality. This covers our immense areas of both Flowering and Foliage Plants. We are booking heavily on Christmas orders and would suggest that customers call as early as possible or mail orders at once so as to get the best selection. Norwood is only ten miles from Broad St. Station, Philadelphia, and is easily reached. We mention below a few of our leading specialties.**

## CYCLAMEN

Now booking orders for immediate and Christmas delivery.

This has been one of our specialties for over 20 years. In all our experience we have never seen a finer lot of plants. We are growing our stock in new houses. They are absolutely clean and perfect in every way and not to be compared with weakly, drawn stock offered at less money. We confidently feel that our four large houses containing 25,000 plants will not be enough. They have been pronounced by plant experts from all over the country as the finest stock ever grown.

4-inch pots $60 per 100.
4-inch pots, heavy, $75 per 100.
5-inch pots, heavy, $15 and $18 per doz.
6-inch pots, very heavy, $24, $30, $36 and $42 per doz.
7-inch pots, very heavy, $4 and $5 each.
8-inch pots, very heavy, $5 and $6 each.
9-inch pots, very heavy, $7.50 each.
10-inch pots, very heavy, $10 and $12 each.

## BEGONIAS

Immediate or Later Delivery

**BEGONIA MRS. J. A. PETERSON**

5-inch pots, $125 per 100.
6-inch pots, $24 per doz.

**BEGONIA GLOIRE DE LORRAINE**

5-inch pots, $125 per 100.
6-inch pots, $18 and $24 per doz.

**BEGONIA GLORY OF CINCINNATI AND MELIOR**

These varieties are endorsed by all the leading retail florists. They will hold the flowers much better than Gloire de Lorraine.

5-inch pots, heavy, $125 per 100.
6-inch pots, heavy, $24 per doz.

**BEGONIA KONKURRENT**

A greatly improved Begonia Cincinnati. This variety is a German introduction, and we have tried it for three years. It makes a much better shaped plant than Cincinnati and is free flowering.

5-inch pots, $125 per 100.
6-inch pots, very heavy, $24 per doz.

**BEGONIA PRIDE OF NEWCASTLE**

Dark, red sport of Mrs. Patten. In bloom every day in the year.

4-inch pots, heavy, $4 per doz., $30 per 100.
6-inch pots, heavy, $9 per doz., $70 per 100.

**BEGONIA ERFORDII**

4-inch pots, in bloom, $18 per 100.

**HYBRID TEA ROSES**

My Maryland, Donald MacDonald, Columbia and Ophelia. Exceptionally fine stock for Fall planting, or for growing on for Easter sales.

6-inch pots, $9 per doz., $70 per 100.

**FIELD GROWN CLIMBING ROSES**

Excelsa and Lady Gay, heavy stock. 2-year-old, $6 per doz., $40 per 100.

**OTAHEITE ORANGES**

A fine stock of this wonderful Christmas plant. Best we have ever offered.

2¼-inch pots, for growing on, $20 per 100; $190 per 1,000 plants in fruit ripened, November and December. $0.40 per fruit.

**ERICA MELANTHERA**

5½-inch pots and 6-inch pots, $18, $24 and $30 per doz.
7-inch pots, $36 per doz

## DRACAENAS

There is no variety of foliage plant so attractive as the highly colored Dracaena. The small and medium sizes can be used to great advantage in making up the popular Christmas baskets, while the large specimens have always been in great demand for decorative purposes. We are now growing more Dracaenas, in greater variety than any firm in the country.

**DRACAENA GODSEFFIANA**

Green and White leaf, very hardy, fine for baskets

2½-inch pots, $20 per 100.
3-inch pots, $35 per 100.
4-inch pots, $60 per 100.

**DRACAENA WARNECKII (NEW)**

Silver and Green leaf. Very durable
6-inch pots, $30 per doz.
7-inch pots, $3.50 each.

**FANCY DRACAENAS**

We are offering a collection of the new and rare Dracaenas. Very handsome for home decoration or for fancy combination baskets

4-inch pots, $9 per doz.
5-inch pots, $15 per doz.
6-inch pots, $18 and $24 per doz.
7- and 8-inch pots, $3.50 and $5 each.

**DRACAENA MASSANGEANA**

The Dracaena with the golden stripe down the center of the leaf. The best of all Dracaenas for the house. We have an exceptionally large stock, well colored and of the very highest quality.

4-inch pots, heavy, $12 per doz.; $100 per 100.
8-inch pots, heavy, $4 and $5 each.
6-inch pots, heavy, $2 and $2.50 each.
10-inch pots, heavy, $7.50 each

**POINSETTIAS**

The largest and finest stock in America The true red variety.

3-inch pots, $35 per 100.
4-inch pots, $50 per 100.
4-inch pots, branched, $65 and $75 per 100.
7-inch Azalea Pans, 3 plants and ferns, $24 per doz.
8-inch Azalea Pans, 3 plants and ferns, $30 per doz.
8-inch Azalea Pans, 3 branched plants and ferns, $36 per doz.
8-inch Low Pans, 6 plants and ferns, $24 per doz.
9-inch Low Pans, several plants and ferns, $3.50, $4 and $5 each.
12-inch Low Pans, several plants and ferns, $7.50 each.

## PALMS

**ARECA LUTESCENS**

Perfect plants with rich, dark green foliage. Our stock is grown cool and hard. It is in splendid condition and will surely give satisfaction. Large sizes are very scarce this year. We have the largest stock in all sizes in the country.

6-inch pots, $30 per doz., made up.
7-inch pots, made up, $4, $5 and $6 each
8-inch pots, made up, $7.50 and $10 each.
10-inch pots, made up, $12.50 each, 5½ to 6 feet tall

**PHOENIX ROEBELENII**

Very scarce. Fine for growing on
2-inch pots, 3- and 4-leaf, $35 per 100.

**CHRISTMAS PEPPERS**

One of the best novelties for baskets, etc
4-inch pots, $6 per doz.
5-inch pots, $9 per doz.
6-inch pots, $12 per doz

## CROTONS

The Croton, with its highly colored foliage, is indispensable during Fall and Winter. We have the largest and most complete collection of Crotons in the world, carrying at the present time for Fall sales over 50,000 in 200 varieties, all of the very highest quality and brilliantly colored.

**Immediate Delivery**

4-inch pots, strong plants, $10 per doz.; $75 per 100.
5-inch pots, strong plants, $15 per doz.
6-inch pots, strong plants, $18 and $24 per doz.
7- and 8-inch pots, strong plants, $4, $5 and $6 each.
10-inch pots, strong plants, $7.50 and $10 each.
12- and 14-inch pots, specimen palnts, $15, $20 and $25 each.

**CROTON PUNCTATA**

One of the finest and most satisfactory varieties for basket work and centers of ferneries.

2½-inch pots, $20 per 100; $175 per 1000.
3-inch pots, $35 per 100.
4-inch pots, $50 per 100.

Every retail store and grower should feature Crotons this Fall and Winter. We know our stock will please you and your customer.

**CROTON LEAVES AND SPRAYS**

Cut Croton Leaves and Sprays have been supplied by us in the past few years to some of the leading retail florists, who have featured them in mantel, table and funeral work. Cut Crotons will last in a cool place from three to four weeks. We can supply them every day in the year.

Very highly colored sprays, at $0.50 each; cut leaves, $5 per 100.

When you have orders for funeral or table work, "out of the ordinary," order Craig's Cut Crotons.

**ENGLISH IVIES**

Small leaf variety. Excellent for made up baskets or trellis work.

4-inch pots, 3 plants, $35 per 100.

## 150,000 NEPHROLEPIS

**(In Variety)**

We are the largest growers of Nephrolepis Ferns in the country. In fact, we are headquarters for them.

**NEPHROLEPIS NORWOOD**

The most beautiful form of Nephrolepis to date, graceful, compact and symmetrical, a vigorous, healthy grower. All growers are invited to inspect it at our Norwood Station greenhouses.

**Strong Plants**

2¼ inch pots, $3 per doz., $12 per 100; $100 per 1000.
4 inch pots, $6 per doz.; $45 per 100.
Orders filled strictly in rotation.

**NEPHROLEPIS VERONA**

Makes a good plant in all sizes. Much finer frond than any crested sort outside of N. Smithii. The fronds are carried on a heavy, wiry stem. We consider it one of the best of the newer introductions.

2¼-inch pots, $10 per 100; $90 per 1000.
6-inch pots, $12 per doz.; $90 per 100.

**NEPHROLEPIS ELEGANTISSIMA COMPACTA**

A dwarf, compact form of Nephrolepis Elegantissima, each plant making an ideal shape.

2¼-inch pots, $10 per 100; $90 per 1000.
4 inch pots, $5 per doz.; $35 per 100.
6-inch pots, $12 per doz.; $90 per 100.

# ROBERT CRAIG COMPANY, NORWOOD, PA.

## CARNATION CONVENTION

### Plans Being Perfected for the Meetings to be Held in Hartford

The florists of Hartford, Conn., and surrounding towns are making extra preparations for the combined exhibitions of the American Carnation Society and the Commercial Cut Rose Growers, to be held in Hartford the last of January.

The exhibition of flowers in connection with the conventions will be held in Foot Guard hall and will consist principally of roses and carnations, although there will be a few other flowers. About all the important growers of roses and carnations in this country and Canada will exhibit at this show. The delegates from various parts of the country will number about 400 and their headquarters will be at the Hotel Bond. The exhibition is to last three days. It has not been decided whether the meetings will be held in Foot Guard hall or the Hotel Bond.

N. C. Osborn, superintendent of the Coombs greenhouses in Hartford, will be the superintendent of the show. Wallace Pierson of Cromwell is chairman of the general committee in charge of the arrangements for the meetings and flower show. The club has appointed the following chairmen of committees: General chairman, Wallace Pierson; superintendent exhibition, N. C. Osborn; hall, J. F. Coombs; publicity, George F. Lane; banquet, Joseph McManus; finance, Wallace Thomson; hotel, Andrew Welch; transportation, J. A. Brodrib.

The annual banquet of the national clubs in convention in Hartford and the local club will be held in the banquet hall of the Hotel Bond and the decorations for this function will exceed anything ever seen in Hartford. The women accompanying the delegates are to be entertained by the following committee of Hartford women: Mrs. Joseph McManus, Mrs. Ellen Welch, Mrs. J. A. Brodrib, Mrs. Charles Coite and Mrs. Wallace Pierson.

## NEW ENGLAND NOTES

The florists of New Haven are planning to organize a florists' club. It is understood that over forty concerns have announced their intention of joining.

Plans are being made for a Horticultural Society at Whitman, Mass. Mr. Louis Graton, originator of the St. Martin strawberry, is active in the movement.

## NEW ENGLAND GARDENERS MEET

The New England Branch of the National Gardeners' Association held a meeting in Boston the evening of Wednesday, November 30. Among those present was Secretary Ebel, of the National Association. Plans for the convention to be held in Boston next year were discussed. It was decided that the convention should be held before September 15, lasting four days. Two days will be given to business and lectures, and the other two to sight seeing. There will be a trip to the North Shore and a clam bake. On the second day the estates at South Lancaster will be visited. It was voted to form a Boston Branch of the Association to hold quarterly meetings.

**Says Sam: There is always a kick for the man who is always kicking.**

**Special Delivery.** The florists in Georgia have been particularly successful in gaining the co-operation of the newspapers. In a recent issue of the Macon News an editorial nearly a column long is devoted to the postoffice's plan of doing away with special delivery for parcel post packages. The general argument is made that the postoffice is conducted for the benefit of the public, and for that reason should not be curtailed. Special attention, however, is given to the necessity for the prompt delivery of cut flowers, and Mr. W. F. Gude, who is the Washington representative of the S. A. F., is quoted at length.

This is good work. As Mr. Gude points out, flowers are entirely different from farm products. They do not go out in carloads, and assurance should be given that, when retailer ships a box of cut flowers, it will be handled carefully and given special service at the other end, the special service needed to insure their delivery to the recipient in good shape.

The Macon News goes on to say:

"The parcels post in foreign countries has developed until it is one of the most popular and convenient agencies in the life of the people, and it ought to be so here.

"It is hoped our representatives in Congress will see the wisdom of combatting the proposed change. If they will once get it into their heads that the people want service out of the department, and are willing to pay the price, all will be well. A way will be found to handle the situation."

This is a particularly good time for florists to get at their representatives in Congress and to bring to their attention the effect which the proposed change would have on the florist trade.

---

**Healthy Competition.** Without good, legitimate competition there would be no upward movement in business. One florist is constantly trying to outdo the other legitimately—improving his service, improving his store, finding his customers' wishes and satisfying them. Don't worry about competition. The keener it is, the better business man it will make of you. The other fellow may come along with a wonderful stunt. Come right back at him with a stronger and a better one. Study the methods of your competitors. If they are live ones, they study yours. Without competition, trade would be extremely dull and uninteresting.

---

**Fire Losses.** Fire losses in the state of Illinois during October totalled $1,363,140 according to the monthly report of State Fire Marshal John C. Gamber. There were 1,138 fires. The rate during the month was one every thirty-nine minutes. The fire losses to stores amounted to $154,641. The state marshal warns against hazards of the winter. Cracks or defects in heating apparatus should be repaired promptly. Fires should be kept clean to avoid fire due to flying sparks. Hot ashes should not be placed in wooden boxes or placed against wooden fences or close to any combustible materials. Consider the danger to life as well as the financial losses and guard against fire.

---

**Welcome the Salesman.** Many helpful suggestions have been passed along to retailers by salesmen who call upon them. It is well to give these fellows a little of your time, when they call on you. They spend all of their working hours among the trade. Many of them are observative and can pass you some tips, which help you in selling your goods. If they do not vouch an information ask them. They'll be pleased to tell you about window and store displays they have observed, to give you ideas for increasing your sales. It's to their advantage to do so. The more you sell the more business they will get. Cultivate their friendship.

# You who have seen the New Pompon

**"NEW YORK"** have recognized something that is better than anything among the older named varieties. It is a seller on the market and is well deserving of the Silver Medal awarded it at the Museum of Natural History Show. Following **"New York"** and a sister to it is

**"LOUISE DAVENPORT"**—There is more bronze and less yellow in its color. There is a wonderful similarity between the two and **"Louise Davenport"** follows **"New York"** by nearly two weeks in season.

**"SARAH TOWNSEND"**—Another Hilda Canning seedling and a sister to both **"New York"** and **"Louise Davenport."** **"Sarah Townsend"** is ready to cut November 20th. These three bronze button Pompons will give a continuous supply of this type from November 1st until December 1st. You need all three to cover the month properly.

**"NOVEMBER GOLD"**—The finest of all the yellow sorts will also be offered this season.

We believe these four Pompons to be the best of this type. The price will be $15.00 per 100. $140.00 per 1000 for cuttings.

## A. N. PIERSON, Inc., Cromwell, Connecticut

### SAY IT WITH FLOWERS—NOW

The Retail Florists' Association of Buffalo has adopted a new slogan, "Say It With Flowers—Now." This is the result of a vote held at a recent dinner attended by 25 florists. A fund of $15,000 is being raised for combined advertising, urging the buying of flowers.

A new flower store being erected in Bloomington, Ind., will be known as The Ellis Florist Shop.

Norton Gibson of Nappanee, Ind., has purchased the greenhouses formerly owned by Wm. Terrell and later purchased by Fred Walters.

To The Trade—

Thos. F. Galvin, himself, will give your orders his personal attention at his son's store.

**Thomas F. Galvin, Jr.**

226 DEVONSHIRE STREET
BOSTON, MASS.

## George Watson's Corner

"You in your small corner and me in mine."

The Robert Craig Company are certainly well prepared for their Christmas customers. House after house of the finest cyclamen we have seen; the finest dracenas in all the best commercial varieties and many good novelties; and ferns—no such display for style, finish and variety is to be found within many miles. A walk through these houses, extending to some 15 or 20 acres, with "Van" as your guide, is certainly a horticultural delight of the first water, and worth going many miles to enjoy. You have to take the train at Broad Street Station for Norwood; but when all is said and done, you get there about as quick as to the old place at 49th street on the street cars.

Hosea Waberer has been located at 109 South Seventh street for about a quarter century, and his place has long been a landmark. He expects to move round to corner of Chestnut street (No. 628) about February 1st. The old location has become a part of the interests of the Curtis Publishing Co., and that concern expects to start new building extensions soon. Mr. Waberer and his two sons, Anthony and Harry, have made an enviable reputation as enterprising seedsmen, and the good wishes of all go out to them in their new move.

Mole "Terrace" is the fancy appellation that our good friend Bert Cartledge applies to the great floral center ordinarily called Mole street. But for the past week or two there has been repairing going on and wheeled vehicles can't get in. Mole "Subway"

IRVINGTON, N. J.

would be more appropriate, for the time being.

Christmas Greens, Ribbons, Baskets, and Floral Supplies is the title of the latest eight-page price list just issued by the Pennock Company. It is very interesting and covers a wonderful assortment of old standbys and great array of new wrinkles of various kinds. Every up-to-date store ought to procure a copy of this.

"Jack" Mills wants to know where Horticulture got the jack to jack up "Mark." He has been Mark since his mother had the say; but now he has been jacked up by a pirate printer, and the "Jack" is liable to hang on until he is dead. To that printer, we lack language loud enough to express our feelings, so we will have to be content with a short quotation from that ancient Irish masterpiece, "Doneraile":

"May fire and brimstone never fail
To fall in showers and him assail;
May every hour new woes reveal
And ice and snow his soul congeal."

To mark this will indicate that we have sent the villain down to hell, with our best wishes for his reception there—and we trust that this will be a warning to all other scoundrels who mishandle type.

Fancy grasses seem to be about the only thing holding their own in the way of prices this season. All over Europe business seems to be nearly at a standstill, with prices dropping. But the demand for the Poas, Fescues, Agrostis, etc., keeps up and there does not seem to be nearly enough to go around. These are used mostly for lawn, golf and permanent pasture formulas by the trade in Europe and America. The seedsmen here are aghast at the extraordinary prices; but they have to have them as they are but little grown as a seed crop in the U. S. The next to make a noise will be the customer and we can imagine the big howl.

The latest important matter being considered at Washington is whether the Flanders Poppy should be prohibited. The matter is solemnly discussed in detail, and so far the answer is: it might, and it might not, become a weed. If we do it in moderation, it would be all right; but if we spread it along the roadsides everywhere, it might become a weed, and if it became a weed, then the department would have to pass a law prohibiting it. That's it! If a thing gets popular, that's a sure sign there's something wrong with it. Prohibit it. The Flanders Poppy has been a common flower in our fields for three centuries, and in the old world since the dawn of history, but it takes the prohibition era to look on it as anything but a beauty of nature in field or wayside. If it had been Mignonette or Sweet Alyssum, the poet had mentioned, probably the same thing would be their share. The rose was a weed once. Be careful.

Next to Philadelphia and Pittsburgh, Lancaster holds the Beacon Light of horticulture, more brighly burning than any other community in the state of Pennsylvania. And that is saying a great deal, for the other big cities in the state are many of them pretty live wires. And no one man

perhaps in Lancaster held a finer record than Harry A. Schroyer, who passed away recently at a ripe old age. He was a fine man and a credit to his business all through life.

All of us are, in sentiment, with the Peace Conference at Washington. To best express our feelings we suggest that every one of us, individually, send our Peace representative or some member of his outfit, a few flowers with a card like this:—

Peace on Earth—Good Will to Men
All Hail to you in your Peaceful Endeavors. Your sentiments are fragrant and beautiful as the Flowers.

Signed .....

If at a long distance from Washington, the F. T. D. service will cover the ground very nicely. We extend our Peaceful Welcome to all nationalities, and there is no better way of saying it than to "Say It With Flowers."

## NEWS NOTES

The florist business of J. T. Keheley, of Columbus, Ga., has been sold to Wheat & Shellnut. The consideration is said to have been about $50,000. Mr. Shellnut is the practical man in the new firm, having been associated with Mr. Keheley for the past twelve years. A display room is soon to be opened.

O. R. Davis and Co. have opened their new store at 59 North Charlotte street, Pottstown, Pa., which will be known as a "cut rate store."

Frederick L. Krekler, a well known florist of Brooklyn, N. Y., died recently, in his 73d year. Mr. Krekler had been a florist for fifty-six years.

**Garden Seed**
BEET, CARROT, PARSNIP, RADISH and GARDEN PEA SEED in variety; also other items of the short crop of this past season as well as a full line of Garden Seeds, will be quoted you upon application to

## FOILING CHECK CROOKS

### A Plan Put Into Effect by Henry Penn Will Protect Florists

It is a well known fact that florists are constantly being victimized by unscrupulous customers who ask them to cash checks for a larger amount than the face of the bill. Henry Penn, of Boston, has hit upon a plan to balk such operations. Whenever a stranger comes into the store and asks to have a check cashed, the clerk quietly says that this will be done if he may place the following stamp on the back of the check:

I hereby declare that I have sufficient funds in the bank on which this check is drawn to meet it upon presentation.

Name .....

Address .....

There is a new law under which a heavy penalty is attached to the false declaration as to funds in the bank. Anyone is liable to a penalty who signs his name to a statement like the one given above. No excuse is accepted by the courts, and a crooked check artist is likely to think twice before affixing his signature to a check which contains this clause." Florists throughout the country are welcome to this plan which I hope will be of some benefit to them as a means of financial safety," says Mr. Penn.

## CATALOGUES AT POUND RATES

At a recent meeting of the Postmasters' Association held in Washington, D. C., J. Horace McFarland made a strong plea for the mailing of nursery and seed catalogues at pound rates. He pointed out that this would be a great saving in time and labor in the case of concerns doing a large volume of business. Mr. McFarland went on to say:

"The advertising man usually plans his catalog in multiples of 16 pages, and as any sort of catalog will run over two ounces, he either pays more for paper of a weight that will run to the next jump, or, as is actually the practice, he pays a much higher rate than 8 cents per pound, because he must mail in two-ounce jumps."

## TRIBUTE TO M. A. PATTEN

Dear Sir:—

Having read your several contributions of esteem to the late Mr. M. A. Patten please allow me to offer my bit to a faithful friend of 35 years' acquaintance, one I loved as a brother, one who from my advent into the florist business has been an able and true adviser.

Never have I heard an ill word spoken of my friend and never one uttered by him concerning others. His motto, "If you cannot speak well of a man keep quiet," was truly exemplified. No one who knew Marcellus Patten could help admiring his true Christian character. He has gone from our midst but his memory will never be forgotten.

GEO. E. BUXTON.

Announcement has been made of the dissolution of partnership of the firm of Thorpe and Anness of Metamora, Ind.

## NEW ENLAND NOTES

George Breed has laid foundations for a 100-foot greenhouse to be constructed on his newly acquired property in Springfield, Mass.

The Tierney Flower Shop in Springfield has sued the street railway company for $5,000 damages as a result of an accident last summer when a car ran off the track and plunged into the Hotel Victoria, where Miss Tierney's shop was located.

Charles L. Hotchkiss is opening a new florist store at Woodbury, Ct. Mr. Hotchkiss is a South Britain man.

William K. Wood, who recently died in Franklin, was for some years a florist in West Newton, with his brother, under the name of E. A. & W. K. Wood. At that time he acted as correspondent for the Florists' Exchange. Later he went into the poultry business. He was a member of the S. A. F., the Chicago Florists' Club and the Florists' Club of Boston.

A. N. Pierson, of Cromwell, Ct., has put out a new Pompon Chrysanthemum named Gov. Lake in honor of the chief executive of the state. It made its official debut at a dinner of the Get Together Club, which was given by Wallace R. Pierson, and at which the Governor was the guest of honor.

Vol. XXXIV DECEMBER 25, 1921 No. 12

# THE TALK OF THE TRADE

Last fall I wrote something about the extent to which Primulinus hybrids are being forced for winter blooming. Apparently the results are all that could have been expected. Mr. B. Hammond Tracy, of Wenham, who shipped 25,000 bulbs to the Pollworths of Milwaukee, in August, recently had a letter in which they said that the flowers opened in November. This is earlier than had been desired, as it brought them into competition with chrysanthemums, but probably the bulbs were forced too hard. The best way to handle them, Mr. Tracy said, is to give them a low temperature so that they will not come on very fast.

It is still possible to force Primulinus hybrids. In fact, they can be had at almost any time during the winter. If they are to be forced as late as this, however, they should be dried out thoroughly for two weeks before they are planted. If this is done, the bulbs which were dug this fall can be used for forcing. The bulbs which were sold early in the fall for forcing had been carried over from the previous season, and of course were thoroughly dried. Experience has proved that bulbs kept in cold storage will not give satisfactory results.

---

Recently Mr. Tracy shipped 500 pounds of dahlias to Washington. They were purchased by the government for experimental purposes. It has been found that a very good sugar can be obtained from dahlias, and the government officials are investigating the commercial possibilities presented by this discovery. Five different varieties were sent to Washington by Mr. Tracy, all of them being blind bulbs which otherwise would have been thrown away. It has been found that the amount of sugar varies in different varieties, some kinds having very little. It seems possible that the entire dahlia industry will be revolutionized if it is found that the tubers are really of great importance for sugar making.

---

According to Peter Dewar, of the R. & J. Farquhar Co., Boston, there is going to be a decided shortage of flower seeds this year. This is particularly true of perennial seeds. The growing season in Europe last summer was a very poor one. Ninety days elapsed in England without any rain. And of course flower seed growers were hard hit. Likewise there is a shortage of vegetable seeds in some lines, particularly peas and beans, and a shortage of Golden Bantam corn. The Thomas Laxton pea is very scarce, and the amount of Stringless Green Pod, Bountiful and some other green beans is very small.

While Mr Dewar was in Europe last season he picked up certain varieties of flower seeds which give great promise. Among others are several varieties of a strain of Snapdragon which Mr. Dewar considers of unusual value. They probably will be put out under the name of the Peerless strain. Mr. Dewar also got some good new sweet peas, and a Streptocarpus far ahead of anything, he believes, now growing in this section.

---

I notice that a writer in one of the English trade papers calls attention to the fact that paper pots are not used nearly as much as it was expected when they were first introduced that they would be. He writes: "When paper pots first put in an appearance and a saving in weight in transporting was urged, it was prophesied that breakable pots would almost disappear from Covent Gardens, but it was expecting too much. The crockery pot remains."

W. H. JUDD

Re-elected President of the Gardeners' and Florists' Club of Boston

Something like this situation exists in the United States. There is no getting away from pottery pots. They are indispensable for florists' use. Paper pots are of value, and are used to a large extent by nurserymen in shipping plants that have been potted up, the reduced weight and freedom from breakage being an advantage. It is quite possible that paper pots and dirt bands will be used more largely in the future for greenhouse work, but it is idle to say that they will ever take the place of the pot which has been so long an indispensable feature of the florist's business.

---

I was interested when visiting the store of Gove, the florist, in Burlington, the other day, to find an unusual method of setting off the office part of the store from the rest of the room. Instead of using a partition of the usual type, a picket fence had been built to enclose the bookkeeping department. It was painted green and a gate gave admittance. The whole arrangement was unique and contains a good suggestion for other florists. It harmonizes very well, too, with the window arrangement, which includes a large white pergola extending from one end to the other.

Mrs. Gove, who is in charge of the retail end of the business, reports that trade has been excellent this season. Much business is obtained through agencies in the smaller towns throughout that section of Vermont. These towns, as a rule, have no florist.

Opportunities like this are sometimes overlooked, but make it possible to obtain a lot of extra business. There are stores in many towns which might well have a list of agents throughout the adjoining territory. In many places it is an easy matter to get the local undertaker to act. In other

towns the school teachers or even the postmaster may be glad to obtain a little money in this way. Funeral business is likely to come in as a matter of course, but with a good agent at work many additional flowers can be sold for weddings and parties, as well as for the sick and shut-ins during the winter when outside flowers cannot be had.

Of course the florist must provide his agents with some sort of equipment, the most necessary being a catalogue of designs. It is not advisable, however, to use a catalogue which has a large number of fancy designs. These cost money, more money than the average rural resident is able to pay. If customers see these elaborate designs, however, they are likely to be dissatisfied with the simpler designs which they can afford. It is a good plan to furnish the agents with literature bearing the florist's name. This may take the form of blotters, calendars or the like. If they can bear the agent's name, so much the better.

Of course, it is necessary to keep sending the agent circulars, price lists, etc., so that he will feel that you are in touch with him and keep more alert for new business.

And above all things you must be prompt in your settlement. There is no way in which enthusiasm is dulled more quickly than by laxity in paying an agent what is due him.

Gurney Hill's three new roses, America, Gude and Angelus, seem to be good keepers. His exhibit sent to Philadelphia for the meeting of the club, Dec. 6th, were still in good shape Dec. 16th in the Pennock Company Market. They were probably cut in Indiana three or four days before, which means a two-weeks' stay and all three of them were going strong.

I guess there is no other florist in the east who grows such a variety of material as Ralph Ward, of Beverly, Mass. It seems to me that about every kind of plant which the florist could want for any occasion is to be found in the Ward greenhouses. The puzzle is that Mr. Ward can keep them all thriving. He says he usually has a mild attack of nervous prostration about once in three years, and no one would be surprised that he should. I was particularly impressed in going through his houses with a big batch of Coleus. It isn't often that one finds a house filled with such good specimens. Mr. Ward has a number of his own seedlings which are especially good. Too often the Coleus seen in the shops lack color, and look rather forlorn, but those in the Ward establishment are as bright as one could well desire.

One phase of Mr. Ward's business is rather unique. He lives in a section where large country estates abound, and when fall comes every year the owners have a good many plants which they want taken care of for the winter. Now Mr. Ward has prepared enormous cellars where the plants are stored away. They are called for in the fall by his men and delivered by them in the spring. This is a profitable enterprise in itself, and furthermore gives Mr. Ward a lot of advertising, thus increasing his sales of bedding plants, of which he makes a specialty. Here is a case where a man has studied his market, adapted himself to it, and tries to make the most of it. Only a first class grower could, of course, handle so many different kinds of plants, but it is necessary for the particular line of work which Mr. Ward has built up.

J. J. Fallon & Co., of Raleigh, N. C., staged a Thanksgiving window which attracted much attention. The chief feature was the large turkey made entirely of magnolia leaves, with the wings outspread. There was a background of crotons and autumn boughs, while autumn leaves covered the floor, with baskets of roses scattered about the window.

With two such men as Roman J. Irwin and Arthur Herrington contesting the election for president of the New York Florists' Club, it is not surprising that the vote was close and that the election aroused no little interest. Mr. Irwin, who was elected by 85 votes as against 69 for Mr. Herrington, is one of the best known figures in the florist world. Although only 44 years of age, he has made himself the head of a large brokerage business, with headquarters at the wholesale flower market in New York City.

ROMAN J. IRWIN

Elected President of the New York Florists' Club

Mr. Anton C. Schultheis, elected vice-president, is also a well known florist, having been in the business for many years. He is general manager of a large plant growing establishment at College Point, N. Y., and has a host of friends. Among those who know him well he is commonly called Spike. As was to be expected, John Young was unanimously re-elected secretary, and William C. Richards, Jr., treasurer.

The New York Florists' Club has become a very active and influential body. It certainly will not lose ground under Mr. Irwin's administration.

## PASSING OF MARTIN REUKAUF

The members of the trade throughout New England, and particularly those of the older generation, are grieved to hear of the death of Mr. Martin Reukauf, Wednesday, December 14. For a great many years Mr. Reukauf was a traveling man for H. H. Bayersdorfer & Co., of Philadelphia. He withdrew for a few months some years ago, but soon returned and remained with the Bayersdorfers until his death. For a long time he had the New England territory, but of late years has been traveling further west. He was a very likeable man, always genial and pleasant, and wherever he went made friends for himself and the company he represented.

## NEWS NOTES

O. L. Henry & Sons, of Pennsburg, Pa., have opened a new establishment, including a 40-foot show and store room and two greenhouses a hundred feet long.

Over 200 public schools in New York have received a gift of 32,000 Von Sion daffodil bulbs from M. J. Keur, of Holland, who recently became a resident of New York. Mr. Keur made his gift as a result of a published account describing the large response of the schools to a call for bulb culture by Dr. Gustave Straubenmuller, president of the School Garden Association.

# THE "HUB" AND ITS SPOKES

## PRES. JUDD REELECTED

### Meeting of Gardeners' and Florists' Club of Boston

There was an unusually large attendance at the December meeting of the Gardeners' & Florists' Club of Boston, at Horticultural Hall, Tuesday night. It was the annual meeting for the election of officers. The only contest was for the executive committee. The officers chosen were as follows: President, William H. Judd; Vice President, Harold A. Ryan; Secretary, William N. Craig; Treasurer, James Methven; Executive Committee, Walter H. Goldby, John E. Russell, Patrick W. Burke, Andrew K. Rogers and George W. Butterworth.

President Howard of the American Carnation Society was present and urged attendance at the convention to be held in Hartford next month. Mr. William Downs spoke about the union agricultural meetings at Horticultural Hall, January 17, 18, 19 and 20. The Gardeners' and Florists' Club is to have charge of one evening's entertainment, a feature of which will be an illustrated lecture by Loring Underwood on "Old New England Gardens."

It was voted to hold the annual ladies' night on January 24, and the annual banquet the evening of March 2.

The subject for the evening's discussion was "Begonias and Cyclamens." Mr. Eric H. Wetterlow of Manchester, Mass., was the first speaker, and discussed the various forms in which the begonia grows. He said that while the old Lorraine begonia did not last long in the house, newer forms of the type, like Melior and Cincinnati, were good for at least three weeks, while Mrs. Peterson would often keep well all winter. He also pointed out that Mrs. Peterson was different from the other varieties in the fact that plants could be carried over for several years, improving in quality if they were cut down each season, as they would quickly break and make good plants again.

In his cultural directions Mr. Wetterlow said leaf cuttings were used, being rooted in sand over cocoanut fibre. He found the use of this cocoanut fibre a great help. He used it to cover the bottom of the propagating bed, a little sand being mixed with it. Then it was covered with half an inch of good clear sand. The fibre, he said, held the moisteure so that one watering with warm water was sufficient. He found that with the fibre the plants broke better than in sand. They can be propagated at this time of year, and when large enough to be potted up should be kept at a temperature of 60 to 65 degrees. He favored pinching in order to get more compact plants, but did not advise syringing. He said the plants liked a little loam mixed with Scotch soot and well rotted cow manure and a little coarse sand. They also liked a dusting of lime.

After speaking about the begonias of the Lorraine class, Mr. Wetterlow paid a tribute to the beauty and value of the tuberous rooted begonias, saying that the kinds having the small leaves and small flowers were very satisfactory.

A paper from James Malborough of Topsfield about growing large flowered winter begonias was next read, which was followed by a paper from Peter Arnott, of Chestnut Hill, on the same subject. Both these men are famous for their success with begonias of this type.

Mr. Fred E. Palmer, the well known florist of Brookline, who has been exceedingly successful with begonias and cyclamens this year, spoke briefly on commercial cyclamen culture. He said that for some reason not fully understood, many cyclamen growers had lost heavily this year, as many as 40,000 plants having been discarded in the houses of four or five growers. He then said that any questions would be answered by his grower, Mr. Harold Edgar, who has developed great skill in handling cyclamens. When questioned Mr. Edgar said that the only commercial fertilizer he used was Clay's fertilizer, and that he gave a feeding regularly every two weeks, using a teaspoonful to a pot. This was in addition to the use of the fertilizer in preparing the soil.

There were some handsome exhibits at the meeting, including begonias, cyclamens, ericas, oranges and other plants from W. W. Edgar Co., begonias from Peter Arnott; cyclamens from Fred E. Palmer and begonias from James Marlborough. The statement was made in connection with the Edgar exhibit that oranges around Boston this year were particularly good.

There was also an exhibit of a new plant stand invented by Mr. E. E. Marshall, a member of the Club, which seems to have many possibilities.

## DEATH OF FREDERICK CAVE

The maiy frends of Frederick Cave, gardener for Mrs. Henry Lyman, of Canton, were pained to hear of his death, which occurred Monday, December 19. Although Mr. Cave had not been in good health for some time, his passing at the end was sudden, and came as a great shock. Mr. Cave was 34 years old, and leaves a wife and two children. He was one of the most popular members of the Gardeners' and Florists' Club of Boston. The funeral was held at 2 o'clock Wednesday afternoon.

## THE CARNATION CONVENTION

Great plans are being made for the Convention at Hartford next month. Pres. W. D. Howard, of the American Carnation Society, is to attend another meeting at Hartford, Ct., January 4, to complete details for the Convention to be held in that city, January 25-27. Everything points to one of the biggest conventions every held by this society. In connection there will be the mid-winter exhibit of carnations and roses, the American Rose Society showing at the same time. Already 8,000 carnations and 4,000 roses have been arranged for, and this number, doubtless, will be increased. The carnation classes include several calling for only a dozen flowers, so that private gardeners as well as the commercial men can enter the competition.

The banquet is to be held the first night instead of the last night, as in the past. This is so that those present will have an opportunity to see each other after getting acquainted. Most of the business sessions are to be held on Tuesday, and a trip to the great florist establishment at Cromwell has been arranged for the third day.

There is certain to be a very large attendance at the exhibition, as the Hartford florists are to distribute 30,000 tickets when sending out their bills. The local papers have arranged to give a large amount of space to the convention and the show. The Hartford men are doing their utmost to make the convention a big one, and the outlook is most promising.

No little damage was done at the Arnold Arboretum, but fortunately few of the very rare trees or shrubs were badly injured. As a matter of fact, the evergreens and the shrubs in general escaped with but little harm.

Very respectfully,

T. J. K.

# How Ryan Advertises

WELL-ARRANGED SIGN BOARD

A florist who sells at retail and is located on a much traveled thoroughfare makes a mistake if he does not capitalize the fact by putting up an effective advertising sign. I think that Harold A. Ryan, the popular young florist of Cambridge, Mass., has shown real good judgment in the kind of sign which he uses to advertise his wares. It consists of a frame so arranged that boards bearing different legends may be quickly set in place. This makes it possible for him to shift his announcements as often as he likes.

Along the top of the frame is a flower box which is kept filled with trailers and blooming plants during the summer season. In addition a flower basket is suspended at each end. The result is very harmonious, and attracts immediate attention without offending the artistic sense of the prospective customers. The plan is one which can be adopted by any florist having a similar situation and Mr. Ryan finds it very satisfactory.

## TREATING IRIS ROT

I have been asked if I have had any experience with Iris rot, and as I have, I give my experience here in the hope that it may be of serice to other growers. Last year I had a magnificent bed, over fifty feet long, filled with splendid clumps of the beautiful Anna Farr. One day I noticed the foliage of a single plant lying flat on the ground. I thought some accident had happened to it, and did not examine it, but the next day when I saw three or four of its neighbors also lying flat on the ground, my suspicions were aroused, and upon examination I found that the upper part of the rhizomes had become soft and mushy, and were not able to hold up the foliage. Although I had never seen root rot before, I decided that this must be the thing other Iris growers were complaining about.

A close examination disclosed that dozens of the rhizomes were infected, and Professor Meyer, who was with me last year, immediately had the men dig up every clump of the Anna Farrs and separate each clump into individual roots and cut away from each root every particle of the rot. He then sprinkled the roots with lime and laid them out in the sun. He next had the laborers remove ten or more wheel-barrow loads of dirt from the infected bed and replace it with fresh garden soil, in which he immediately planted some of the original roots, planting the balance in a nursery row. He mixed quite a quantity of fresh lime with the new earth before replanting the Irises, and during the past season we have not found a single root, either in the original bed or in the new planting, which has been the least affected with this troublesome disease. During the remainder of last season and throughout this season I have used lime quite liberally in all my Iris planting, and I have not seen a sign of trouble in any place where the lime has been used. I believe that probably a tablespoonful of lime should be worked into the soil around the root of each Iris to protect it from attacks of this disease.

Of course, I am not sure that it was the lime that stopped the trouble for me. It may have been the sunshine on the exposed roots, but I intend to continue the use of lime until it is proven to me that some other treatment is better. I am glad to report that the trouble, or disease if it is a disease, is apparently not contagious, as I did not lose a single Clio in a bed only three feet distant from the infected Anna Farrs.

Lee R. Bonnewitz.

## NEW ENGLAND NURSERYMEN

The annual meeting of the New England Nurserymen's Association will be held at the American House in Boston, January 31 and February 1. An interesting program is now being prepared. This association finds itself without a head, owing to the death of the president, the late John K. M. L. Farquhar, and the resignation of the vice president, Mr. Ernest F. Coe, of New Haven, who has retired from the nursery business. Probably the secretary, Mr. Sheldon Robinson, of Lexington, will call the convention to order.

## MASSACHUSETTS NURSERYMEN'S ASSOCIATION

The Massachusetts Nurserymen's Association will have its annual meeting and luncheon at Horticultural Hall, Boston, January 17, at 2 P. M. Pres. Julius Heurlin, who has been a very active executive, has secured two interesting speakers in Mr. H. O. Cook and Hon. Chas. O. Bailey, who will discuss forestry matters.

C. C. Wonneman is to enlarge his establishment at Mexico, Mo., by the addition of two or four new houses.

# TUBEROUS-ROOTED BEGONIAS and GLOXINIAS

We are again in position to supply splendid strains of Tuberous-Rooted Begonias in exceptionally fine strong bulbs 1½ to 2 inches in diameter.

TUBEROUS ROOTED BEGONIAS LARGE SINGLE FLOWERED. SCARLET, CRIMSON, PINK, WHITE. SALMON AND YELLOW.
$1.75 per dozen; $12.00 per 100; $110.00 per 1000.

CHOICEST SINGLE MIXED VARIETIES.
$1.50 per dozen; $11.00 per 100; $100.00 per 1000.

TUBEROUS ROOTED BEGONIAS SUPERB DOUBLE FLOWERING. SCARLET, CRIMSON, PINK, WHITE, SALMON AND YELLOW.
$2.25 per dozen; $16.00 per 100; $150.00 per 1000.

CHOICEST DOUBLE MIXED VARIETIES.
$2.00 per dozen; $15.00 per 100; $140.00 per 1000.

GLOXINIAS SUPERB STRAIN. SEPARATE COLORS—RED, WHITE AND PURPLE.
$2.50 per dozen; $18.00 per 100; $170.00 per 1000.

CHOICEST MIXED GLOXINIAS.
$2.25 per dozen; $16.00 per 100; $150.00 per 1000.

GOLDEN YELLOW CALLA "ELLIOTTIANA."
1¼ inch Bulbs. $2.00 per doz.; $15.00 per 100; $140.00 per 1000.
1¾ to 2 inch Bulbs. $2.50 per doz.; $18.00 per 100; $175.00 per 1000.
2¼ inch Bulbs. $3.00 per doz.; $22.50 per 100; $2.20 per 1000.

## SHAW CERTIFIES 2500 FRUIT TREES

Nursery certification, an outgrowth of the research in leaf characters of Dr. J. K. Shaw of the Massachusetts Agricultural Experiment Station, has been undertaken by the Massachusetts Fruit Growers' Association this fall, and more than 3,000 trees have been examined in the nursery.

Dr. Shaw did the certifying himself. He certified 2580 trees as being true to name, but refused to certify 267 others. He also condemned 438 younger trees, budded from the rejected stock, as being untrue to name. Thus he prevented 705 misnamed trees from being sold to fruit growers.

The nurserymen, Dr. Shaw reports, were as anxious as the growers to eliminate misnamed stock. He found one grower mystified as to how a plot of nondescript trees he had been calling "Gravenstein" had become mixed with his good stock.

This fall's certification work was only a beginning. It was the first application of Dr. Shaw's studies on the identification of trees by their leaf characters, to commercial fruit growers. The Massachusetts Fruit Growers' Association paid the cost of materials used and furnished the equipment for the work.

The trees certified are a small proportion of those planted in the State every year; for only about 5,000-10,000 trees of the 100,000 or so annually planted in Massachusetts are grown by nurserymen of the State.

## MEDICINE HAT PROSPEROUS

### Many Orders for Flowers from United States and Canada

Medicine Hat, Alberta, has been receiving the attention of the press because of the great amount of business being done in that northwestern city this year. One article reads as follows:

"Christmas flowers will soon begin leaving Medicine Hat, Alta., by the carload. Acres of chrysanthemums, carnations, roses, violets and cyclamen are in bloom. Orders of unprecedented size are being received from cities of the United States, eastern and western Canada, and from the newly settled districts in the rich farming sections of the prairie provinces where the Christmas season will find general prosperity.

"Medicine Hat's rise as a producer of cut flowers began with the establishment of two greenhouses. Richness and lasting quality of the floral product resulted in a sharp demand. One greenhouse at a time was added until The Rosery now has thirty-two glass houses, each 250 feet long, covering five acres.

## FLORISTS AT CORNELL

The New York Federation of Horticultural Societies and Florists' Clubs is to have a meeting at Cornell University, Ithaca, N. Y., Thursday, Feb. 16. The program includes the following papers:

Diseases of Florists' Crops, Dr. L. M. Massey. Floriculture Building.

Methods of Flower Arrangement, Charles Henry Fox, Florist, Philadelphia, Pa. Floriculture Building.

Production of Cut Flowers and Pot Plants in England, Illustrated, Prof. E. A. White. Floriculture Building.

There will be a reception to the delegates at 1 P. M., followed by a business session. F. R. Pierson, of Tarrytown, is president of the federation, and Arno H. Nehrling, secretary.

Prof. E. A. White of Cornell is back from a long trip through Europe and is being called upon for many lectures and talks before florists' clubs and horticultural organizations.

# LA FRANCE

## *The Phenomenal Giant Everbearing Red Raspberry*

**Superior to any other Raspberry; produces large, juicy berries of finest aroma; very prolific, heavy bearer, absolutely hardy and free from disease.**

**Produced in the New England States, succeeds well in all sections.**

**Retails now at $6.00 per dozen, $49.00 per hundred. Strong field-grown plants.**

**Awarded First-Class Certificate by Massachusetts Horticultural Society and by all other Horticultural and Agricultural Organizations before whom it was exhibited.**

**Make reservation now with your dealer for Fall or Spring delivery.**

## S. A. F. & O. H. Department

### Fifth National Flower Show

About fifty exhibitors have made space reservations in the trade section of the big show to open in Cleveland on March 25th next. Some prospective exhibitors appear to be in doubt as to the charges made for this space, therefore it may again be mentioned that a flat rate of $1.75 per square foot covers the whole expense of rental, and includes signs, a background artistically uniform with the setting of the Show, and booth.

### Additional Special Premiums

James McLaughlin, chairman of the committee on special premiums, reports the following additional premiums:

Harry I. Randall, Worcester, Mass., discretion of the committee, cash $10.

J. B. Keller Sons, Inc., Rochester, N. Y. Discretion of the committee, cash, $25.

Carters' Tested Seeds, Inc., N. Y. C., N. Y. Discretion of the committee, cash, $25.

Amrican Bulb Co., Chicago, Ill. To be offered as a prize for 25 Lily Plants in pot, cash, $50.

J. A. Budlong Co., Chicago, Ill. Discretion of the committee, cash, $25.

Hammond's Paint & Slug Shot Works, Beacon, N. Y. To be offered as a prize for the best exhibit of roses to be decided by a majority vote of the ladies attending the show. Cash, $10.

Erne & Co., Chicago, Ill. Discretion of the commitee, cash, $10.

Martin & Forbes Co., Portland, Ore. Discretion of the committee, cash, $20.

Park Floral Co., Cleveland, Ohio. Discretion of the committee, cash, $10.

A. L. Miller, Jamaica, N. Y. Discretion of the committee, cash, $25.

Mrs. J. Vaughan, Chicago, Ill. For the best table decoration, open to members of Ladies' S. A. F., cash, $25; also cash of $25 for the discretion of the committee.

Henry F. Michell Co., Philadelphia, Pa., Michell Seed House, offers for the best Vase of 12 Roses not yet disseminated, Gold Medal. For the second best Vase of 12 Roses not yet disseminated, Silver Medal.

Van Zonneveld & Co., Sassenheim, Holland. To be offered as a prize for the best Pan of Darwin Bartigon open to commercial trade, cash, $25.

Stuppy Floral Co., St. Joseph, Mo. Discretion of the committee, cash, $50.

W. H. Siebrecht, Chappaqua, N. Y. Discretion of the committee, cash, $25.

### The 1921 Fund

The 1921 Fund now amounts to $32,370.66. If all who are in arrears on their pledges would promptly complete their payments, the total amount would approach more closely the figures of the last two or three years. The Publicity Committee hopes that delinquents will take this statement as a reminder that their checks would be greatly appreciated at this time, and would help materially in the publicity work.

JOHN YOUNG, Sec.

## MR. ATKINS' LETTER

### Replies to Some of the Charges of Miss Anna Jarvis

It is evident that Mr. F. L. Atkins, of Rutherford, N. J., keeps his eye on the papers all over the country. Not long ago one of the Boston papers published an article on Mother's Day, along the lines of many stories inspired by Miss Anna Jarvis or her cohorts. Mr. Atkins immediately gave an answer in which he said:

"The writer was one of the fortunate men who happened to be on the committee that helped to start 'Say It With Flowers' on its great world journey. I am told that this slogan is now being used in as many languages and dialects as that in which the Holy Bible is printed, more than 554 in number.

"It is just possible this great slogan has brought flowers to the homes of millions of people who never enjoyed being in the presence of flowers before. The slogan became popular and has naturally been one of the great factors in bringing flowers into almost every home.

"If Miss Anna Jarvis, president of the Mother's Day International Association, Inc., of Philadelphia, will go to the slight trouble of investigating the industrial part of the trade, she will realize from the great volume of money invested in florist business, in all its branches, that flowers do not just grow as many people may believe, but are entirely dependent upon the horticultural knowledge and the millions of dollars invested in the commercial part of flower production.

"The writer feels that the printing of this article in your splendid paper is a detriment to floral and horticultural progress. Please pardon me for saying it is your duty to find a way to offset with a right, the wrong this article has done to the flower and to this great commercial industry, which every day, in some country, is giving pleasure to some unhappy mortal.

F. L. ATKINS.

## CARNATION CUTTINGS

**NEW AND STANDARD VARIETIES**
**For December and Later Delivery**

**THOMAS C. JOY.** We believe this one to be the best all-round pure white Carnation offered. It has been tested and tried in different sections of the country and without exception, has made good. December and later delivery. Rooted cuttings, $12.00 per 100, $100.00 per 1000.

**MAINE SUNSHINE.** Seedling of Ward and Crystal White. Good yellow Carnations are always in demand. Maine Sunshine is a good, clear yellow. Rooted Cuttings, $15.00 per 100, $120.00 per 1000.

**LASSIE (Ward x Alice).** A commercial Carnation of exquisite shade of rose. Very free bloomer. A decided improvement on Ward. Rooted Cuttings, $12.00 per 100, $100.00 per 1000.

**WHITE DELIGHT.** It is an improved Pink Delight in all but color. Rooted Cuttings, $12.00 per 100, $100.00 per 1000.

**REDHEAD (Aviator x Alice).** The finest scarlet Carnation today. Exceptionally free bloomer. Rooted Cuttings, $12.00 per 100, $100.00 per 1000.

**RED MATCHLESS (Matchless).** Scarlet just a little stronger in growth than parent. Rooted Cuttings, $12.00 per 100, $100.00 per 1000.

**HARVESTER.** A cross between White Wonder and Matchless. Pure white. Rooted Cuttings, $10.00 per 100, $80.00 per 1000.

**HAPPY DAY.** A very fine red. Rooted Cuttings, $10.00 per 100, $80.00 per 1000.

**LADDIE.** The best of them all. Rooted Cuttings, $15.00 per 100, $125.00 per 1000.

All the standard varieties, prices on application.

## NEW GERANIUMS

**Mrs. George E. Buxton.** Has every indication of being the best commercial double Geranium in the market. Very strong grower, producing exceptionally large trusses. A most beautiful shade of Bridesmaid Pink. Equally good for pots or bedding. Rooted cuttings, $15.00 per 100, $125 per 1000.

**Elmira.** Color of the rose Premier. Produces large truss and has every appearance of a good commercial variety. 2-inch pots, $15.00 per 100, $125 per 1000.

## REX BEGONIAS

2¼-in. pots
All the best varieties, mixed
$14.00 per 100 $125.00 per 1000
4-in., extra good, $60.00 per 100

## DAISIES

| | 100 | 1000 |
|---|---|---|
| Boston Yellow, 2½ in. | $7.00 | $60.00 |
| White Marguerites, extra strong, 2½ in. | 6.00 | 50.00 |
| Mrs. Sander, 2 in. | 6.00 | 50.00 |

Limited quantity.

**Our Complete Price List is worth having. Send for it.**

# RAMBLING OBSERVATIONS OF A ROVING GARDENER

While the nurserymen of Canada do not have to contend with the restrictions of Quarantine No. 37, I find that nevertheless they are much interested in the propagation of new material. When I was in Montreal a few days ago I had a long talk with Mr. Ferguson, the well known nurseryman of that city, and learned that he was experimenting with many of the newer plants, both shrubs and perennials. He has a cold climate to work in, but grows many of the good things that are being used in the States. He has not been very successful with Cotoneasters, but I recommended that he try C. acutifolia, which is being grown with such success by Holm & Olson in Minnesota, and ought to be hardy, therefore, in Quebec.

Mr. Ferguson is going in more heavily for peonies than ever before, and plans to grow some of the best kinds. Very much has been done to arouse enthusiasm for the peony in the Dominion through the efforts of Mr. Harry Norton, of Ayers Cliff and Boston. At his home in the former town Mr. Norton has the biggest planting of peonies in Canada, and great numbers of people go to see his garden every year. It will be remembered that Mr. Norton won handsomely at the peony show in Boston last spring. He may be expected to do as well at the next year's show, which is to be held on Canadian soil, at London, Ont. From the fact that Mr. Ferguson and Mr. Norton had their heads together pretty close, I judge that some important developments in the cultivation of peonies may be expected in Canada.

One of the perennials which Mr. Ferguson is particularly enthusiastic over is Eucharis Fleur de Peu. He considers it one of the finest garden flowers that grows, but I do not remember of ever having seen it in the States, and I do not think it is listed by American seedsmen.

Like most of the nurserymen and seedsmen in Canada, Mr. Ferguson imports heavily from across the water, and for that reason gets some of the good things long before they show up in United States, although if I am not mistaken, the particular Eucharis mentioned is by no means new.

---

Nurserymen in the United States should be interested in the work which is being done by Prof. W. T. Macoun at the Central Experiment Farm in Ottawa, Can. I heard Prof. Macoun talk the other day and tested some of the new apples which have been originated on the farm. They are remarkably good and come at a season when they will be appreciated. Attempts to cross various varieties have not been so successful, apparently, as the growing of seedlings and the selecting of those which prove good. The McIntosh Red has produced several seedlings of splendid quality and which have the merit of ripening earlier in the season than McIntosh itself. Some of these seedlings have been propagated to such an extent that they are being offered for sale, and I believe that nurserymen in this country will do well to get acquainted with them.

---

Prof. Macoun is not devoting himself entirely to fruit, however, as he is making many experiments with flowers as well. One thing he endeavors to do is to learn what varieties of the different flowers are of special value to the florists' trade. Canadian florists and nurserymen who do not keep in touch with him are certainly losing an opportunity to better their business. Among the outdoor plants being grown on the farm are 75 varieties of climbing roses. They include not only the varieties which are most in favor in the United States, but other kinds have been obtained from England and France. After a few years the report from the trials here should be of no little value, particularly to Dominion gardeners. Of course, climbing roses, like other roses growing in Canada, must have careful protection, and the practice at the farm is to take down the climbers every fall and cover them with earth.

---

Being deprived of azaleas, commercial florists and private gardeners are turning more and more to begonias, especially those of the large flowered type. Great numbers of begonias have been seen in the florist shops this season, and have sold well. Lor-

BEGONIA MELIOR

FANCY DAGGER FERNS

A No. 1 Quality, $2.50 per 1000

HENRY M. ROBINSON & CO., Inc.

2 Winthrop Square 32 Otis Street

Boston, Mass.

raine does not keep its flowers well, and so is not a good commercial plant, but some of the newer varieties of the same type are very satisfactory, notably Mrs. Peterson.

What a remarkable work has been done by the man whose name this begonia bears! Mr. J. A. Peterson, of Cincinnati, in giving the horticultural world such plants as these, has conferred a great boon on flower lovers everywhere. And strange enough nobody else seems able to approach his accomplishments. The most popular begonias now on the market are his, although the one white variety which finds favor, Turnfold Hall, is, I believe, an English creation.

Begonia Melior seems to have been especially in favor with the florists this year, some fine specimens being offered to the trade.

## ORCHIDS

### WHITE CATTLEYAS

There are no white-flowered species of Cattleyas; the flowers of all the species are more or less colored, and color and odor being two of the most important agents of attraction to facilitate fertilization by insect aid, especially as displayed in the labellums, the perpetuation of the colored types is assured. White, or color-suppressed, forms are sometimes met with in a wild state, but they are always rare, the probability being that the seed-bearing flowers of these albinos are fertilized by pollen from the colored forms, or, if set with their own pollen, reversion to the more or less colored type takes place in a great degree, says a writer in the Gardeners' Chronicle.

The members of the C. labiata section are the most productive in white forms in their native habitats; those with white sepals and petals and colored lip being the more frequent, while what are called true albinos, in which the lip is also white, are rare. In all white forms the yellow of the labellum, which is more in the nature of body color, remains, while the evanescent surface rose or mauve tints of the sepals and petals vanish, and in some way provide for the development occasionally of pure white in the whitish ground tint of the flower.

The section including C. O'Brieniana, C. intermedia and others of the class, are affected in the same way, producing true albinos. C. bicolor, C. granulosa, C. Leopoldii and others of their kind have flowers with greenish ground tints in the sepals and petals, and in them there is no pure white, the albinism resulting chiefly in suppression of the color markings, although the labellum, having a whiter ground, may sometimes be white.

To the hybridist the C. labiata section, with its large and finely formed flowers, is the most important. This section, as stated, is the most prolific in white forms, though curiously enough C. Dowiana, with its slight yellow surface color, and which has been one of the most important factors in dispelling the rose and mauve tints in others when crossed, seems never to have yielded a white form itself, even though it has been raised true from seeds in gardens.

The production of white forms is one of the most desirable fields for the hybridist to work in, and it must be said that intelligent and very successful work has been done in that direction. By crossing two albinos, it was found that albinos resulted when there was no suspicion of color in the parents, but if not perfectly white a reversion to the colored type resulted, although the desired end was sometimes attained by crossing again.

Even the crossing of two-colored varieties may give a proportion of whites as, for example, the C. Corona alba (Hardyana x Mantinii) in which the yellow of the C. Dowiana aurea in the Hardyana in some of the batch suppressed the mauve of C. Mantinii. In other colored crosses a white sometimes appears, and altogether good white orchids have been produced in profusion, thanks to the diligence of the hybridist. Each cross has its well-defined distinguishing characters of size, shape, substance and odor, and another value is their different seasons of flowering.

**SAYS SAM: Some people are always grumbling because roses have thorns. Why not be thankful that thorns have roses?**

**Trade Shows** With all our shows and exhibits, why not have one which shall be run by the trade for the trade. It is an idea which is being worked up in England and might well receive attention here. We do not know that the idea has ever been suggested before, but it seems to us that there would be very keen interest in propagating, potting and tying competitions. Not only would there be a healthy rivalry, but the younger members of the trade would certainly absorb a great amount of useful knowledge if they witnessed contests of this kind properly conducted. The idea might be carried even further so that there would be competitive exhibitions of flower handling, the making up of floral pieces, the packing of boxes, etc. While the exhibiting of cut blooms is in itself an outstanding attraction, there can be no doubt, we think, that great numbers of people in the trade, and perhaps some outside, would be equally interested in a well executed demonstration of methods and processes by which flowers are handled and distributed. Perhaps the results of such competition would be seen in the work room and the benches. It is foolish to decry the education received at Horticultural colleges and schools, and yet there is danger of too much theory and too little practice being received at such institutions. The theory is good, but the practice is equally as important for the young man who is going to make floriculture his life work.

A writer in the English publication called The Horticultural Trade Journal says: "I would rather engage a young fellow who could win a trophy for quick and clever work than one whose faith is pinned to a diploma which shows that he passed with honor in the botanical science examination after a six months' college course. It should, in my opinion, be one of the foremost aims of the whole trade to get its own trade shows and to make the workmanship competitions the main feature, for by such means the lads and young men will find that interest in the calling which is essential to their own success and the well being of the trade."

It may be that competition of the kind suggested might be undertaken with good results at some of the meetings of the different florists' clubs and, for that matter, at the conventions of the nurserymen as well. For what is said applies to the nursery industry as well as to the florist business. Nurserymen are only too pleased when they can hire young men who are able to say that they have budded a couple of thousand rose stock in a day, with a 90 per cent "take," or youths who can graft, layer, make cuttings or prick out seedlings in a manner that ensures success and at a pace which makes their work commercially satisfactory.

Isn't there an idea in all this which can be developed to advantage?

---

**Coming Or Going?** A prominent florist was explaining to his employees not long ago that there was no such thing as "standing still" in the flower business or in this world, that as soon as they did they immediately lost ground. "That's right," exclaimed one man, "We're either coming or going." That's just it exactly; when we do not improve, learn, develop old ideas or find new ones, we are going backwards and everyone knows just how fast one can go in this direction when there's no driving power to keep us going forward. It is a good thing to keep a goal just in front of us to give us an incentive to work for something and just as soon as that is reached mark off another goal and go to it. One will never know how easily these goals are reached until he tries it.

---

**Watch Him.** Whenever you run across a man who brands all business men as thieves and liars, you'd better play safe and make him pay cash. That's the truth. We never knew a man who was suspicious of everything and everybody, who wasn't a good man not to do business with.

# You who have seen the New Pompon

**"NEW YORK"** have recognized something that is better than anything among the older named varieties. It is a seller on the market and is well deserving of the Silver Medal awarded it at the Museum of Natural History Show. Following **"New York"** and a sister to it is

**"LOUISE DAVENPORT"**—There is more bronze and less yellow in its color. There is a wonderful similarity between the two and **"Louise Davenport"** follows **"New York"** by nearly two weeks in season.

**"SARAH TOWNSEND"**—Another Hilda Canning seedling and a sister to both **"New York"** and **"Louise Davenport."** **"Sarah Townsend"** is ready to cut November 20th. These three bronze button Pompons will give a continuous supply of this type from November 1st until December 1st. You need all three to cover the month properly.

**"NOVEMBER GOLD"**—The finest of all the yellow sorts will also be offered this season.

We believe these four Pompons to be the best of this type. The price will be $15.00 per 100. $140.00 per 1000 for cuttings.

## A. N. PIERSON, Inc., Cromwell, Connecticut

### THE SKY A HABIT

#### An Interesting Thought for the New Year

Claude Monet, the well known impressionist painter, was once visited by a young art aspirant, who handed him his portfolio of sketches.

Monet looked them carefully over and in giving them back said, "What does the sky say to you?" "The sky say to me? Why, nothing." "Well," said Monet, "come back to me again when it does, for until the sky speaks to you, you cannot paint." Yet how many of us at the end of a day can describe what the sky has been? We would know whether we had needed our umbrellas, whether it had been cold or warm, but who of us can tell which month has the gray skies shot through with golden light, when to expect the most beautiful sunsets, or when the great white picture clouds are sailing through the sky?

Sometimes it seems as if we were all so intent on the task [illegible] of Dr Edward Everett Hale's familiar verse that we forget the first,—

> "Look up and not down,
> Look out and not in,
> Lend a hand."

Yet the buoyancy of the person who looks up in these days helps, perhaps as much as the person who puts lend the hand. In the Museum at Olympia is a bas relief of Atlas carrying the weight of the world on his shoulders. Behind him stands a nymph. She has not lifted her hands to bear the actual weight of the world, yet no one could see the relief without realizing that Atlas was helped by her sympathetic presence. She was there.

One day in going through a hospital ward I heard the men wearying at the inertia of their convalescence; they were longing for strength to return that they might be out. It did seem dreary until from the windows of their ward we saw the blue of the sky as Sill has said:

"Half wondering if a man who reads
'Blue sky' in books that color sees,—
"So fathomless and pure: as if
All loveliest azure things have gone
To heaven that way,—the flowers, the sea,—
And left their color there alone."

Or when we are troubled as to how to make ends meet on earth, can we not remember that Lowell has told us:

"'Tis heaven alone that is given away
'Tis only God may be had for the asking."

M. R. Case.

**MICHELL'S SEED HOUSE**
518-516 Market St., Philadelphia, Pa.

# ADVERTISING AND SELLING

## ADVERTISING AND SELLING

Not long ago I was talking with a florist who pointed out one of his customers just leaving and said: "That man owes me over a thousand dollars. He is one of my best customers, but he only pays every year or so. I don't like to offend him by pressing him for money, but his delay causes me no little embarrassment." There are many florists in a like position. Under such conditions a credit business is a good one, but the young florist and the man who has limited capital, find themselves much better off if they can stick as far as possible to a cash basis. One retailer sums up the advantage of doing business strictly on a cash basis as follows:

"A book-account represents money lent without interest or security.

"Book-accounts don't pay bills or buy new goods.

" 'I will pay tomorrow,' means next week, next month, next year, or never.

"Cash in hand is worth two in the book.

"The more business you do at less-than-a-living profit the worse off you are.

"The more you trust out the more you have to charge your cash customers.

"Cash sales refill your shelves. Book-accounts empty them and curtail your business.

"Cash sales take less capital, less bookkeeping and make more profit.

'You can afford to do a cash business if you don't do half as much.

"Your book-accounts are cash invested that is not earning you a living."

---

It might be a good thing if florists would tell the general public more about their business. This sort of publicity, when it gets into the newspapers, attracts much attention to the demand for flowers. An example was given in Allentown, Pa., recently, when Mrs. Fred W. Balliet, who with her husband conducts a florist establishment, spoke at a meeting of the Quota Club. Mrs. Balliet gave those present much general information about the way in which flowers are handled, and even demonstrated the construction of a floral wreath. Mrs. Balliet aroused special interest by what she said in regard to the telegraphing of flowers. Almost every city has a business organization of some kind at which a florist might well represent the industry and it is good advertising for the trade in general.

---

It seems that other lines of trade are not slow in copying various phrases originated by florists. We have seen "Say It with Flowers" paraphrased to such an extent that it even figures now as a song which is slightly changed so as to read "Say It with Music." In looking over a grocers' magazine recently I found that Henry Penn's well known expression "Flowerphone" had been adapted by a confectionery company so as to read "Candiphone," while a pastry concern was advertising "Pastriphone." Likewise the advertising manager of the candy store had adopted the plan of watching birth announcements carefully, the little ones shortly receiving a card stating that if their parents would bring them to the store they would receive their first stick of candy without charge.

We wonder if as a rule florists follow up engagements as carefully as does this candy manufacturer. The moment an engagement is publicly announced, the firm writes the bride-to-be a personal letter with their best wishes. This letter tells her that they are sending under a separate cover a box of candy as a small memento of their congratulations. They add that they hope sooner or later to be able to supply her more generously. Then, after the wedding has taken place, the young woman receives another letter in which the store places its services at her disposal, inviting her to call, with the assurance that she will receive courteous treatment at all times.

One other plan might be worth consideration. Whenever they see the announcement that a new family has moved to town or is coming to the local hotel, they write the wife a pleasant letter telling her about their goods and their service. In this way they get themselves before the eyes of the home maker before she is actually installed in the new home, and a pleasant welcome-to-a-strange-city letter of this kind warms the cockles of the recipient's heart and in many cases makes her a steady patron.

---

## WINTER COURSE FOR FLORISTS

A ten-weeks' winter school in floriculture is to open in the Massachusetts Agricultural College in Amherst, January 2. It is designed primarily for students interested in commercial floriculture, and special trips will be taken to various large establishments in the state. The Massachusetts College is second to no other college in the east in the amount of greenhouse space available for class work, having a total area of 20,000 square feet. Further details may be obtained by writing to the college.

---

The McCarron Floral Co. has opened a new store in the old Times Building at Raleigh, N. C. A very attractive opening announcement was published in the Raleigh papers.

## GOOD MONEY FOR SEEDSMEN, FLORISTS, AND NURSERYMEN

**Who Catalog—or Sell Over Your Counters—Cook's Chinese Cinnamon Vines and Cook's Hybridized Potato Seeds**

LARGEST GROWER IN THE WORLD

**Cinnamon Vines** are extra big sellers—and pay big. They are sure to grow and sure to please and make friends. The Tubers are nice and clean to handle, never rot or dry up, are light to mail, require no packing, and you can sell and deliver them by mail, express—or over your counters from January to July. My first order for 1922 was for 50,000 Tubers—from a Firm who sold 15,000 last season. What more need be said?

**Cook's Hybridized Potato Seeds—From the True Seed-Balls**

**My Potato Seeds** are the wonder of Gardeners and a puzzle to Scientists. Every Seed will positively produce a new and distinct variety of Potatoes. **Always** big pullers of orders—but when Potatoes are scarce and high (as they will be this season) the orders come in a **perfect deluge.** No other can at all compare. Millions want this rare and vanishing seed. Simply them and make $500.00 or $1,000.00 clean profit as many do. All will be clear gain for it conflicts with nothing else you sell. Sample Packet Free. Send for one.

If this adv. doesn't convince you that these are extra good paying things for you to handle—write me a Personal Letter and I will say more. Electros—any size—supplied. Trade list with particulars free. Yours for big business.

**A. T. COOK, *Seed and Vine Specialist*** **Hyde Park, N. Y.**

## George Watson's Corner

"You in your small corner and me in mine."

Tom Roland hands down his sceptre as president of the S. A. F., January 1st, to his successor, Sam Pennock. Mr. Roland has made a fine record during his incumbency of that great office and we all take our hats off to him. And we have no doubt but that Mr. Roland hails his successor with high enthusiasm as he no doubt feels, as we all do, that Mr. Pennock is in thorough sympathy with the Roland policies and that these will be continued and amplified to the utmost extent possible. Both men are proven heroes in the business, one in the growing end, the other a wholesaler. Both of them are modest men, and blush when they are praised a little, so we will let them off easy and say no more. We will leave our questions about the Hitopadesa, etc., for those bright lights, John Welsh Young, Robert Kift and Brother Engler. Roses grow while you sleep.

---

One of the things our new president will be apt to do in his inaugural address to the S. A. F. on taking office, January 1st, is to "say a few things." And the honorable Samuel knows how to say them. The Society is to be congratulated on not only a forward-viewing personality for its head; but one endowed with a fine experience of history in the making during the past quarter century. We have had some great men occupying that seat of honor during the past 37 years; but none of more all 'round caliber and experience than Samuel S. Pennock. And he is ultra-modest with it all, and would be the last man to admit that what we say is really so.

---

Now for the future. Along which track will we run? The carnation men, a lot of them, a few years ago, thought the rosarians were getting the best of it, so they switched over. They became rosarians. After you become a rosarian you butt into a new market, and the price of roses comes down. So, this season, a lot of them are wishing they had remained carnationists. Carnations are scarce and bringing good prices. Ain't it awful, Mabel, how things go? First we think yes, and then again we don't know.

---

It was bad enough for the printer to call our good friend Battles "Baffles," and, still worse, to call another dear friend Mark, "Jack"; but to call that distinguished gentleman Harry Waterer a "Waberer"—that's the limit! Perhaps he just did it to show his spite, and to emphasize the fact that placing him under the "Doom of Doneraile" had no terrors for him. I guess the "Doom of Delaware" would be more effective. The great State of Delaware has some excellent laws on its statute books, even in these unholy days. One of them is:—Forty lashes on the bare back. I suppose all the answer we'll get is that it's lucky he didn't call him a "Wabbler." However, the villain in this story at least knows now that the heroes of the story are after him, hot foot, and that he'd better beware.

---

What do you mean—a "Cleveland Cherry?" We know what a Boston Bean is, although it don't belong to Boston, and never did; but what do you mean by a Cleveland Cherry? Looks like camouflage. So come across. I'll bet Cleveland never invented it; or if she did, it's a bluff of some kind. I've always considered Youngstown the horticultural center of Ohio, since John Walker located there from Philadelphia. Cleveland has another think coming! So, as I said before, Cleveland—come across!!

---

At the January meeting of the Florists' Club of Philadelphia there will be a little talk by Samuel S. Pennock on his experiences in Europe during the Spring, Summer and Fall of 1921. He looked over many of the leading horticultural establishments in France, Germany and England during his pilgrimage on Friendly Service, and also attended the principal Flower

Shows in Paris and other places, so he is in a position to give the American growers an interesting talk. It will be well worth hearing, and we understand will have the added attraction of some excellent lantern slides to illustrate same.

Restraint of trade. That's what the lawyers call it. But if a couple of farmers meet on the road to market each with a horse to sell were to agree to a price for their respective mounts—wouldn't that look like common sense, instead of restraint of trade? So why should it be any different in a case where two window glass men haul their loads to market to agree beforehand not to cut each others' throats? If two rose growers were to meet on their way to market would you put them in jail if they came to a common sense agreement not to undersell each other? According to our point of view the haggle of the market takes care of itself. Supply and demand. When all is said and done, the government is only a policeman. Nothing to do with our buy or sell or what we eat or drink.

As a beginner we will leave the first question with Mr. Young. What was Aristotle's idea of democracy? His paper has the most pages in Chicago, although only an offshoot, so we will give him first chance to make good. The shades of Scott and Grant will help him all they can, if they can only be reached.

The Dreer people are always up to date and original. We were particularly tickled this year to receive one of their 1922 calendars. And what do you think is its feature? The nicest thing they could have done. The Flanders Poppy! Very nice little colored plate, showing the red poppy with its dark center; and below, an appropriate little calendar block for the year. That little gem stays in front of us affectionately for the next 365 days to come. Thank you, gentlemen. You know how to reach our hearts. No, not on the wall; but right on our desk in front of us. Gone but not forgotten. The Flanders Poppy. That picture touches the heart of those who have dear ones under the sod in Flanders fields, and they will always be remembered.

A charter has been granted to the Louis M. Noe establishment, Chatham, N. J., which is to manufacture floral designs. The company is incorporated for $100,000.

## LANCASTER FLORISTS CELEBRATE

The tenth anniversary of the Lancaster County Florists' Association was a big event. A banquet was enjoyed, followed by speech making and dancing. M. J. Brinton, of Christiana, was toastmaster. Mr. A. M. Herr, the first president and the organizer of the association, reviewed the beginnings and growth of the organization. The following were nominated for office the coming year:

President, Harry K. Rohrer; Vice-President, Jack Moore; Secretary, Albert M. Herr; Treasurer, Mr. Lemon Landis.

**ROMAN J. IRWIN**
IMPORTER
43 WEST 18th STREET, NEW YORK

Resolutions of respect were drawn up by Messrs. Markley, A. M. Herr and B. F. Barr on the death of Harry A. Schroyer.

A. M. Herr was the happy recipient of an electric floor lamp, B. F. Barr a stick pin, and W. B. Girving a box of cigars for services rendered. There were others just as deserving, but these three were lucky.

Dancing was indulged in until a late hour and "delighted" was the term used by everybody. Our only regret was that more of our out of town members and friends could not be with us, but T. J. Nolan represented a pretty big section of the country and Earl C. Tipton the balance.

ALBERT M. HERR.

## MUCH FOREIGN STOCK COMING IN

Manetti stocks are now arriving in good volume in New York, according to McHutchison & Co., who are in close touch with foreign trade. The Olympic brought three consignments last week, and the Baltic two. The McHutchison importations this year are between one and two million Tuberous Begonias and Gloxinia bulbs are now in. The bulbs are fully as good as the Belgium bulbs, but the price is eight to ten times more. Transportation alone has cost this company $3,180.00 to date. Probably few people realize the volume of basin which is done in raffia. The McHutchison Co. now has in stock, en route or in storage 2,500 bales of raffia. It also has 1,100 bales of bamboo canes.

The Ludwig Floral Co., of Pittsburgh, Pa., is sending out some very attractive postcards showing the Saxonwald Greenhouses, at Castle Shannon, which they control. There are ten of these greenhouses, arranged one above the other on the side of a hill in an unusually commanding situation.

WHEN you think of a concern, don't you promptly think of a certain few things about it, that to you mean the concern itself? To you, it makes but little difference what the capitalization is or who is the general manager or chairman of the Board. Satisfaction, sure and secure, is the only thing that really interests you.

To our notion, business satisfaction is mainly made up of two things: Sincerity and Pleasant Dealing. If we are sincere, **your** interest comes **before** ours. It's not a question of what kind of a house there is the most money in for us to build, but what house will at once best build **your** bank account. If it will surely build yours, it will just as surely in the end build ours.

So being sincere is not only being sincere, it's good business. If we believe in Pleasant Dealing, any question of changes or readjustments that may arise, will be handled as one good friend to another. When it comes to payments, fairness, of course; but always friendliness as well.

For this New Year 1922, we are not seeking to sell you just a greenhouse. We want you to put your money into Hitchings Sincerity, Friendliness, and Pleasant Dealing.

### CHANGES AMONG NEW ENGLAND GARDENERS

Charles Manson has become superintendent of Wild Wood Farm, Seal Harbor, Maine. Mr. Manson succeeds James Warr, who has gone to England for a six months visit.

Richard Calvert, formerly of Chestnut Hill, Mass. has become superintendent on the Aldrich estate at Glen Cove, L. I.

Gustav Hamerin is now gardener on the B. B. Clarkson estate at Tyringham, Mass.

Robert De Schryver has left the Swift estate at Prides Crossing, Mass., where he was superintendent for many years, to take charge of the E. D. Speck estate at Detroit, Mich.

C. H. Halpin is now head gardener for Miss H. L. Maynard at Richfield, Conn.

### NEW ENGLAND NOTES

A new flower store has been opened in Salem, at 233 Essex street. It is called the Essex Flower Shop, and is a branch of the Terminal Flower Shop in Boston.

Mr. C. A. Aken and Mr. Eugene McCarron, florists of Providence, have been elected to membership in the Rhode Island Horticultural Society.

John F. Fitzgerald has entered the employ of Campbell, the Florist, at Lawrence, Mass.

The Siebrecht Floral Co., Marion, Ind., has been incorporated, with a capital stock of $2,500.

### JOHN C. MEYER'S NEW YEAR'S GREETING.

Early one morning, not long ago, a big, husky looking darky shambled into the outer office. After giving the place the once over, the following dialogue took place:

"Mawnin' sah! Is you de boss?"

"Yes, I am in charge at present."

"I wants to know if you-all has a job aroun' here wifout a niggah tied to it—ca'se if you-all has de job, I's de niggah."

If you-all got a minute—I wish to say

HAPPY NEW YEAR

Vol. XXXV JANUARY 10, 1922 No. 1

# THE TALK OF THE TRADE

A recent trip through New Hampshire and Vermont following the Christmas rush served to show that the retail florists in those states had their full share of the holiday business. There was some expectation that people would spend their money more freely for the necessaries of life, but apparently they were not at all backward about buying flowers, particularly flowering plants, although cut blooms were well cleaned up.

Mr. H. E. Meader, of Dover, was rushed to the last minute and cleaned out everything that was salable. The Garrison Hill Greenhouses in the same city also had a very heavy trade. Their call for roses for shipment out of town was particularly large. It was impossible to take care of more than a small part of the business offered them.

Mr. Meader, by the way, now has his new range in running order, it having been completed the past season. This model range was built of A. T. Stearns material, with houses all running east and west, and having a space between them. The range includes a top notch boiler plant, and a dandy looking pressed brick stack. Mr. Meader is very well known as a gladiolus expert and many people in the trade do not realize that he is also a cut flower grower and a retail store man.

In Rochester, N. H., E. A. Corson did a rushing business. Miss Corson, who is in charge of the store, reports a fine clean up, and I am particularly pleased to say that this concern closed its eyes to old fashioned competition pleas and got decent prices. The florist business is certainly waking up in the smaller towns. Ellis Bros. of Keene, tell the same tale as the other people visited.

---

Harry Totman, of Randolph, Vt., seems to be doing an excellent business at the new store which he recently opened at White River Junction. He is kept busy running his two establishments, which are some distance apart. When I called at the Randolph store recently, I was surprised at the number of packages which I saw going out by express and parcel post. I understand that in each town he has a population of approximately fifty thousand to draw upon.

---

The opening of the new store some weeks ago was really quite an event, and deserves more attention than seems to have been given it.

I was recently talking with Mr. Vernon T. Sherwood, the well known florist of Charlestown, N. H., who was present at the gathering and said that everybody had a splendid time, Mr. Totman making the occasion a red letter one for northern New England. Florists were present from Brattleboro, Claremont, Bellows Falls, and various other towns.

It is quite possible, according to Mr. Sherwood, that the florists of these places will form some sort of organization as a result of getting together at this affair. It would be a good thing, too, for there are many ways in which the florists in these smaller towns could help each other out. I am sure that all of us could learn something from Mr. Totman, for his business methods are up-to-date in every respect, and his stock is always of the best, no matter whether he grows it himself or buys it.

---

Speaking of Mr. Sherwood calls to mind the great amount of geranium and vinca stock to be seen at his place. The vincas are a specialty with him and are grown so well that they almost sell themselves when planting out time arrives. Still he has his troubles with them. "I have several thousand," he told me, "which, although potted up three months ago, I cannot succeed in making grow large enough to sell in quantities during the three coldest winter months, in spite of sixty degrees and plenty of water, although just now there is a little red-looking break at the base which shows they are coming along all right."

He has about decided that he might as well keep the vincas at fifty as at sixty, because they won't make much extra growth during the winter, anyway. He would like to know what other growers think about this.

Mr. Sherwood has been in business for a long time, but he isn't the kind of man who thinks that the good old days were necessarily the best. In fact, he thinks the present times are pretty good. Every decade of our lives brings its own particular compensation, as he says, and after all it really doesn't matter much so long as we can have a smile on our faces every day. I guess Neighbor Sherwood's philosophy is a pretty good one.

---

While on the subject of business matters, a little conversation I had with a live New England retail merchant, not in the florist line, has set me to thinking. He said that almost every line of business has been very satisfactory the past holiday season, and attributes the fact largely to the growing popularity of the Christmas Clubs run by the banks. He said that in one town, in particular, figures were taken which proved that business made a sudden jump when the Christmas funds were unloosed. Undoubtedly the florists have profited along with the other lines.

---

My opinion on the present argument concerning parcel post special delivery, is that, unless this branch of the service can be improved, we might just as well do without it. To put a special delivery stamp onto a parcel post package now is pretty nearly

**FLORISTS' RED LETTER DAYS—1922**

Nov. 30—Thanksgiving Day.
Dec. 25—Christmas Day.

useless. I know that one line of the florist trade in particular has found this true. I mean the growers who ship rooted cuttings of different kinds. I think you will find that many of them advise their customers to have the stock go by express rather than by parcel post. The special delivery stamp looks all right, and the plan sounds very good, but that is about as far as it goes.

A real special delivery service would be of great value to our business, but there is little doubt but that ten cents does not pay for this special service. I am sure that we would all be willing to pay more if we could get satisfactory delivery. Twenty-five cents on a special parcel for quick service would be well worth while. I have heard quite a number of people asking why small packages from growers have been sent by express. Now rooted cuttings of any kind must go through promptly, and experience shows that it takes several days longer to ship by parcel post than by express. I believe that that is the answer, and it ought to be a satisfactory answer, too.

---

There has been a remarkable scarcity of potted plants since the holidays and this is true in particular of begonias and cyclamen. These plants, except in very small sizes, were practically cleaned up. One retail dealer in Boston recently learned the truth of this statement. He needed several hundred begonias of fair size and visited fourteen growers' establishments without being able to find what he wanted. Was it a good holiday season for the growers? I'll say it was.

---

There are none too many ferns in the larger sizes to be had, at least in New England. R. & J. Farquhar Co. have a good lot of ferns in 4, 5 and 6-inch pots at their establishment in Dedham, but there are few other growers so well supplied. And, by the way, where is it possible to find large sized palms and other decorative plants in any numbers in the neighborhood of Boston? It is a question which retail storemen often ask without getting a satisfactory answer.

---

The news of the passing of Adolph Gude, of Washington, was received with the deepest regret by everybody in the trade. Of course many florists knew that Mr. Gude had been in ill health for the last two years, but did not realize that his condition had suddenly grown serious. In fact, few of them knew that he had been in the hospital for five weeks. Mr. Gude's career is an inspiration for all young florists. Starting in business with a capital of only $250 he gradually worked his way to the top. After erecting three greenhouses in 1888, he made his brother, William F. Gude, his partner, and from that time on the growth of the business was rapid.

Mr. Gude was a broad minded man, and interested in many activities. He had been Grand Commander of the District of Columbia Knights Templars, was at one time president of a bank, was prominent in the Chamber of Commerce, and of course very active in the work of the S. A. F. He will be greatly missed.

---

The many friends of Mr. James MacManmon and his estimable wife are glad to learn that the fire which reached his flower store in Lowell, Mass., recently did not put him out of business. To be sure, the fire burned up a fine stock of plants which was on hand at the store, as well as a considerable quantity of vegetable and flower seeds. Fortunately, however, the MacManmons had a good supply of plants and cut flowers at their greenhouse, so that they could fill orders for funeral work, wedding pieces and the like, with their usual promptness. One serious loss, coming just as it did, however, was a considerable number of Christmas baskets. Mr. MacManmon estimates that his loss in the store was about $2,000.

---

A number of greenhouse men have suffered losses from fire recently. The last blaze reported destroyed the head house on the range owned by Wilfred Wheeler at Concord, Mass. Although Mr. Wheeler grows vegetables, he is well known in the trade throughout New England, having been State Commissioner of Agriculture for several years.

**Pres. S. S. Pennock of the S. A. F.**
His Annual Address Appears on Another Page

---

Benjamin Hammond has made himself known the country over for his work in developing gardens for boys and girls. He has even reversed the old saying about a prophet being without honor in his own country, for he is held in high esteem in his home town, Beacon, N. Y., and the schools there reflect his efforts and energy in no small way. A Beacon paper was recently received in which much space is given to a review of the season's work. It is reported that over six hundred pupils were members of the home garden brigade.

---

## NEWS NOTES

The Saltford Flower Shop at Poughkeepsie, N. Y., has purchased the block in which it is located, and which is one of the landmarks of the city.

Herman G. Kretschmar of Flatbush, N. Y., a well known horticulturist, died recently, leaving a wife, two sons and a daughter. He was a member of the S. A. F.

The florist establishment of Hayes Bros. at Redbank, N. J., has been moved to a new location in the Brasch building, which has been leased for two years.

A. E. Kunderd, the famous gladiolus grower of Goshen, Ind., says that the past season was one of the most favorable in his experience. He harvested three thousand bushels of bulbs, and has begun mailing his fifty-six page catalogue, of which sixty thousand copies are being distributed.

D. L. Smith, an ex-service man, has opened a new flower shop at Birmingham, Ala. He calls it "The Blossom Shop."

L. C. Margot, for 27 years a florist in Jamaica Plain, has decided to discontinue business at the end of the holiday season. His store was the first of the kind to be opened in the Jamaica Plain section, and his many friends will be sorry to see his store vacated.

Because of difficulty in obtaining a vacant store in Dansville, N. Y., Miss Zimmer, the florist, has been obliged to move her stock into a garage for the time being.

# IN AND AROUND BOSTON

## JOHN P. FITZGERALD MARRIED

John P. Fitzgerald, the well known retail florist, with a place of business on Huntington avenue, was married last Saturday morning at 7.30 to Miss Mary Small, of Waltham, who for several years has been head bookkeeper for the Henry Robinson Co., in Winthrop Square. The ceremony was performed by Rev. Fr. Fitzgerald, an uncle of the groom. The young couple left immediately for a wedding trip to Canadian cities. Both the bride and the groom have hosts of friends in the trade, and were handsomely remembered by the co-workers of Miss Small in the Robinson concern.

## THE MARKET

There is a good normal market, with no surplus, and everything being cleaned up well. Carnations are selling for six to eight cents, average stock. Maine Sunshine has been bringing ten cents and Laddie twelve. Roses are running from eight to sixteen cents with practically no American Beauties to be had. Violets have made an excellent recovery from their slump. There are none too many of them, and they are bringing $1.50 a bunch. There are good lilies for which twenty-five cents is being asked, but there is practically no demand for them. Roman hyacinths are being offered in bunches, but nobody seems to want them. This is strange, for they seemed to be popular years ago, and are excellent for working into funeral pieces. Calendulas are in good demand, and well grown, and bring from two to three cents. Golden Spur is selling for ten cents. Some excellent wallflowers are being sent in by Beasley, a pansy specialist of Milton, and are bringing fifty cents a bunch. Freesias are being offered at ten cents. Some potted tulips and hyacinths are beginning to appear in the market, and there seems to be a good sale for them.

## MASSACHUSETTS HORTICULTURAL SOCIETY

The Annual Inauguration Exercises of the Massachusetts Horticultural Society were held at 3 o'clock, Monday afternoon, January 9. President A. C. Burrage presented an able report, which was heard with much interest. Horticultural Hall, during the past year, has been in greater demand than at any time in its existence. Over $9,100 in rentals was taken in, this being $4,000 more than the previous year.

## THE SELLING SITUATION

The dispute between the growers and retailers in Boston is still unsettled, although matters have been very quiet the last few weeks, owing to the rush of holiday business. The growers have submitted a proposition to the retailers, and a committee from the latter are considering it. A meeting of the retail association will probably be held this week. During the holidays the signs advertising flowers at retail at ten o'clock in the morning were removed from both markets, but have now been restored. The number of retail sales in the markets is not large, however, possibly because no further advertising has been done.

## GROWERS' TO MEET AT HARTFORD

The second annual meeting of the National Flower Growers' Association will be held at Hartford, Connecticut, in the Bond Annex Building, on Thursday, January 26th, at 1 p. m. in connection with the Carnation Convention.

All members and growers interested are invited to attend this meeting. Important changes in the by-laws will come up for consideration, along with other important subjects, according to the secretary, J. F. Ammann of Edwardsville, Ill.

## BOSTON NOTES

While the Gaffy Flower Basket Co., of Wakefield, is not a large concern it has set a pace for other manufacturers in the quality of the baskets turned out. T. F. Gaffy, the manger, was formerly with the Bayersdorfer Co., of Philadelphia, and knows his business thoroughly. He has originated some unusual designs which are making quite a hit with the florists.

Mr. James Casey, the proprietor of The Rosary, reports the biggest holiday business that he ever had. This is interesting, as showing that it is possible for a florist shop located near the upper end of Boylston street to make a success. While off Copley Square, The Rosary seems to retain most of the business which it had at the old location. And, of course, Mrs. Casey, who is herself a saleswoman of no little ability, is on hand to greet visitors.

## NEW YEAR'S GREETING

### Message From Pres. Howard of the American Carnation Society

As president of the American Carnation Society, I extend best wishes for a prosperous and Happy New Year to all the members of this Society and all interested in horticulture. We have every reason to look forward to the new year with expectations of service and success. True, it is a period of readjustment, but the changes to normal conditions are continuing slowly and surely, with but little needless upheaval. Our business in comparison to others has suffered very little. Yet to have the success which our profession should have, we must work together toward the object of our society, "the advancement of the carnation."

On January 25, 26 and 27, we are to have our first opportunity for co-operation. On those dates the annual convention of our association is to be held, in a joint meeting with the American Rose Society, in Hartford. There we will have a chance to get together, exhibit our flowers, and discuss our problems. Let us all ask for and give advice freely at that time, for it is through general discussion that valuable suggestions are received.

We hope that our fellow-members from the West will not only come in large numbers for this meeting, but will also bring or send exhibits. For the past few years, the Western growers have been rather lax in this respect. It is not only their opportunity but their duty to help make these exhibitions a success. We need and trust to have their co-operation. We, as a branch of the Society of American Florists and Ornamental Horticulturalists, have a chance to do our share toward the furthering of horticulture in general. The great National Flower Show, in which we are to take an active part, will be held in Cleveland, next March. Let us do our share toward making this the finest exhibition ever known. Already preparations are practically completed. The splendid new building there is finely suited for our needs. Yet the success or failure depends on us as individuals. Let us each help to make it a success by sending exhibits and, if possible, attending in person.

I have full confidence in you and know that, through your help, 1922 is going to be the finest year ever known in our profession.

W. D. HOWARD.

## SOLDIER'S WREATH

The very attractive and somewhat novel soldier's wreath shown on the opposite page was designed by Henry Penn of Boston. A wreath of this kind is a particularly fitting tribute to departed soldiers of the late war, and retailers should be able to take orders by showing their customers this illustration. An eighteen-inch wreath of this design requires the following material in addition to the frame: 750 Magnolia leaves; 5 yards of red, white and blue ribbon; 6 white Chrysanthemums; 3 bunches of Garza Pom Pons and 2 Sago Palms. Of course, when chrysanthemums are out of season white roses and daisies may be substituted. This wreath is designed for an easel.

## TAKING TOO MUCH FOR GRANTED

The proprietor of a certain store is forever scolding his employes for their indifference in the matter of possible sales.

One day, hearing a clerk say to a customer, "No, we have not had any for a long time," the proprietor, unable to countenance such an admission, began to work himself into the usual rage. Fixing a glassy eye on the clerk, he said to the customer:

"We have plenty in reserve, sir—plenty downstairs!"

Whereupon the customer looked dazed; and then, to the amazement of the proprietor, burst into hysterical laughter and walked out of the shop.

"What did he say to you?" demanded the proprietor of the clerk.

"'We haven't had any rain lately.'"

## ILLINOIS NURSERYMEN

The executive committee of the Illinois State Nurserymen's Association has voted to co-operate with the planting service bureau conducted by Mr. F. F. Rockwell, of the National Association. The annual meeting of the Association will be held in Chicago, January 19-20. The executive committee is endeavoring to put into effect the Standard Practice Service, as outlined at the last convention, and any nurseryman outside of the state who desires to co-operate can obtain full information by writing to Secretary J. A. Young, at Aurora, Ill.

Earl J. Seniff has taken possession of the greenhouses in Utica, N. Y., formerly conducted by William Pfeiffer. Mr. Seniff has been in the employ of Barker, the Florist, for many years, and his experience well qualifies him for his new work.

**Awarded First-Class Certificate by Massachusetts Horticultural Society and by all other Horticultural and Agricultural Organizations before whom it was exhibited.**

**Make reservation now with your dealer for Fall or Spring delivery.**

### WOOD FIRES

Patches of snow lay on the ground interspersed with brown stubble, which gave the country a dreary moth-eaten appearance. A sullen gray sky presaged a storm. The air was raw and chill. The men had been logging all day, chopping down the trees and piling up the wood. After a hearty supper of salt pork and beans, wrapped in their warm blankets, they were now sleeping sound by the fire. All but one, a youth more slightly built than the others, with a dreamy, thoughtful look. He was tending the fire, throwing on the pine logs and watching the flames leap up. He l'ked his work, and as he heard the merry snapping of the sparks, he thought of a day of the previous summer when he had cared for the horses of a gay party of picknickers and had made the fire for their kettle. Then, as the sparks snapped out, a young girl had cried joyously to her companions, "Oh, hear the fairies come out of the wood. They will soon be dancing with the sunbeams and the breezes."

M. R. CASE,
Hillcrest Gardens, Weston, Mass.
December 31st, 1921.

### HAVE YOU SEEN THE WIND?

One time Ernest D. Hastings, the magazine editor of the Dry Goods Economist, asked a man, "Ever have your hat blown off?" "Yes," said the merchant. "What blew it off?" "The wind." "Did you ever see the wind?" "No." Well, advertising is like the wind, an invisible force. You can't see it, but you can and will see the results, just as you saw your hat go rolling down the street.

This incident in a nut-shell very aptly describes the power of advertising. Many people who never had much experience with the power of advertising, only having at intervals now and then had occasion to spend a little money, but who didn't keep it up long enough to feel its force, may not be keen to continue in its support, but the knowing ones in the trade who have adopted its use cannot afford to drop it and rather believe in using it to a greater extent than ever.

The Publicity Committee for 1922 has plans for a worth-while campaign and has accordingly sent out letters for subscriptions, and the committee feels that those in our profession who have faith in the future of our business will unhesitatingly send in their quota so that our program may make further progress.

National Advertising is the domi-

nant and outstanding feature of the "Say it with flowers" slogan and helped to ride it to the level that made so many Editors, Writers, and Cartoonists use it as a text, and which is worth many many times over the amount we actually expended in the magazines to put it over.

To the thinking mind the use of National Advertising need not be questioned, but to those who have not delved into the problems connected with advertising, there are many who feel that local co-operative advertising is all that is needed, but never was there more need for the National campaign to continue than at present, for there is no medium that can spread our slogan more uniformly over this broad land of ours than national magazines so that everyone can get results unselfishly.

While no one belittles the good of local advertising, we must admit that it helps only in spots where the newspaper goes, but magazines are read the world over, and the greatest good to the greatest number is served in this channel.

Help the national campaign fund now and thereby help yourself. Advertising in national mediums against local mediums has the same effect on the reading public as does a national figure-head speaking in public against the local man at a town meeting. Each has his place and both are essential to put across the message.

Will we measure up to the 1922 prophecy for better business. This will partly help in solving our problem.

HENRY PENN,

Chairman National Publicity Campaign.

## ULTRA-VIOLET RAYS STRENGTHEN PLANTS

Preliminary experiments conducted at the Massachusetts Agricultural College have pointed to the practical use of light to influence plant structure. Orton Clark, plant physiologist, told a large group of chemists, agronomists and horticulturalists the effect of different light intensities and of ultra violet rays on plant structure and flower production at this week's research seminar of the station.

His first experiments have shown a decided structural difference in the plants given different amounts of ultra violet rays. Those plants deprived of the rays become stringier and lighter in color than the plants which grow under the rays.

## CARNATION CUTTINGS

NEW AND STANDARD VARIETIES
For December and Later Delivery

**THOMAS C. JOY.** We believe this one to be the best all-round pure white Carnation offered. It has been tested and tried in different sections of the country and without exception has made good. December and later delivery. Rooted Cuttings, $12.00 per 100, $100.00 per 1000.

**MAINE SUNSHINE.** Seedling of Ward and Crystal White. Good yellow Carnations are always in demand. Maine Sunshine is a good, clear yellow. Rooted Cuttings, $15.00 per 100, $120.00 per 1000.

**LASSIE (Ward x Alice).** A commercial Carnation of exquisite shade of cerise. Very free bloomer. A decided improvement on Ward. Rooted Cuttings, $12.00 per 100, $100.00 per 1000.

**WHITE DELIGHT.** It is an improved Pink Delight in all but color. Rooted Cuttings, $12.00 per 100, $100.00 per 1000.

**REDHEAD (Aviator x Alice).** The finest scarlet Carnation today. Exceptionally free bloomer. Rooted Cuttings, $12.00 per 100, $100.00 per 1000.

**RED MATCHLESS (Matchless).** Scarlet just a little stronger in growth than parent. Rooted Cuttings, $12.00 per 100, $100.00 per 1000.

**HARVESTER.** A cross between White Wonder and Matchless. Pure white. Rooted Cuttings, $10.00 per 100, $90.00 per 1000.

**HAPPY DAY.** A very fine red. Rooted Cuttings, $10.00 per 100, $90.00 per 1000.

**LADDIE.** The best of them all. Rooted Cuttings, $15.00 per 100, $125.00 per 1000.

All the standard varieties, prices on application.

## NEW GERANIUMS

**Mrs. George E. Buxton.** Has every indication of being the best commercial double Geranium in the market. Very strong grower, producing exceptionally large trusses. A most beautiful shade of Bridesmaid Pink. Equally good for pots or bedding. Rooted cuttings, $15.00 per 100, $125 per 1000.

**Elmira.** Color of the rose Premier. Produces large truss and has every appearance of a good commercial variety. 2-inch pots, $15.00 per 100, $125 per 1000.

## REX BEGONIAS

2¼-in. pots
All the best varieties, mixed
$14.00 per 100. $125.00 per 1000
4-in., extra good, $60.00 per 100

## DAISIES

| | 100 | 1000 |
|---|---|---|
| Boston Yellow, 2¼-in | $7.00 | $60.00 |
| White Marguerites, extra strong, 2½ in. | 6.00 | 50.00 |
| Mrs. Sander, 2-in. | 6.00 | 50.00 |

Limited quantity.

# RAMBLING OBSERVATIONS OF A ROVING GARDENER

I understand that the Henry A. Dreer Co., of Philadelphia, is introducing this year an uncommonly attractive Bourgainvillea. It is called Crimson Lake, and was introduced to the Bureau of Plant Industry, having been received originally from British Guiana. There seems to be no particular reason for its name except that it describes very well its rich, beautiful coloring. The chief merit of this new variety lies in its richness and brilliancy, surpassing all other Bourgainvilleas in this respect. It seems fair to believe that this will become popular as a pot plant for the conservatory or greenhouse, as it admits training over a trellis and in any shape, although it may be cut back and grown in bushy form if desired.

In southern California and in Florida this Bourgainvillea, like the other varieties, can be grown out of doors, making wonderfully gorgeous climbers. Among the other new tender plants being introduced by the Dreers are some hybrid Dracaenas which were originated by a grower in Trinidad, British West Indies, a man who has long made a hobby of crossing and raising seedlings. There are four in the lot now being offered by the Dreer people, all of them distinct in appearance. They are called Harmony, Juno, Mrs. Ed Andre and Mrs. Rufus W. Scott.

This has been a great season for the tree surgeons and repair men as a result of the big storm in November. More publicity has been obtained by the Bartlett Co., of Stamford, Ct., than any other firm, particularly because of the new and ingenious methods which they are using. A device which has attracted particular attention is a power machine for boring holes for long bolts to be used in mending large cavities. The outfit includes a small gasoline engine and generator and resistence coil, weighing altogether only about a hundred pounds. During one demonstration the whole apparatus was lifted up into a tree where it performed just as satisfactorily as on the ground. The drills are equipped with regulation ship augers of different lengths, and bore through the largest limbs with ease, at a great saving of time and effort. A patented burr, which includes

Well Grown Buddleia Asiatica

FANCY DAGGER FERNS

A No. 1 Quality, $2.50 per 1000

HENRY M. ROBINSON & CO., Inc.

2 Winthrop Square 32 Otis Street

Boston, Mass.

a series of eleven circular saws of different diameters mounted on the same shaft, operates at a speed of 3,800 revolutions per minute, and digs away the diseased wood tissues with remarkable rapidity.

Although Buddleia asiatica does not seem to be taken up as freely by the trade as it deserves to be, still it is finding favor with private gardeners and some very good specimens are being grown on different estates. This winter flowering Buddleia has much to recommend it, and the new form with pink flowers called Eva Dudley, which is being put out by R. & J. Farquhar Co., is also a plant of much merit.

The first catalogue of the season to show up is that put out by the H. G. Hastings Co., of Atlanta, Ga., and proves to be an excellent piece of work, typographically and otherwise. The cut watermelons on the front cover fairly make one's mouth water, and there are some very good color plates inside the book, particularly those illustrating geraniums, ferns and salvia.

Close on the heels of the Hastings catalogue came one from Richard Diener in California. As usual, the Diener catalogue is of surpassing elegance, so far as color work is concerned, and is superbly printed. The list of gladioli and petunias will be perused with special interest, as Mr. Diener has made himself famous as a grower of both.

Choice Orchids

HYBRIDS

Laelia-Cattleyas, Brasso-Cattleyas, etc.

G. E. BALDWIN & CO.

Mamaroneck, N. Y.

Another catalogue which came along promptly is that of John Lewis Childs, from Floral Park, N. Y. As usual, the Childs catalogue has some excellent colored plates featuring novelties, and they are better done, I think, than ever before. The single cut of the new dahlia "Sunkiss" on the front cover is superb. The Childs people are making a feature of ferns, and picture several new varieties, including Baeri, which seems to be a strong grower of unusual merit.

## ORCHIDS

### MILTONIA VEXILLARIA

Miltonia vexillaria is well known and it certainly is one of the best spray orchids for either commercial or private use. Its flowering season extends from early April until the later part of July. The flowers, if kept cool and dry, will keep in good condition four weeks and longer. The color varies in different plants from nearly white with a touch of pink in the center of the sepals and petals to deep pink and rose. Some varieties have a deep carmine blotch on the lip, others only a few radiating lines of a dark rose color in addition to the usual yellow blotch which surrounds the yellow crest. However, all of them are beautiful and well worth the little trouble it takes to grow them. They don't seem to care what compost they grow in, for I have seen excellent plants grown in osmunda fibre, others in peat and moss and others in moss alone. Some growers use nothing but clean live sphagnum moss, which is kept growing and is replaced with fresh as soon as it shows signs of decay.

Miltonias are nearly always active and, therefore, require no special resting season. The only time they rest is when in full bloom and then less water is given at the root and the plants are kept in a cool, dry place where no damping down is done. Each plant is then allowed to get quite dry before water is again applied. At all other times the plants require an abundant supply of water and once a week or ten days an application of weak liquid manure. As the bulbs commence to swell and the flower spikes push forth this may be increased to double the usual strength until the flowers begin to expand. After that no more feeding is done until the new growths, which will push forth soon after the flowers are past, are well under way. Any dividing or repotting should be done at that time as then the roots are most active and will quickly take hold of the new compost.

Miltonia vexillaria is not over particular as to temperature. Some grow them cool, some warm and some in intermediate temperature. The atmosphere is kept damp during the growing season by frequent damping of the floors and between the pots.

Miltonia Roezlii requires a little more heat, but M. Bleuiana, a cross between the two, will do well under the treatment advised for M. vexillaria.

## A NEW YEAR'S RESOLUTION

**RESOLVED—That I will not talk pessimism, especially about the florist or the nursery business, and that, so far as lies in me, I will be optimistic even in my thoughts.**

**Looking Ahead.** President S. S. Pennock sounds a note of confidence, optimism and fraternal fellowship in his address to the S. A. F. Let us hope that it will fall upon willing ears. There is every reason for florists to feel confident as to the future of their business. The period of readjustment is not yet over but this readjustment is largely mental and will be ended when there is a willingness to face the facts and abide by them. Florists like men and women in other lines are affected by a spirit of inertia. They dislike to change either their methods or their ways of looking at things, but will be none the worse off if these things are forced upon them.

Optimism follows confidence as a matter of course. It is popular to be an optimist in these days. Nobody likes a trouble hunter or a calamity howler. The optimistic employer, who is at the same time sane and practical, will inspire his clerks to better work. The optimistic clerk, who is not too assertive in his optimism, will inspire his customers to buy more flowers.

As for good feeling in the trade, who can doubt its value? There are bound to be business differences, rivalries and competition. Well and good; each man must necessarily look to his own interests. At the same time the fundamentals of the industry affect all alike. There are points on which all members of the trade can get together. There are endless opportunities for one florist to help another without hurting himself. Let us start the new year with a determination to hold up President Pennock's hands so far as we can by working with united effort for the good of the trade as a whole, by endeavoring to broaden our vision and to learn the value of co-operation, by looking ahead to a bigger future instead of living in a narrow past, and by refusing to harbor grudges based on race, rumor or religion.

**Stock Taking.** This is the time of year to take account of stock. How do you go about this undertaking? Are you absolutely honest or do you try to fool yourself? The alert and business-like retail florist will find stock-taking a guide and a help; the careless dealer who seeks only to make a good showing will find it a delusion and a snare. What you are really after is to find out where you stand, unless you are so unfortunate as to have a lot of stockholders who must be placated by favorable reports. Do not be afraid to write depreciation on fixtures, delivery outfits and the like. You will not be over-conservative if you write off 20 per cent or even more of the cost of the fixtures. You know well enough that, if you should try to sell these fixtures after only one season's use, you could not begin to get their original value. Why not face this fact in your inventory? Let some of the expense that has been going into fixtures be charged as advertising and carried in the year's overhead. Advertising helps create the good will which makes your business grow. Its cost belongs in your overhead.

And then as to book accounts. Such an account is not an asset unless it can be realized upon and not a full account if collecting it is going to cost half its value. Florists lose a tremendous amount of money through bad accounts. It is one of the evils of the business. Yet if the accounts are there and you know they are bad, you might as well charge them off first as last, making a mental reservation that you will be more careful in the future. Once a year have a personal show down. It may stir you up a bit, but it will be good for your business.

**Hartford's Convention.** It was something of an innovation when the city of Hartford was decided upon for the annual convention of the American Carnation Society, the rose growers and the National Growers' Association. Realizing that fact, the florists of Hartford set themselves at the task of making the convention a red-letter event. That they are certain to succeed can already be foretold. For nearly a year they have labored steadily toward this end. They have been unsparing with money, time and energy. By the time the visitors arrive the whole city will be talking about the affair and a big attendance is assured. Florists in other parts of New England are also doing their part and may be counted upon for a big display of flowers. President W. D. Howard has made repeated trips to Hartford in the interests of the convention and has had the cordial support of the local committees. It is going to be a splendid gathering and a credit to New England.

# You who have seen the New Pompon

**"NEW YORK"** have recognized something that is better than anything among the older named varieties. It is a seller on the market and is well deserving of the Silver Medal awarded it at the Museum of Natural History Show. Following **"New York"** and a sister to it is

**"LOUISE DAVENPORT"**—There is more bronze and less yellow in its color. There is a wonderful similarity between the two and **"Louise Davenport"** follows **"New York"** by nearly two weeks in season.

**"SARAH TOWNSEND"**—Another Hilda Canning seedling and a sister to both **"New York"** and **"Louise Davenport."** **"Sarah Townsend"** is ready to cut November 20th. These three bronze button Pompons will give a continuous supply of this type from November 1st until December 1st. You need all three to cover the month properly.

**"NOVEMBER GOLD"**—The finest of all the yellow sorts will also be offered this season.

We believe these four Pompons to be the best of this type. The price will be $15.00 per 100. $140.00 per 1000 for cuttings.

## A. N. PIERSON, Inc., Cromwell, Connecticut

# PRES. PENNOCK'S GREETINGS

## An Inspiring Address to the Members of the S. A. F.

Friends and fellow members: To each and every member of the S. A. F. and O. H. the incoming administration extends heartiest greetings and best wishes for the New Year.

We feel the future has more in store for humanity in this world of ours, towards progressive civilization, better living conditions, better feeling towards our fellow-beings, more thought to that which is elevating and refining, less of that old spirit, say it with guns, so let us teach the world to "Say It With Flowers." With all these advancements in deed and thought, how can we horticulturists, dispensers of one of God's greatest gifts, help but be benefited by that uplift that we are living through? So let each one of us put forth our best efforts and make 1922 the crowning year of the history of the S. A. F.

In going back over the 37 years of the S. A. F.'s past, we do not realize what tremendous strides the society has made, till we analyze the conditions existing then and those of today, and realize what wonderful opportunities the youth of today has, to learn and to push ahead, compared to the opportunities of those of the past.

Looking into the past brings to mind the starting of the S. A. F. and the part played by that grand old man J. C. Vaughan, the friend of every horticulturist, who was largely instrumental in the starting of the Society, always a worker, and still a worker, contributing his bit whenever occasion or necessity arises. What would the Society have done without these men of the older generation—without the Vaughans, the Craigs, the Lonsdales, the Westcotts, the Smiths, the Burtons, the Hills, the Stewarts, and many others who bring back most wonderful recollections of what we can do to make our lives worth while. We, in our busy everyday life, are apt to forget those who are older and have passed their zenith, so we want to take this opportunity to express our appreciation and thanks for all that the old guard have done for the S. A. F.

To The Trade—

Thos. F. Galvin, himself, will give your orders his personal attention at his son's store.

# WILLIAM SIM
**CLIFTONDALE** **MASS.**

Many off-shoots have come from the S. A. F.; in fact nearly every organization pertaining to horticulture is a result, directly or indirectly, of the S. A. F. and its influence. The Philadelphia Florist Club was formed to entertain the S. A. F. members during their second convention in 1886. Now we have flourishing florists clubs in nearly every large city in the country, more or less the direct result of the S. A. F. Then we have the trade papers, first the American Florist, then the Florists Exchange, the Review, Horticulture and the Southern Florist, all the results of the S. A. F. To the trade papers with their support, their advice, their contributions and their wonderful assistance, not only the S. A. F. but the trade, in general, owe more than they can estimate.

The different societies such as The Rose Society, Carnation Society, Chrysanthemum Society, etc., are all the results of the S. A. F. There's a feeling among quite a number of our higher lights in the S. A. F. that these societies should not have left the mother society. I think there are good reasons on both sides. In some ways I would prefer to see all these societies work within the S. A. F. and yet, looking at it from another standpoint, I hardly see how they could be handled and handled in a satisfactory manner, as each has its own particular field.

Now in regard to the work that the S. A. F. has been doing in the way of backing the publicity committee, this committee has certainly been wonderful in helping to elevate and push the business. Those who are among the more progressive people in the S. A. F. are all of the firm opinion that if advertising is done judiciously, it's a paying investment, and with the advertising which the publicity committee has done for flowers with the slogan, which is now known in every walk of life—there's no question but that the money has been well expended, and is bringing back results, fully warranting the expenditure.

The Vegetable Gardeners' Association, in their annual convention in Albany recently, passed a resolution which they forwarded to Congress, asking that the cost of the free seed distribution, which amounted to about $360,000, be put into seeds for the families of the Russian famine districts to use for the planting of their crops. Whether anything will be done along these lines is a question, but it is a very worthy and excellent recommendation, as the Russians will face another year of starvation if they are unable to procure seed for their planting the coming season.

And as a final and last word. Don't forget the personal side of our business. We are all friends. Competitions, and rivalries, and keen business dealings, are the stress and strivings of the day's work, but do not let these carry you too far. Let no hatreds or jealousies mar the ever present fact that we are all human, and in the long run there is plenty in this world for all of us. Let us all strive for friendly feeling and co-operation for the advancement of horticulture and the happiness of humanity and for a bigger and better S. A. F. and O. H.

## ATTENTION GROWERS!

We are handling the unrivaled carnations of W. D. Howard and S. J. Goddard, New England leaders in the business. Now we want consignments from first-class growers of sweet peas, single violets and novelties.

**HERMAN WEISS**
**121 WEST 28th ST., NEW YORK CITY**

### NEWS NOTES

Professor David Lumsden, formerly assistant professor of floriculture at Cornell University and during the last two years director of agricultural reconstruction at Walter Reed General Hospital, has recently been appointed horticulturist in the Office of Foreign Plant Quarantines, Federal Horticultural Board, Washington, D. C.

Fred Walters, for several years a florist of Leroy, N. Y., has bought a half interest in the business of Gustav Noack, of Batavia. The new firm will be known as Noack & Walter, and will have a flower store in the Masonic Temple, as well as greenhouses on Bank street.

## George Watson's Corner

"You in your small corner and me in mine."

Mr. and Mrs. Arthur Whitney Jackson announce the marriage of their daughter, Jean Sharps, to Mr. Douglas Earl, on Saturday, December 31, 1921, at Doylestown, Pa. At home after February 1st, Madison, N. J.

---

David Rust calls our attention to the fact that the Florists Exchange's London correspondent says that Walter Burpee had invaded that great city recently under a "nebulous and fuliginous atmosphere," and wishes us to explain what the nebular hypothesis refers to is. We think that they just wanted to spoof a little with big words, so as to get us poor ignorant Americans guessing. If he had had to pay for the space at the sizeable prices the Exchange charges for advertising, per word and line, he would have put it in three letters "FOG." A good old English word, which has the Greek and Latin skinned a mile for brevity. And that's one of the reasons why our flexible and wonderful language is conquering the world today. It takes them all in—French, German, Japanese, Scotch, Yiddish, Lancaster County, Bellevue Stratford and the Neck—so that we can say things better and in fewer words than ever known since Adam ate the apple. 'Vast Fuliginous! You'll be handing us "meticulous," first thing we know!

---

Samuel S. Pennock was the star at the monthly meeting of the Philadelphia Florists Club, January 3rd. His talk, and his lantern slides, illustrating same, were exceedingly interesting, and were listened to by a large audience of ladies and gentlemen. Seldom has the Roof Garden of the Adelphi been honored by such a distinguished gathering. Germany, France, Belgium and England, in many interesting phases, were shown, and the remarks of the man with the wand were very apt and illuminating. The progress of horticulture in Europe, from window gardening to rose culture, came within his scope, and everybody felt they had spent one of the most remarkable evenings they had ever dreamed of, both from a historical and entertaining standpoint. It was a great event, and will be long remembered.

CARTER'S TESTED SEEDS, Inc.

19 AND 20 SOUTH MARKET STREET, BOSTON, MASS.

Sixty years ago John May used to be able to run a mile in nine seconds or therabouts. Now, according to what he writes the Commodore it takes him nine thousand. Bad leg. But otherwise all right and happy in his old age. As to that leg John Burton has him beat a mile. His old leg is all right again and he is chipper as a chipmunk looking for stray acorns.

---

Specimens of the wonderful new yellow French rose, Souvenir de Claudius Pernet, were on exhibition at the Pennock Market on the 20th and excited much favorable comment. In size and form the flower is away ahead and the color is the best yellow we've got in roses so far. Quite a number of the forward looking growers are keen to get a hold of it and try it out.

H. H. Battles thought very well of it and he is one of our keenest from the artistic point of view. The stem is rather prickly and seems to indicate that there is some of the old Harrison yellow blood in the genesis of the new one.

---

Adolph Gude, although not quite so prominent in public life as his brother William, was well known and highly respected all over the country as an ornament to his profession. He adorned particularly the growers' end of the business, and everybody looked up to him for his fine record in that connection. Samuel S. Pennock of Philadelphia was one among many who went from all parts of the country on the 29th of December to pay final respects to their old friend in his last resting place in Washington. May we all have as good a record when we pass on to the great beyond.

Bermuda seems to be the popular winter resort these days. We hear that Adam Graham and his two daughters left for there December 27th. Then came Paul Huebner and his two cronies, John Kuhn and Bill Kleinheinz, who sailed January 4th for the same haven of rest and recreation. Bob Craig had better get busy and put in a few more licks for Porto Rico. That winter Elysium may be a bit nearer the equator than Bermuda but what's a few hundred miles in these days of quick transportation. Has the usquebagh anything to do with it?

---

Piqueria trinerva and Piqueria luxurians are the two varieties of Stevia now on the market. The later is sold as the double Stevia although that is a misnomer as it is a quite distinct variety and just as single as trinerva although of a different habit and with unserrated leaves.

### TUBEROUS BEGONIAS

It is interesting to find that tuberous begonias are again coming into popularity. At a recent meeting of the Gardeners' and Florists' Club of Boston they received high praise, especially the smaller flowered kinds, and those adapted to hanging baskets. These begonias are not at all difficult to handle, and can be started any time during February, March or April. It is only necessary to plant them in shallow boxes containing light soil, preferably one part loam, one part leaf mold and two parts coarse sand. The crowns of the tubers should not be covered, and water should be given sparingly until they start into growth. When the shoots are half an inch long, the tubers can be potted up in 4 or 5-inch pots, using a compost of loam, leaf mold and sand with a little rotted manure. Before they get pot bound the plants should be shifted again, but should not be over potted. Tuberous begonias should not have too much heat as they are much sturdier if grown slow. Buds may be picked off until the plants are well

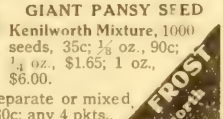
established if they are to be flowered in their pots. A little weak manure water will help to give better flowers.



A house for begonias needs to be kept moist and the plants must be shaded from the hot sun sufficiently to prevent scorching of the leaves. Water sparingly as the plants cease flowering, and stop watering after the stems are formed. Begonias for bedding should have wide popularity. They might well be featured by florists and seedsmen. When used in beds or at the base of the house they are exceedingly attractive. For this purpose they should be started in early March, and hardened off for planting out in June.

Tuberous begonias in hanging pots make a lovely picture. One point to watch out for is that the baskets are not too large for the tubers. It makes a good display to use three tubers in a ten inch basket. The baskets are to be lined with moss on the inside, the moss being covered with turfy loam or coarse soil with compost on top. The soil should be firm and the tubers just covered. A daily syringing of the moss is advisable, and must not be omitted after the baskets are filled with roots.

Give the plants all the light you can, but shade them from the bright sun. There are other ways in which tuberous begonias can be used with charming effects. They are attractive in outdoor vases, in large porch boxes and in the summer house. But always where they will not get too much sun and where they will not be exposed to high, hot winds, which they will not tolerate.

# Principles and Practice of Pruning

By M. G. KAINS

Few practices in the handling of plants, especially fruit bearing plants, attract so much interest as do those of pruning. The accumulation of new knowledge has become very considerable, especially in the last decade, but it is necessarily so scattered that very few growers have access to it, hence the demand for a book as this, which shall present the really important features of these investigations as well as set forth the fundamental principles based upon the laws of plant growth. This volume is lavishly illustrated mainly by actual photographs of specimens which show good and bad practices.

After a few pages of introduction the author discusses Plant Physiology as related to pruning. A chapter takes up the Philosophy of Pruning, itself, a very interesting subject. Then follows a classification and clear discussion of Buds, very fully illustrated from life. How Wounds Heal is an exceedingly interesting chapter, as are also those on Prevention and Repair of Mechanical Injuries, Pruning Nursery Stock, Young Trees, Mature Trees and Odd Methods of Pruning and Training, Rejuvenating Neglected Trees and Practical Tree Surgery. There are 400 pages in all.

Price $2.50

HORTICULTURE PUBLISHING CO.

739 Boylston Street Boston, Mass.

# Plant Propagation, Greenhouse and Nursery Practice

By M. G. KAINS

We have had many inquiries from time to time for a reliable and up-to-date book on plant propagation, but were always at a loss to find any publication that we could recommend. The subject has been dealt with in fragmentary manner only in books that have come to our notice. So it is well that this new work has been issued, especially as it is both comprehensive and practical, and it should meet with a ready sale among plantsmen, nurserymen and gardeners. There are nineteen chapters covering in detail topics of germination and longevity of seeds, propagating by buds, layering, cuttings, grafting, etc., fruit tree stocks, scions, etc., and there are eight pages of condensed cultural instructions in tabulated form, covering annuals and perennials from seed, woody plants, evergreens, vines, bulbs and tubers, greenhouse and house plants, ferns, palms, water plants, orchids and cacti. The illustrations are numerous, comprising 213 figures and halftone plates. There are 322 pages well bound and on heavy paper, teeming with helpful information. It is a book which no cultivator can afford to do without. It is worth many times its price. Copies can be supplied from the office of HORTICULTURE at publisher's price, $2.25.

# THE WORLD'S BEST CANNAS

**THE BEST VARIETIES FROM ALL SOURCES, FOREIGN AND AMERICAN INTRODUCTIONS**

**The best quality of roots, both as to vitality and size of divisions. Every order filled with fresh cut roots which must not be confused with roots cut, packed and stored months before delivered to you.** They cost a trifle more but are worth considerably more. Every 100 roots we supply will, with reasonable treatment, produce 200 or more pot plants.

The subjoined list contains the names of free, large flowering, vigorous growers, any of which will please you and your customers. Order now and say when you want them shipped to you.

**Price $5.00 per 100, $40.00 per 1,000; except where otherwise noted.**

**BEACON.**—Free flowering dwarf, bright red.

**CHEERFULNESS.** — Beautiful variegated orange and scarlet with golden border. The florets are medium sized, but very freely produced.

**CITY OF PORTLAND.**—A wonderfully attractive rose-pink. Excellent upright habit and free flowering. $15.00 per 100, $125.00 per 1000.

**DR. E. ACKERKNECHT.**—The bronze foliage blends pleasingly with the carmine rose trusses. Vigorous and free.

**DUKE OF MARLBORO.**—An old favorite with deep crimson flowers.

**EUREKA.**—The best white Canna. A very strong grower blooming freely. The flowers are large and become pure white in the full sun. $8.00 per 100, $75.00 per 1000.

**FANAL.**—Exceedingly free flowering, deep bright red. A most effective bedder.

**FEUERMEER.**—Another excellent old sort with a profusion of dazzling orange-scarlet flowers.

**GAIETY.**—Wonderfully effective. Deep orange suffused with scarlet and bordered with yellow. A brilliant bedder.

**GOLDEN GATE.**—Vigorous and free. A unique combination of yellow and golden shades, blending into rose as the flower matures. $6.00 per 100, $50.00 per 1000.

**KING HUMBERT.**—The most popular Canna of this generation. The large orange-scarlet flowers and particularly the very deep bronze foliage make it one of the most useful.

**LOUIS REVERCHON.**—The flowers are brighter and more freely produced than on King Humbert, while the foliage is a greenish bronze.

**MRS. ALFRED CONARD.**—Magnificent trusses of large salmon-pink flowers. Unique and very ornamental. The stock of this variety is very scarce. We have a limited quantity and advise early ordering. $15.00 per 100.

**MRS. KARL KELSEY.**—A tall, majestic, vigorous grower surmounted by great trusses of large orchid type flowers. Orange-scarlet, streaked and mottled with rose.

**RICHARD WALLACE.**—A well known pure yellow.

**THE GEM.**—A seedling of Hungaria, more vigorous, with a profusion of large cream-colored flowers dotted with carmine. Very unusual and attractive. $7.00 per 100, $60.00 per 1000.

**THE PRESIDENT.**—The greatest red Canna in commerce. Very heavy, vigorous growths surmounted by great trusses of immense florets of bright scarlet. We heartily endorse this as the greatest Canna introduction of recent years. $8.00 per 100, $75.00 per 1000.

**WYOMING.**—We know of no other Canna as effective as this for large plantings. A giant in growth. Extremely vigorous with its deep bronze foliage as an ideal background for large bright orange-colored flowers of the orchid type. It makes an ideal subject.

**YELLOW KING HUMBERT.**—A sport from King Humbert to which it occasionally reverts. Green foliage with yellow flowers, dotted with scarlet. $8.00 per 100, $75.00 per 1000.

We have good stocks of many other varieties, prices on which will be quoted on application. Order now for delivery in February and March.

### NEW ENGLAND NEWS

Harold Patten, the well known carnation grower of Tewksbury, is tax collector, which fact adds not a little to his duties, sometimes keeping him at his desk until midnight or past.

William Purdon, the famous plant explorer in the Chinese Foreign Service, who died November 7, was at one time a plant hunter for the Arnold Arboretum.

### OTTO B. ROBOLD

The death of Otto B. Robold, who passed away on January 13th, 1922, at 6.30 A. M., will stand out most prominently in the records that Philadelphia can produce for men of ambition and energy.

Having joined the force of the well known firm of Henry F. Michell Co., Philadelphia, Pa., at the age of twenty-eight, he was one of their outdoor representatives during the past thirty years, being an indefatigable worker, faithful to his trust and loyal to his friends and employers.

Those with whom he came in contact express the sincerest sympathy for his family. At the time of his death he had passed the fifty-eighth milestone. He leaves a widow and four grown children.

Following an operation which was performed in July, 1922, for kidney trouble, the greatest hopes were had for his recovery, but he was suddenly called to be rewarded in the land beyond. Burial took place from his home at Chestnut Hill, Philadelphia.

### MR. ZINN'S BIRTHDAY CELEBRATED

Julius A. Zinn, the well known florist of Beacon street, Boston, celebrated his sixtieth birthday recently, and the occasion was made notable by a banquet given to his employees in the Hotel Bellevue. At this banquet Mr. Zinn expressed his appreciation of the support which his people had given him, and thanked them for an attractive gift which came from them. Among those present were William F. Chase, who has been with Mr. Zinn for 24 years, Henry Ciccolo, who has been with him for sixteen years; Miss Violet Smith, his bookkeeper, who has been with him for twelve years, and Eugene Richard, who has been in his employ for four years. Mr. Zinn also received many congratulations from friends outside the store.

## THE TALK OF THE TRADE

Without doubt many of the visitors to the Carnation Convention at Hartford this week will want to look over some of the many carnation ranges in New England. Nowhere are more growers to be found in the same area, and nowhere, I am sure, is there a larger number of men whose names are famous in the trade.

Many of the visitors will be particularly interested in seeing how the New England growers do Laddie. They cannot do better than to call on such well known growers as S. J. Goddard, of Framingham, and William Sim, of Cliftondale. Then I ought to mention C. H. Rice, of Lexington, because I have found Laddie particularly well grown on his place. There are not a great number of them, to be sure, but in color and size they rank with the best.

At Mr. Goddard's the visitor will be interested also in the new variegated carnation, The Lark, one of Dorner's creations. This is a free flowering and all round easy doing sort. Mr. Goddard is growing it well.

At President Howard's range in Milford, Mass., one will find one of the most complete establishments in New England. The new houses recently constructed at Mr. Howard' place are models and are producing a great amount of stock which brings a premium in the New York market.

At Harold Patten's well known range in Tewksbury, north of Boston, visitors will find their attention drawn to the new white T. C. Joy and the new pink Natalie. Joy has met with a fine reception, and has sold heavily. The records show it to be a free flowering sort, pure white in color and with a long stem, and the flowers do not split. Natalie is promised for 1923, and growers hope that it will take the place of Ward. It is a general feeling that Ward is not as profitable as it should be. It has fine growth, to be sure, but is slow in finishing its flowers. A bench of Ward, properly grown, always looks very prosperous, but it is a fact that the records will show a small cut compared to many other varieties. There is still plenty of time to watch Natalie and note how it works out. I was interested to have George Noyes, salesman for Patten & Co in the Boston Market, tell me that both Joy and Natalie are well liked by the retail men, and that the keeping qualities of both are reported of the best.

I haven't found a single grower who hasn't been well pleased with Maine Sunshine and who doesn't intend to increase his stock this season. It certainly is making good, and can be seen in practically all of the establishments around Boston. Of course the place to see it at its best is Mr. Strout's own establishment at Biddeford, Me., and visitors who get that far will find much to interest them, including some of the other novelties which Mr. Strout is now growing.

In spite of the fact that early in the fall it was the general belief that carnations would be under the average in quality this season, we find that the stock has made an excellent recovery. A lot of small plants had to be housed, not from choice, but because there had been a heavy loss in the field. Moreover, there was more stem rot than usual, and, without a doubt, more red spider. This is meant to apply to New England in particular, and these are the reasons why a short crop was predicted. Now, however, one can go into range after range and find plants of surprisingly good quality. I could mention a great number of places where blooms of the very highest quality are being cut and where there is plenty of them, too.

The New Variegated Carnation "Happiness"

Pres. W. W. Thompson
of the Hartford Florists' Club

In going around I have been interested to watch what the growers have planted for a red variety, and I think it is safe to say that Aviator has the call. It seems to be the very best producer; the color is excellent and it is a good keeper. While it cannot be called better than medium size, I know of no scarlet carnation which gives better returns.

Speaking of Aviator, I am reminded right away of a bed which I saw at the range of C. B. Johnson in Woburn, Mass. I have seen a lot of good Aviators this season, but none to beat this batch which Mr. Johnson is growing.

Of course everyone expects to see quantities of Pink Delight grown around Boston, and the Pink Delights are here in large numbers. The color and shipping quality of this carnation atone for its various shortcomings. Many florists would like it better if it only had a more agreeable disposition. We must admit that it is shy in making cuttings, is hard to root, and does not grow into a big plant. Yet the fact remains that growers shipping into the Boston Market find this among the best paying sorts, even though it is one of the smallest varieties found in the stalls.

---

I am very much interested to find in the new catalogue of Charles H. Totty Co., Madison, N. J., just out, a wonderfully fine reproduction in color of the new carnation "Happiness." This is a yellow variegated carnation, and quite unique. Although a carnation of this kind has never been very successful in the trade, yet many people like it, and Mr. Totty says that his customers have been demanding an opportunity to grow "Happiness." In addition to a dainty combination of colors it has a very delightful fragrance, a point often overlooked, but which means much to many people. The ground work is canary yellow, and the petals are flecked and striped deep pink in a very unusual way. The blooms of "Happiness" are only medium sized, but are of good form, and the plants are considered exceptionally free flowering. This is the carnation which was awarded the silver medal of the Horticultural Society of New York as being the best carnation of the year.

## THE MARKET

Roses have taken rather a surprising drop. Nine-inch stock sells for six cents, and the price increases gradually to eighteen cents for twelve-inch. Carnations are a little sticky, but are bringing five and six cents, with eight cents for fancies. Wallflowers are much in evidence this year, and are selling fairly well at thirty-five and fifty cents a bunch. If there were some good sized calendulas, they would readily bring six cents, but the small stock offered seldom gets above four cents, and you can buy little flowers for one cent. Myosotis is coming into the market in fair supply, and selling at fifty cents a bunch.

Violets, which braced up a week or two ago, have dropped back to the old price of seventy-five cents to one dollar and twenty-five cents a bunch. The demand for violets depends largely upon the weather. When days are warm and pleasant so that street selling can go on, violets bring a good price, but when the weather gets cold or inclement, the price drops. Very few fancy sweet peas are to be seen in the market, but the average stock shown is selling for from two to four cents. Bulbous stock is in good supply. Spurs are selling for ten cents, Paper-whites for four to five cents and Freesias in good supply at six cents.

# FORM AN ALLIANCE

## Growers and Retailers of Greater Boston Reach an Agreement — Banquet Saturday Night

The Growers' Association and the New England Retailers' Association have reached an agreement. Allan Peirce, acting for the former, and Chas. F. Boyle, president of the Retailers, submitted to their organizations a form of Alliance which has been accepted. This stops retail selling in the Winthrop Sq. Markets. The agreement will be celebrated by a banquet at the City Club at 6.30 Saturday evening, Jan. 28, to which all members of the trade are invited. Tickets are $2.00. Those not able to attend the banquet can come later and hear the speakers, who will include Messrs. Asmus and Ammann, who will come direct from the Hartford Convention.

The constitution adopted reads as follows:

### CONSTITUTION

ARTICLE 1

**Name**

The name of this organization shall be Florists' Alliance of New England.

ARTICLE 2

**Purpose of the Alliance**

To devise and carry out better business methods, and cultivate closer relations between the producer and the retailer, so as to overcome glut in the market; fluctuation in prices, and loss and waste caused thereby.

Sec. 2. To foster a spirit of mutual interest within the trade, discourage unfair methods; encourage mutual assistance; protect against imposition, and guard individual interests.

Sec. 3. To collect by means of assessment on a percentage basis, payable by both grower and retailer, or other allied trades, a sum of money to be used for ADVERTISING within the Boston and New England districts.

Sec. 4. To improve salesmanship; methods of grading, storing, packing and delivery. To raise the standard of the industry.

Sec. 5. To eliminate completely retailing and the acceptance of retail orders in both markets and to treat all such violations with, expulsion from both markets.

Sec. 6. To eliminate specialization by growers, commission men, salesmen and other agents and all such transactions so defined.

Sec. 7. To secure a uniform basis of credits, and collection of accounts, and to collect and disseminate information to members of the Alliance.

Sec. 8 This Constitution may be amended by two-thirds vote o f the members present at any regular meeting, providing, however, that due notice of the amendment has been mailed by the Secretary to each member of the Alliance at least ten days prior to said meeting.

### BY-LAWS

ARTICLE 1

**Membership**

Sec. 1. Any person or firm who deals in flowers either retail or wholesale, and any commercial grower who disposes his products in the New England and Boston districts is eligible to membership in this Alliance.

Sec. 2. Application for membership must be in writing, stating full name of individual or firm, business address and telephone number, after which it shall be acted on by the Executive Committee; a majority of whom favoring the admission of applicant, he shall be admitted to membership upon agreeing to obey and be governed by the Constitution and By-Laws.

Sec. 3. Upon election of any member and the payment by him of dues as hereinafter provided, the member shall sign the agreement to abide by the Constitution and By-Laws, and thereupon a certificate of membership, signed by the proper officers, shall be issued to said member.

Sec. 4. The resignation of any member shall be accepted only at the end of one year when accompanied by all the dues and assessments to the date of resignation, and upon surrender of his certificate of membership.

**Officers and Terms of Office**

Sec. 2. The Directors shall elect one of their own members to act as chairman who shall preside at all meetings.

Sec. 3. The Secretary who may be elected from outside of the business, and shall devote his entire time to the work, shall receive a salary and be bonded in such an amount as fixed by the Board of Directors.

Sec. 4 The Treasurer shall be elected by the Board of Directors and furnish bonds in such an amount as the Directors shall approve.

Sec. 5 The term of all officers shall be one year or until their successors are chosen.

Sec. 6. The absence of any officer from three (3) consecutive meetings of the Board of Directors and of the Alliance reckoned together, shall constitute a resignation subject to the approval of the Board of Directors of the cause of such absence, which shall be ascertained by direct inquiry by the Secretary.

### ASSESSMENTS

ARTICLE 3

**Retailers**

Sec. 1. Retailers shall be assessed 1% on all charges purchased, this amount to be added to their monthly or weekly statement, and collected by the individual, firm or sale man making the sale.

Furthermore, the retailer shall be assessed from 1% on all purchases made outside of the markets, Boston growers or wholesalers and turn same into the Alliance Treasury.

Sec. 2 Growers marketing their own products shall be assessed 1% on all wholesale sales of flowers or plants whether or not they are sold to Boston dealers. The amount to be deducted from their statements after collection has been made and paid into the Alliance Treasury.

Furthermore, the grower shall be assessed 1% on all CASH sales made to the retailer the amount to be turned into the Alliance Treasury weekly.

The grower shall not be assessed on any retail sales made in his home office.

**Salesmen**

Sec 3 Salesmen who are selling on commission basis shall collect and pay into the Alliance Treasury on the same basis as the grower who sells his own goods and in addition 2% on gross commissions.

Sec 4 The wholesaler who sells consigned flowers or plants shall deduct 1% from all such sales before making returns to the grower, this amount to be turned into the Alliance Treasury.

Sec. 5. The wholesaler who buys direct from the grower and resells, shall pay ½%, this amount to be collected by the selling agent, the same as though it was a sale direct to the retailer.

Sec. 6. A wholesaler who purchases flowers or plants outside of the Boston district for resale shall be assessed ½% on all such purchases, this amount to be turned into the Alliance Treasury.

Sec. 7. All money collected under Article 3 shall be devoted exclusively to advertising of flowers and plants within the Boston and New England district, excepting such amount as is necessary for office expenses.

ARTICLE 4

**Accounting and Checking Up**

RETAILERS

Sec. 1. All retailers who purchase their flowers and plants in the Boston district shall keep a specially ruled book or loose leaf system approved by the Executive Committee. On the first of each month an alphabetical list shall be made up showing the total amount owed by him to each grower, wholesaler or commission salesman. A copy of this list shall be sent to the Secretary of the Alliance.

Furthermore, on the first of each month he shall send to the Secretary a list showing an account of flowers or plants bought outside of this Alliance whether for cash or time, and with this list a check covering an assessment of 1% on the total amount.

Sec. 2 Growers who market their own products, shall keep a similar system to that used by the retailer and on the first of each month fill in in alphabetical order a list of names of retailers owing him, with the total amount. A copy of this is to be sent to the Secretary of the Alliance. When statements are sent out 1% is to be added to the account, this 1% plus ½% to be deducted from the amount of the bill, is to be turned into the Treasury of the Alliance.

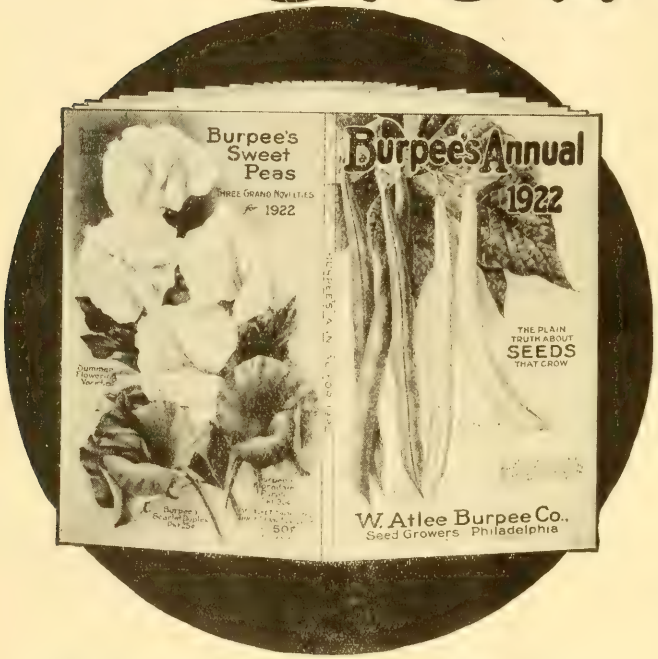
No Assessments shall be made on CASH sales to the purchasers. Grower and salesmen, however, shall send a check covering 1% assessment on such sales to the Secretary of the Alliance on the first of the month covering CASH sales made the month previous. All assessments collected and his own assessment are to be turned into the Secretary not later than the 25th of month following delivery. At the same time a Sec of delinquents is to be filed with the Secretary. If accounts are not paid up by the 25th of the month following delivery, a list of such buyers shall be made and forwarded to the Secretary, and those names which appear on this list shall be denied further credit by members of the Alliance.

**Salesmen**

Sec 3. Salesmen who sell on commission for a number of different growers shall keep a similar system to the retailer and grower who sells his own goods; shall add 1% on all bills sent out and deduct 1½% on all such accounts. This amount to be turned into the Alliance Treasury.

Furthermore, the salesmen shall pay into the Treasury the amount equal to 1% on all cash sales, whether or not he collects this from the party buying the goods and an additional 2% on gross commissions. This amount to be turned into the Alliance Treasury on the first of the month following delivery.

Sec 4. The Secretary who receives reports from dealer, grower, salesman or



**ATTENTION GROWERS!**

# Burpee's Seeds Grow

## Burpee's Annual

### The Leading American Seed Catalog

Burpee's Annual gives reliable information about Burpee Quality Seeds. It fully describes the best varieties of vegetables and flowers, and more than a hundred Burpee specialties are illustrated in the colors of nature. Burpee's Annual will be mailed to you free. Write for your Annual today.

TEAR HERE

W. Atlee Burpee Co., Seed Growers, Philadelphia.
Gentlemen: Please send me a free copy of Burpee's Annual.
If you are a Florist or Market Grower check here ☐ (63).

Name

Street

Post Office State

wholesaler should check up one against the other, and if any discrepancy is found the Directors may order an investigation.

The sales of grower, salesmen and wholesaler should equal the combined buying of the retail branch of the business.

Sec. 5. The Commission salesmen should be required to use a cash register, tripilicate sales book or other device approved by the Board of Directors.

The salesman's monthly totals should equal the returns made to the grower, which should be checked up by the Secretary of this Alliance, for the protection of the members.

The wholesale florist who does not sell for the grower but who buys direct and resells, and who pays ½% to the grower on his accounts, should be required to add to all bills sent out for flowers or plants to Members of the Alliance, or to all who are willing to co-operate in this campaign 1% on all such bills. This amount to be turned into the Alliance Treasury.

A book or system, the same as used by the retail dealer or grower, should be used for this purpose, and a copy of transactions entered therein to be sent to the Secretary of the Alliance.

Sec. 7. As all goods are sold at prevailing CASH prices, accounts shall only be kept for approved customers who buy from day to day during the month. All bills are due when rendered and must be paid on or before the 25th of the month following delivery.

ARTICLE 5

**Officers and Committees and Their Duties**

Sec. 1. The Executive Board shall have charge of all publicity matters and advertising features necessary for the public dissemination of information and for the benefit of the Alliance. The Executive Board shall have the power also to appoint such other committees or assistants as it may deem advisable for the good of the Alliance.

Sec. 2. The expenses of all committees appointed by the Executive Board or of any assistant, or assistants incurred in discharge of duties for the Alliance, shall be provided from the General Fund of the Alliance.

Sec. 4. The Treasurer shall have the custody of the Alliance funds, deposit all moneys received in a bank approved by the Executive Board. All bills must be approved by the Executive Board before being paid. He shall keep an accurate record of all receipts and disbursements, in a book provided for that purpose, and shall, when called upon by the Executive Board, render a full report of the financial condition of the Alliance. All valuable papers, books and vouchers shall be at all times subject to the inspection of the Executive Board. In case of absence or disability of the Treasurer the Executive Board may appoint one of its members to act as Treasurer pro-tem.

Sec. 5. The Secretary shall keep a record of the proceedings of the Executive Board and of all meetings of the Alliance; send out notices of all meetings of the Alliance, Executive Board and special committees and keep a correct account between the members and the Alliance; he shall receive all moneys paid in, collect the dues and pay the same to the Treasurer, taking his receipt therefor, and shall perform such other duties incident to his office as the Executive Board may direct. In case of his absence or disability they may appoint a Secretary pro-tem. The Secretary shall execute a sufficient bond to the Alliance to be approved of by the Executive Board, and shall make all reports without unnecessary delay, and shall report to the Alliance such information as may be useful for the proper discharge of its duties. Any florist or individual member shall have the power to contract any debt on the behalf of the Alliance or on any amount or be liable for the payment of any sum unless the same has been directed by the Executive Committee.

ARTICLE 6

**Duties of Members**

Sec. 1. Every member of the Alliance shall consider it his duty to do all in his power by word and deed, to further the interests of this Alliance, and shall be bound by the rules and regulations which it may adopt.

ARTICLE 7

**Provisions of the Constitution**

Sec. 1. Provisions of the Constitution and of this Alliance may be changed by a vote of two-thirds of the members present at any regular meeting, but only after one month's written notice has been given to all members concerned.

The Last Chance to Secure Heavy Dormant Two Year Old Budded Plants of the Wonderful Pillar or Climbing Rose

# Paul's Scarlet Climber

**At the Low Price of $50.00 per 100**

This variety, as we have predicted ever since its introduction, is rapidly taking the first place as the most popular brilliant pillar or Climbing Rose.

Mr. S. S. Pennock in his recent address before the Philadelphia Florists' Club in speaking of the wonderful Bagatelle Rose Gardens at Paris, France, referred to this rose as the most brilliant in color and a subject that could be seen from all points in the garden, still in splendid shape after other Climbers had passed.

It is truly a wonderful rose and will find a place in every garden.

The price of $50.00 per 100 is special and will only hold good on orders booked on or before February fourth and for immediate delivery.

PHILADELPHIA, PA.

This offer is intended for the Trade only

## POINTS FOR CONVENTION DELEGATES

A florists' convention has seldom been held in a more convenient location than at Hartford. The headquarters are at the Bond Annex, one of the leading hotels in the city, while the show and business sessions of the American Carnation Society are to be held in Footguards' Armory, which is almost directly across the street.

The Armory is on High Street. It is a building well adapted to the purpose of a flower show, having a staging room which is close to the cold storage room. It also has club rooms where the sessions of the Carnation Society will be held.

Upon reaching Hartford you will be expected to register and get a button, at the same time applying for a banquet ticket, the price of which is $3.00. Do not fail to note the change in arrangements from former conventions, which brings the banquet on the first night of the convention.

The officers of the Hartford Florists' Club who will be on hand throughout the session are as follows:

President, W. W. Thompson.
Vice-President, W. J. Andrews.
Secretary, George Marchant.
Treasurer, J. A. Brodrib.

**Says Sam: Spite is sand in the community carbureter. Forget it!**

**Hartford's Welcome.** The florists of Hartford have fully justified the wisdom of the National Carnation Society last year when it voted to hold this year's session in the Connecticut city. They have not spared time, money or labor to make the convention a success. On the contrary they have worked together in the most united manner to complete the preparation for a convention which promises to be one of the most successful in the history of the organization. Moreover, they have received the hearty support of the trade throughout New England, for to a certain extent it has been felt that this is really a New England convention.

No little praise is due to the officers and committee members for what they have accomplished. The convention will open with everything in perfect readiness, and with a show such as has seldom been equalled, and perhaps never surpassed. With over 12,000 carnation blooms, 193 separate vases, and nearly 3,000 roses, the show is bound to prove an eye-opener to the thousands of local people who will attend. Certainly it was a splendid plan which the Hartford florists adopted in distributing tickets to their customers. It has been good advertising for the florists and will help to make the show a success. From all appearances the capacity of the Armory will be taxed to the utmost, although the building is one of generous proportions. The Armory has been decorated in a similar manner as for the inaugural balls of the Governors, which means that it presents a very attractive appearance.

The hotel accommodations of the city are good, and nowhere has the convention hall been more accessible than in Hartford. We are sure that nobody who attends the Hartford Convention will go away with regrets.

**Boston's Alliance.** Without question, we believe, the solution of the difficulties which have existed for some time between the retail florists and the growers of Greater Boston will be received with keen interest throughout the country. The alliance which has now been accepted by both the retailers' and the growers' organizations ought and doubtless will be permanent. It is based upon an arrangement which should work out for the best interests of all concerned. It provides for contributions to the advertising fund on a basis to which no member of the trade can well object. The constitution which is published in full in this issue is quite a remarkable document, and probably will serve as a model for florists in other parts of the country who have similar problems to solve. No little credit is due to the members who drafted this constitution, and particularly to Allan Peirce, of the Growers' Association, and President Charles Boyle of the Retailers, who acted for their respective organizations.

**Pilgrimage To Portland.** No doubt there will be some disappointment among the rose growers of the country over the postponement of the pilgrimage to Portland, Oregon, announced in this issue of Horticulture. It should be understood, however, that the pilgrimage is only postponed, and will take place without much question next year. President Robert Pyle, of the American Rose Society, places special emphasis on this fact, for he does not want the interest in the pilgrimage to diminish because another twelve months must elapse before it takes place. The reasons for waiting another year, as set forth in the report submitted by Secretary Wister, will be accepted as justifying this action. Many of the commercial rose growers will be present at the Hartford Convention, and it is pleasant to see that this section of the society is active and flourishing. There is much which it can do in behalf of the trade.

**"Try Anything Once."** Do not be afraid of novelties, either in flowers or furnishings. The public likes them. In fact, it will buy novelties when it will not buy staples. Human nature seems so constituted that it delights in "trying anything once." The retail store keeper takes advantage of this tendency, if he is wise. He puts in new things and tells the public about them. That is what the public wants. We are talking, of course, about the progressive, pushing store man who is building up a business. The man with an established trade and traveling more or less in a rut may not agree with us. Nevertheless, novelties pay and people seldom consider the price of what appeals to their curiosity. Do not hesitate to put price marks on your novelties, but above all things make your customers realize that they constitute something new. Advertise them, feature them. You will sell them at a good profit—and other things, too.

# The Friday of Mid-Winter Show Week Will Be Visiting Day

BOSTON, MASS.

## CHANGE AT HORTICULTURAL HALL.

It is stated on authority that the Massachusetts Horticultural Society last Saturday dispensed with the services of Joseph Spry, who has been the engineer in charge of Horticultural Hall ever since it was built in 1900. Through his position, Joseph Spry had become thoroughly known to nearly all of the florists and horticulturists of Boston and vicinity, and many will be surprised to learn of his dismissal. A few years ago Joseph Spry and his son set up a trucking business and made use of the building for his headquarters, until the Trustees of the Society became satisfied that it was necessary to make a change and have the building used only for the purpose for which it was built.

## WOOD FIRES

### No. II

The lights were burning low in a pleasant sleeping-room. A sweet faced nurse was moving quietly about. The window was wide open that the clear night air might enter. A young girl lay in bed struggling with the hard drawn, labored breathing of bronchial asthma, as she heard the wood snapping merrily in the fireplace, she thought some day when this hard struggle is over, I shall fly forth like these little wood fairies, free to soar to the tops of the tallest pine trees, to the rocks where the eagles build their nests, then on through the beautiful blue skies to worlds of unknown beauty, a great, free, joyous disembodied spirit.

In loggers' camp and pleasant sleeping room the fires burned on.

## ATTENDED MRS. MURRAY'S FUNERAL

Henry and Charles Robinson, of Boston, were among the many members of the trade who attended the funeral of Mrs. Mary Ann Murray, wife of Peter Murray, well known florist of Fairhaven, Mass. The house was filled with a wealth of floral tributes from all over the country, as Mrs. Murray, like her husband, was well known throughout the trade. She was a member of the Woman's Club, and of the Order of the Eastern Star, and had had a conspicuous part in many of Fairhaven's activities. The deepest sympathy is extended to Mr. Murray in his bereavement.

# RAMBLING OBSERVATIONS OF A ROVING GARDENER

It seems that the Prince of Wales has revived the custom across the water of wearing a flower in the buttonhole. It is a pleasant custom and one which might well be followed to a greater extent over here. I have worn many flowers, but the one which suits me best is the little Mrs. Aaron Ward rose. Cut just as the bud begins to open, it will keep fresh and good looking for a surprisingly long time. I have found no other rose to equal it in this respect. The Bachelor's Button lasts well and is a favorite with many men, although somewhat under the ban during the war, owing to the kaiser's supposed fondness for it. For keeping qualities, though, the prize must be awarded to the Helichrysum or strawflower, which looks for many days as though picked within the hour.

Probably the carnation is worn more often in winter than any other flower, although men find it difficult to handle because of the thick calyx. There is a way to overcome this difficulty in large measure, and a simple one. If the thumb and finger are pressed hard against the bottom of the calyx a prong will immediately protrude from the surface of the flower. Let this prong be removed and the seed case will come with it, leaving a soft and pliable calyx which will go readily through the buttonhole.

---

Of the newer flowers which grew in my garden last summer, three or four linger in my memory as especially pleasing. One is the Ageratum Fraseri, which was a delight for many weeks. No ageratum with better color or better habits has yet been introduced. The new heliotrope Elizabeth Dennison proved very fine and should not be overlooked by garden makers who love the heliotrope's fragrance as well as its rich color. And the blue petunia was charming. This is certain to be one of the most popular of garden and window box plants, pro vided that the best seed is purchased. I have heard some complaints about flowers that were off color, but so far have, for my part, none to make.

During the late fall I have enjoyed the cheerful yellow blooms of Helianthus argustifolia. I feel sure that this is the proper spelling of the name, although I found it listed as questifolius in the catalogues. In any event, it is a splendid, small-blossomed sunflower, blooming with great freedom in the autumn, enduring mild frosts and having much the same general habit as the Cosmos, which perished, of course, long before it.

The New Yellow Rose "Souvenir De Claudius Pernet"

The landscaping of automobile filling stations is so unusual that it is worthy of notice when discovered. One company in New England, having a chain of stations, has placed them in the midst of trees and shrubs, with grass plots abutting the cemented drive, and evergreens to give a note of color when winter comes. Instead of being disfigurements these filling stations are objects of real beauty which even the speeding tourist must observe, for an empty gas tank is more effective than a traffic officer in enforcing a halt. Some of us willingly go out of our way to patronize these filling stations, which are found here and there like an oasis in a desert of brick and concrete. Let us hope that the practice of this particular concern will be followed by others. At least, it is worth encouraging.

---

Few of us realize, perhaps, the full value of mulching in garden practice. If we did, there would be fewer bonfires in the Fall and more leaves would go onto the rhododendron beds and around the newly set shrubs, and over the perennial borders. In most sections leaves form the cheapest mulching material and the kind which is most available, but this is not always so. In New Hampshire not long ago I found a man who was using pine needles in large quantities. They were spread for the most part on his extensive strawberry beds, and were applied expeditiously and readily by means of a manure spreader, which left an even blanket of uniform depth all over the fields. Care was taken, of course, not to put on the mulch until after the ground had frozen rather hard, an important matter often overlooked, I find, by the amateur.

Even tea leaves may be employed for mulching purposes. Probably they will not come into common use, but other occasions may arise similar to one reported from England. As everybody knows, the English people are inveterate tea drinkers, and after a certain very large function at a country place, an enormous quantity of tea leaves were left. The gardener, being a man of resource, conceived the idea of piling them around the newly set trees and shrubs, with results which seem to have fully justified the experiment.

---

Endive, both the curled and the Bavarian, have been exceedingly satisfactory in my garden the past Fall. It was handled in a method somewhat different from that commonly employed. A lazy man's method it might

Welcome and Greetings from

PLANTS, CUTTINGS, BULBS AND SEEDS

Main Office

303 BULLETIN BLDG., PHILADELPHIA, PA.

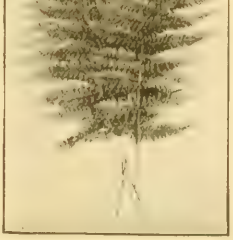
New England Office

15 CEDAR STREET, WATERTOWN P. O., BOSTON, MASS.

be termed, perhaps, but it saved me considerable labor and gave splendidly blanched heads, so why should I mind a critical comment or two? The endive was set out in four rows and closer than is the usual plan. The rows were so close, in fact, that the plants blanched each other, which was the purpose desired. There was no tying up to be done, but boards were set along the outside rows. Late in the season strips of burlap were laid over the plants, and as the weather grew cooler, leaves were piled on the burlap. Protected in this way the endive remained in excellent condition until Thanksgiving; much of the bitterness disappeared and the plants took on a flavor which was most delectable. The broad-leaved Bavarian variety, although somewhat less decorative, was just as appetizing as the curled kind, and it was difficult for the family to make a choice.

By the way, I have a popcorn which luxuriates in poor soil and will give a crop where other kinds of corn, even field corn, will hardly yield an ear. It is called Sorghum-pop, and owes its origin to Luther Burbank. Now all of Burbank's creations have not lived up to their catalogued descriptions, at least in the East, but after a two years' try-out, I can recommend Sorghum-pop as being all that it is popped up to be. It is a hyphenated corn, as the name suggests, with sorghum as one of its parents, and sorghum is famed for being able to thrive in thin soil and where water is scarce. As a matter of fact, I do not have to grow things which will endure a poor soil, and this point about Sorghum-pop is simply a passing observation. I like the corn because it pops clean and full. It is entirely free from core and the large kernels have the fluffy appearance which everybody likes to see in pop corn, at least if they know enough about the matter to pass judgment at all. And there are very few old maids, which is another considera tion.

I am very much interested to find the new rose, Souvenir de Claudius Pernet, offered in Charles H. Totty's 1922 catalogue. This rose has created a sensation wherever shown, but I did not suppose that it would be on the market this year. It is a Pernetiana seedling, and promises to give us what we have so long waited for, that is to say, a golden yellow rose that will stand the climate of this country, and also keep its yellow tint to the edges instead of turning white, as most yellow roses do. This is the rose which was awarded a gold medal at the International contest at Paris. Mr. Totty considers it the best yellow rose so far introduced for the garden, and his judgment seems well justified.



The orange yellow shade so prominent in Mrs. Ward and Sunburst is absent from Souvenir de Claudius Pernet, which is a clear, shining yellow. The foliage is free and vigorous, and the leaves are remarkably shiny. As is to be expected, Mr. Totty can offer only small plants, but I believe rose enthusiasts throughout the country will be very keen about experimenting with this new variety.

# FLORISTS' WINDOWS ABROAD

## Some Decorative Schemes Which May Be Worth the Study of American Retailers

Much has been written about the drab character of the show windows across the water. The impression may have been gained that only American florists know how to exercise ingenuity and originality in making their windows attractive. It appears, however, that this is not altogether true, for judging from reports in the trade papers of London, the florists of that city have been showing no little enterprise during the past few weeks. One of the most talked of windows in London at Christmas time was that of Moyses Stevens, just outside the Victoria station. A writer in the Horticultural Trade Journal describes it as follows:

"This window was a fine testimony to the art and skill of the floral artist, and was probably unequalled throughout the Kingdom. An outstanding feature was a design showing a sleigh, made of red Gnaphaliums, drawn by two prancing piebald ponies, with hoops of jingling silver bells. In the sleigh was Santa Claus driving, and a tiny tot reclining upon cushions, with frost and cotton wool around, and in the sleigh blooms of Poinsettias. The whole was some 5 ft. x 2 ft. mounted, and an edging of Conifers completed this charming display.

"Another beautiful subject was an old-fashioned mill scene, a small red house gleaming with light, with straw-thatched roof, a whirling wheel, patches of lawn with frosted dew, a frozen pond, a rockery built bank, and a miniature tree stripped of its leaves, and aeroplanes of frosted Holly hovering in mid-air."

Other windows and methods of treatment are also discussed in the following way:

"A small, square, wicker work basket, dyed a pinkish mauve, was filled with rose pink Hyacinths, and enhanced by royal blue ribbons—a dainty and alluring combination of shades, but creating an effective contrast. In the background came another gold basket devoted to White Heather, with a perky top bow of broad rich apricot ribbon; and then to our nearer view were shallow bowls, planted to represent miniature Japanese gardens; and dotted amongst the cut flowers were bowls in art shades of blue, mauve, pink and salmon pink, planted with Dutch and Roman Hyacinths, scarlet, yellow and deep rose Tulips, all toning admirably with their different receptacles.

"And anon, amidst the jostle of busy crowds, all intent upon Christmas shopping, we turned into Bond street and here found another specialized florist, who showed fine examples of his fascinating craft. 'Look, Mumee,' said one little chap. 'Teddy Bears,' and there they were effectively designed in green moss, with eyes and whiskers all complete.

"Solanum Aculeatissimum, from France, is a particularly effective subject for Yuletide, with its bright and cheerful orange red. One attractive art bowl, filled with White Dutch Hyacinths, had an edging of these berries, which supplied a pleasing splash of scarlet. Small Capsicum berries with foliage, were also employed to effect, and by using a fine

hand-painted bowl the dark green foliage, with red berries here and there, proved quite enough color for that class of bowl.

"Hand-painted bowls and chintz fern pots are very effective in themselves, discretion must be used in filling these to ensure a good effect as a whole. A lovely shade of sea-green art bowl, filled with Cypripediums, interspersed with Asparagus Plumosus, produced a charming toning of greens, which doubtless would appeal to many. Another sweet contrast was produced with a deep blue bowl of Lily of the Valley, edged with small Asplenium Biforme. In the centre of the window was a beautiful confection of Ericas Nivalis and Poinsettias, tied with broad wine colored ribbon. It is surprising the beauty Primula Obconica takes unto itself when planted in art bowls of mauve shadings. Victorian Posies were a feature in one window.

"Each florist can give his own interpretation and change with endless variety his display, no matter whether it be with the dainty Orchid or the useful "Mum," both can be made to appeal and allure. Pretty Cupid, in china, jolly old Father Christmas, and all the diversities of the potter's craft can each be made an attractive messenger of goodwill, and each a good selling line when handled with art and skill."

## YELLOW CLIMBERS

### A. J. Fish Reports on Those Which He Has Tested

I am often asked if there is any Hardy Yellow Climber that will stand New England climate. Perhaps the enclosed list of varieties that I grow may be of interest to your readers. Of course I am adding new ones from time to time, the last one being Emily Grey, an English variety which I am wintering for the first time this year:

Here is the list:

Goldfinch—Small flowers in clusters, long strong stem. Hardiest early yellow.

Oriole—Small flowers, creamy yellow cluster, rather soft. weak stem. Early.

Electra—Lemon yellow, quite large flowers, semi-double. Early.

Gardenia—Yellow pointed bud, very pretty, somewhat tender. Early.

Source d'Or—Largest flowers of all, strong yellow. Second Early.

A. Barbier—Creamy yellow, large flowers, some tender. Early.

Edwin Lonsdale—Pale yellow changing to white; grown on ground; through long stem; medium size flowers; doesn't keep very well when cut. Early.

Robt. Craig—Small flower, sharp color, somewhat tender. Early.

Prof. Sargent—Largest size flowers, apricot yellow; will keep a week after all are open. Early bloomer but needs protection from northwest winds.

Jersey Beauty—Creamy yellow, somewhat tender. Early.

Emily Grey—Not tested yet, will bloom next season if the plants live over.

Good yellow climbing roses for a small collection are as follows: Goldfinch, Gardenia, Source d'Or, Prof. Sargent. Oriole is pretty, but doesn't keep well when picked. Electra is good, but there are none for sale in the United States. I have only one bush left, which I imported before the war. A Barbier I have not had much luck with, but have seen it doing very well at Newport. E. Lonsdale makes long growths dunring the summer after the blooming period, but most of the wood kills back badly in April. Then it makes new wood which flowers at once, although blooming on new wood is, of course, a very unusual habit for a climber. Robert Craig kills back somewhat, but the blooms have a nice color, with buds which are just the right size for the buttonhole.

At present I have no plants of William Allen Richardson, a Noyesette climber, but a friend of mine here is having good results with this rose. I have grown it several times, but it has always killed back somewhat. This rose, however, also blooms on new wood.

A. J. FISH.

BOXWOOD SPRAYS

One of the Pennock Specialties. In good supply at present, and of excellent quality. Fresh; good green color, well trimmed. Packed in bags of about 50 to 70 lbs.—so as to save something on expressage. For immediate orders, we offer at the special price of

**$25.00 per 100 lbs.**

f.o.b. Philadelphia

Prices of other greens on application.

## Great for Farms and Gardens, Production Doubled and More

Seedmen want their seeds to produce bumper crops and it is to their great advantage to have them do so.

Nitrate of Soda broadcast at the rate of 200 pounds per acre, has made big yields of corn, vegetables and fruits.

Here is one record of Wilson's Missouri Apple Orchard.

| Fertilizer | Yield per acre | Value of fruit |
|---|---|---|
| Acid Phosphate | 40 bbls. | $300.00 |
| Check, no fertilizer | 45 " | 337.50 |
| Nitrate of Soda and Acid Phosphate | 70 " | 525.00 |
| Nitrate of Soda | 130 " | 975.00 |

Figure the profit for yourself as Mr. Wilson did!

If you want any special information regarding Nitrate of Soda, it will be promptly supplied by Dr. William S. Myers, Director, 25 Madison Avenue, New York City, without cost.

# TUBEROUS-ROOTED BEGONIAS and GLOXINIAS

We are again in position to supply splendid strains of Tuberous-Rooted Begonias in exceptionally fine strong bulbs 1½ to 2 inches in diameter.

TUBEROUS ROOTED BEGONIAS LARGE SINGLE FLOWERED. SCARLET, CRIMSON, PINK, WHITE, SALMON AND YELLOW.
$1.75 per dozen; $12.00 per 100; $110.00 per 1000.

CHOICEST SINGLE MIXED VARIETIES.
$1.50 per dozen; $11.00 per 100; $100.00 per 1000.

TUBEROUS ROOTED BEGONIAS SUPERB DOUBLE FLOWERING. SCARLET, CRIMSON, PINK, WHITE AND SALMON.
$2.25 per dozen; $16.00 per 100; $150.00 per 1000.

CHOICEST DOUBLE MIXED VARIETIES.
$2.00 per dozen; $15.00 per 100; $140.00 per 1000.

GLOXINIAS SUPERB STRAIN. SEPARATE COLORS—RED, WHITE AND PURPLE.
$2.50 per dozen; $18.00 per 100; $170.00 per 1000.

CHOICEST MIXED GLOXINIAS.
$2.25 per dozen; $16.00 per 100; $150.00 per 1000.

GOLDEN YELLOW CALLA "ELLIOTTIANA."
1¼ inch Bulbs. $2.00 per doz.; $15.00 per 100; $140.00 per 1000.
1¾ to 2 inch Bulbs. $2.50 per doz.; $18.00 per 100; $175.00 per 1000.
2¼ inch Bulbs. $3.00 per doz.; $22.50 per 100; $2.20 per 1000.

## HENRY A. DREER

714-716 CHESTNUT STREET PHILADELPHIA, PA.

The grower who can produce a yellow climber with flowers anywhere near as good as those of Marechal Niel, and at the same time hardy or nearly so, will make his fortune with it.

## Nursery Stock

Direct from Propagator to Planter. Choice, full of life, True to name Apple trees, One year old, 17 cents. Two year old, 25 cents. Well rooted and Branched Peach, in leading varieties, 2 to 3 feet, 10 cents each. 3 to 4 feet, 15 cents each. 4 to 5 feet, 20 cents each. Pear and Plum in all varieties, 3 to 4 feet at 20 cents each. 4 to 5 feet, 25 cents each. Cherry Trees in 4 to 6 feet, 50 cents each. One year, 2 to 3 feet, 35 cents. Grape, 2 year, No 1, 15 cents each or $10.00 per 100. Strawberries, all varieties, $5.00 per 1000. Rhubarb, strong roots, 10 cents each or $8.00 per 100.

All colors of Rambler Roses at 25 cents each or $2.50 per doz. Monthly Roses in all colors and variety, 50 cents each or $5.00 per doz.

Am now booking Spring orders for early shipment which insures an early start in growth, please get your order to me early with one-fourth amount of your bill, balance when Stock is ready for shipment, which is generally March 1st to April 1st. Special prices on large orders, write for list. Avoid the Nursery Agent and save from 50 to 75 on your needs. My customers are repeaters, give me a trial order and be convinced.

# ROBINSON MADE PRESIDENT

## Annual Meeting of Massachusetts Nurserymen's Association

There was very good attendance at the annual meeting of the Massachusetts Nurserymen's Association, which was held at Horticultural Hall the afternoon of January 17. Pres. Julius Heurlin was in the chair. Four new members were admitted, and it was stated that no member has been lost by death or otherwise since the last annual meeting. The following officers were elected: President, Sheldon A. Robinson of Lexington; Vice-president, Richard M. Wyman of Framingham; Secretary-Treasurer, Winthrop Thurlow of West Newbury; Executive Committee, J. J. MacMannon of Lowell, Julius Heurlin of South Braintree; Leonard Ross of Taunton and Donald Wyman of North Abington. Mr. Gustav Thommen was made an honorary member.

Christian Vander Voet, superintendent of the Arnold Arboretum, delivered a very interesting and valuable talk on the pruning of ornamental trees, and demonstrated his methods by material which he had brought to the meeting for the purpose. Mr. Vander Voet's talk was greatly appreciated, and he was given a unanimous vote of thanks.

Mr. E. W. Breed advocated the organization of a Chamber of Horticulture to be allied with the United States Chamber of Commerce and to include all of the different organizations of seedsmen, nurserymen and florists throughout the country. Mr. Breed was authorized to present a resolution embodying his ideas at the next meeting.

Upon receipt of a communication from Commissioner of Agriculture E. H. Gilbert, a vote on daylight saving was taken. There was a majority of one against the daylight plan.

A communication was read from State Forester Cook in regard to petitioning the Interstate Commerce Commission for a restoration of the

second class express privileges on nursery stock.

There was a long discussion in regard to the whole problem of express shipments, the fact being brought out that the industry is badly crippled by the high rates charged. It was stated by one member that he filled a $9.00 order going to Kansas City, and that the express for the package was $9.50. In another instance where the express company stated that the cost of sending a $200 order would be $210, the goods were shipped by freight instead, and arrived sooner than they would have reached their destination if sent by express, judging by the customary deliveries.

Mr. Theodore Borst urged that an effort be made to have statements made in magazines and papers all over the country showing that the high rates interfered with the distribution of shrubs and trees, people being unwilling to buy at any distance because of the cost of getting goods.

The question of wages also came up for discussion, and the members present said that while it was easy enough to get men who would work for 25 cents an hour, it was impossible to get really experienced help. The low priced men were not reliable and could not satisfactorily take the place of trained men. The latter, as one man put it, are almost an extinct species. This problem of getting experienced labor is one of the chief difficulties with which the nurserymen have to contend at present.

It was voted to have an Equity Committee to act as mediators or arbitrators in regard to any disagreements which might be presented to them. The following were selected as members of this committee: J. J. MacManmon, Donald Wyman and Julius Heurlin.

Before the end of the meeting, Mr. Heurlin, retiring president, was given a vote of thanks for his efficient work, and after adjournment a luncheon was enjoyed.

## NEWS NOTES

J. Edward Moon has been elected president of the newly formed Eastern Nurserymen's Association, which was organized at Trenton, N. J. Lester Lovett is vice president, F. F. Rockwell secretary, and Adolph Muller treasurer.

Mr. Hugh Findlay is to give a short course entitled "Landscaping Home Grounds," Tuesdays and Thursdays, beginning March 21, at Columbia University, New York.

## CARNATION CUTTINGS

**NEW AND STANDARD VARIETIES**
**For December and Later Delivery**

**THOMAS C. JOY.** We believe this one to be the best all-round pure white Carnation offered. It has been tested and tried in different sections of the country and without exception has made good. December and later delivery. Rooted Cuttings, $12.00 per 100, $100.00 per 1000.

**MAINE SUNSHINE.** Seedling of **Ward** and **Crystal White.** Good yellow Carnations are always in demand. **Maine Sunshine** is a good, clear yellow. Rooted Cuttings, $15.00 per 100, $120.00 per 1000.

**LASSIE (Ward x Alice).** A commercial Carnation of exquisite shade of cerise. Very free bloomer. A decided improvement on **Ward.** Rooted Cuttings, $12.00 per 100, $100.00 per 1000.

**WHITE DELIGHT.** It is an improved **Pink Delight** in all but color. Rooted Cuttings, $12.00 per 100, $100.00 per 1000.

**REDHEAD (Aviator x Alice).** The finest scarlet Carnation today. Exceptionally free bloomer. Rooted Cuttings, $12.00 per 100, $100.00 per 1000.

**RED MATCHLESS (Matchless).** Scarlet just a little stronger in growth than parent. Rooted Cuttings, $12.00 per 100, $100.00 per 1000.

**HARVESTER.** A cross between **White Wonder** and **Matchless.** Pure white. Rooted Cuttings, $10.00 per 100, $80.00 per 1000.

**HAPPY DAY.** A very fine red. Rooted Cuttings, $10.00 per 100, $80.00 per 1000.

**LADDIE.** The best of them all. Rooted Cuttings, $15.00 per 100, $125.00 per 1000.

**All the standard varieties, prices on application.**

## NEW GERANIUMS

**Mrs. George E. Buxton.** Has every indication of being the best commercial double Geranium in the market. Very strong grower, producing exceptionally large trusses. A most beautiful shade of Bridesmaid Pink. Equally good for pots or bedding. Rooted cuttings, $15.00 per 100, $125 per 1000.

**Elmira.** Color of the rose Premier. Produces large trues and has every appearance of a good commercial variety. 2-inch pots, $15.00 per 100, $125 per 1000.

## REX BEGONIAS

2¼-in. pots
All the best varieties, mixed
$14.00 per 100. $125.00 per 1000
4 in., extra good, $60.00 per 100

## DAISIES

| | 100 | 1000 |
|---|---|---|
| Boston Yellow, 2¼-in | $7.00 | $60.00 |
| White Marguerites, extra strong, 2½-in. | 6.00 | 50.00 |
| Mrs. Sander, 2 in. | 6.00 | 50.00 |

Limited quantity.

## MEDALS FOR HARTFORD SHOW

### Offered By American Rose Society --- Portland Pilgrimage Postponed

An important meeting of the Executive Committee of The American Rose Society was held at the City Club of New York, January 9, 1922. The membership for the year 1921 was reported as 2280.

The Treasurer's statement was presented and a long discussion on finances took place. It was shown that the Society must have many more members to keep up its good work in the future. The membership committee reported the new rose premium by which new members taking out 1922 memberships for $3.00 receive with it a coupon for $2.00 worth of roses to be secured from any one of eleven co-operating nurserymen.

Mr. Pierson reported at length on the work of the committee on cut flower interests. He said that every effort was being made to make the rose exhibition at the National Flower Show, Cleveland, March 25th to April 1st, the greatest ever held in America. Three thousand dollars worth of premiums have been offered in the name of the Rose Society but many members of the society feeling that this was too great a burden for the society to carry have offered to be responsible for over $1,000 worth of these premiums.

It was voted to hold the annual meeting during the Flower Show week in Cleveland, the exact date to be determined later. It is hoped that the Rose Society may have a booth at this show and that many of its members may be able to get together there.

The society's gold and silver medal was offered for rose seedlings to be shown at the Hartford show on January 26th and 27th.

The committee on commercial cut flower interests was disbanded and in its place a new committee of fifteen members was appointed, to be known as the committee on commercial forcing rose interests. This committee is to have charge of the commercial interests of both the pot plant growers of forcing roses and the cut flower interests and to represent the A. R. S. in matters pertaining to either of these important branches of the rose industry. The following were appointed to this committee:

For three years from January 1st, 1922: Charles H. Totty, Frank H. Traendly, Thomas Roland, Jos. H. Hill, E. J. Fancourt.

For two years from January 1st, 1922: Harry O. May, Alex. Montgomery, Jr., James Heacock, Wm. Duckham, Wallace R. Pierson.

For one year from January 1st, 1922: Frank Stuppy, F. R. Pierson, W. J. Keimel, Robert Simpson, F. L. Atkins.

Mr. Pennock reported the progress of the committee on the Portland pilgrimage and the various routes and prices were discussed. He reported that preparations had reached an advanced state when it was learned that the American Bankers Association, the Rotarians and the Shriners were all planning trips to the Pacific Coast this June. It was felt that these three large pilgrimages would secure the best cars and accommodations and would so attract public attention that the comparatively small A. R. S. Pilgrimage would be completely overshadowed. It was decided that for these reasons the Pilgrimage of the A. R. S. to Portland be postponed until June, 1923.

## George Watson's Corner

"You in your small corner and me in mine."

Gillyflower as a commercial cut flower proposition, has been tried and found wanting. No matter what improvement you make on it—the original Gillyflower remains. It will never amount to anything as a commercial cut flower—such as the Sweet Pea and the Snapdragon have. The two latter have the right elements, fundamentally, back of them: Form, stamina, keeping qualities; and they can be worked into all kinds of commercial propositions. But the Gilliflower—fine as it is, in thousands of ways, will never amount to anything as a commercial cut flower. So you might as well forget it, in that connection, except as a fill in once in a while when you have nothing else to put on your benches.

---

The Michell Wholesale Catalogue, which has just reached this office, is one of the best yet issued by the company, and that is saying a good deal, as they have been in the forefront for a quarter of a century or more. Many think when they see the counters crowded six deep with customers that the Mitchells confine themselves to the retail trade. They certainly have got the cream of the retail trade, as far as Philadelphia is concerned, notwithstanding the fact that they moved away from the center at 1018 to the backwoods at 518 Market. They had the trade and they've held it; their customers followed them. That's the retail end; but it would surprise you how many of the six-deep are down there as florists and merchants trading for stock in quantity at wholesale prices—and nobody any the wiser. Henry Michell has built up a wonderful business all along the line, and we certainly have to take our hats off to him.

---

The flower seed part of the Michell list covers a number of novelties, including new Early Flowering Double and Semi-Double Perennial Chrysanthemum, Extra Early Double Flowering Cosmos, New Annual Statice True Blue, New Verbena Royal Bouquet, etc.

Vegetable Seeds also come in for their share of space, many special strains for the market gardener being offered.

---

Otto Robold was among the "passed away" in the local environs last week He was one of the outside men for the Michell people for about twenty-five years and was highly thought of by all who knew him. The week also had on its record William P. Carre of Manshaw, N. J., who had a nice local florist trade and also did some shipping to Philadelphia in outdoor novelties, such as Dahlias. Alexander Grant Donald of Edgewater Park, a distinguished fruit grower, also passed away, as did Peter P. Morley. The latter was well known among florists, although not in the business. He was a Belfast lad, and was connected with Wanamaker's, and other big houses on this side, for a quarter century.

---

David Burpee, on being approached about that "nebulous and fuliginous," which his brother, W. Atlee, encountered in London town, said that he did not know very much about "fuliginous," but that the last time he was in London, which is not so long ago, it was as "thick as cream." Ah, Hah! we have at last discovered what these astronomers have been talking about, all these years, when they orated about the Milky Way. They meant Piccadilly! Fuliginous! Thick as cream! Piccadilly! Oh, Baby! David's got the right idea. If a fellow has

got to be smothered, he might as well be smothered in cream. Edward Doonер used to sing a song about that. I think he called it "Kilkenny," however, not "Piccadilly."

Samuel S. Pennock was at Scranton on the 10th inst., giving to horticulturists there a talk about his experiences in Europe. The occasion was very enjoyable and Mr. Pennock liked it but he seems to be beginning to realize that being a popular hero means an awful lot of hard work. However, he has the stuff in him, and will toe the mark. Every generation has its heroes in that connection, which thought brings to mind Thomas Meehan, who passed away twenty years ago at a ripe old age. For thirty years he edited Meehan's Monthly and wrote thousands of articles for all kinds of scientific publications. He wrote books; made speeches; officiated in the clubs; ran a nursery business; and from knee high to his seventies was an enthusiast and leader in gardening. A grand example, among many, and a beacon light for those who follow at the present day.

Eugene Bernheimer has moved temporarily from Ranstead and 16th to South Mole street, next door to Chas. E. Meehan. A change of landlords in the old place made the move necessary. This makes six wholesale places in half a block. We suggest that Avenue De Flora would sound better than Mole street.

William Robertson, gardener for George H. MacFadden, Villa Nova, Pa., writes from Springfield, Fifeshire, Scotland, Dec. 28th, wishing us a happy New Year. Thanks William! Same to you! This is the first we heard of that old timer being abroad, having a good time. If we had his money, maybe we'd be there too. But he deserves the best. He has a fine record around Philadelphia for thirty years back.

The Dreer catalogue for 1922 is a work of art, and we all ought to be proud of it. It is not altogether for what it lets in; but for what it keeps out. That's really the great test of the editorial mind. Most houses say: Will it catch them? Will it pay? And they build their annual appeal to the world on that basis. Some houses do not. They say first, is it right. If it's right, then go ahead. Well, that's one thing for the Dreer people you can say. It's got to be right before they back it; money or no money. Honesty and uprightness have always been their guiding star and are

yet. And their 84th annual offering in all lines of horticulture (outside of the tree business) is the best yet; and shows that this old house is ever young, and carrying the Dreer name on to fame and glory, and bringing an added effulgence to the halo of the founder and his successors in the empyrean, as well as on our little local footstool, here in the Quaker City.

---

We had the pleasure of seeing some blooms of Robert McGorum's new rose on the 12th inst., at Liggit's. They were still in good shape, although cut five days previously, showing that it is a good keeper. In color it is a lovely bright rose, shading to darker in the center, about the same shade as Pilgrim; good form and substance, and nice fragrance. The leaves are light green, and in form short and broad—quite distinct from most other sorts in that respect. Mr. Liggit says:—

"The name of the rose is 'William Wright Walcott.' It is a seedling, parent being Ophelia crossed on a pink seedling from Richmond.

"The rose is not yet disseminated, and probably will not be disseminated until the coming season. We are going to have it tried out here in this locality. It seems to have every characteristic of a good rose, but of course you cannot tell until it is tried out a little further."

---

Visitors include J. C. Stroh, Batavia, N. Y.; J. Howard Thompson, Kennett Square, Pa.; John Walker and his brother, Tom, Youngstown, O.; Andrew Yeager, Allentown, Pa.; J. D. Hooper, Richmond, Va.; F. Macrae, Providence, R. I.

---

The Quarrey Floral Co., of Worcester, was recently incorporated, with a capital of $100,000. The incorporators are as follows: Michael P. Quarrey, Mrs. Anastasia M. Quarrey, Michael W. Donahue, Frank Clarkson and Daniel J. Donahue of Worcester, Ernest L. Smith of Millbury and Walter L. Hubbard of West Boylston.

# Does Stretching It Weaken It?

A funny thing happened yesterday.
Was on the train going to Wilmington, Delaware, to look over that big job we just finished for Pierre du Pont.
Two men in the seat behind started talking about greenhouse construction.
One was strong for having the rafter and post spliced with gusset plates. Claimed "it looked stronger and was stronger."

The other one objected to the plates.
Said they "looked too heavy and doubted if they made as strong a fix as one **solid** piece combining rafter and post in one."

To which the first one replied: "That's all very well, but it means bending the iron at the eave. When you bend it, seems to me it must stretch the fibres of the metal and weaken them."

"Hold on," said the second one, "you are only half right. Sure it weakens a few, but it actually strengthens the metal at the point where it most needs the strength.
"See here, let me show you. In the first place, the iron is heated to a **white heat** before it's bent. Now a white heat, as you know, is right next door to being melting hot. When it's that hot, the whole mass of metal just readjusts itself; it doesn't actually stretch.
"Furthermore, let's suppose there might be some stretching on the very outside portion of the bend. The rest actually **fulls up** with more metal, making it stronger at the very place where added strength is needed."

"Say," replied the other man, "I never thought of that. You are dead right. Doesn't it beat the deuce, how a fellow every once in a while, loses sight of the plain every day common sense things. Why, man alive, of course that rafter and post in one solid piece is the thing."

Just then the train rolled into Wilmington and I had to get out. Confound the luck, I'd like to have heard what they had to say about other comparative construction points.

We'll chat together again in a couple of weeks or so.
In the meantime, don't forget that we go anywhere for business. Or to talk business.

## THE TALK OF THE TRADE

The Carnation Convention at Hartfordis now a matter of history. I think it is perfectly safe to state that this convention stands out as one of the best on the records of the American Carnation Society. Many of us had the feeling all through the Fall that there would be a great deal of difficulty encountered in putting up a creditable show. Carnation growers in practically all parts of the country, as has been noted many times this Fall, were up against serious difficulties from the growing end. I am of the opinion that a large part of the succes of this show is due entirely to the determination of our leading carnation growers to back it with the best they had, and make the finest showing they possibly could. Through fear that this show might not turn out as well as it should, all the energies possible were brought into play, and it produced wonderful results.

When we come to consider the committee in charge, it's only fair that they be given all the credit in the world. When Wallace Pierson made the statement that he as chairman had working with him "a wonderful bunch of boys," I think he spoke the whole truth. Each and every one of them appeared to give the best that was in him.

---

Regardless of how some of the growers may feel about the combination of rose and carnation growers at one meeting, I fail to see other than good work in the particular instance, and I cannot see why it may not always work out well. I can't possibly see why the roses and carnations should detract one from the other when brought together at a joint meeting, and I am glad that on the whole the growers in attendance at that meeting were so well pleased that it was decided to again come together in a joint meeting at Cincinnati.

Courtesy Hartford Times

**General View of the Big Mid-Winter Show in Hartford**

Records of the various entries and awards at the Hartford meeting have been published and well gone over by the trade. There are, however, a few varieties which stand out clearly in my mind as being of unusual promise. The Dorner seedling 135, which will probably be introduced in 1923, shows great possibilities. S. J. Goddard showed a vase of this variety in very good shape. Let us hope that it will turn out to be a good producer. If it is prolific, there is room for it, and it is surely going to be grown in large quantities. I believe Mr. Goddard made the statement that it would bloom three to one of Laddie. It is so near to Laddie in color and form and general make-up that it would take a good grower to tell the two apart. I think it will fall down a little in size, but if it will produce, it surely will be a money maker for the carnation growers.

In the next two years we have a number in the rose pink class to work on, and there seems to be no reason why this class cannot be well taken care of now, with varieties that are producing sufficiently to make them better paying sorts than Mrs. C. W. Ward.

---

There has been more said about Natalie than possibly any of the others coming along, except Rosalind. Natalie showed up well in Hartford, proved to be a good keeper, and seems to have a fair chance of being a good commercial sort. Rosalind is a dark Ward in color, very well finished and I believe this sort is also coming out in 1923. Besides these, there is the variety Betty Jane, Valentine, and No. 127 shown by John Stevens, of Independence, Mo. Both Betty Jane and No. 127 are very good keepers, particularly the latter.

---

Mr. A. Jablonsky, of Olivette, Mo., showed Betty Jane and also a variegated variety which looked very promising called Olivette. I believe that No. 127 will not be put on the market until 1924. But these deep colored pink sorts mentioned will bear watching, and it would appear now that there will be very close competition.

---

William Sim showed an attractive novelty called Gold Dust. It is somewhat after the style of the old variety Prosperity, being splashed instead of striped, on a white background, and the coloring is a bronzy yellow. It lights up particularly well under artificial light, and I was interested to notice how many of the commercial growers were well taken with this variety. An interesting point as to its parentage is that this is a seedling Matchless on Matchless.

---

Another novelty very striking in appearance is Happiness, shown by C. H. Totty Co. This is a striped variegated sort, the background being yellow and the stripes reddish pink. Happiness staged well and is a good keeper, not extra large in size but fully up to the average.

Red Rosalie is a fancy in every sense. The color is very good, and of course the size and form of the flower as well as the stem being fully as good as Rosalia is up to all that one would have a right to expect.

Unfortunately the white variety "Joy" was staged under some handicaps. While it took first award for 100 whites, it was from stock from Nashville, Tenn., over a thousand-mile journey. But it was particularly pleasing to those growers who are buying this sort to see how well it stood up. The blooms from Patten & Co., Tewksbury, Mass., arrived badly frozen.

---

Many growers were sorry that there were no blooms of the new rose Angelus exhibited. But a vase of Hill's America was especially good. Another vase of roses which appealed to me was Pilgrim. It was shown in very good shape and the color was also very good. While the quantity of roses shown was not great, one vase after another, right through the lot, in all varieties, was up to top form.

---

There is a general feeling of satisfaction in the election of Mr. A. F. J. Baur as president of the Carnation Society. By his faithful service as secretary he has certainly won the honor. It seemed fitting, too, that Mr. Henry W. Shepard should be named as vice-president. He represents Cincinnati, where the next convention will be held. It was something of a problem to choose a new secretary to take Mr. Baur's place, and it was quite an inspiration when Mr. Oliver Steinkamp, Mr. Baur's partner, was hit upon. He is eminently fitted for the position, and will prove a worthy successor for Mr. Baur. Mr. F. E. Dorner was re-elected as treasurer, as a matter of course, and it was entirely fitting that Mr. Peter Fisher should be made a director. New England was further honored by having Mr. Harold Patten, of Tewksbury, named as judge.

**A. F. J. Baur**
Newly Elected President of the American Carnation Society

---

The rose grower who can have his plants at this time of year in the condition of the stock in Thomas Roland's Revere, Mass., houses is doing mighty well. All credit is due to Mr. Livermore, the foreman, as his plants are carrying a good crop and appear to have been cutting well through the entire winter. Columbia in the Roland range is particularly good. I don't think I have ever seen it any better. The blooms are of good size and what a heavy crop these benches are carrying!

There is a good crop of Premier also on the plant, but the stem seems to be shorter than in many places, which probably is due to local growing conditions. It is called a paying variety, however, but it is plainly evident that it does not lend so readily to growing conditions there as do such varieties as Columbia, Double White and Ophelia. Several beds of Mrs. Aaron Ward are very fine. Very seldom is this variety seen so good, now-a-days, as I saw it at Revere.

---

The Hoffman Nursery Co., of Elmira, N. Y., is working along as fast as weather will permit with the building of an entire new range, and plans to take down the old range, when the land on which the old houses now stand will be turned over for real estate purposes. Heretofore this firm has not gone into rose growing for cut flower purposes, but it is planning this year to house about 5,500 plants, all of which will be of the best commercial varieties, and their stock of carnations is as good as any around that section, carrying good crops, with less than average amount of splits and weak stems.

From my observation I would say that the growing of cut flowers in New York state carries with it more handicaps than through the towns nearer the Atlantic coast from New England down to Philadelphia. Middle and northern New York state certainly has its share of cloudy weather, and growers out in that section deserve all the credit in the world for the quantity and quality of the stock they produce from their glass. Day after day through the entire months of December and January these growers have to fight against cloudy weather and snow, either heavy storms and blizzards or snow squalls.

Some sections report not over ten full clear days for these two months. And I know personally that for three weeks in January there were only three very clear days. In my opinion this is not a section of the country where the ridge and furrow type of houses is to be desired. I believe the grower can very well afford to stand the extra investment and have all the houses separated.

The new Hydrangea Domotoi is being watched carefully by plant growers, and if it comes anywhere near to fulfilling expectations will certainly be a good pot plant variety. From what I have seen of the sort, I would describe it as one very similar to Otaxa in characteristics. It is said to be an easy grower, no more difficult to do well than Otaxa. The flowers are large, well put together and the individual florettes are double. Stock of this variety is now available in quantities.

## PHILIP CARBONE BURIED

The funeral of the late Philip Carbone was held Wednesday, February 1, at Mount Auburn Cemetery, Cambridge, Massachusetts. The service was conducted by Rev. Mr. Kingdon, of Bingham, assisted by Rev. Charles Fleischner. The chapel was filled with a wealth of flowers, including pieces from practically all the prominent florists of Boston, as well as from both markets. Mr. Carbone had long been among the leaders of the florist trade and was 55 years old when he died. He was born in Boston, his father being a veteran of the Garibaldi uprising and his mother a resident of Hull. Mr Carbone was educated at Derby Academy in Hingham, and later studied horticulture at Bussey Institute.

## MARKETS MAY CONSOLIDATE

### Important Changes Contemplated at Winthrop Square, the Center of Boston's Flower Industry.

Some important changes will probably be made in the handling of flowers at Winthrop Square in Boston within the next year. The directors of both markets have voted to consolidate. This vote must be ratified by the membership, but the general opinion seems to be that some such action will be taken. It will not be immediately, however, as the lease on the building where the Flower Market is now located runs for another year. It is possible that this building will be used to house both markets. There is room enough, the directors state, if all of it is utilized, and of course such a move would mean a decided reduction in total expense, unless, as is rumored, a very much higher rent is demanded in case the lease is renewed.

The rumor has been going around that the Boston American was to move out and that the whole building would be converted into offices. The latest report is, however, that the plan has been abandoned because of the high price of labor and the fact that offices are not in as great demand as formerly.

There is a strong feeling that the markets should be moved to some other location, preferably one where rentals are lower. South Boston and Cambridge have been mentioned, although some florists believe that arrangements might be made to locate the markets at Park Square. Eventually, without much question, the association will have a building of its own. There should be no great difficulty in financing such a proposition, considering the volume of business being done, and then quarters could be designed which would be for the best interests of all in the trade, and allow an opportunity to have suitable assembly halls as well as executive offices.

## SILVERMAN IN NEW CORPORATION

Articles of incorporation have been filed in Boston by the Fisher Florist Corporation, with capital stock of $100,000. It is understood that this corporation includes Mr. Fisher, the florist of New London, Ct., and Mr. Silverman, who has long been located on Winter street, Boston. Mr. Silverman recently gave up his Boston location owing to the fact that his lease had run out and the rent jumped to a prohibitive figure. It is reported that a chain of stores will be started by the Fisher Corporation, and that Mr. Silverman will do the buying. Both Mr. Fisher and Mr. Silverman are experienced and capable florists, as well as good business men, and their new venture will be watched with much interest if it turns out to be as reported.

## THE MARKET

While the market has been holding its own reasonably well, a break seems imminent unless there is a storm or other severe weather to reduce the supply. Prices at this writing are satisfactory. Antirrhinums are from one to two dollars a dozen. Calendulas still lack somewhat in size and sell for from twenty-five to seventy-five cents a dozen. Carnations are from six to eight cents for regular stock, with Ward and Laddie ten cents. Bachelor Buttons are two to five cents. Lilies are not selling very briskly at sixteen cents. Lily of the Valley is eight and ten cents. Mignonette is selling at five to twelve cents.

Bulbous stock is in good supply with a fair demand. Tulips are bringing six cents, Jonquils from six to eight and Paper Whites five cents. Violets remain practically unchanged at from 75 cents to $1.50. There are some good pansies at from one to two cents, and fair sweet peas at from one to three. Freesias have improved a little and are selling from four to six cents, with eight cents for extra good stock.

**ATTENTION GROWERS!**

We are handling the unrivaled carnations of W. D. Howard and S. J. Goddard, New England leaders in the business. Now we want consignments from first-class growers of sweet peas, single violets and novelties.

**HERMAN WEISS**
**121 WEST 28th ST., NEW YORK CITY**

# SUCCESSFUL WINDOWS

## Methods Followed by Lane, the Hartford Florist—A Unique Setting

Lane, the florist of Hartford, has won more than a local reputation for the success of his window displays. The one which he was using at the time of the Carnation Society's Convention attracted much attention, and doubtless will be copied in many other places. The principal feature was a large gold frame set at an angle near the rear of the window. This frame contained various pieces of artistic pottery, including flower holders with a few blossoms. These accessories seemed to have been cut in half, and fastened to the black background. As a matter of fact, the material forming the background had been cut away so that the bowls, etc., could be set half way through. Then they were covered at the rear so as not to be visible to people in the store.

A little in advance of the frame was a representation of an artistic palette painted black. Two cat tails took the place of brushes, while the daubs of paint were simulated by carnations of different colors, including one dyed green. A very interesting effect was created by these few articles, and scores of people stopped in front of the window, even though the temperature was down to zero.

Mr. Lane has some very well thought out ideas about window work. While one window may be catching the crowd with some unusual feature of the kind just described, the other window will be filled with pot plants or cut flowers of the kind which the public is most likely to buy. One thing which Mr. Lane tries to avoid is having both his windows very elaborate. He believes that people are often frightened away from a flower store because of the expense indicated by the decorations and the contents of the windows. He wants customers to realize that they can come inside and buy at a reasonable price.

Mr. Lane has been giving considerable attention of late to the subject of price tags. As a rule florists refrain from tagging the articles displayed in their windows. Mr. Lane thinks this may be a mistake, and proposes to find out whether or not it is. In many other lines of business store keepers have found that it is just as advantageous to use price tags in the windows as to quote prices in their newspaper advertisements. People of a retiring disposition dislike to inquire prices, fearing that these prices may be higher than they can afford to pay. If they see something in the window at a price which is not too high, they feel safe in going into the store.

Another point upon which Mr. Lane places emphasis is the necessity of having windows for special occasions considerably in advance. His Mothers' Day windows and his Valentine windows, for example, are made up long before these days arrive. Mr. Lane believes that people are beginning to shop about even when buying flowers and that they will make up their minds what they want several days ahead if they get the right suggestion from a store window display.

The same holds good as regards wedding windows. When he is preparing for June weddings, Mr. Lane stages a wedding window in May. The good judgment of this is plain enough, for without question the orders for wedding flowers are placed well in advance of the event. Mr. Lane says that his policy has been vindicated in his own mind because time and again people have come to him and asked for certain articles which they saw in the window a few weeks previous.

He likes to test out his displays in his own way, and makes a habit of remaining in the store in the evening after all the inside lights are out. The window lights are kept burning as the store is next to a prominent theatre. When the crowds come out, he notes the number of people who stop before the windows and the degree of interest which they show in the displays.

## NATIONAL PUBLICITY COMMITTEE

A meeting of the National Publicity Committee was held at the Greater Bond Hotel, Hartford, Conn., at 2.30 P. M., on Wednesday, January 25th. There were present: Chairman Henry Penn, Boston, Mass.; George Asmus, Chicago, Ill.; J. F. Ammann, Edwardsville, Ill.; President S. S. Pennock, S. A. F. and O. H., Philadelphia, Pa.; Secretary John Young, New York; and Major P. F. O'Keefe, Boston; E. J. Fancourt, Philadelphia, and Wallace R. Pierson, the latter formerly a member of the Committee, all by invitation. Treasurer J. J. Hess, Omaha, Nebraska, was absent through illness, and Mark Mills, Philadelphia, sent regrets at his inability to attend.

Major O'Keefe reviewed the recent advertising of the Committee, and explained the necessity for using small advertisements throughout the series, which was due to the small amount of money available for contracts. He also referred to the controversy to which considerable space had been devoted in "Printer's Ink," in regard to the origin of the slogan, "Say it with Flowers.' While the statements published were wholly incorrect, he considered the matter was good publicity for the slogan. He proposed, he said, to place a page advertisement in that publication at his own expense in refutation of the claims made, and read a letter which he would use as copy, to be signed by him and also by the original members of the Publicity Committee, if no objections were offered by the Committee. There being none, he was given authority to proceed as suggested.

JOHN YOUNG,
Secretary.

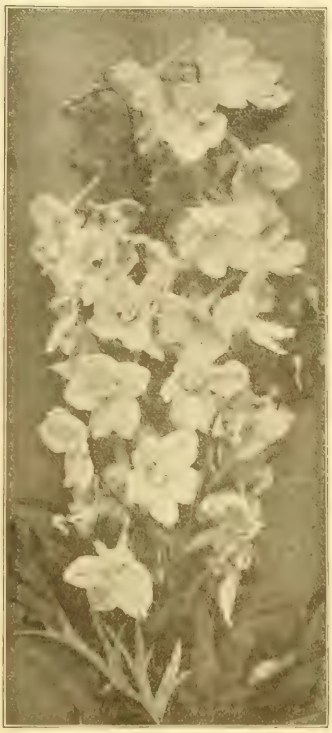
## GEORGE H. BEAN

George H. Bean, aged 68, for forty years a florist at Medford Center, Mass., died recently, after an illness of several months. Mr. Bean was well known in Greater Boston, both among the florists and the Odd Fellows. He is survived by a widow.

Prof. John E. Hill, of Brown, has been elected president of the Rhode Island State Horticultural Society.

**BROOKLINE GREENHOUSES**
**FOR SALE**
**BUSINESS OPPORTUNITY Quinn The Florist**

Having operated these hothouses for many years and having a well-known reputation throughout this part of the country, desires to take in a partner with small amount of capital to invest in the business, or to sell outright his estate, which consists of 55,000 ft. of land on Chestnut St., containing two hothouses 120 ft. long each. They are equipped as a going concern and are doing business daily. The dwelling contains 11 rooms, hardwood floors, electric lights, open plumbing, gas and coal ranges, gas hot water heater, etc. This is an exceptional opportunity for a florist to acquire a long established business capable of indefinite expansion, with the owner willing to stay as a partner or long enough to introduce the new owner to his clientele and give any other possible help. Apply to NEW ENGLAND REAL ESTATE EXCHANGE, 1015 Tremont Bldg., Boston. Tel. Hay. 4388-4389.



# DREER'S SELECT

## Hardy Perennial Flower Seeds

Old-fashioned Hardy Flowers are now very popular and many of them are easily raised from seed. Our list is the finest and most select offered in this country. We offer below a few of the leading sorts; for complete list see our Spring Catalogues now ready.

| | Tr. Pkt. | Oz. |
|---|---|---|
| **Achillea The Pearl.** Double white | $0.50 | $4.00 |
| **Anchusa Italica Dropmore Variety.** Rich gentian blue | .20 | .75 |
| **Aquilegia Long Spurred Hybrids.** Choicest Mixed | .30 | 1.50 |
| **Campanula pyramidalis blue.** (Chimney Bellflower) | .25 | 1.00 |
| **Centaurea Montana blue** (Perennial Cornflower) | .20 | .70 |
| **Chrysanthemum Shasta Daisy Alaska.** The finest of all | .40 | 2.00 |
| **Coreopsis lanceolata grandiflora.** An extra fine strain | .10 | .25 |
| **Delphinium Belladonna.** Light turquoise blue. Extra fine | .50 | 2.50 |
| **Delphinium Gold Medal Hybrids.** The finest stain of mixed Hybrids | .25 | 1.00 |
| **Dianthus Latifolius Atrococcineus fl. pl.** Rich crimson scarlet | .25 | 1.00 |
| **Dianthus Plumarius Double.** Choice Mixed | .25 | 1.00 |
| **Dianthus Plumarius Single** (Hardy Garden Pink) mixed | .20 | .60 |
| **Digitalis Gloxiniaeflora Mixed** (Spotted Foxglove) | .15 | .50 |
| **Gaillardia Grandiflora Superb Mixed.** A fine perennial | .15 | .40 |
| **Gypsophila Paniculata** (Baby's Breath) | .15 | .40 |
| **Helenium Riverton Gem.** Wallflower red. | .25 | 1.00 |

### MR. HOYT'S METHODS

#### How He Handles the Transplanting of Large Trees

Mr. Stephen Hoyt of New Canaan, Conn., had an album and photographs with him at the Nurserymen's Convention in Boston showing some of the work done by him in transplanting large trees. Other nurserymen were much interested in his methods and his pictures. Mr. Hoyt also appeared before the students of the nursery course at Massachusetts Agricultural College on January 17th and discussed his system.

This is a line in which Mr. Hoyt's nurseries have specialized for a number of years. Mr. Hoyt explained that small trees are usually handled with canvas, while the larger ones are dug and transported without burlaping but with large balls of earth. Mr. Hoyt prefers to do this work during the spring months, but has accomplished many successful removals during the fall months and even during the summer when trees were in foliage. This sort of transplanting is more successful with deciduous species. Mr. Hoyt does not recommend the transplanting of very large evergreens and prefers the early spring months for that work.

The Pin Oak can be transplanted very successfully though the Red Oak is hard to handle, and the White Oak difficult also. The Beech transplants well, contrary to a common belief. The Dogwood also transplants well.

After-care during the first two years after transplanting is exceedingly important. Most of the losses in transplanting trees are due to negligence at this time, especially during the second year. Newly transplanted large trees should be handled, watered and fed like potted plants. All transplanted trees should be headed back and thinned out at the time of transplanting in order to bring the tops into balance with the roots.

Work of this kind is very expensive and liberal charges must be made or business will show a loss at the end of the year. The usual price for transplanting large trees is from $100 up. When trees are guaranteed to live, fifty per cent should be added to the charge.

### DONALD WYMAN NOW A PARTNER

Mr. Donald Wyman, son of W. H. Wyman, proprietor of the Bay State Nurseries, of North Abington, Mass., has purchased a half interest in the business. For several years the younger Mr. Wyman has had a very active part in the conduct of the business. The elder Mr. Wyman has just gone south for a six weeks' trip.

### IRIS CHECK LIST OUT

The Iris Check List prepared by the nomenclature committee has now been issued. It is really a section from the new Catalogue of Standard Plant Names, and is issued in advance of that book. The check list is edited by John C. Wister, president of the American Iris Society, and should be a great help to Iris growers.

**SAYS SAM: Tell me what your family does after supper and I'll tell you where your boys and girls are.**

**On To Indianapolis.** It is a pity that the National Flower Show could not be held at Cleveland, as was originally intended, and as the florists of the country expected it would be up to a very late day. If the fact had become apparent some months ago that the Mayor's objections would make it impossible to secure the new Cleveland Auditorium, very likely arrangements would have been put through to postpone the show for another year. As it is, some of the leading florists of the country believe that this would be the best move. The general opinion is, however, that because of the late date and the fact that arrangements have been so nearly completed, it is wisest to transfer the show to Indianapolis.

One thing is certain. Indianapolis is in a position to stage the show well and to care for the visitors. It has long been prominent as a convention city. Its hotels are first class, and its florists are as warm hearted and enterprising a lot of men as can be found anywhere. There is every reason to believe that the Indianapolis show will be as great an event as it was expected the Cleveland show would be. To be sure Indianapolis is a few hours further from the east, but, on the other hand, it is a few hours nearer the west. The change in location should make but little real difference to florists in other sections. It will, of course, make a great difference to the residents of Cleveland. They are the ones who are to be commiserated with. They have been looking forward for many months with the greatest of interest and pleasure to the National Show, and are keenly disappointed to have it snatched away from them.

Naturally, too, the florists of Cleveland are both chagrined and disappointed. It is a pity that their months of hard work should go for nothing. We can be sure, though, that they will be as keen as anyone to make the Indianapolis show a success, and give every assistance possible to their Indianapolis brothers. Perhaps the trade can make up to Cleveland in the future what it has lost this year. In the meantime it is up to everybody to abide by the new arrangements cheerfully and to revise their plans speedily. "On to Indianapolis" will be the slogan from now until March 25, when the show begins.

**Cheap Competition.** There are those who do not agree with the statement made at the convention of the New England Nurserymen to the effect that the selling of rose bushes and other shrubs through the department stores is highly detrimental to the trade. It may be true, and doubtless is, that in some instances growers have turned down orders from other nurserymen in order to supply department stores, although it is difficult to understand the reason why, because the price paid by these stores must necessarily be very low, much lower, probably, than prices prevailing in the trade.

It is very likely, though, that the stock sold to department stores is not stock which the grower would care to put into the hands of other nurserymen. One other point is to be considered, too. Such sales are likely to be brought about because some grower has on hand a very large surplus of some particular variety. If he can unload this variety through one deal, it facilitates his business and fattens his pocketbook because the total amount is likely to be a pretty large one, with very prompt payment.

Now at first thought it would seem that the public as a result of buying such plants in the department stores at a low price would be led to complain of the prices found in nurserymen's catalogues. As a rule this doesn't prove to be the fact, and for a very good reason. In a great many cases, if reports are true, the plants are given a variety of standard names, although they all have come from one lot. Consequently it makes no difference whether the purchaser asks for Ophelia or General Jacquiminot or Killarney or something else. She gets a plant just like her neighbor who carries home a rose bush labeled with some other tag. Now the public doesn't like this sort of thing, and also finds that many department store roses die because of being poorly handled after being dug. Sometimes, too, they are found to be budded very high, another disadvantage.

In any event, after one or two experiences with department store stuff, the everage purchaser is glad to turn to reputable nurserymen and to buy what is offered in the catalogues. It is obvious that no store selling for a lower price than that which prevails in the trade can offer equally good material, so packed and handled that they can stand behind it. It must take its place as second-rate stuff, and in the end the nurseryman whose business is done in a conscientious way will profit rather than suffer with such competition.

# GRAFTED ROSES

Once again we remind you that we are grafting Roses. We have a big lot of very fine Manetti and can take care of your requirements.

PREMIER — MRS. AARON WARD
COLUMBIA — MILADY

# VALENTINE DAY BUSINESS

## Various Ways in Which Buyers Have Been Attracted in Different Cities

It is difficult to find any new way of exploiting Valentine Day. Apparently there are no new ways in which flowers can be put up to create a valentine effect. To a very large extent heart shaped boxes are depended upon. For the most part they are simple boxes in bright colors, but some florists also use much more elaborate boxes. Penn, of Boston, has been showing some remarkably attractive boxes this year, covered with satin and hand painted.

There are differences of opinion in regard to the use of boxes. Max Schling, of New York, deprecates handling any but the simplest kinds. He is quoted as follows: "Many use fancy baskets or hampers or some kind of boxes, the price of which is out of proportion to the flowers used in them. This is a detriment to the flower business. Why? Because to be able to sell these fancy boxes the florist must say that they can be used as sewing baskets or jewelry baskets afterwards. Then they put in a bunch of violets and call it a wonderful gift. After two or three days the flowers have gone and the box has disappeared. The recipient is likely to say that the color did not exactly fit in her room, and so she gave it to the maid. Then this customer never comes back to the same place for valentines, and he is lost to the florist business and becomes a candy customer." That, of course, is one point of view.

As a matter of fact, more can be done with ribbons and baskets than is commonly realized. Oftentimes they replace the heart boxes to good advantage, especially when made up with ribbons decorated with hearts in colors and embellished with cupid ornaments. Almost any basket and any kind of flowers can be made available with such decorations.

A department store in the west has hit upon a very novel advertising scheme. They get out what they call valentines for busy men, and cards advertising these valentines are distributed by means of notes in hundreds of down town offices. These cards say that upon receipt of a telephone call or written instructions a valentine package of flowers or candy, wrapped and ready to pop right into the pocket, will be delivered at the shop or office. This idea appeals to hundreds of suburbanites and to many others who dislike personal shopping. It is a plan that florists might readily adopt. This same concern obtains additional advertising by means of a St. Valentine delivery car, which is a motor cycle having a side car attachment. The outfit is painted a bright red, while a cupid with a big red bow perches on the handle bars. The side car bears the canvas sign: "St. Valentine Special Delivery" with the name of the store. This is another novel idea well worth copying.

# GILLETTE NAMED PRESIDENT

## Convention of New England Nurserymen's Association —Important Matters Considered

Kenneth E. Gillette, of Southwick, Mass., was elected president of the New England Nurserymen's Association at its annual convention at the American House Tuesday and Wednesday of last week. The other officers elected were as follows: Vice-president, James A. Tufts, Jr., Exeter, N. H.; secretary, Donald D. Wyman, North Abington; treasurer, John R. Barnes, Yalesville, Ct.; executive committee, officers and Leonard N. Rose of Taunton, W. E. Campbell of New Haven, C. H. Greaton of Providence.

The convention was an unusually successful one, many interesting matters being brought up for discussion. There being no president, owing to the death of John K. M. L. Farquhar, and the resignation of Mr. Ernest F. Coe, Secretary Sheldon A. Robinson called the convention to order. Mr. W. G. Wyman, of Littlefield & Wyman, North Abington, was chosen temporary chairman.

There was much interest in the report of Richard Wyman, of Framingham, who is chairman of the committee on education, in regard to the short course in nursery practice at the Massachusetts Agricultural College. The course which is now being given at the college is the first of the kind attempted anywhere in the United States. It probably will be continued next year, and is likely to be enlarged to a two-year course in the near future. The association voted to stand behind the plan and to contribute $100.00 for the expenses of the speakers, nurserymen from various parts of New England going to Amherst to talk before the students.

Several members of the association have boys of their own who are taking the course, and several others have employees at the college.

The report of the secretary showed a membership of 73. During the past year there were two deaths and one member was dropped. Three new members were admitted. They were F. W. Smythe, Newport Nurseries, Newport, R. I., R. F. Cross, of Osterville, Mass., and the Brainerd Nursery and Seed Co., of Thompsonville, Ct. Gustav Thommen was made an honorary member.

Mr. C. H. Greaton, of Providence, a member of the vigilance committee, condemned the sale of nursery stock to ten-cent stores and department stores, saying this was to the detriment of the trade, especially as these stores were often quoted a price less than that which the trade was called upon to pay. He also criticized the careless labeling of stock, and the use of nails instead of twine in packing stock, particularly evergreens.

**Donald Wyman**
New Secretary of the New England Nurserymen's Association

He said that more care should be taken to ascertain the reliability of small dealers, and said that the members should post each other in regard to unreliable parties. He declared that some nurserymen catered to private gardeners to such an extent as to pay them to buy their goods, a practice which he severely condemned.

Mr. James Wheeler told about the plan which the florists were adopting to create a greater demand through united advertising, and believed the nurserymen could follow suit.

Paul V. Fortmiller, of Jackson & Perkins, Newark, N. Y., brought greetings from the Eastern Nurserymen's Association, which was in convention at Trenton, N. J., the previous week.

Prof. E. K. Thomas, of Providence, R. I., was introduced. He presented Mr. Greaton with a gold medal which had been awarded him by the Rhode Island Horticultural Society.

A. W. Lombard, of the Massachusetts Department of Agriculture, spoke of the advertising value of public exhibitions, and mentioned in particular the rose exhibits of Thomas Roland and the Breck-Robinson Co. in Boston last year.

Tuesday evening an enjoyable banquet was held, followed by an entertainment, the business sessions being resumed the following morning, when Christian Vander Voet spoke on "Who is an Arboriculturist?" Mr. Vander Voet's paper had many original thoughts, and was heard with much interest.

Mr. W. N. Craig then began a discussion of Quarantine 37 from the viewpoint of the private gardener. Mr. Craig declared that the amateur gardeners of the country must be reckoned with and that they were strong against the embargo because it kept out many of the novelties which they wished to grow, but which commercial growers might not care to bother with.

Mr. Craig spoke particularly of the unreasonableness of barring out orchids which could be grown only in greenhouses and were never known to harbor any pests except those to which orchids were subject. He said the Horticultural Board at Washington showed remarkable ignorance in declaring that orchids could be propagated readily in this country, when, as a matter of fact, it took from three and a half to ten years to flower them. He was very severe in his criticism of the newly appointed horticultural advisor to the Board, saying that he was not qualified to represent the horticulturists of the country.

Mr. Craig also criticized the sending of representatives from Washington to inspect orchids in a house near Boston only a few weeks after they had been received and had gone through the necessary inspection. He then turned to bulbs, and said that California grown iris had not proved a success in the east. Very few flowers could be obtained from hundreds of plants. He declared that it was a good thing that the country had been taught to propagate more extensively, and did not advocate throwing down the bars without discrimination. He said we did not need the cheap Holland stuff, but unfortunately we had few carefully trained propagators in America.

Mr. Craig then aroused considerable interest by saying that he challenged the Horticultural Board to tell how many permits for bringing in excluded material had been issued, and how many of them had been used. He declared that they were hedged

FANCY DAGGER FERNS

HENRY M. ROBINSON & CO., Inc.

2 Winthrop Square 32 Otis Street

Boston, Mass.

around with so many restrictions that oftentimes no use was made of them after they had been obtained.

Mr. Harlan P. Kelsey agreed with Mr. Craig's remarks in regard to the issuance of permits, and declared that the Board should tell the number given out and to whom they were issued. He charged that some nurserymen had been unable to get even a few desired plants of certain kinds, while other nurserymen had been allowed to import the same plants in large numbers. He said that if the permits and the amount of material brought in should be published, the country would stand aghast.

Mr. Dexter M. Rogers, Boston representative of the Federal Horticultural Board, replied to some of Mr. Craig's statements, and a warm exchange of remarks followed, although everything was taken in good part and at the end of the discussion Mr. Craig and Mr. Rogers stepped to the front of the room and shook hands. Mr. Donald Wyman and several other nurserymen expressed the belief that shipments should be inspected at the port of entry.

At the afternoon session the second day Dr. J. K. Shaw of the Massachusetts Agricultural College presented his method of identification of apple tree stock in the nursery row long before it has arrived at the bearing stage. He illustrated his talk by means of many skilfully prepared lantern slides.

W. E. Campbell of New Haven, E. H. Breed of Clinton and H. P. Kelsey of Salem spoke of the necessity for extending the right of patenting to the producers of new varieties of plant growth. It was brought out that the development of long-staple cotton by a Texan had brought $40,000,000 additional into the state the second year after the discovery, but that the planter who had developed the plant did not receive a dollar of it. It was voted to undertake an investigation to determine what protection ought to be given to those who devise horticultural improvements.

# THE WORLD'S BEST CANNAS

**THE BEST VARIETIES FROM ALL SOURCES, FOREIGN AND AMERICAN INTRODUCTIONS**

The best quality of roots, both as to vitality and size of divisions. **Every order filled with fresh cut roots which must not be confused with roots cut, packed and stored months before delivered to you.** They cost a trifle more but are worth considerably more. Every 100 roots we supply will, with reasonable treatment, produce 200 or more pot plants.

The subjoined list contains the names of free, large flowering, vigorous growers, any of which will please you and your customers. Order now and say when you want them shipped to you.

**Price $5.00 per 100, $40.00 per 1,000; except where otherwise noted.**

**BEACON**—Free flowering dwarf, bright red.

**CHEERFULNESS.**— Beautiful variegated orange and scarlet with golden border. The florets are medium sized, but very freely produced.

**CITY OF PORTLAND.**—A wonderfully attractive rose-pink. Excellent upright habit and free flowering. $15.00 per 100, $125.00 per 1000.

**DR. E. ACKERKNECHT.**—The bronze foliage blends pleasingly with the carmine rose trusses. Vigorous and free.

**DUKE OF MARLBORO.**—An old favorite with deep crimson flowers.

**EUREKA.**—The best white Canna. A very strong grower blooming freely. The flowers are large and become pure white in the full sun. $8.00 per 100, $75.00 per 1000.

**FANAL.**—Exceedingly free flowering, deep bright red. A most effective bedder.

**FELKERMEER.**—Another excellent old sort with a profusion of dazzling orange-scarlet flowers.

**GAIETY.**—Wonderfully effective. Deep orange suffused with scarlet and bordered with yellow. A brilliant bedder.

**GOLDEN GATE.**—Vigorous and free. A unique combination of yellow and golden shades, blending into rose as the flower matures. $6.00 per 100, $50.00 per 1000.

**KING HUMBERT.**—The most popular Canna of this generation. The large orange-scarlet flowers, and particularly the very deep bronze foliage make it one of the most useful.

**LOUIS BEVERCHON.**—The flowers are brighter and more freely produced than on King Humbert, while the foliage is a greenish bronze.

**MRS. ALFRED CONARD.**—Magnificent trusses of large salmon-pink flowers. Unique and very ornamental. The stock of this variety is very scarce. We have a limited quantity and advise early ordering. $15.00 per 100.

**MRS. KARL KELSEY.**—A tall, majestic vigorous grower surmounted by great trusses of large orchid type flowers. Orange-scarlet, streaked and mottled with rose.

**RICHARD WALLACE.**—A well known pure yellow.

**THE GEM.**—A seedling of Hungaria, more vigorous, with a profusion of large cream-colored flowers dotted with carmine. Very unusual and attractive. $7.00 per 100, $60.00 per 1000.

**THE PRESIDENT.**—The greatest red Canna in commerce. Very heavy, vigorous growths surmounted by great trusses of immense florets of bright scarlet. We heartily endorse this as the greatest Canna introduction of recent years. $8.00 per 100, $75.00 per 1000.

**WYOMING.**—We know of no other Canna as effective as this for large plantings. A giant in growth. Extremely vigorous with its deep bronze foliage as an ideal background for large bright orange-colored flowers of the orchid type. It makes an ideal subject.

**YELLOW KING HUMBERT.**—A sport from King Humbert to which it occasionally reverts. Green foliage with yellow flowers, dotted with scarlet. $8.00 per 100, $75.00 per 1000.

We have good stocks of many other varieties, prices on which will be quoted on application. Order now for delivery in February and March.

THESE PRICES ARE INTENDED FOR THE TRADE ONLY

# BOSTON FLORISTS' ALLIANCE

## Growers and Retailers Signing Up --- Carl Becker Acting As Secretary

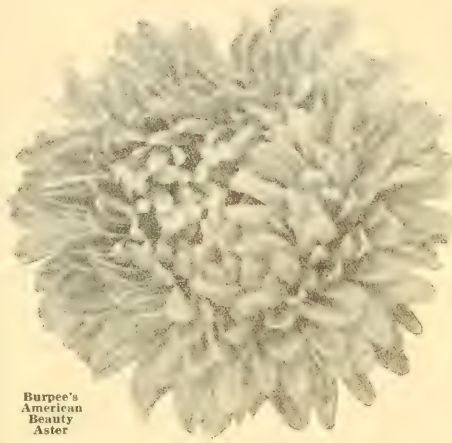
Excellent progress is being made in the development of the newly formed Alliance between the Growers' Association and the Retail Florists of Greater Boston. The executive committee which will have full charge of the Alliance affairs is as follows:

Representing the Growers' Association, Allan Peirce, Thomas Roland and W. C. Stickell.

Representing the New England Retailers' Association, Charles F. Boyle, John O'Brien and Carl Becker.

The wholesalers are to be represented only through the retailers, so that, as finally agreed upon, the executive committee will have but six members. For the time being Mr. Becker is acting as secretary, but a permanent secretary to be paid by the Alliance and probably a man outside the trade is to be chosen. Thomas Roland has been elected treasurer.

Just where the permanent office of the Alliance will be located has not yet been decided. Probably it will be at the wholesale market in Winthrop Square for the present. The Alliance starts off with rosy prospects. It is said that 75 per cent of the growers in Greater Boston are represented. There are fifty-six members of the New England Retailers' Association, all of whom are in the Alliance, and many others outside have signified their intention of coming in. Without much question practically all the retailers in the Greater Boston district will be included.



**Allan Peirce**

Active in Promoting the Florists' Alliance

At the dinner held at the City Club on the evening of Saturday, January 28, sixty signatures were received, which gave the Alliance a good start. This dinner was one of the most largely attended and enthusiastic get-together affairs ever held in Boston. All branches of the trade were represented, and several visitors were present, including George Asmus, of Chicago, Fred Ammann, of Edwardsville, Ind., A. F. J. Baur, of Indianapolis, the newly elected president of the American Carnation Society, Mr. A. M. Campbell, president of the Philadelphia Florists' Club, John Hartje of Indianapolis, Charles Johnson of Olivette, Mo., and E. M. Knockam, of Buffalo, secretary of the Western New York Flower Growers' Association.

Messrs. Asmus and Ammann were

# Burpee's Asters

Burpee's American Beauty Aster

The Burpee Beauty Asters are of inestimable value for cut-flowers. The individual blooms measure 4 to 5 inches across and are carried on long strong stems. This distinct type of Asters was first introduced by Burpee. They bloom after the Late Branching Asters have finished blooming and before the early Chrysanthemums have come into the market. The early kinds come into bloom almost as soon as the Royal Asters and produce flowers for a long time.

**American Beauty.** The large flowers are a bright rosy carmine, the shade of the world-famous American Beauty Rose. Pkt. 10 cts.; ¼ oz. 45 cts.; oz. $1.60; ¼ lb. $4.80.

**Purple Beauty.** Wonderful rich purple flowers of unusual size and graceful form. Pkt. 10 cts.; ¼ oz. 45 cts.; oz. $1.60; ¼ lb. $4.80.

**Lavender Beauty.** The large, well-displayed flowers are a clear lavender. Pkt. 15 cts.; ¼ oz. 60 cts.; oz. $2.20; ¼ lb. $6.60.

**September Beauty.** Delicate, soft shell pink. A beautiful and rare color. Pkt. 15 cts.; ¼ oz. 60 cts.; oz. $2.20; ¼ lb. $6.60.

**Crimson Beauty.** A very bright rich crimson. Fully double and extremely large. Pkt. 25 cts.; ¼ oz. $1.25; oz. $4.00.

**White Beauty.** The flowers are fully double and of magnificent size. A pure white in color. Pkt. 25 cts.; ¼ oz. $1.25; oz. $4.00.

**Early Carmine-Rose.** Rich carmine-rose. Flowers very double, and lasting well in water. Pkt. 25 cts.; ¼ oz. $1.25; oz. $4.00.

**Early Shell-Pink.** A delicate yet rich shade of shell-pink. Pkt. 25 cts.; ¼ oz. $1.25; oz. $4.00.

**Early Purple.** A rich and impressive color which goes well with the massiveness of the large flowers. Pkt. 25 cts.; ¼ oz. $1.25; oz. $4.00.

**W. ATLEE BURPEE CO.** Seed Growers **Philadelphia**

the principal speakers, and aroused much enthusiasm by their remarks. Mr. Asmus said in part:

"Do you believe in advertising? Be sure of that at the beginning. Then go after your share of the business. People can spend their dollars only once.

"The percentage method which you are considering here has proved a great success in Chicago. We have practically taken the glut out of the Chicago market. As you all know, the quantity of flowers is much greater at some times than others. There are seasons when hundreds of small growers send in blooms and flood the market. You must let people know when such conditions prevail. You must tell them when there is a big drop in prices. If you do you will start them buying. If you don't tell them, how are they to know?

"In Chicago we borrowed $9,000 from the bank on a note to put our first big campaign over. Then we found that the public was pleased because we had told them that flowers could be bought again at a reasonable price. We adopted the Milwaukee plan by which the retailers paid one per cent on the amount of all purchases, while the growers also paid one per cent on the sales.

"This is an extremely small proportion when the amount of the extra business obtained is considered. It is an accepted fact that retailers should spend four per cent of their income for advertising. This is the smallest amount they should spend. One per cent for the association leaves three per cent to be used individually. How little this is! When I find a man so small that he won't give a cent on a dollar, he is usually so small that you can't see him behind the cent. Remember that people in other trades are trying to steal our slogan. We must spend money to keep it where it belongs.

"We must have an education campaign for the florists. In some cases we must teach florists business ethics. It is no use to have an advertising campaign unless we follow it up in our store work. If you advertise a thing and don't keep faith with the public, your ad is wasted.

"Work together. Do not think of each other as competitors, but as co-operators. Co-operation is the spirit of the day. Take advantage of every big event. Be part and body of all the big things that transpire in your town. Begin to think in the future

The benefit of HAIL INSURANCE was forcibly illustrated by a number of violent hail storms in New England last year.

Be wise and send to **John G. Esler, Sec'y of Florists' Hail Association, Saddle River, N. J.**, for Hail Insurance literature.

**DO IT NOW.**

from tonight on. Forget the past and drop your grouches.

"Some florists have objected to a plan like the one discussed, saying 'We don't want everybody to know our affairs.' There's no need to worry about that. Get an outside man for your secretary. He is the only one who will have access to the records. Under our constitution we have the right to investigate if we think a man is not paying his lawful proportion, but there never has been any occasion to use this right, and probably never will be."

At the close of his talk Mr. Asmus was asked many questions. Some of them were as follows:

Question: What about artificial flowers?

Reply: If you can't convince the public by advertising that natural flowers are better than artificial flowers, you had better give up. Show the superiority of natural flowers and the public will believe you.

Question: Do all your retailers buy in Chicago?

Reply: The greater part of them do.

Question: How about high prices on Mothers' Day?

Reply: A reasonable advance is always justified when there are heavy demands. Your advertisement should cover that. Don't try to make too much profit on such occasions, however. Keep the public in your confidence. Tell them in your advertising why flowers are higher or cheaper.

## BOSTON BOX COMPANY MOVES

The Boston Box Company, Inc., which makes boxes for florists, has moved from Hawkins street, Boston, where it has been located for some time, to 65 Clinton street, Malden, where the company has larger quarters and more complete facilities for its business.

## ANDREW CHRISTENSEN TO BUILD

It is understood that Andrew Christensen, the well known grower, is planning to build two new greenhouses at Reading, Mass., on land he has purchased near the station. They will be of the modern, display type and contain an attractive show room. Mr. Christensen has also bought fifteen acres of land in another section of Reading, where he contemplates establishing a nursery.

Daniel E. Nelson is putting up a building at Hyannis, Mass., which he will use as a flower shop.

## DR. VAN FLEET'S DEATH

The news of the death of Dr. W. Van Fleet has been received with deepest regret on every side. Dr. Van Fleet has occupied a prominent place among the leading plant breeders of the country for the last twenty years, and has become especially famous for his work in the production of new and better roses. He had been with the Department of Agriculture at Washington since 1910, but died at Miami, Fla., following an operation. He had gone to Miami for the purpose of conducting experiments at the plant introduction garden there, with the hope of improving various tropical plants. Dr. Van Fleet was a remarkable man in many ways, and it is impossible to overrate what he has done for the development of horticultural interests in America. He was 64 years old.

## TRIBUTE FROM S. S. PENNOCK

In this morning's mail, I received a letter from Professor Corbett, telling of Dr. Van Fleet's sudden death. This comes as a great shock to all those who knew him, particularly to those who knew him as intimately as some of us who have been associated in the Rose Society with him for the past few years.

His death is a distinct loss to Horticulture. In roses he has made wonderful advances in rose breeding. Probably the most distinct success along these lines of anyone who ever hybridized roses.

American Pillar and Dr. Van Fleet Roses that are known the world over, and many others of equal merit, we have him to thank for—giving us climbers that were better than existing varieties. One of his many ambitions was to produce an ever-blooming climber, and it would have been only a matter of a few years when he would have had something startling to give us along these lines.

In visiting him at the experimental ground and at his home at Bell Station, Md., one always felt a day, or part of a day, spent with him was a day added to one's life—a day full of interest and full of close intimacy that was not gotten in any other way. He was retiring and modest to a fault—a man that one loved to be with and loved to be counted as a friend, in fact, a real rich privilege to be numbered among those who were close to him.

To Mrs. Van Fleet our very deepest sympathy goes out in her loss, and not only her loss, but a loss to the whole Horticultural world.

S. S. PENNOCK.

## DR. MILLS' TRIBUTE.

Rev. Dr. Edmund M. Mills, the celebrated rose enthusiast of Syracuse, N. Y., says:—

"Dr. Van Fleet's fame will rest, not only on being the originator of such fine roses as Silver Moon, Dr. Van Fleet, American Pillar, etc., but in having also orignated many fine roses whose bushes as well as blooms are beautiful."

## DEATH OF MRS. E. R. RECK.

Mr. Carl C. Reck, the well known florist of Bridgeport, Conn., has the sympathy of many friends in the loss of his wife, Mrs. Emily Reed Reck, who has just passed away after a short illness. Mrs. Reck was widely known for her activities in organizing the Republican women of the state. She was a member of the Republican Committee, and was a speaker at many rallies. Besides her husband she is survived by one son and one daughter, a father and two sisters.

An exhibition of spring flowering plants will be held in Horticulture Hall, Boston, Thursday to Sunday, March 23-26. This is to be an unusually important show, and a large number of entries is expected.

## ADVERTISING and SELLING

Max Lakin, proprietor of Johnson's Flower Store in Quincy, Mass., has adopted a novel method for increasing trade. Mr. Lakin found when he bought this store that many Quincy people were going to Boston to buy table decorations, and flowers for special occasions where artistic decorative work was required. He determined to demonstrate that work of this kind could be done just as well in Quincy, and placed the following advertisement in the local papers, using generous space:

**Get Acquainted Week**

You are cordially invited to inspect our daily showing of table decorations, from Jan. 27 to Feb. 4 inclusive, specializing Valentine displays. Sincerely, JOHNSON'S FLOWER STORE, 1361 Hancock Street, Quincy, Mass. Decorators for all occasions. Quincy's Flower Phone, Granite 275-W.

An attractive dining table was given a prominent place in the store and was decorated every morning in a different way. Sometimes carnations and roses and sometimes spring flowers were used. One day the table was arranged for a somewhat elaborate meal, and again for a very simple luncheon. Customers calling at the store were not urged to buy, the fact being emphasized that the only purpose of the display was to show what the store was capable of doing. It was a good idea, and one justified by results.

### DEATH OF WILLIAM A. GILSON

Much regret is expressed at the passing of William A. Gilson, for fourteen years market representative of Thomas Roland. Mr. Gilson died of pneumonia last week, and the funeral was held Monday morning, Feb. 6, at St. Joseph Church, Somerville. There were flowers from both markets, and many florists were present at the funeral, as Mr. Gilson was widely known and very popular. Before entering the employ of Mr. Roland, Mr. Gilson had been connected with the Butterworth establishment at Framingham, and the Waban Rose Co. He was forty-seven years old and is survived by a widow.

Otto Goodwin, formerly with the Rosary in Boston, has now entered the employ of Max Lakin, the florist of Quincy, where many of his friends have already found him.

## Nursery Stock

Direct from Propagator to Planter. Choice, full of life. True to name Apple trees. One year old, 17 cents. Two year old, 25 cents. Well rooted and Branched Peach, in leading varieties, 2 to 3 feet, 10 cents each. 3 to 4 feet, 15 cents each. 4 to 5 feet, 20 cents each. ## George Watson's Corner

"You in your small corner and me in mine."

Dennis Connor blew in recently. Haven't seen him for a month. He explained. Very busy in the building line for Lord & Burnham. Also, had been worried about the madam. She got caught with an attack of pneumonia and it looked like touch and go for a couple of days, when it reached the crisis. Fortunately, she has pulled through, all right, so her old hubby can think of his office in the Land Title once more, and hand out a few more cut quotations to the prosperous rose and carnation growers who must put up some more glass.

Brother Jones of the Pennock Co. is quite cheerful over the situation in the cut flower market. He says some of the growers are kicking a little but that they have not much reason back of their grouch and if they would only compare themselves with what other lines of production are going through they would quickly realize that they are really more fortunate than most.

The Philadelphia boys who journeyed to Hartford to the Carnation Convention returned with very favorable reports on the fine way that event was handled, not only by the people of Hartford and the rest of New England but by the Carnation Society whose membership is widely distributed. The showing of the latest and best in carnations was unusually good, and the management were wise enough to boost the advancement of their favorite flower by getting every day a good attendance of the general public. This was accomplished by the issuance of invitation tickets. These were distributed by the houses who come in contact with flower lovers:—flower stores, seedsmen, nurserymen, and allied interests. This method gives the desired selective, and also adds the personal element and draws just the right kind of people. Not an indiscriminate mob as a general distribution of free tickets would bring out; but the people of refinement and the people who can appreciate natural beauty and the attainments of the present-day leaders in horticultural development. Fundamentally that is what all flower shows are for; but it is always a difficult question just how to go about it. Most of the efforts make the mistake of scheming too must to get the dollar back. The best

**ROMAN J. IRWIN**
IMPORTER
43 WEST 18th STREET, NEW YORK

way is to use a show on the same basis as we go at advertising—with a general fund for publicity, the "Say It With Flowers" idea, to which we are all supposed to contribute. Only, in the case of a show, the individual exhibitor gets his advertising directly from his exhibit while the managers and workers contribute their share in hard work but no other expense and they get their returns also by the advancement of the business. We all have to keep everlastingly at it in some way or other. The fellow who does not contribute his share someway, somehow, to the best of his ability (cash, hard work or something) is not doing his full duty to his profession.

---

Edwin J. Fancourt and others in commenting on the success of the Hartford show were rather favorable to the opinion that the smaller cities really had some points of advantage for such occasions over the metropolitan centers. For one thing, the people of these smaller communities are nearer to trees and flowers and agriculture and have fewer distractions in the way of theatres and the general rush of the great white ways; so that they are more easily interested and understand better what they see.

---

Benjamin Dorrance, of Dorrancetown, Pa., passed away January 23rd. In addition to many other interests, he had a big range of glass on his place near Wilkes-Barre and made a specialty of growing roses. The greenhouse end was actively participated in by his daughter, who survives him. They were one of the first to make a big success growing the Killarney when it was first introduced. He was seventy-five years of age.

---

P. M. Kosher, Bridgeton, N. J., formerly of Boskoop, Holland, will be the lecturer at the monthly meeting of the Florists' Club of Philadelphia, March 7th, Adelphia Hotel, 8 P. M. "Horticulture, Its Duty and Its Future," is the title of his talk. Members and their friends invited.

# The Little Things That Count Big In Owning Your Own Greenhouse

Ever gone into a hat store knowing exactly the kind and shaped hat you want; and then have some smart Alec of a salesman try to sell you the kind HE liked.

Makes a fellow madder than a wet hen, doesn't it?

Suppose, however, that same salesman had told you something about some of his hats that meant better service to you, more satisfaction for your money—you then sort of feel towards the salesman as you would toward an old friend.

Salesman number two is our sort when it comes to selling a greenhouse.
We do sell greenhouses, but we first sell satisfaction.
Furthermore, it's said we have a reputation for pleasant dealing.
You know we go anywhere for business, or to talk business.

## FERNS

We wish to call particular attention to our fine stock of ferns which we are offering at this time.

**NEPHROLEPIS VICTORIA** (The Victory Fern). A beautiful, new, crested form of Teddy, Jr., nice plants, 3½-inch pots, $25.00 to $35.00 per 100; 6-in., 75c each; 8-in., $2.00 each.

**NEPHROLEPIS ELEGANTISSIMA.** Large specimens, 8-in., $2.00 each; 10-in., $3.00 to $5.00 each.

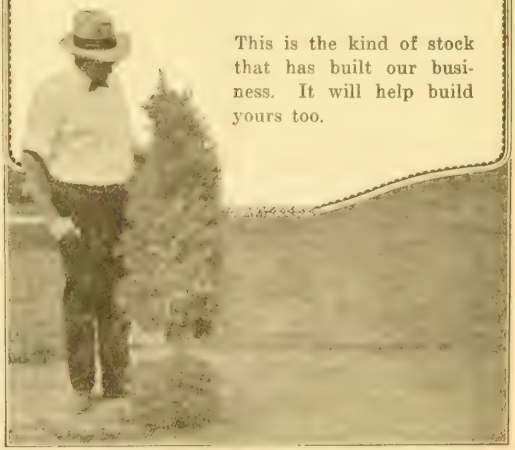
**NEPHROLEPIS ELEGANTISSIMA COMPACTA.** 3½-in., 35c to 50c each; 6-in., 75c each; large specimens, 8-in., $2.00 each; 10-in., $3.00 to $5.00 each.

**NEPHROLEPIS MUSCOSA.** Nice plants, 2¼-in. pots, $12.00 per 100; 3½-in., 35c to 50c each; 5-in., 75c each; 6-in., $1.00 each.

**NEPHROLEPIS HARRISII.** 10-in., $5.00 to $7.50 each.

**NEPHROLEPIS DWARF BOSTON.** 3½-in. pots, $25.00 per 100; 6-in., 75c each.

**ENGLISH IVY,** nice plants, 4-in. pots, bushy, 25c and 35c each, according to quality.



Packing added extra at cost.

F. R. PIERSON, Tarrytown, N.Y.

### SWEET PEAS UNDER GLASS

Mr. J. Bennett, Lachine, Que., recently addressed the Montreal Gardeners' and Florists' Club on growing sweet peas under glass and gave the following pointers:

He first mentioned sowing the seeds in pots so as to have them in good shape by the first week in December, for planting out into benches as soon as the 'mums are cleared off. The same soil is often used, by first screening it and adding lime and ashes. Some people prefer half of the old soil and half new. Sweet-peas like rich, rich soil.

Mr. Bennett stated that he did not pinch back, but left the young growth on the ground until new and strong shoots grew up, ready for tying. In staking, some used string, others wire netting and brush. Another method is the use of a wire instead of string. The wire should be long enough to go into the ground and hook at the top. A wire always keeps straight and never breaks like string.

Care should be taken in cutting flowers. It is important not to cut when any moisture is on the bloom. Cut in morning or evening when bloom is perfectly dry. Place in water so the stems can become full of moisture before shipping. They will keep much better.

## THE TALK OF THE TRADE

We are sorry to have reports from California that the crop of Freesias for the coming season will be decidedly scarce. Heavy frosts and unseasonable weather generally have caused heavy losses in stocks, and there is no doubt that the supply in all flowering sizes will be limited. What the final answer will be is a matter of some question. The probabilities are that prices on lilies for the coming Easter will hold close to what they were last year. It is doubtful if the market will go over twenty-five, though I can't see any reason for it to be much below that. There is no more than an average supply in sight, although I believe that pretty nearly all of the stock will be finished in time. I doubt if there will be the same quantity timed too late this season that we found around last year. The count, however, will probably run low, as it has in the past two or three years. With such a large quantity of the smaller sized bulbs that are being grown, it's only natural to figure on a low count.

In a general way lilies appear to be well done. The percentage of disease is certainly no more, and I think it's fair to say less than it has been some years. Bermuda Harrisi has given a pretty good account of itself again this season, although in my opinion this is a lily which can be made very profitable if flowered very early, but for late flowering it has no advantage over Formosum and Giganteum. The Bermuda Harrisi has its place as an early variety.

---

I was pleased to see again a batch of geranium "Alice Lemon," which I have lost track of for the past two or three years. It appeared to me when I first saw it a few years ago as one of the most promising varieties, particularly for pot culture. This geranium, properly grown in four-inch pots, is, to my mind, as good as any variety on the market when used early in the season for such a season as Easter and before the bedding out time. The color is exceptionally good, a lighter pink than Poitevine. It has a fine habit of growth, and while it is considered a good bedding out variety, I think it is particularly good as a pot plant type. It is still very early in the spring for any short crop on bedding plants, but it is a fact, nevertheless, that geraniums in all varieties now are practically sold out. Of course, this has been true for a long time past with the variety Ricard, but there is very little stock left now of any sorts.

Some of the growers who were obliged to buy geranium stock have complained about the price charged for two and a quarter inch pots, but it's doubtful if these same growers would care to contract to grow a quantity at a lower price. I doubt if there is more than a legitimate profit in two and a quarter inch geraniums at around sixty dollars a thousand. At any rate, all the stock that can be found will easily sell at those prices, and I doubt if there is any reason for looking for lower prices for some time to come in this particular line.

Eugene M. Naukam
New Secretary of the New England Florists' Alliance.

---

The cut flower markets in the east show in a general way a healthy condition. I believe that prices this season for cut flowers have held up to the top of last season. For a few weeks past carnations in particular have been running a little ahead of the same time a year ago. I do think, however, that plant stock has not moved in the same lively way, while the prices are but little if any below other years. There are no lines that are short in supply, and it's necessary to crowd the pot plant lines a little bit in order to move out the stock that is ready.

---

The Butterworths, at Framingham, Mass., have much faith in the value of a handsome show room and office as an advertising medium. They have just completed one of the finest offices to be seen in any similar establishment in United States. It is made of Portland cement, and looks very substantial as well as artistic. Attached to it is a Hitchings conservatory greenhouse, where it is planned to have a display of orchids as well as other flowers at all seasons of the year. Many people associate the Butterworths only with orchids because of the fame which they have won for themselves in growing these flowers. The fact is, though, that they carry on a general greenhouse business, and have much retail trade. The two men, father and son, are among the most enthusiastic plant growers around Boston. They never fail to give the shows liberal support, and are always on the lookout for whatever is new and up-to-date.

---

Some of the biggest geranium growers in the country have been reporting appalling losses, and apparently without being able to fathom the reason. These reports come from the south as well as from the west and east. I do not presume to tell these expert growers what the trouble is,

but in talking the other day with another well known grower of long experience, whose losses have been fewer, I received some suggestions that may be worth passing along.

This man said that in his opinion the trouble is one of constitution. That is to say, the mother plant has not been properly taken care of. Stock plants are left in the benches year after year, and do not get the same chance to recuperate as those planted outside in the field and brought in during the autumn. All too frequently, this man said, everything goes. Diseased plants, semi-double plants which have run out and become practically single are kept for stock. The day will come when geranium growers will be known by the strain they have. Then it will not be just a question of getting a cutting of any sort that is well rooted, but of getting a cutting that will flower true to name.

It was pointed out by this grower that geraniums and aspidistras have an affinity in the fact that they are hard to kill and yet respond wonderfully to proper treatment. One has to see how aspidistras are grown in Belgium to appreciate what good cultivation really means.

Isn't it rather a severe indictment for an experienced grower of geraniums or any other stock to confess that his losses amount to from 50 per cent to 60 per cent? You and I would think twice before employing a man boasting twenty-five years' experience in geraniums and yet found him losing such a large percentage of cuttings.

In the most successful geranium houses the plants are kept as clean as possible. As careful attention is paid to airing, watering, feeding and disbudding as would be paid to any other crop. And why not when every plant is worth a dollar or more for cuttings?

---

In the readjustment of prices, which has been going on for some time, it should not be forgotten that the growers have to take their share. During war times, when prices went up, the growers got their share. So now, when things come the other way, they ought to take it philosophically. Of course the middlemen are the first to get blamed for the new conditions. That's natural. But they are no more responsible for it than they are for a sunset or an eclipse. As for the retailers: the most important thing for them is to see that they get their store rents back to normal. The landowner got his share in the general upward tend, and he has got to take his share now by coming back to earth again. All of which is only ordinary common sense; but it's a hard job to make some of them see it.

---

I hope that it isn't imagination on my part, but there does seem to be an improvement in the way the express companies are handling plant shipments. Maybe I will be paid for this rash statement by a long report of frozen shipments, but my observation would show that up to this time, even through the very severe weather we have had, there has been a lower report of frozen shipments than I have noted for quite a number of years past.

Possibly I am crediting the express companies with something they don't deserve. It may be that the growers have waked up and are more careful in their packing, and are also being more careful not to ship during extreme cold spells. Whatever the real reason may be it is a very satisfactory condition, because these lost shipments cause trouble with all parties concerned, and any way that it's possible to avoid them is well worth trying.

---

## NAUKAM ON THE JOB.

### Begins Work as Secretary of New England Florists' Alliance.

Eugene M. Naukam, of Buffalo, who has been made secretary of the newly formed New England Florists' Alliance, arrived in Boston Monday of this week, and immediately began getting acquainted. On Tuesday he took possession of the new offices which have been rented by the Alliance as its headquarters. These offices are at 77 Summer Street, and are located on the seventh floor. They are commodious and convenient, and only a few steps from the wholesale markets. Mr. Naukam has taken a room in the Back Bay district, and will not move his family, which consists of a wife and one child, to Boston for the present. In fact, he is to continue to give a certain amount of attention to the Buffalo organization for the next few months. Mr. Naukam has a pleasant personality and is already making friends.

Mr. Carl Becker who has been acting as secretary reports that twenty new names have been added to the list of members. Some of the retailers are holding back, and considerable convincing will be necessary, they say, to make them sign up. Mr. Naukam, however, has a fine array of facts and figures with which to do the convincing job. Another get-together banquet is planned for the near future.

## BOSTON GARDENERS' AND FLORISTS' CLUB

The annual Carnation Night of the Boston Gardeners' and Florists' Club was held on Thursday evening, as the hall could not be obtained for Tuesday evening. A number of prominent carnation growers spoke, and many exhibits were shown. At the close of the meeting refreshments were served.

The annual banquet will be held at Horticultural Hall on the evening of February 28, and a large attendance is expected.

---

## THE MARKET

The market has been very weak for several days past. The holiday was partly responsible. Retailers report but little business. Good carnations have been selling for five and six cents, and roses almost as low. For the rest, quotations about like those of last week have been made, but selling prices have averaged considerably under them.

---

## PLANT CONFERENCE

### Florists Are Wondering Just What Its Scope Will Be

Dr. Marlatt, Chairman of the Federal Horticultural Board, consented to change the date of the "Plant Conference" from March 15th to April 19th, and the trade appreciates that—but this Committee has been unable to get a definite and explicit statement as to the scope of the Conference, what specific subjects the F. H. Board will be prepared to discuss.

How can there be a full and free discussion by interested persons unless those persons know that what they are interested in will be discussed? If it is the Board's intention to quarantine Rose Stocks and Narcissus Bulbs there will be no "full and free discussion" of those subjects unless those interested in such items are present at the Conference—and they will not be there unless they know that those items will be discussed—they are not interested enough in "modifications to No. 37" to warrant their going.

Of course the trade would gladly give the Board some practical constructive guidance with regard to modifications of No. 37, but if additional quarantines are planned this Committee will be fully occupied in meeting the main issue—the trade has largely adapted itself to the iniquities of No.

# Grafted Rose Stock

Our contribution this year to the **GRAFTED ROSE** business, will total

## 400,000 PLANTS

A good many of these are already sold, but we can still quote on most of the standard kinds. A specially fine lot of 15,000 **PREMIER** will be ready for delivery February 25th. Price on this and other standard varieties, $225.00 PER 1000.

## ANGELUS

**(Fred Lemon's White)**

We will have 10,000 grafted plants, ready for delivery March 1st. If you want some place your order now for plants of this early block, and thank us later for the suggestion. $375.00 PER 1000, $1,750.00 PER 5000.

Stop in and see our **ROSES** and other stock if you are in our vicinity. Angelus is a kind, free doer and one you will like to work with. Full enough in petalage for Summer use, and opening splendidly at the present time.

## CHARLES H. TOTTY COMPANY, Madison, New Jersey

37, to lift the quarantine on items that are not now purchasable in commercial quantities would be futile anyway—but the trade is vitally interested in additional quarantines.

Will the Conference discuss "modifications to No. 37" or "additional quarantines"?—to consider both at the same time would result in burying the important matter of additional quarantines under a jumble of protests over spilt milk. Does Dr. Marlatt want that? or does he want "a full and free discussion"?

THE T. AND LEGISLATIVE COMMITTEE OF S. A. F. AND O. H.
JAMES M. HUTCHISON,
Chairman.

### MR. HILL'S TRIBUTE TO DR. VAN FLEET

Mr. E. G. Hill of Richmond, Ind., writes as follows in regard to the passing of Dr. Walter Van Fleet:

"It was with a keen sense of loss and deprivation that word of the death of Dr. Van Fleet came to us and it came as a sudden shock. His work was of intense interest, and we awaited from year to year the new 'find' that he himself had worked intelligently to produce.

"His plans were wise; he sought to improve the garden roses of America, to add interest and enthusiasm to the labors of the great gardening fraternity of the country. He realized and often referred to the poverty in the line of hardy roses for the colder sections of the country, and to this class he gave his utmost effort and closest attention.

"Among his choicest productions have been the American Pillar, Silver Moon and Dr. Van Fleet, the last a magnificent memorial of his work, a Carnot bloom, on a hardy, glistening rose bush.

"With deepest regret we realize his work is finished, that no more treasures can come to us from his generous and unselfish hands.

"E. G. HILL."

### LAUREL

Although the laurel awarded to the Greek youths, winners of the Olympian games, and to the orators in the Forum was quite unlike our kalmia latifolia, in fact not a kalmia at all, there is still a romance about the laurel which may come partly from the well balanced beauty of the name. Yet our mountain laurel with its great bursts of pink and white blossoms has an innate beauty which endears it to us all and it needs no legend to charm us.

We hear much today about the wanton destruction of laurel. The societies for the protection of our wild flowers are trying to preserve it, but something also might be done to encourage its growth. It was recently reported at a conference of people connected with different garden societies, who were especially interested in wild flowers, that seedling laurels were found under the old bushes where a mossy covering to the ground protected the seeds and caused them to germinate. Where they fell on the bare and sterile ground they would not come up, but if we keep a soft mulch or moss under the parent bushes the seeds will grow.

M. R. CASE.

Hillcrest Gardens, Weston,

# ADVERTISING AND SELLING

The name which is given to a business often has much to do with its success. That is to say, the name may prove to be of pronounced advertising value. That this is true has been proved by Fred L. Gentry and Fred H. Sass, who conduct a flower store at Spartansburg, So. Carolina. The fact that both partners had the same first name gave them an inspiration and they opened their new store under the novel name of "Fred's Flowers." It is a name which immediately attracted attention, and which because of its euphony and alliteration stuck in the memory.

When the business was started something over a year ago, most of the flowers were grown in a few frames in the yard of the Gentry home. A little later a greenhouse was put up, and within a few months a second house. Both houses are now taxed to their capacity, much outside buying has to be done. The two partners admit that the name has had much to do with the success which they have won. While Mr. Sass is a German, he enlisted in the United States army when the war broke out and served for eighteen months. He has helped to make "Fred's Flowers" a success.

There is another concern in the south which has utilized a good name in a good way. The store is at Richmond, Va., and is known as "The Rose Bowl." The interest of the passerby is first attracted by an old fashioned swinging sign such as those used by old English inns: The painted sign represents a bowl overflowing with roses. Now, as it happens, the sign in this particular case advertises a tea room, but there is no reason why it should not be used equally well or better by the owner of a flower shop who wants to attract attention in a novel way.

## PENN LOSES LITTLE

### Some of the Methods by Which He Makes His Losses Small

Henry Penn of Boston was recently interviewed by a Philadelphia paper and gave an interesting account of the way in which he keeps his losses down to an almost negligible amount. He says that he never accepts a charge order from a hotel without investigating the man who gives it. He has learned that a college boy ordering a dozen American beauties for the theatrical star who has captivated his fancy loses much of his ardor when the time to settle comes, especially as the star is then probably shining far away.

On the other hand, an order for funeral flowers is never questioned, even though it comes from a total stranger. As a rule that is true with flowers ordered for a wedding. The theory is that there is enough sentiment about such occasions to bring about a settlement. It is a theory that works out in practice, too, because the percentage of loss from poor accounts is less than one-half of one per cent. This doesn't mean, though, that all bills are paid promptly. Sometimes considerable effort is required to get in the money. And right here a very capable woman with a desk upstairs enters.

Unusual care is taken in the care of every charge account to get the customer's telephone number and most of the slow accounts are collected over the phone. The woman in question is extremely tactful. She never makes a peremptory demand for payment, but always has a pleasant word of greeting and an indirect method of approach which seldom gives offense. At the same time she is so insistent, calling morning after morning if necessary, and taking pains to learn just when the debtor is most likely to be at his home or his office, that she almost invariably obtains payment within a comparatively short time. This is one feature of the business where the human equation counts for much.

DELPHINIUM BELLADONNA
(Everblooming Hardy Larkspur)

Henry A. Dreer 714-716 Chestnut Street PHILDELPHIA, PA.

because a customer is seldom lost, no matter how often dunned. In fact, the dunning itself is carried on so tactfully that it merely cements the confidential relations between the seller and the buyer, and in itself helps to extend trade all over New England.

### ABOUT TRANSPLANTING

#### Richard M. Wyman Talks to Nursery Students at Amherst

Mr. Richard M. Wyman of the Framingham Nurseries was a recent lecturer at the nursery practice school at the Massachusetts Agricultural College, Amherst, and gave a very interesting talk on transplanting.

The first transplantings in the nursery are made from seed beds or flats into flats or cold-frames. This applies to only a few lines of stock which are grown from small seed. The more important transplanting is practiced on material 1-3 years old, which is taken from the seed beds and planted in the growing-on fields. The majority of this stock is raised from cuttings in propagating fields or beds. Such cuttings are rather closely root framed at the time of transplanting. This helps them to form better roots and also reduces the cost of the operation. The condition of the material at the time of transplanting is of great importance. It must be fresh and dormant. The best time for transplanting most trees is just at the time when the new growth is started. This applies both to evergreen and deciduous material. Although the planting season may be lengthened the best time for transplanting is very short. In many nurseries this work interferes with shipping, but it is poor business to make transplanting wait until the end of the shipping season. Transplanting should start in this latitude April 5-10 with deciduous species, and April 12-25 with evergreens. Hemlocks should be transplanted especially early before any growth starts. Spruce, Juniper and Arborvitae will stand later transplanting.

### CATALOGUE OF PLANT NAMES

According to Mr. Harlan P. Kelsey, of Salem, Mass., chairman of the committee on nomenclature, the Catalogue of Standard Plant Names will be ready for distribution April 1. The price will be $5.00, but orders will be accepted from members of the trade, we understand, up to April 1, at the rate of $3.50. This advance discount is given in order to help obtain ready money for financing the book. The catalogue will be a monumental work, containing 100,000 names, and will be indispensable to everyone who grows or handles plants. Moreover, it should prove of inestimable value for clearing up the confusion which has existed in the past.

---

At the formal opening of the Dodge City Floral Co., Dodge City, Kansas, a public reception was given and largely attended. This company is headed by D. M. Robinson, of Emporia, and has put up two large greenhouses which are well stocked.

# FIFTH NATIONAL FLOWER SHOW

## Manufacturer's Building
## INDIANAPOLIS

## *March 25 — April 1, 1922*

The move from Cleveland to Indianapolis has been accomplished without difficulty, and even to advantage.

Indianapolis is a wonderful city, with remarkable drawing powers due to its great interurban system of travel. Just think of it! Indianapolis, for an event such as the National Flower Show, draws from a population of **Sixty Millions,** all within a day's ride.

A very ordinary exposition held in the same building, recently, packed it with an attendance of one hundred thousand, something which would be phenomenal anywhere else.

It is an ideal city for a National Flower Show—a city of house owners, with the home life paramount. Within its own limits it has a population of nearly 350,000 citizens, all of a prosperous class, due to the splendid industrial conditions enjoyed, with a high percentage of American born.

### TRADE EXHIBITS

The Trade Exhibits will be staged in TWO SECTIONS:

ON THE MAIN FLOOR, Manufacturer's Building, where the competitive section will be staged.—For exhibitors who sell direct to the public. Space Rate $1.50 per sq. ft., exclusive of equipment, signs, etc.

CONVENTION HALL BUILDING—Where all Trade meetings, American Rose Society's Convention and S. A. F. Directors' Meetings will be held and where other functions, social and otherwise, will take place.—Space Rate $1.00 per sq. ft., exclusive of equipment, signs, etc. **The trade exhibits in this hall will not be open to the public.**

Plans showing space locations in both halls will be sent to anyone interested on application to the Secretary—But why wait for the plans! Everybody will be well cared for. There is plenty of room, and advantages at Indianapolis such as never enjoyed at any previous National Flower Show.

Address all inquiries to the Secretary, 43 West 18th Street, New York. After February 23, the Secretary may be addressed in care of Claypool Hotel, Indianapolis.

JOHN YOUNG, Secretary.

43 West 18th Street, New York.

## NEW ENGLAND NURSERYMEN

### The Committees for the Next Year Are Announced

Committees for the next year have already been announced by the officers of the New England Nurserymen's Association. The list is as follows:

**Executive Committee,** The Officers and Leonard Ross, Taunton, Mass.; W. E. Campbell, New Haven, Conn.; C. H. Greaton, Providence, R. I.

**Legislative Committee,** George C. Thurlow, West Newbury, Mass.; James Brandley, Walpole, Mass.; Charles Adams, Springfield, Mass.

**Membership Committee,** F. S. Baker, Cheshire, Conn.; V. A. Vanicek, Jr., Newport, R. I.; C. W. Morey, Woonsocket, R. I.; A. P. Horne, Manchester, N. H.; H. W. Gottschalk, Manchester, Conn.

**John R. Barnes**
Treasurer

**Transportation Committee,** D. C. Stranger, West Newbury, Mass.; V. A. Vanicek, Newport, R. I.; Sheldon Robinson, Lexington, Mass.; Theo. F. Borst, Boston, Mass.; J. J. McManmon, Lowell, Mass.

**Publicity Committee,** Walter Adams, Springfield, Mass.; K. E. Gillette, Southwick, Mass.; W. C. Thurlow, West Newbury, Mass.; Stephen Hoyt, New Canaan, Conn. John R. Barnes, Yalesville, Conn.

**Educational Committee,** R. M. Wyman, Framingham, Mass.; Theo. F. Borst, Boston, Mass.; W. E. Campbell, New Haven, Conn.

**Vigilance Committee,** C. H. Greaton, Providence, R. I.; H. P. Kelsey, Salem, Mass.; F. S. Baker, Cheshire, Conn.

**Committee on U. S. Chamber of Horticulture,** H. P. Kelsey, Salem, Mass.; E. W. Breed, Clinton, Mass.; W. E. Campbell, New Haven, Conn.

**Committee on National Botanic Garden,** George Thurlow, West Newbury, Mass.; Sheldon Robinson, Lexington, Mass.; Christian Vander Voet, Jamaica Plain, Mass.

The officers are as follows:

President, Kenneth E. Gillette, Southwick, Mass.; Vice-president, James A. Tufts, Jr., Exeter, N. Y.; Secretary, Donald Wyman, North Abington, Mass.; Treasurer, John R. Barnes, Yalesville, Conn.

## NEWS NOTES

Mr. Lloyd Stark, of the Stark Bros. Nurseries, Louisiana, Mo., is booming Samuel Adams, editor of the American Fruit Grower, for ambassador to Germany. He has sent letters to many people in the trade asking them to support Mr. Adams for the appointment.

# The GLADIOLUS

"Who, oh who, will give us a really good white gladiolus, one which is prolific, which has straight, strong stalks and is firm enough to stand shipping?" That has been the cry, both in the trade and out, for a long time. Growers who cater particularly to the commercial trade have been trying very hard to get a satisfactory white.

One of the newest claimants and one which promises unusually well is White Wonder, which was introduced by the originator, Mr. J. A. Kemp, Little Silver, N. J., last year. Mr. Kemp is known far and wide as a gladiolus expert of unusual skill. Anything that comes from his hands is sure to be watched with interest.

White Wonder is a lineal descendant of the well known and justly popular Mrs. Francis King. Moreover, it seems to be endowed with all the good qualities of that variety. Its growth and habit is almost identical with King, but the flowers are pure white, without a trace of marking in the throats. They open widely, and often measure up to five and a half inches in diameter. They are particularly good for florists' use, as five or six are usually open at one time.

White Wonder has proved very prolific, and gives extra large bulblets, many of which grow into first size bulbs the second year. Apparently White Wonder forces as well as any gladiolus known. The accompanying illustration is the reproduction of a photograph made of a spike grown under glass. While its garden merits, therefore, are not to be overlooked, it is also to be reckoned with as a forcing variety.

---

J. L. Vondel, of Sharon, Mass., is pushing Beaconflame as a cut flower and forcing gladiolus. I do not remember of seeing the flower, and so cannot speak with authority as to its value. Yet I know that in 1917 it was awarded a certificate at Boston as a first-class commercial variety, but under another name. It was rechristened Flame, but as two other claimants to that title were found it was named again Beaconflame. This gladiolus was originated by Mr. Kunderd, and is a cross between Kunderd's Glory and War. The bloom is large, flame colored and slightly ruffled. It makes vigorous growth and is a rapid multiplier, with bulblets which are large.

## NEW GLADIOLUS PAPER

"The Gladiolus" is the name of a little paper which has just appeared and which is edited and published by Stanley Thorpe, well known gladiolus grower of Medway, Mass. Mr. Thorpe says in his introduction: "The Gladiolus will be issued from time to time, depending upon the demand of its readers. It is not issued as a competitive sheet, but with the idea of reaching as many growers of gladioli as possible, thereby increasing the popularity of that grand flower."

## GLADIOLUS NOTES

The following paragraphs from "The Gladiolus" may be helpful:

Gladioli that increase slowly can be made to yield more freely by cutting a ring around the corm between the eyes from top to bottom; the result will usually be two bulbs and more cormels; or the corms may be halved, leaving an eye and part of the root to each section. The cut parts should be rubbed in sulphur and not planted for a day or two. Almost any injury to the corm will result in an increase of cormels.

# POMPON CHRYSANTHEMUMS

A selection of varieties made after extensive trials, with a view of selecting the best for outdoor cultivation, for which purpose we recommend every variety offered.

Prices, except where otherwise noted: 85 cts. per doz.; $6.00 per 100; $55.00 per 1000

**A. Barham.** Early, aster-flowered bronze.
**Adironda.** Early, aster-flowered golden bronze.
**Anna L. Moran.** Midseason, large button, orange-scarlet, $2.00 per doz.; $15.00 per 100.
**Autumn Glow.** Aster-flowered, deep carmine-rose.
**Bright Eyes.** Late, miniature button white when fully open, while developing, the reverse of the inner petals show an orange apricot. $1.25 per doz.; $8.00 per 100.
**Captain R. H. Cook.** Early midseason, very large button, clear deep rose. $1.75 per doz.; $12.00 per 100.
**Cometo.** Aster-flowered, seedling of Lillian Doty, very free, of compact habit, dark rose shaded mauve.
**Comoleta.** Early, aster-flowered excellent yellow.
**Cranfordia.** Early midseason, large aster-flowered, deep golden yellow.
**Edina.** Early, aster-flowered, splendid rose-pink.
**Excelsior.** Early midseason, aster-flowered bright yellow.
**Fernridge.** Midseason, single, large bright red. $1.50 per doz.; $10.00 per 100.
**Frank Wilcox.** Late aster-flowered, splendid bronze. $1.50 per doz.; $10.00 per 100.
**Harrie.** Early, aster-flowered, rich yellow.
**Hilda Canning.** Midseason, medium sized button, light bronze
**Idolf.** Very early, aster-flowered, salmon-pink.
**Indian.** Aster-flowered, good sized Indian red.
**Iva.** Button shaped, handsome light bronze.
**Juliana.** Midseason, large yellow button.
**La Garonne.** Early, aster-flowered deep flesh rose.
**Lilian Doty.** Medium early ball shaped light rose.
**Little Dot.** Midseason, small deep bronze button.
**Marie Dupont.** Very early, dwarf, large white aster-flowered.
**Mimico.** Midseason, tall growing lavender-pink, seedling of Lilian Doty.
**Minta.** Midseason, small pink button.
**Miramar.** Midseason, bronze aster-flowered.
**Model of Perfection.** Midseason, small white button.
**Mrs. F. H. Bergen.** Midseason, fine pale-pink aster-flowered.
**Mrs. F. H. Vincent.** Late, good bronze aster. $1.25 per doz.; $8.00 per 100.
**Mrs. Nellie Kieris.** An improved Lilian Doty, better in both color and habit. $1.75 per doz.; $12.00 per 100.
**Nellie Blake.** Early, red orange aster-flowered. $1.75 per doz.; $12.00 per 100.
**Nio.** Midseason, pretty small pink button.
**October Gold.** Early, aster-flowered rich orange-yellow.
**Ouray.** Midseason, very bright reddish bronze large button.
**Romaine Warren.** Late, rich bronze.
**Soleil d'Or.** Midseason, rich orange aster-flowered.
**Tints of Gold.** Early, glorious golden-yellow aster. $1.50 per doz.; $10.00 per 100.
**Uvalda.** Early, a fine white aster-flowered.
**Viola.** Midseason, violet-rose medium sized button. $1.75 per doz.; $12.00 per 100.
**Wanda.** Midseason, a fine large white aster-flowered.
**White Doty.** Early, pure white ball-shaped flower.
**White Midget.** Late, miniature pure white button. $2.00 per doz.; $15.00 per 100.
**William Sobey.** Midseason, a fine yellow aster-flowered.
**Zella.** Early, fine aster-flowered yellow. $2.00 per doz.; $15.00 per 100.

**Price. Any of the above except where otherwise noted. 85 cts. per doz.; $6.00 per 100; $55.00 per 1000.**

**HENRY A. DREER** 714-716 CHESTNUT ST. PHILADELPHIA, PA.

THE ABOVE PRICES ARE INTENDED FOR THE TRADE ONLY

Commercial growers should never sell flowers at a loss or at a price that does not yield a fair return. This is sometimes done by growers near a large city when flowers are plentiful. It would be far better to send them to your neighbors' homes and don't forget the hospitals.

Better results are obtained if cormels are not planted until the second year, when they will germinate more readily and give a good crop. This is especially true of Norton, Mary Fennel, Peace and many other varieties.

## CONNECTICUT STATE NURSERYMEN

At the annual winter meeting of the Connecticut Nurserymen's Association, all the officers were re-elected as follows: President, Henry W. Gottschalk, Manchester; Vice-president, W. W. McCarthy, New Haven; secretary, Frank J. Rippin, Manchester; treasurer, W. W. Hunt, Hartford.

In an address on advertising suggestions to nurserymen, Mr. Ralph Bertini advised using small advertisements in the newspapers so that leads might be developed which could be followed up with letters.

## DAHLIA GROWERS ACTIVE

Commercial dahlia growers are learning the advantages of organization, and much activity is expected the coming season. The Wholesale Dahlia Growers' Association, which was organized in August, 1920, has as its purpose the advancement and protection of the industry of the country, and its secretary keeps on file information valuable to both growers and buyers. All men in the business who grow dahlias in wholesale quantities will find it advisable to keep in touch with him, and of course all commercial growers should be members of the association. Co-operation is necessary in order to get the best results for the trade as a whole. The president of the organization is Mr. J. K. Alexander, of East Bridgewater, Mass., and the vice-president is Mr. I. U. Underhill, of the Babylon Dahlia Gardens, Babylon, N. Y. Mr. N. A. Hallauer, of Ontario, N. Y., is secretary and treasurer, and the man from whom commercial growers can obtain any desired information in regard to the association.

# KEMP'S Prize Winning Gladioli

**PINK WONDER—WHITE WONDER—ALBANIA—EARLY SNOWFLAKE**
**Prize winners in every show in which they have been exhibited**

These wonderful Gladioli were introduced by the originator season of 1921, and almost instantly sprang into world-wide favor.

Orders for them have come from every section of this country, from many points in Canada, from Cuba, Europe and Australia. And requests for my catalogue have been received from nearly every country where the Gladiolus is grown.

My sales of these wonderful varieties, this season, up to the middle of February have been five times greater than the total volume of sales for the season of 1921. Am entirely sold out of 4th and 5th sizes of PINK WONDER and WHITE WONDER, but can still supply them in limited quantity in all other sizes and bulblets.

I venture to say, that never before has the volume of sales of any other varieties been as great, nor as widely distributed in so short a time after their introduction. The demand for them is steadily increasing, and promises to far exceed the supply during the next few years.

All four of these varieties are extra heavy producers of large growable bulblets, which insures their permanency as commercial and garden varieties. If "YOU" want the best there is in Glads. If "YOU" are looking for the big money makers, then you will want these. They are the best and most profitable BUY obtainable at the price. Second edition of my 1922 catalogue now ready, and is free for the asking.

**Says Sam—Salesmanship is the selling of goods that won't come back to people who will come back.**

**On the Road.** This is an editorial for traveling salesmen. Perhaps they will read it for the reason that one seldom sees an editorial printed for their particular benefit. They will wonder if anyone really understands their trials and perplexities. If they are Dutch bulb salesmen they probably will wonder if anybody can appreciate their feelings when they are told by a florist they have traveled half a day to see that three other bulb salesmen have already been turned down that very morning and that they might as well be on their way without stopping to unlimber their line of talk. It is a hard life. There are other salesmen on the road who get an audience at the start by saying as an introduction that they are not selling Dutch bulbs.

Whatever a salesman may be handling, however, he needs tact and diplomacy and good nature far above other men. The first thing that a man on the road must do, whether he sells any goods or not, is to win the confidence of his prospective customers. They may know his house and believe in his goods but he must make them believe in him personally if he is going to be a success. Good nature is a great asset. If the florist who sees you coming knows that you will be optimistic, encouraging—that you take life with a smile—he will welcome your approach. If he knows that you are a grouch or belong to the family of Fuller-Gloom, he will probably go out of the back door as you enter the front. He has troubles enough without hearing yours.

It does not pay to impose on the good nature of your customer. If he is a big hearted man, as many florists are, he may offer you all kinds of hospitality. Be slow to accept. He is not likely to be offended and may be relieved. Of course salesmen make personal friendships which nullify any such rule, but this is put forward as a general proposition.

There is a great temptation for men on the road to carry tales. Some good salesmen have yielded to it and damaged their reputations beyond repair. You may think that you are pleasing your customer by saying something derogatory about his competitor. You may tickle his vanity and thereby help to get an order, but after you are gone he will begin to wonder what you will say about him to the next man you visit.

There is one thing, though, that will greatly improve your chances, and that is a willingness to pass along ways and means of improving business or reducing expenses. The wise salesman will keep his eyes open for every opportunity to help his customers save money. He will try to find out the value of new devices and new preparations, in order that he may report intelligently and honestly upon them. This is a kind of service which wide-awake florists appreciate, knowing, as they do, that they can often get more accurate information from a reliable man on the road than in any other way.

The good salesman will play fair. It is not unlikely that he will be consulted about F. T. D. orders. Let him be square in advice. At the same time, he is not to be blamed if he throws all the orders he honestly can to the men who have given him their business. It sometimes happens that a florist is nasty to a salesman, without any reason for being so. That is poor business. The salesman, being human, will not forget it, and a nasty speech may cost the man who made it many dollars.

It has been prophesied that the printed page and the circular—the silent salesman of modern times—will eventually put the man on the road out of business. This is a mistake. The traveling salesman is a necessary equation. He will survive and thrive. Life in many a small town would be humdrum enough without his coming. The man on the road is here to stay. May his tribe increase.

**Notes by the Way.** Florists in New England will have a warm welcome for Mr. Naukam, the new secretary of the Florists' Alliance. He is a hustler and a good mixer, and his smile is enough to prove that there is nothing in a name, after all.

The National Flower Show, to be held at Indianapolis, has been monopolizing the center of the boards, but the trade must not overlook the International Show in New York, which antedates it. Everything points to a great show in the big city and a record breaking attendance may be looked for.

Increasing activity among the growers indicates that the announcement of lower prices for greenhouses and for glass has had its effect. There are plenty of men who have had their plans drawn for months. Now they are getting ready to have them materialize.

# NATIONAL FLOWER SHOW

## Indianapolis Florists Very Busy---Claude Wallin Director

Indianapolis florists and, for that matter, the florists of all Indiana, are working might and main for the success of the National Flower Show, which opens March 25. Mr. Erwin Bertermann, of Indianapolis, is chairman of the flower show committee, while Mr. Claude Wallin has been appointed Exposition Director. Headquarters have been opened in the Chamber of Commerce Building, and the committee has been assured of the support of the Indianapolis Chamber of Commerce. Mr. Bertermann is hoping to find some one who will give $2,500 for the benefit of the Indianapolis school children in order that they may have free admission to the exposition.

### NATIONAL SHOW EXHIBITORS

#### Pres. Pennock Urges Vigorous Work for the Great Indianapolis Event

In a letter dated Feb. 17, received this morning from Irwin Bertermann, Executive Chairman of the local National Flower Show interests in Indianapolis, he is very enthusiastic indeed about the forthcoming National Flower Show, and says that

"The whole city and state have swung to our assistance. I have as yet to find one person who will not commit himself to this end. The National Show is already a success, as stated above, provided the Florists themselves are loyal to their own institutions and to their own welfare."

This is certainly fine, and presages a successful show; and quoting still further from Mr. Bertermann's letter: "The success of the Indianapolis Show is practically assured, so far as attendance is concerned." This has bothered us in other shows, wondering whether the attendance would be big enough to make the show a financial success. With this an assured fact, the thing now is for each and every florist in every part of the United States and Canada to hold their end up as to exhibits; and with exhibits, whether they be large or small, from every grower who has the business and the National Flower Show at heart, we are sure to have one of the most wonderful and successful shows ever staged in this country; so I am appealing to every member of the trade to exhibit, and as I said above, even if it is small, we want the small exhibitor as well as the large.

S. S. PENNOCK.

Philadelphia, Feb. 20, 1922.

To The Trade—

Thos. F. Galvin, himself, will give your orders his personal attention at his son's store.

**HYBRIDS**
Laelia-Cattleyas, Brasso-Cattleyas, etc.
**G. E. BALDWIN & CO.**
Mamaroneck, N. Y.

# THE WORLD'S BEST CANNAS

**THE BEST VARIETIES FROM ALL SOURCES, FOREIGN AND AMERICAN INTRODUCTIONS**

The best quality of roots, both as to vitality and size of divisions. **Every order filled with fresh cut roots which must not be confused with roots cut, packed and stored months before delivered to you.** They cost a trifle more but are worth considerably more. Every 100 roots we supply will, with reasonable treatment, produce 200 or more pot plants.

The subjoined list contains the names of free, large flowering, vigorous growers, any of which will please you and your customers. Order now and say when you want them shipped to you.

**Price $5.00 per 100, $40.00 per 1,000; except where otherwise noted.**

**BEACON**—Free flowering dwarf, bright red.

**CHEERFULNESS.** — Beautiful variegated orange and scarlet with golden border. The florets are medium sized, but very freely produced.

**CITY OF PORTLAND.**—A wonderfully attractive rose-pink. Excellent upright habit and free flowering. $15.00 per 100, $125.00 per 1000.

**DR. E. ACKERKNECHT.**—The bronze foliage blends pleasingly with the carmine rose trusses. Vigorous and free.

**DUKE OF MARLBORO.**—An old favorite with deep crimson flowers.

**EUREKA.**—The best white Canna. A very strong grower blooming freely. The flowers are large and become pure white in the full sun. $8.00 per 100, $75.00 per 1000.

**FANAL.**—Exceedingly free flowering, deep bright red. A most effective bedder.

**FEUERMEER.**—Another excellent old sort with a profusion of dazzling orange-scarlet flowers.

**GAIETY.**—Wonderfully effective. Deep orange suffused with scarlet and bordered with yellow. A brilliant bedder.

**GOLDEN GATE.**—Vigorous and free. A unique combination of yellow and golden shades, blending into rose as the flower matures. $6.00 per 100, $50.00 per 1000.

**KING HUMBERT.**—The most popular Canna of this generation. The large orange-scarlet flowers and particularly the very deep bronze foliage make it one of the most useful.

**LOUIS REVERCHON.**—The flowers are brighter and more freely produced than on King Humbert, while the foliage is a greenish bronze.

**MRS. ALFRED CONARD.**—Magnificent trusses of large salmon-pink flowers. Unique and very ornamental. The stock of this variety is very scarce. We have a limited quantity and advise early ordering. $15.00 per 100.

**MRS. KARL KELSEY.**—A tall, majestic, vigorous grower surmounted by great trusses of large orchid type flowers. Orange-scarlet, streaked and mottled with rose.

**RICHARD WALLACE.**—A well known pure yellow.

**THE GEM.**—A seedling of Hungaria, more vigorous, with a profusion of large cream-colored flowers dotted with carmine. Very unusual and attractive. $7.00 per 100, $60.00 per 1000.

**THE PRESIDENT.**—The greatest red Canna in commerce. Very heavy, vigorous growths surmounted by great trusses of immense florets of bright scarlet. We heartily endorse this as the greatest Canna introduction of recent years. $8.00 per 100, $75.00 per 1000.

**WYOMING.**—We know of no other Canna as effective as this for large plantings. A giant in growth. Extremely vigorous with its deep bronze foliage as an ideal background for large bright orange-colored flowers of the orchid type. It makes an ideal subject.

**YELLOW KING HUMBERT.**—A sport from King Humbert to which it occasionally reverts. Green foliage with yellow flowers, dotted with scarlet. $8.00 per 100, $75.00 per 1000.

We have good stocks of many other varieties, prices on which will be quoted on application. Order now for delivery in February and March.

**THESE PRICES ARE INTENDED FOR THE TRADE ONLY**

# SNAPDRAGON RUST

## Its Prevention and Control---A Very Valuable Bulletin

Rust is the most serious disease with which snapdragon growers have to contend. The cause of this trouble, how to prevent it and how to cure it are treated at length in a very valuable bulletin just issued by the Agricultural Experiment Station at Amherst, Mass., and written by William L. Doran. Every grower of antirrhinums should get a copy. Some of the advice given is particularly timely at this season as, for example, the following:

"Many growers take their cuttings at a time when snapdragon rust is at its height in the greenhouse, which is in March, April and May. There are various opinions as to the relative merits of raising plants from seeds and from cuttings, but plants raised from cuttings come true to color, and in the effort to preserve a good variety some growers take rust-free cuttings from a bench showing rust, or they take cuttings bearing spore pustules. Some growers have thought that if the cuttings show no spore pustules they are safe to use, even though they come from a bench of infected plants.

"The writer propagated plants by cuttings which bore uredinia and by cuttings which bore no uredinia, although taken from an infected bench. After three weeks all of the cuttings which bore uredinia were badly rusted, and 35 per cent of the cuttings which when made were apparently free from disease, although taken from an infected bench, showed the disease. It is evident, then, that cuttings bearing spore pustules may be expected to develop into rusted plants, and that cuttings free from spore pustules, if taken from a bench of infected plants, serve to aid very materially in the dissemination of the fungus. Microscopic examination of the leaf surfaces of these apparently healthy cuttings revealed numerous urediniospores which had fallen there or had been carried there from diseased plants. These spores need only the favorable environment of the cutting bench to cause them to germinate and infect the young plants, and it is therefore usually inadvisable to take cuttings from a house showing rust.

The benefit of HAIL INSURANCE was forcibly illustrated by a number of violent hail storms in New England last year.

Be wise and send to **John G. Esler, Sec'y of Florists' Hail Association, Saddle River, N. J.**, for Hail Insurance literature.

**DO IT NOW.**

Both Peltier (loc. cit.) and Stone (1917) consider cuttings as being among the principal means of dissemination.

"Proof of the importance of greenhouse insects in the spread of snapdragon rust is not lacking. Three insects often found on snapdragon are the white fly (Aleyrodes vaporariorum West), the red spider (Tetranychus bimaculatus Harvey) and the common aphid (Aphis gossypii). With a binocular microscope the writer examined these insects on snapdragon foliage. They were on healthy plants, but there were rusted plants in the same bench. On the bodies of most of the insects examined were the urediniospores of P. Antirrhini.

"The third agency by which the fungus is disseminated is watering. Carnation growers in watering make an effort not to wet the foliage any more than is necessary, usually employing a stiff piece of hose or pipe which enables them to get water into the middle of the bench without wetting the plants above. To this simple practice is due in part the decline in importance of carnation rust.

### CHARLES H. BRECK RESIGNS

**Retires from Joseph Breck & Sons After 54 Years of Service**

Charles H. Breck has resigned as president and director of the Joseph Breck & Sons Corporation, of Boston. He has transferred his interest in the business to his son, Luther A. Breck, and his son-in-law, John Benbow, who, together with his brother, Joseph F. Breck, who is treasurer of the corporation, will continue the business as usual.

The house was founded in 1822 (the year Boston became a city) and has been continued without interruption ever since. With the advent of Messrs. Luther A. Breck as president, and John Benbow as vice-president, the fourth generation of the Breck family succeeds in the management of the business.

Charles H. Breck, a student of the Massachusetts Institute of Technology, entered the store in 1868; became a partner with his grandfather, Joseph Breck, and his father, Charles H. B. Breck, in 1875, and succeeded the latter as president in 1900.

The house has seen some wonderful changes during its one hundred years in the kinds, quality and sources of supply of seeds, plants, and nursery stock, while invention and improvement of the implements and machines with which they are planted, cultivated and harvested have made possible the enormous crops now necessary for the world's requirements.

## George Watson's Corner

"You in your small corner and me in mine."

P. Joseph Lynch, president of the Dingee & Conard Co., writes from Indianapolis, February 14th:

"I was very pleased to read the various tributes to Dr. Van Fleet in your issue of Feb. 10th. He was quite a wonderful man in his way, and gave us many fine roses. The best of them all, I think, is the American Pillar. He also gave us the first really good red canna, the Flamingo, when he worked for our company at West Grove, Pa., many years ago. Personally, a quiet, modest, unassuming man, whom everybody liked. And a fine player on the flute."

Mr. Lynch has been laid up with a bad attack of the grippe for a couple of weeks; but is back again at his desk, and attending officially to the important affairs of the great State of Indiana.

---

That Boston Alliance sounds good, away down here on the banks of the Green Delaware. The Boston growers are smart as they make them; but there always comes a time when they get too smart. Then they split up into camps. Then the retailers get the best of it. After a few years of fighting—with the retailers on top—the growers finally come down to earth, and get together again. They make the Boston Alliance. A combination of growers and retailers (all wholesalers cut out) and they have the ideal pact that will suit everybody. We congratulate the Boston Alliance, and trust it will work out to their entire satisfaction.

---

The Philadelphia boys had the same idea. So they formed a company and ran a flower market. Just like the Boston growers. Worked fine for a while. Then it blew up; and the reasons were largely the same as in Boston. When all is said and done, the best way for the grower to market his product is through a reliable commission house. But be sure that you select a reliable concern. And when found, stay put. If you keep chasing around from pillar to post you will never get results. The commission man stands by his standbys first. The fly-by-nights take their turn. Be a standby and you will be pretty sure to get the best showing in the long run. One of our Philadelphia commission houses has this legend on top of

*When writing to advertisers kindly mention HORTICULTURE*

its weekly market offering:—"This weekly offering is not merely a vehicle to advance the interests of the Company. It is a great medium of exchange between grower and retailer—benefiting both."

This sentiment should be well considered by all, for there's truth in it. There's overhead expenses in any form of marketing. So there's no use trying to dodge. The commission man is the best form of all—if he's a good one. As Aristotle said about the different forms of government:—

"That form of government is best which is best administered."

---

The legislators of Washington, when they are considering reductions in freight rates for the farmers to help them out of their sad plight of low prices on things they have produced, should not stop at buckwheat seed, alfalfa seed, and things like that. They ought to make the reduced freight on seeds of all kinds, and be done with it. For the farmer always pays the freight. The seller of seeds may say he pays the freight. If he does he adds it to the price somewhere. The only reason the seed sellers are anxious for lower rates is to help the farmer. If the freight rates are too high when sowing time comes around the farmer lets his acres stand idle and orders no seeds. Of course, that's where the seed seller gets hurt. He loses business he would otherwise get if freight rates were lower. Consequently it stands to reason that the seed seller is with the farmer in this matter, first, last and all the time.

---

Now that we are committed to the Sesqui-Centennial celebration it is a wise thing to back it both individually and collectively. The cost of membership in the Society having the matter in charge is only a ten-spot. Be in the running and remit to the secretary, Edward Robins, of the Bellevue-Stratford. No firms. Individuals only. Make checks payable to Sesquicentennial Association.

# The Little Things That Count Big In Owning Your Own Greenhouse

Ever gone into a hat store knowing exactly the kind and shaped hat you want; and then have some smart Alec of a salesman try to sell you the kind HE liked.

Makes a fellow madder than a wet hen, doesn't it?

Suppose, however, that same salesman had told you something about some of his hats that meant better service to you, more satisfaction for your money—you then sort of feel towards the salesman as you would toward an old friend.

Salesman number two is our sort when it comes to selling a greenhouse.
We do sell greenhouses, but we first sell satisfaction.
Furthermore, it's said we have a reputation for pleasant dealing.
You know we go anywhere for business, or to talk business.

## FLOWER SHOW SPECIAL

Here is a full Iron Frame House of our Number Two Construction, that, in four widths up to 40 feet, costs no more than a Semi-Iron House.

# To The Florists of New England
# Build Now

The Convention held at Hartford, Conn., during the week of January 23rd, was most successful.

Everyone had a good time and much good was accomplished. Rose and carnation growers from all parts of the country attended. What was most noticeable was the optimistic tone as to the business outlook.

Lord & Burnham Company believes that business is now on the upward trend.

The orders placed with us during January exceed the combined orders of January and February of 1921, both in number and in value.

What we want to impress on you is that now looks like the time for you florists to build. Materials are low and we have reduced our prices materially. Build now before business gets into full swing. When it does, prices are bound to go up.

We have built hundreds of greenhouses throughout New England and have hundreds of satisfied customers.
We maintain a Boston Office which is equipped to render prompt and practical service.

Get figures and facts and you will be surprised how cheaply you can buy a Lord & Burnham Steel Frame Greenhouse.

Vol. XXXV MARCH 10, 1922 No. 5

## THE TALK OF THE TRADE

I was much interested in some of the matters brought up at the last meeting of the Gardeners' and Florists' Club of Boston in regard to plant propagation and it has been my good fortune to listen during the last month to quite a few discussions and arguments by some of our best carnation growers on the very subjects that were brought out at this meeting. For instance, Mr. Patten's remarks on rooting Pink Delight.

It is a fact that the best of the growers have always found this sort a treacherous one to work with. As Mr. Patten said, one batch may come out fine and there seems to be every reason why the next should do equally as well, but the results may be disappointing. The points that come to my mind which were brought out by the different growers as most valuable in rooting this variety are selection of cuttings and temperature in the sand and in the house. Small cuttings do not seem to strike well. Good sized, plump ones will give the best results; and it seems to be a fact that more heat in the sand is necessary; and it will not stand the same amount of sunshine that most sorts will. It naturally follows that this treatment will give a cutting somewhat softer than under cooler rooting conditions, and that means that Pink Delight must be hardened off carefully before taking from the sand, and then when put into the soil it will take more careful watching or it will wilt down and be a long while in recovering.

To my mind the most important point to watch in the raising of carnations is stem rot, and similar troubles. The past year has been particularly troublesome in this respect. I am firmly convinced that the grower who starts his fight against stem rot and disease in general by looking ahead from the very beginning when he takes the cuttings is the one who meets with the best results. Weak plants can't produce good stock. The conditions in the propagating bed must be carefully watched and it is generally believed that cuttings left in the sand too long and rooted soft will be unhealthy stock right through the season. There is a greater tendency to disease on that stock than where they are rooted with full light and air possible, and not too much bottom heat.

The majority of growers prefer to firm the sand thoroughly in the propagating bed, but a few like the idea of simply leveling the sand well, giving it a good watering and doing away with the pounding altogether. From what I have been able to see and hear, I think the stock taken out of sand that has been thoroughly firmed gives better results, particularly where the cuttings must be shipped. The points Mr. Patten brought out about the taking of cuttings seems to follow well along with the average successful grower. Don't trim tops too severely; use stem cuttings from not too high up on the stem, and avoid the tops and shoots from the bottom of the plant.

Mr. W. D. Howard's remarks on diseases of carnations are particularly important, and I am sure will be read with interest by every carnation man on account of last season and the extreme troubles in the field. The finest fields of carnations to be seen are practically without exception those fields where the cultivator is kept going constantly. The drier the season the more it should be used. But it also follows that a very wet season demands the use of the cultivator as much as is possible. Of course it cannot be worked when it's muddy.

I have found few growers who believe in using the hose for both watering and syringing, but I never yet have found where it didn't seem to me that more harm than good was the result. And I do know that quite a few growers who have gone to considerable trouble and expense to equip that way have discarded the use of water in the field.

I think that very few carnation men had any idea of the number of varie-

New Type of Signboard Being Used in Buffalo

ties that have been introduced, as shown in Mr. Goddard's list, and a lot of the younger growers know of many of these sorts only through having heard the name, and had no idea of their value or even their color.

I hope Mr. Goddard won't mind my suggesting that White Perfection seems to me to deserve a place in his list of varieties of "outstanding merit" taken from his period of 1900-1910. White Perfection is still grown, with very good results, in quite a number of establishments.

Mr. Goddard brought out a good point when he called attention to calling carnations "pinks." It should be discouraged in every way possible.

---

Mr. Harold J. Patten, of Tewksbury, calls my attention to a slight error in my comments on the carnation convention at Hartford. It is true, as stated, that most of Mr. Patten's carnations were lost as a result of freezing, only 212 out of the 750 taken to Hartford being suitable for staging. Nevertheless, the vase of 100 Thomas C. Joys which won first prize in the 100-white class was grown and staged by Patten & Co. They did not come from Nashville, although the Joy Floral Co. did stage both Joy and Natalie in separate classes. Mr. Patten, who is nothing if not truthful, wishes it stated that because of the damage which his flowers suffered he could find only ninety that were presentable, the Springfield Floral Co. furnishing the ten blooms necessary to complete the century number.

---

The fact that two very prominent concerns, one the Henry F. Michell Co., of Philadelphia, have taken over the No. 1 proved stock of Pommert's Purity, is enough to indicate the belief of the trade that this gladiolus has a great future before it. As shown in Philadelphia and Washington last August, it won many very favorable comments. Some people seem to have an idea that a white gladiolus cannot be healthy, but this belief has been exploded. Mr. Charles Pommert, of Amelia, Ohio, who introduced Purity, says that in the three acres of the variety growing at his farm last season, not a single diseased plant was found, although the season was unfavorable and some other white varieties were badly affected.

Purity, when shown at the St. Thomas convention of the Gladiolus Society last year, was not at its best, owing to the lateness of the show and the unusually dry, hot summer. Still, it gave a very good account of itself, even at that.

There is no doubt of the fact that the florists are eagerly awaiting a white gladiolus that will fully meet their needs. It is an interesting report that in Cincinnati last season many of the florists used Purity as a substitute for lilies, without having their customers find any fault. This ought to be a pretty good test of any variety.

---

The variety of sweet pea "Mrs. Kerr" has been found to be a dandy fine commercial sort. That lively salmon color takes well. The flowers are large, borne on good stems, carrying when properly grown three or more flowers to the stem. I think it's a wonderful variety, and predict that it is going to be grown largely in the next few years.

---

Much interest is being shown in the new sign board designs being used in and around Buffalo. Some time ago the florists of Western New York decided to elaborate the "Say It with Flowers" slogan so as to link it up more fully with their publicity work. Accordingly, they repainted the boards which had been purchased from the national committee, using a very artistic combination of colors, and supplemented the slogan with additional lines, like "They Succeed Where Others Fail," and the one used in the accompanying illustration. The basket of flowers is done in natural colors. In several instances shrubbery and flowers have been planted around the boards. Green or white lattice work is also being employed in several instances. The boards are paid for by the Western New York Society Publicity Fund and 25 of them have been erected in prominent locations.

## GRAY SUCCEEDS VICK

### Boston Gets Annual Sweet Pea Convention

President Sperling of the American Sweet Pea Society has appointed William Gray to the vacancy caused by the resignation of E. C. Vick, who felt compelled to give up the secretaryship owing to pressure of business. Mr. Gray was formerly secretary for several years and is well known as a good grower as well as a good secretary.

The invitation of the Massachusetts Horticultural Society to hold the Fourteenth Annual Exhibition and Convention in Horticultural Hall, Boston, has been accepted and the Exhibition will be held in conjunction with the combined Rose and Sweet Pea Show of the Massachusetts Horticultural Society on June 24th and 25th.

## MARKET CONSOLIDATION

### New Building Probably Will Be Erected in Back Bay, Boston

Preparations for consolidating the flower markets of Boston are going forward rapidly. There seems to be no doubt but that the two markets will come together the first of January. Probably the Flower Exchange will buy out the Co-operative, as the simplest way to carry the project through. Everything points to the erection of a new building for the florists in Back Bay, several sites around Park Square having been considered.

## BOSTON NOTES

Mr. Sidney Hoffman has found a new way of advertising. He is distributing packages of dainty after-dinner mints, with his name printed on the back of the wrapper. The mints proved very popular at the recent banquet of the newly formed alliance when Mr. Hoffman distributed them with a liberal hand.

Newman, the Tremont street florist, and one of the city's old-timers in the trade, suffered a small loss by fire recently, but his business has not been greatly interfered with.

Mr. Charles E. Evans, the well known florist of Watertown, Mass., has the sympathy of his many friends in the loss of his wife, who died recently very suddenly.

## ALLIED FLORISTS OF NEW YORK

The Allied Florists' Association, of New York, is continuing very active, and a big drive is being made on subscriptions. Mr. Traendly, the wholesaler of 26th Street, was the first to send in a perfect score. Mr. Bagley, of 18th Street Market, reports 75 per cent of his list pledged to carry out their last year's subscriptions through 1922. Mr. Rigby, of 28th Street, although just back from a short trip, has 40 per cent pledged. Mr. Schloss has 85 per cent from the supply houses. The retailers in general are very enthusiastic about co-operative advertising. As to their financial pledges they are but waiting to use the most practical method that the coming mass meeting brings.

---

Mr. A. M. Henshaw, president of the Allied Florists' Association of New York, is expected back from England in the near future.

# SIGNING UP

## Almost a Hundred Names on the New England Florists' Alliance List.

With the new secretary of the recently formed New England Florists' Alliance, Eugene M. Naukam, installed in his office at 77 Summer Street, encouraging progress is being made. Secretary Naukam is getting about in the trade and making friends wherever he goes.

The new office itself will make an excellent headquarters for the florists of New England. Secretary Naukam says that they will be welcome there at any time, and can make appointments as far ahead as they like. Mr. Naukam himself has to be out in the field much of the time, but the office will be open all day. The location is very easy to remember, as it is Room 77, on the seventh floor of No. 77 Summer street.

Within a short time another get-together banquet is to be held, at which all branches of the trade will be represented. The number of florists who have signed up has reached almost a hundred. The complete list at this writing is given below. The initial letters show the branch of the trade with which the members are connected, as follows:

| | |

Jack Clebrick, who recently opened a flower store at Lynn, Mass., reports excellent business. His brother Israel and his father are working with him to make the venture a success.

## NEW ENGLANDERS AT THE INDIANAPOLIS SHOW.

New England is to be well represented at the National Flower Show in Indianapolis. Thomas Roland, of Nahant, who has probably the finest collection of acacias in New England, will make a large display. A. N. Pierson, Inc., will enter a car load of stock, including flowering plants and blooming roses. The Piersons will also have an exhibit in the One Thousand Cut Roses class.

Among the other New Englanders who will exhibit are several leading carnation growers, including Samuel J. Goddard and W. R. Nicholson, of Framingham; M. A. Patten, of Tewksbury; William Sims, of Cliftondale; W. D. Howard, of Milford; and C. A. Strout, of Biddeford.

## WATSON ON MR. BRECK'S RETIREMENT

Philadelphia, March 4, 1922.

Gentlemen:—I was very much interested in seeing the account in your issue of Feb. 25th of the retirement of Charles H. Breck of Boston after a half-century of faithful service. My early sojourn with his great house in Boston—the four years from 1884 to 1888—gave me my first grounding in American horticulture, to add to my younger experience of eight years in the seed trade of the old world. I can well remember how prompt Mr. Breck was to take advantage of new suggestions and, among many other things, how his firm was the first to introduce the new Eckford sweet peas in the United States. A few years later Wallie Burpee got wise on the same subject, and he often told the writer afterward that he first got his enthusiasm from the Breck publications. Now the house of Burpee, with its George Kerr and other enthusiasts, pretty nearly leads the world on sweet peas.

GEORGE WATSON.

## FARQUHAR COMPANY OFFICERS

The R. & J. Farquhar Co., of Boston, which occupies a prominent place in the seed and nursery trade, has elected a new set of officers as follows: President, Alexander P. Dewar; Vice-president and secretary, George Cruikshank; Treasurer, Victor E. Nelson. All these gentlemen were connected with the firm under the management of the late John K. M. L. Farquhar, and are thoroughly familiar with all its details. They report a very good business so far this season, with a most favorable outlook.

# FLOWER SHOW ARRANGEMENTS

## FIFTH NATIONAL FLOWER SHOW

The work of preparation for the Fifth National Flower Show, to open in Indianapolis on March 25, next, is remarkably well advanced. The local committees are well organized and, owing to the emergency nature of most details, there are committees covering every phase of the exhibition.

Some of the larger exhibits promised for Cleveland will be staged at Indianapolis along the lines originally planned, among them the following: Bulb Garden, by the Wayside Gardens, West Mentor, O.; Bulb Garden, by Walter E. Cook, Cleveland, O.; Rose Garden, by Merkel & Sons, Mentor, O., and a Rose Garden by the Daisy Hill Farm, Chagrin Falls, O.

Another large garden will be one the State Florists' Association of Indiana will stage.

The space taken in the trade section by the A. L. Randall Co., of Chicago, approximates almost one thousand square feet and, as previously noted, will be used for the staging of an up-to-date flower shop, containing the latest ideals in the way of auxiliaries and fixtures. The Lord & Burnham Co., Chicago and New York, also are among those who have taken large spaces, their reservation covering one thousand square feet, in which they will stage a most comprehensive exhibit covering greenhouse construction and equipment.

A rate of one fare and one-half for members of the S. A. F. and O. H., and affiliated organizations, attending the adjourned meeting of the Society in Indianapolis, in connection with which the Fifth National Flower Show is held, has been granted by the Central Passenger Association, and the Trunk Line Association, and the arrangement will be concurred in by the other passenger associations. The rebate is conditional upon 350 making the trip, including members and dependent members of their families.

## EXHIBITORS AT INDIANAPOLIS

It is announced that A. L. Miller, of Jamaica, N. Y., past president of the S. A. F., will have a fine exhibit of flowering plants at the Indianapolis Show. Mr. Miller may always be depended upon in an emergency like this.

Henry A. Dreer, Inc., of Philadelphia, and W. K. Harris, of the same city, are to have a car of palms and specimen ferns. F. R. Pierson, of Tarrytown, N. Y., who has one of the finest collections of fancy ferns in existence, will send a car load of them to the show.

**Erwin Bertermann**
Chairman of Indianapolis Flower Show Committee

**Claude Wallin**
Exposition Director

***A HEARTY WELCOME AWAITS YOU***

Do you remember—
The good old days when New Year's Calling was the thing?
Do you remember—
The open house and the warm welcome as you crossed the threshold?
Those days are gone, but the genuine spirit remains, and

***A. L. MILLER***

invokes it at Jamaica during the week of the New York Flower Show, March 13 to 19.

Among the rose growers who will have large displays are John H. Dunlop, of Toledo, Canada, and E. G. Hill and Joseph H. Hill, of Richmond, Indiana. W. A. Manda, of South Orange, N. J., will have one of the most interesting exhibits at the show, including rare horticultural novelties. Mr. Manda, as is well known, has one of the best horticultural collections in the country, and it is good news indeed that he is to have a part in the Indianapolis exhibit.

One interesting feature of the show will be an aquarium in which will be a collection of alligators from H. Wiegand & Sons, of Indianapolis.

Plans are being made for a Chicago Day, a Cleveland Day, an Indiana Day and a Chamber of Commerce Day.

## THE NEW YORK SHOW

### Everything Ready for the Greatest Exhibition Ever Held in the Big City

Arrangements for the Ninth International Flower Show at New York are completed. The Show will outshine all its predecessors, both in quality and magnitude of exhibits.

Innovations are plentiful this year. Realizing that the public is always interested in anything showing possibilities for a more extended use of flowers, the Flower Show Committee spared no effort to create interest. A feature to be inaugurated this year will be found in altar and pulpit decorations. Liberal space has been apportioned to an exhibit demonstrating floral decorations in churches, confined, of course, to the altar and pulpit. Clergy of all denominations have for a number of years regretted the absence of flowers in the services of their different churches and it might be said that the suggestion for this form of exhibit came directly from pastors. The decorations will be carried out by florists, different decorations for each day of the Show. The auxiliaries for the different settings will be somewhat standard in character, but the series of exhibits will be wholly undenominational in character.

Another feature is a duplicate representation of the wedding bouquet of Princess Mary, used at her nuptials in Westminster Abbey, London, on February 28.

# HOW TO HANDLE PEONIES

When Memorial Day, May 30th, arrives, the peony does more for the honor of the day than any other flower. The call for peonies on Memorial Day grows louder and louder each passing year, and it holds its own with the flower loving public in June and July, and thanks to our fellow member, Mr. George Klehm, of Arlington Heights, Ill., who discovered and inaugurated the cold storage system for peony buds some twenty-five years ago, the peony season was extended another month or well along into August.

When the buds show color and begin to soften the cutting must begin, leaving two or three leaves on the stem to preserve the vigor of the plant. As fast as cut the buds should go to the packing room or basement, which should be as cool as possible, in bunches of thirteen each, placed in wood or paper boxes weighing not over eighty pounds each when packed and shipped by express or parcel post at once. If the buds reach their destination in thirty to forty-eight hours they ought to be in good condition, depending on the buyer's treatment to continue the opening process. I have shipped them to Massachusetts with no loss, Festivia Maxima at that, which variety is just a little hard to handle.

Last, but not least, what is the price you realize for the crop? The three acres I cut last year, not all of which were in full bearing, yielded approximately thirty thousand buds that were shipped into fifteen states and realized from $900 to $1,000. The fields were from three to five years old and contained in round numbers 14,000 plants. The increase in plants, counting only one plant or extra division, would add a yield of 14,000 to the yield of the season, and figuring the lowest value of 15 cents per plant means an additional asset of $2,100. All this happened on land that would grow a good crop of corn, potatoes or cabbage. A heavy dressing of barnyard manure, twenty-five to thirty tons per acre, was added six months before planting, no fertilizers used after planting. Heavy manuring would increase the crop of buds, but induce overgrowth and also encourage scab, root-rot and decay, as well as peony leaf and bud blight.

As we can no longer look to Holland and France, with the exception of special varieties by special permit, I procured all my planting stock prior to Quarantine 37 from those countries. It's up to me now to grow my own planting stock, or pay double or treble prices for plants that are not nearly as good as those grown in Holland or France.

Just one word about the new and high-priced varieties: You will ask me, why do you pay from $1.00, $5.00 to $15.00 per plant for new varieties when you have placed a valuation of 15 cents each on your own plants. If we want anything better, some one must work and strive for an improvement. Dame Nature is reluctant when it comes to permitting improvements, and he who delves in and works with the forces of nature and uncovers a gem should have a fair price for his efforts. We all know fairly well what Mr. Burbank has accomplished, but only a very few, if any, of us know the amount of hard work doing the same thing over and over again sometimes for years and years before a real jewel is wrung from the laboratories of nature. What is true of Mr. Burbank is also true of the twenty to twenty-five men who have worked long, hard and faithfully for the past century, developing the peony. While thousands of florists have profited by their productions filling the hands of millions with flowers and delighting the hearts of all.

L. F. Dintelmann at Illinois Nurserymen's Convention.

# GLADIOLUS

## POMMERT'S PURITY

### Offered This Season for the First Time

All the No. 1 proved stock of this splendid gladiolus has been taken up by the J. M. McCullough's Sons Co., of Cincinnati, Ohio, and the Henry F. Michell Co., of Philadelphia, Pa., who can now supply the bulbs and to whom you should write for prices.

We still have a few thousand No. 1 bulbs of Purity containing in mixture about fifteen per cent of our improved America. We are offering these bulbs at $10.00 per hundred.

The description of Purity is as follows: Pure white, as large as America and blooming at the same time. In vigor and productiveness it is unsurpassed by any variety of any color. Moreover, it is the best shipper and the best keeper of any gladiolus with which we are acquainted. In other words, it is a real florists' flower. Cincinnati florists have been using this variety to take the place of lilies for the past two seasons, which gives an idea of the manner in which it appeals to the trade. Without doubt it will become just as popular among the florists in other cities, and with good reason.

Pommert's Purity was given the highest award by the judges at the recent convention in Washington, D. C. Blooms that had been cut a full week and which had been exhibited at the convention hall for three days were still good enough to be used as a gift to the president of the United States by the ladies of the Society, at the Chief Executive's reception. It would be hard to find better proof of Purity's staying qualities.

## GLEN MARY FISH FARM

### AMELIA, OHIO

**JOHN POMMERT, Manager**

P. S. This new variety was exhibited in Philadelphia and was reviewed in the "Watson's Corner," page 58, of the August 10 number of Horticulture. As there stated, there are many fine whites, but Purity not only has all the good points of the others, but is more prolific in addition, and it is the dollar per square foot that tells the final tale from the florists' standpoint.

**SAYS SAM: The fellow who makes good has got to keep his mind and his body moving at the same time, and in the same direction.**

**Flower Shows.** There are many people in the trade who as yet do not realize the value of flower shows as business promotors. If they did, they would be more enthusiastic and would give these shows greater support. These remarks do not refer by any means to the big shows exclusively. They apply as well to the small exhibits, hundreds of which are held at different times all over the country. All too often florists are not represented either by exhibits or personally. We believe that this is a mistake, and that every flower show, no matter what its nature, should have the united support of the commercial florists.

A writer in the Horticultural Trade Journal makes several pertinent observations in this connection when he points out that the interest aroused by such shows is certain to be reflected by greater prosperity to the trade. When this writer goes further, however, and argues that various extraneous features should be added to flower shows for the sake of attracting a larger attendance, we do not feel that we can follow him. He believes that instead of more liberal prize money there should be a greater variety of entertainment. This sort of thing may serve its purpose across the water, but in this country we believe the flower shows should have only one purpose, and that is to serve the interests of the man and the woman who is interested in gardens and garden making, or in the growing of flowers under glass. Attractions of a foreign nature are to frowned upon, even though they might help to increase the attendance. There is no knowing where such a tendency might lead. We can even imagine that, in the end, the space between the exhibitors' tables might be used for dancing to the measures of a jazz band.

**Worth Pondering.** A man who serves the florist trade has made several statements which are worthy of elaboration. Let us take them in their order. He is discussing trade organizations and the duties of those employed in different positions. He says:

"No secretary worth his salt cares how much the members write to him."

That statement is true and suggests the great importance of obtaining a secretary of ability, tact and friendliness for every organization which sets out to accomplish a definite undertaking. To a large extent the secretary can make or ruin an enterprise of this kind. The right kind of man is to be prized highly and paid accordingly.

The second statement is:

"The federation spirit is not an inherent quality in most men. It can only be developed by service."

The truth of that statement is apparent to every man who has had anything to do with the development of organizations for the benefit and advancement of the florist business. It is the nature of most men to keep their business affairs to themselves. If they have been brought up in the old school of business, where cut-throat methods prevailed, and where every man's hand was against his neighbor, he is likely to regard suspiciously any effort to link up his commercial fortunes with those of his fellows in the trade. It is only when he has learned by observation and reflection that the old ideas have been shed like a reptile's skin by every present day organization which has taken a long step forward that he becomes ready and willing to assist in a co-operative movement. It is the federation spirit above everything else which must be fostered in the florist trade today.

Then there is the final statement as follows:

"There are still growers who throw their money to their trade organizations as they would a bone to a dog."

This is the truth expressed more baldly than is usually the case. While many of the foremost men in the business pay their assessments with alacrity and satisfaction, realizing that they are simply making an investment which will return to them a hundred fold, yet other men who have not been baptized with the water of co-operation and mutual helpfulness, dole out their coin with a regret that is all too apparent, and sometimes with a niggardliness which excites remark. Now anyone in the trade has a perfect right to conduct his business affairs as he likes, to work in double harness or go it alone, according to his inclination, but if a man is going to participate in the forward movement of the day, let him by all means do it joyfully and without restraint, knowing that the attitude which he assumes is of as great importance as the actual cash transaction.

## PASSING OF JUDGE MAREAN

### A Warm Tribute from His Close Friend, John Scheepers

The passing of Supreme Court Justice Josiah T. Marean, while he was sojourning, in Winter Park, Florida, has brought to a large number of persons in all parts of the country a keen sense of bereavement. Many who had come within the sphere of his gentle and gracious personality, yet knew and felt the force of the happy philosophy which ruled his life, feel a keen sense of loss.

By his going the horticultural world has lost a commanding power, for in his chosen field the Judge had no peer. Always a lover of flowers and out-of-doors, Judge Marean has for the past fifteen years devoted his knowledge and skill exclusively to the glorification of the dahlia. In his lovely private gardens at "Daybreak," Green's Farms, Connecticut, he has worked patiently, ardently, but with sure and discriminating touch, to bring forth every latent beauty of this splendid flower.

The triumphant results are known to all the flower-loving world. Almost it has seemed that among his tools in the "green workshop" at Daybreak there must have been a magician's wand, for surely magic was wrought miracles of color and form, and such perfection of finish as has never before been even dimly approached in the development of the dahlia. Each year fresh wonders were accomplished to the astonishment and delight of an ever-growing audience of admirers; each year it seemed possible for the tranquil worker to transcend perfection.

And now that the last wonder has been wrought, the tools laid aside, there is solace in the thought that in great and little gardens throughout the land the beauteous flowers, called into being by his love and skill and prepared for future development, will bud and unfold, like the pages of an immortal book, carrying his name down the years in honor and affection, thankful for his loving foresight to carefully arrange for the continuation of his great work, following his principles in every way. And even the earth will hold him tenderly who brought it to such noble ends.

The philosopher of "Daybreak" counted his friends among all classes, and his unfailing kindness to all who sought his advice or laid claim upon his time will not soon be forgotten.

Sunshine was he in the winter day;
And in the mid-summer coolness and shade.

JOHN SCHEEPERS.

# RAMBLING OBSERVATIONS OF A ROVING GARDENER

The Lenox Horticultural Society has created something of an innovation by electing the wives of the members to honorary membership in the society. Now the ladies attend the meetings and exhibit at the shows. Women are coming more and more to take an active part in Horticultural matters and there seems to be no good reason why they should not attend the meetings of organizations devoted to such matters. Perhaps the example of the Lenox Society will be followed elsewhere.

The Lenox Society, by the way, is one of the most active and progressive organizations of the kind in the country. Moreover, it has many large and well equipped plants to draw upon for its shows, which is a great advantage. It is particularly rich in orchids and its membership includes such well known orchid growers as Oliver Lines and A. J. Loveless. At the annual fall show Mr. Lines, who is superintendent for Mr. A. N. Cooley, put up an orchid exhibit which aroused much comment. Indeed, it has been described as the best exhibit ever staged by a private gardener in America. Quite properly it was given a gold medal, the first ever awarded by this society.

---

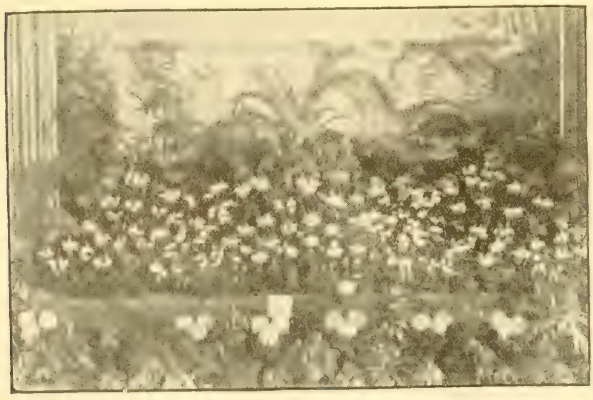
Another organization which has become famous for its exhibits is the Horticultural Society of Tarrytown, N. Y. This society, too, has many fine estates to draw upon and always has the corporation of Mr. F. R. Pierson, one of the best known commercial growers in the country. Mr. Pierson appears to pride himself upon the quality of the exhibits which he makes at the shows of this society. The annual banquet of the Tarrytown organization is always a big event and one attended by prominent people from far and near.

---

I wonder why the turquoise berried vine (Vitis heterophylla) is so seldom seen on estates in this country. It is an extremely attractive and useful hardy climber from North China and Japan. It grows rapidly, is easily trained, and has very pretty fruits. It is particularly interesting to watch the ripening and coloring of these fruits, which look much like beads. First they are bright green or dull purple, but presently become rich purple, and sometimes a real peacock blue. Then they turn to a rich turquoise blue. This is a vine which is not at all difficult to handle, and which has a distinctive appearance which ought to have recommended it highly.

---

Among the interesting novelties introduced by Dreer for 1922 is a California poppy in an entirely different color from that heretofore seen. It is called Purple Glow and has a bright reddish purple hue. It is by far the darkest shade yet obtained in this lovely annual. Scarlet Beauty is another new California poppy and, as its name indicates, is scarlet throughout.



While the annual larkspurs do not possess the stately beauty of the perennial kinds, they are still handsome and useful. A new variety, called Exquisite, is especially to be desired because of its soft rose color, a color that is entirely new in this section. It should prove a particularly handsome annual for cutting and house decoration.

---

A new trailing rosé called Max Graf, being put out by Dreer, promises particularly well. Probably it is a cross between Rosa Rugosa and Sitegera, and while it will climb well, it is valuable for a ground cover, nestling close to the ground like the Wichuriana varieties. It has fine glossy foliage, held very late in the season, and seems immune to mildew, while it is perfectly hardy. The flowers are single and bright pink, with petals somewhat crimped. People who are fond of highly scented roses will be pleased with the new California hybrid tea called Fragrant Bouquet, which was originated by Howard & Smith. It grows in a compact form, and has medium size flowers, delicate pink in color, with golden yellow at the base of the petals. It is remarkably sweet scented. Another new rose from Howard & Smith, which Dreer catalogues, is called Mrs. William C. Eagan, and has large flowers in two-tone pink. As planted in the garden of Mr. Eagan, for whom it was named, on the shores of Lake Michigan, it has proved exceedingly floriferous.

---

I haven't the time to bother with hotbeds, but I set a great store by my cold frames, using them spring, summer and fall. No glass is used. The sashes are filled with a prepared cloth, which is just as satisfactory, and which does not splinter into fragments if my fingers slip. Moreover, its cost is small compared with that of glass. I make a secondary use of this glass substitute, too, in a way which may be worth telling about. The sashes are very light, of course, so that I can move them without difficulty. Now it often happens that a sudden rainstorm comes up in the spring, which is a blessing to the plants in the frames, but much less favorable to the well-being of my young chickens. Accordingly I shift the sashes to the yards where the youngsters are running, keeping them dry and safe without the necessity of shutting them into their houses. While the prepared cloth is not transparent, it lets the light through almost as freely as glass, and yet excludes every drop of water.

A. N. Cooley Orchid Exhibit at Lenox

## MISUSE OF SLOGAN

### Furniture Dealers to Drop "Say It With Flowers."

Chairman Henry Penn of the National Publicity Committee has received a very interesting letter showing that the Furniture Dealers are to drop the slogan "Say It with Furniture." The florists took up the matter with the associated advertising clubs of America, and the results are most satisfactory. The letter to Mr. Penn reads as follows:

Dear Sir:—

We are writing to you in further reference to your letter of December 16th, 1921, in which you called our attention to the misuse of your slogan by certain furniture manufacturers.

Today we have a letter from Mr. R. W. Lyon of the American Home Bureau, in reply to a letter which we addressed to Mr. Robert L. Jordan, of Chicago, stating that he regretted very much the use of this slogan, and that his office would gladly co-operate in attempting to wipe out its use, because he feels that it is absolutely unfair, and not at all in harmony with their ideas of conducting a publicity campaign.

We will continue to work for the abolition of this misuse of your slogan and hope, with you, that it will soon die of its own weight.

Most truly yours,
Associated Advertising Clubs,
M. L. Smith,
National Vigilance Committee.

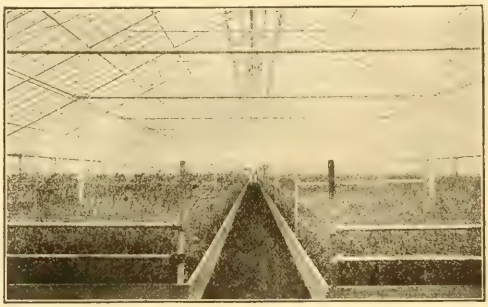
## THE APRIL 19TH CONFERENCE

### Its Purpose is to Allow a Full Discussion of Quarantine Matters

Just as we go to press we have a letter from Mr. James McHutchison of New York containing the copy of a letter which he wrote to H. C. Wallace, Secretary of Agriculture, inquiring the particulars of the conference to be held in Washington, April 19, also the reply of Secretary Wallace, which contains the following paragraph:



"You are advised that the plant quarantine conference called for April 19 is not a public hearing preliminary to quarantine action, but is to be simply a conference to enable this department to secure additional and needed information on subjects covered, and to give all persons interested an opportunity for full and free discussion."

This is a very important statement of Secretary Wallace, in view of which there is likely to be a very large attendance at Washington. In any event, as Mr. McHutchison says, the trade can now co-operate with the F. H. B. in a full and free discussion.

## DEER LEAPS INTO GREENHOUSE

Bennie Armarillo, while pruning carnations at the Batley greenhouse at Maynard, Mass., had a thrill when a young deer crashed through the glass roof and landed a few yards from where he was at work. As he attempted to catch the doe, it leaped on a bench and from there went through the glass side of the structure.

TEWKSBURY MASS.

January 18, 1917.

King Construction Company,
North Tonawanda, N. Y.

Gentlemen

Relative to the house, 42 x 200 feet just completed by your firm for us, we wish to state we are much pleased with the light, airy interior, and the strong, rigid frame. The house is well built and braced, at the same time casting a shade barely discernible.

We are naturally proud of this house and pleased with the treatment accorded us by your firm, and we thoroughly appreciate the care exercised in all the details of the construction.

We hope to have this house continued sometime about 175 feet longer, and of course will have "King Construction".

Yours very truly,

Patten & Company.

January 20, 1922.

King Construction Co.,
North Tonawanda, N. Y.

Gentlemen

Enclosed herewith, is the signed contract for one King Iron Pipe Frame Greenhouse, 42 feet wide by 140 feet long.

In 1916 you erected for my father, the same style house 42 x 200 feet. It has proved so satisfactory that I will extend same to 350 feet.

This proposed extension is necessary to house 20,000 plants of NATALIE, a new pink carnation to be disseminated in 1923 by The Joy Floral Co., of Nashville, Tenn. NATALIE was named for my little daughter and as I will represent their interests in the North, the greater part of the stock will be planted in the present and proposed extension of the King house.

Very truly yours,

Harold J. Patten

PATTEN & COMPANY

Nothing could be added to this convincing proof that King Constructed Greenhouses have won and are winning on the merits of Proved Performance. The success of Patten & Company as Carnation Specialists is unquestionable. This success is due principally to good business judgment.

In 1917 they were first sold on King Houses after experimenting with other houses for years. Five years of successful performance proved to them that King Constructed Greenhouses not only produced more and better Carnations but offered to them an opportunity of carrying out their program of featuring the new and wonderful Pink Carnation "Natalie."

King Pipe Iron Frame Greenhouses are built in all widths, even or uneven span and are used extensively by many leading growers throughout the Country. The posts, purlins, rafters and bracing are all steel pipe and make a complete skeleton frame independent of the woodwork. The pipe posts are of a size depending on the width of the house. Purlins laid on top of rafters are held in place by special malleable castings and U bolts. Rafters cut to uniform lengths and assembled with strong malleable iron fittings. The well designed bracing will withstand the most severe wind attacks and snow loads. Close placing of the purlins permit light sash bars. These bars admit maximum light and still possess ample structural strength. For light, strength and growing features these houses are unexcelled.

King Houses are the leaders also in the wide steel houses and the less expensive semi iron frame greenhouses. Write for descriptive catalog.

*When you think of good greenhouses, think of KING*

## ADVERTISING and SELLING

### FULL WINDOWS BEST SELLERS

Show windows which display a large amount of goods apparently bring better results than those showing only a single article, although windows of the latter type may be more artistic. At any rate, these are the facts as based upon extensive experiments which have been carried out by an Institute of Business Science in Germany.

A store having windows on two streets was selected for the experiment. In some a single color scheme was used throughout, and in others a variety of colors. The latter, that is the window showing several colors, pulled better than the one with only a single color. Some windows had only a few pieces of merchandise on sale, while others had a large collection. The greatest number of sales was obtained from the windows displaying a large amount of merchandise in comparison with those which showed only a few things.

The articles in some of the windows had price tags attached. In other windows no prices were given. It was found after several weeks of experimenting that the sale of articles bearing price tags greatly surpassed those not marked.

These are suggestions well worth the attention of the florist. It is quite possible that, in an attempt to make an artistic window and one which appeals to the esthetic nature, business is actually retarded rather than stimulated. In fact, the test has surprised a great many people in the discovery that highly decorated windows have less power of attraction than those in which no special artistic trimmings are used—at least so far as German people are concerned. Inasmuch as human nature is very much the same the world over, it is fair to expect that much the same conditions would be discovered in this country.

It is a question to what extent price tags can be used in florists' windows. A number of florists have been experimenting along that line and have found as a rule that when prices are given, especially if they are not too high, there is an immediate jump in sales. This is an outstanding fact which, while often overlooked, will do much to help promote business in florist stores, especially in sections where trade of the highest class is not sought. A great many people hesitate to go into a florist store, especially one of pretentious character, to buy a few flowers, for fear that the price will be higher than they can afford. This is especially true since price fluctuations have become so marked as in recent years. If you can show your possible customer by a window display just what he can expect for a given amount of money, he will be much more likely to enter your doors. The customer coaxed into your store in this way may, of course, become a permanent buyer, and one whose trade you will be glad to have.

### MAYFLOWER BILL LOSES

Much to everybody's surprise, the committee on conservation of the State Senate has reported adversely on the bill sponsored by Pres. A. C. Burrage, of the Massachusetts Horticultural Society, to prevent the extinction of the Mayflower. There was no opposition to the bill at the time of the hearing, and a large number of people appeared to speak in its favor, pointing out that the Mayflower, which is the State Flower, was rapidly disappearing because of the way professional gatherers pulled the flowers up by the roots.

DELPHINIUM BELLADONNA
(Everblooming Hardy Larkspur)

### CAMPBELL NOW HEAD OF ELM CITY NURSERY

A complete change was made in the officers at the mid-winter annual meeting of The Elm City Nursery Co., New Haven, Conn. Ernest F. Coe, the former president, who founded the business, retired from active connection with the company on July 1 of last year, but the final papers were not passed and his interests in the company transferred until Feb. 1. His entire interests now pass to the new management. All of the new directors have been with the company for a number of years as heads of various departments.

The organization now is: President, Walter E. Campbell; vice-president, and general manager, W. W. McCartney; secretary and treasurer, Robert B. Faxon; superintendent, William H. Egan; director of landscape department, John L. Donnelly.

Mr. Campbell, who has been with the company for the last 15 years, is well qualified to head the new organization. Mr. McCartney has had much to do with the building up of the company's interest at Woodmont. Mr. Faxon is a graduate of the Landscape department of Ohio State University. Mr. Egan has grown up with the business at Edgewood and his promotion to the superintendency is well merited. Mr. Donnelly was graduated from the Landscape department of Michigan Agricultural College and is well qualified to handle the new duties assigned to him.

### WITCH HAZELS IN BLOOM

#### Hamamelis Mollis Given First Award in England—Flowering in Arboretum

Although late, the Chinese witch hazel, Hamamelis mollis, is now in bloom at the Arnold Arboretum. The Japanese forms, H. arborea and H. japonica, are not quite out. It is interesting to note in this connection that the Council of the Royal Horticultural Society in England has just established a new award for ornamental plants especially intended to mark plants of proved excellence for garden decoration, and that the first award has been made to Hamamelis mollis. This is the handsomest species of the genus. The long narrow petals are straight, not crumpled as in the other forms, and are rich golden yellow, except for a reddish base. They are set in a red-brown calyx, smooth within and hairy without. The bush grows six to eight feet high, and has stout branches. It is not particular as to soil, but grows best in good loam, and requires no pruning except possibly to correct a slight tendency towards sprawling.

### NEW ENGLAND

The New England Landscape and Tree Preservation Co. has been incorporated at New Bedford, Mass., with a capital stock of $99,000. Arthur M. Horn is president, Harold A. Horn treasurer, and the other incorporator is Henry J. Gault.

### GETTING NEW ACCOUNTS

#### How Henry Penn Handles His Advertising and Circularizing

"I never key my advertising. Of course, reasonable intelligence is used in placing my copy, but little attempt is made to check up results. It doesn't pay. Like bread cast upon the waters, an advertising expenditure perhaps forgotten has often returned to me after many days. On certain occasions, like Thanksgiving and Easter, I advertise special sales and look for immediate response, but most of the time it is general publicity which I am after, and there isn't a day in the year in which some of my advertising does not appear somewhere in some form. And when I advertise freely my business increases: when I cut it down my business falls off."

It is in this way that a writer for the Retail Public Ledger introduces an interview with Henry Penn of Boston.

The interview then continues:

Mr. Penn paused for a moment and smiled. "I don't much relish this talking about myself," he said, "but you asked for my methods and I am giving them to you as frankly as I can. I have no mortgage on them. If any other florist likes them he can use them and welcome.

"It wasn't long after going into business for myself," Penn went on, "that the value of publicity was sensed. It was an event in those days if a florist spent $25 for advertising, but I promptly put a poster into all the street cars of Boston and I have kept cards there ever since. Then I went into the newspapers. For a long time we spent 4 per cent of our gross income for advertising space. Now we spend 8 per cent in that way.

"There is just one thing we have tried to do in all our advertising, and that is to make the name of Penn synonymous with flowers. At first I fea-

**Nio.** Midseason, pretty small pink button.
**October Gold.** Early, aster-flowered rich orange-yellow.
**Ouray.** Midseason, very bright reddish bronze large button.
**Romaine Warren.** Late, rich bronze.
**Soleil d'Or.** Midseason, rich orange aster-flowered.
**Tints of Gold.** Early, glorious golden-yellow aster. $1.50 per doz.; $10.00 per 100.
**Uvalda.** Early, a fine white aster-flowered.
**Viola.** Midseason, violet-rose medium sized button. $1.75 per doz.; $12.00 per 100.
**Wanda.** Midseason, a fine large white aster-flowered.
**White Doty.** Early, pure white ball-shaped flower.
**White Midget.** Late, miniature pure white button. $2.00 per doz.; $15.00 per 100.
**William Sobey.** Midseason, a fine yellow aster-flowered.
**Zella.** Early, fine aster-flowered yellow $2.00 per doz.; $15.00 per 100.

**Price.** Any of the above except where otherwise noted. 85 cts. per doz.; $6.00 per 100; $55.00 per 1000.

**HENRY A. DREER** 714-716 CHESTNUT ST. PHILADELPHIA, PA.

THE ABOVE PRICES ARE INTENDED FOR THE TRADE ONLY

tured violets until whenever any newspaper reader or street car patron in Boston thought of violets he thought of Penn. Violets were chosen deliberately because they were popular, moderate-priced and solved the flower problem for thousands of people. If it occurred to a man that he should send flowers to his wife or his sweetheart, it was the natural thing for him to order violets because he knew what they would be like and what they would cost him. We have sold 247,000 violets in one day. That meant 3,600 bunches, and it is a record probably never equaled by any other florist in the world.

"Freshness is a word which means much to the average customer, and it is emphasized. From the first every violet advertisement has contained this statement: 'Penn's violets are picked fresh three times a day.'

"While it is my aim to keep the name of Penn always before the flower-loving public, the name alone is not worth very much unless it is constantly re-enforced by phrases or statements which quickly catch the eye and appeal to the imagination."

The oft-repeated slogan, "Say it with flowers," belongs to the florists of the nation. It has been popularized by advertising paid for by the trade from the Atlantic to the Pacific. Nevertheless, there are thousands of people in Boston who think that it is Penn's personal trademark. Mr. Penn says he makes no attempt to convey this impression. Indeed, he assures people that it is the watchword of the industry as a whole. But, because he was one of the first to use it, and has displayed it consistently ever since, it has probably been worth more to him than to any other florist in New England.

### "Flowerphone, Beach 6900"

For years many of Penn's advertisements have contained the line, "Flowerphone, Beach 6900," which in itself has brought no little business.

"We make wide use of circulars and the telephone," said Mr. Penn. "Every few weeks neat cards containing some special announcements are sent out and with them often goes a request for the different anniversary dates of the family. These requests have been answered in hundreds of cases, and have given me a long list of the best people in Greater Boston. Every morning, as soon as the business day opens, a girl sits down at the phone and calls up the head of each family which is to have an anniversary the next day. She says, 'Mr. B., shall we send some roses or carnations to your wife tomorrow? It is her birthday, you know.' 'By George,' comes the answer, 'that's so. I had almost forgotten it. Send up a $10 bunch of Beauties."

The benefit of HAIL INSURANCE was forcibly illustrated by a number of violent hail storms in New England last year.

Be wise and send to **John G. Esler, Sec'y of Florists' Hail Association, Saddle River, N. J.**, for Hail Insurance literature.

**DO IT NOW.**

## George Watson's Corner

"You in your small corner and me in mine."

The Philadelphia boys are standing up, to the best of their ability, for the great show at Indianapolis. The latest to come across, at the request of President Pennock, is the W. Atlee Burpee Co. They had cancelled their space engaged for the Cleveland exhibit; but have reconsidered and will make their best efforts to put up a fine sweet pea display, in spite of all handicaps. Those who know the Burpee spirit of enterprise will appreciate their patriotism, and we may look forward to a showing in every way worthy of the great house, and the grand occasion. Others of our big houses here will be in line, and you may look for them.

The New York boys did the honors well at the Captain Clement Memorial Services. They had a big detachment of the Old Guard in the tall fur head dresses and their swords and handsome uniforms, which made a great showing and added dignity and distinction to a great ceremony. The floral emblems, like the people attending, came from everywhere. It is a long time since Broad and Thompson has had such an enormous gathering of distinguished people in all walks of life and it will be long remembered.

When we get down to fundamentals, it's the rose that counts, not the Rose Society. Whatever helps the rose: whether it is an individual, a company or a society, we welcome that influence on behalf of the rose. All and everyone are welcome to do their little bit; but not one, nor a multitude of them, may presume to be boss! The Queen reigns supreme! All under her are her humble servitors, and honors will be awarded to each and every one according to their just deserts. That is the proper way to look at it. Makes no difference what your business. A blacksmith, or a banker; a farmer, or a florist; a woodsman, or a wool dealer; a priest, or a prophet; it's what you do for the rose that counts. Makes no difference whether you make any money out of it or not. A real enthusiast—professional or otherwise—never thinks of money. It's the rose with him, first, last and all the time. Which fundamental proposition, being admitted, as it must, where comes in this new notion that the rose followers must be all amateurs, and that no professionals can be allowed to stand under the banner of the Queen. Her banner waves the world over, knows no latitude, no longitude, no nationalities, no languages. Her sway is universal and all are welcome to serve—no matter what their nationality, creed, color or occupation.

IRVINGTON, N. J.

George's corner is supposed to be very serious and for affairs of state only. But once in a while a little joke may be allowed to creep in. This one is especially for that esteemed lawyer and florists' friend, Daniel Donoghue.

"Do you mean to tell me," said the indignant lawyer, "that you deny the accuracy of what that witness has told?" "Not at all," said the polite young man. "I merely wish to make it clear what a liar I am, if she's speaking the truth."

---

This one is for that hard-shell buyer, Frank Ross, who had the nerve to baptize our gentle heavyweight, young Jack Cox, with a tough name. He said his real name was not Jack. That it was "Old Ironsides." I suppose that means, the man with an "iron jaw," on both sides, and that, if true, would put him in line with the plumber in this story of the two darkies, bragging about their tough parents:—

"Boy! Ah comes from a rough, tough breed! Mah old man cuts his nails with a ax, an bresh his teef with a file!"

"Huh! Ain't so tough! Mah ole man am a plumber, and twice a week he done shave himself with a blow torch!"

---

This one is respectfully referred to George Amman by a distinguished Philadelphia rose grower:—

"The best method of conserving the interests of the grower is for him to make sure that he is getting all that's coming to him from the retailer. As is well known, the retailers are regular pirates, and they not only overcharge their customers and ruin the business, but they kick like steers when the grower asks for even a small slice to help pay his awful coal bill." We trust it is really not quite so bad as that but, of course, there are always two sides to a question.

---

Howard M. Earl of the Jerome B. Rice Co., Cambridge, N. Y., (not Mass.) was a recent visitor. He spent a week or so at his old homestead at Doylestown and got the benefit of a thorough run-over by his old friend, Dr. Swartzlander. Then back again to headquarters at Cambridge. He reports the wholesale seed business in good shape, and gradually coming back to normal. Some of the seed boys got a few hard knocks; but there has been no scandal in the seed business such as we have heard of so much lately in other lines. Sixteen brokerage concerns in one month is the record up to March 4th in Philadelphia in the bankruptcy court. Other lines in lesser proportion. Not a single fatality of that kind

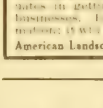
**ROMAN J. IRWIN**
IMPORTER
43 WEST 18th STREET, NEW YORK

*When writing to advertisers kindly mention HORTICULTURE*

has visited our fair city as far as its seed trade is concerned, for which we are all duly proud and thankful.



Robert Lockerbie of Greenville, S. C., reports the retail florist trade down in that locality as fairly good but not rushing like it used to. They are not complaining any but like the rest of the country they seem to listen more welcome when a funeral order comes in than in the period when it was all big shows and parties and the expense didn't count—no limit—hundreds or thousands. When they have Hog Island money, what do the millionaires care?

BECOME A LANDSCAPE ARCHITECT

Practical. Exclusive Profession not overrun with commercialisers. Crowded with opportunities for money making and big fees. $5000 to $10,000 incomes attained by experts. Easy to master under our correspondence methods. Diploma awarded. We assist students and graduates in getting started and developing their businesses. Established 1906. Write for information (it will open your eyes). Do it today.

Yes, that's Mr. Moss, himself, by that stone pillar
Wish we had a "close up" of him to show you

# How Moss Keeps the Moss Off The Mossbacks

If you know Moss, I don't need to tell you how he does it. But if you are not so fortunate, then what he tells will interest you.

"Thirty years I was working for the other fellow, but all the time I was working for him, I was working for myself. Working for myself, by doing my work just the best I knew how. Every once in a while my boss would even find me working overtime.

Finding that he was not offended, I started in mornings earlier than we had agreed upon.

Then one night when my old corn cob had gone out, I says to myself, says I: Ike you're a mossback if you are going to be content to stay on and on, working for the other fellow, when you are the fellow to work for.

So I went to Dad and told him I wanted to build a great big greenhouse in his yard—a lean-to 15x50.

For some unknown reason he said, "go to it Ike, wish you luck."

Now I never believed much in luck. Some folks fall into "soft things" as they call them, but I call such chaps unlucky.

The lucky fellow is the one who has found out that accomplishment of his own, is one of the biggest things in life. My recipe for accomplishment is, *hard work and keep on the job.*

Starting with that little lean-to house, we now have quite a flock of them to kind of keep us from jazzing too much. This curved eave one across the drive is not a greenhouse at all, but just a big glass show case which folks see into going by, and go into when they stop.

See those *two* entrances to make it convenient for them? Fine house that. It's a Hitchings'. The first on my place. But let me tell you, it won't be my last. As Postum says: "There's a Reason."

To which let us add our sincere appreciation to you, Mr. Moss, for the privilege of building for such a straight thinking, success-making man as yourself.

### NEWS NOTES

John McKenzie, the well known florist of Cambridge, deals in real estate as well as in flowers. He has just completed a very attractive block of stores on Massachusetts avenue

Edwin Hoyt, son of Stephen Hoyt, has become a member of the Stephen Hoyt Sons Co., Inc., nurserymen of New Canaan, Ct. This makes the fourth generation entering this nursery firm, which has been established in business for seventy-five years. All of this time it has been in the same place.

A new nursery firm has been organized in Manchester, Conn., under the name of C. L. Vanderbrook & Son. Mr. Vanderbrook, who is at the head of the concern, was for seventeen years with Jackson & Perkins, but has had other connections for the past twelve years.

William Nicholson, who has long been a famous carnation grower of Framingham, is gradually working out of carnations, having only about six thousand plants at the present time. He will give his time largely to the growing of chrysanthemums and various novelties. He is also making a specialty of forced gladioli.

Mr. H. D. Seele has been appointed park superintendent at Elkhart, Indiana. Mr. Seele is well known in park work, and is a life member of the S. A. F. and O. H., having served as one of its judges in landscape contests.

The benefit of HAIL INSURANCE was forcibly illustrated by a number of violent hail storms in New England last year.

Be wise and send to **John G. Esler, Sec'y of Florists' Hail Association, Saddle River, N. J.,** for Hail Insurance literature.

## NEW ENGLAND

Robert E. Morrison, who has conducted a greenhouse and floral establishment for twenty years at East Norwalk, Conn, has sold his business and property to Falkenback & Meckel, of White Plains, N. Y., who have taken possession. Mr. Morrison and his family are soon to leave for Lake County, Florida, where they will make their permanent home. The new owners will carry on the greenhouse work as formerly, but will also specialize in landscape gardening.

Prof. C. L. Thayer, of the Agricultural College at Amherst, Mass., is to discuss future policies at a meeting of the College Florists' Section of the S. A. F. at Indianapolis during the show next week.

Joseph Intravaia has purchased a new location at Middletown, Conn., to which he will remove his florist business now located on Ferry Street. He expects to erect several new greenhouses but he will retail at a store on Main street.

George E. Fisher, the well known florist of New London, Conn., will again have a place this year on the committee operating the Juvenile League of that city. Mr Fisher is much interested in baseball, and in developing amusements for young people.

Joseph Sokol, the florist of Hartford, Conn., was recently awakened to find burglars trying to enter his house. He fired several shots at them, and one of the men was captured with three bullet holes through his coat, showing that Mr. Sokol is not a bad marksman after all.

Peter Greene, for seven years in charge of the Beverly, Mass., parks, passed away recently in his sixty-seventh year. He was born in Kieth, Scotland.

Walter Smith Brown, of Providence, who passed away recently, aged sixty-seven years, conducted a florist establishment on Jewell street for many years and was widely known.

Harry Cedar, who has purchased the Crockford Flower Shop at Winchester, Mass., has changed the name to Sweetheart Flower Shop. Mr. Cedar, who is an ex-service man and was cited for bravery in the Champagne-Marne offensive, has many friends who wish him success in his new venture.

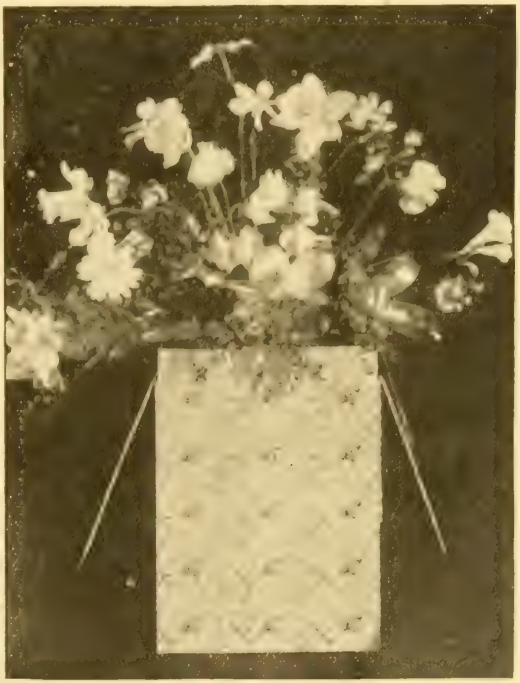
## THE TALK OF THE TRADE

I understand there is quite a good call for some of the chrysanthemums of later introduction. Two varieties, in particular, Golden Glory and Glorious, are meeting with a very strong demand. I think that Golden Glory is especially good. It comes into bloom early in October, has a rich shade of yellow, and is one that should not be very difficult to handle. It seems to fit in with some of the more easily grown commercial varieties. Glorious is a light pink and flowers at a time when good pink sorts are not over plentiful.

Thanksgiving pink is also one of the good selling varieties. It made friends enough last year by its rich color and good character of growth. It matures just right to fit the Thanksgiving season, and is said to be a very good shipper.

Another variety that I think a lot of personally is the Pompon Anemone, Sunshine. I don't think there is a chrysanthemum in this class that is better than Sunshine. It does equally well as a pot plant or for spray purposes, and I saw some excellent blooms at Hugo Teute's place in Rochester, N. Y., at Thanksgiving time, which he had grown disbudded four or five blooms to the plant. This stock was very well done and found a ready sale in the market.



Good strong field clumps of perennials, Campanula and Delphinium, have been found to force readily and make pleasing crops as novelties. Delphinium belladonna, the light blue, is liked better than the dark. I find increasing quantities of these two crops being forced by the smaller growers selling their own stock at retail. Either as pot plants or cut flowers both fit in nicely and give a variety that is pleasing.

There are indications that in the coming season there will be a much larger quantity of field grown roses offered, such as the tall growing ramblers, as well as the Baby type. Large quantities have been worked up and it seems now that they will be available, of good grade and at lower prices than in the past few seasons. This, of course, will be pleasing to the plant men in general.

I have been much interested in the new flower container being put out by the Houghton-Gorney Flower Shop, where it was invented. It is called the Florabox, and probably will be distributed among the trade as well as used locally. It consists of a very handsome box, finished in paper or cretonne. It has two sections, the lower part comprising the base of the box wherein is placed a water container. The four sides comprising the rest of the box are not fastened at the corners, but are held in place by the cover when the box is closed. The moment the cover is removed the four sides fall outward, displaying the contents, which may be any sort of bouquet. This gives an element of surprise which makes it excellent for gift purposes.

The flowers may be allowed to remain in the box, which makes an artistic container, or removed to vases and put back in the box at night, where with the sides closed they will keep as in a miniature ice box. The box may be shipped anywhere if placed within an outside case especially designed for it.

The Houghton-Gorney people are receiving many congratulations on this

The New Houghton-Gorney Florabox

unique box, which is selling well in their own store

It is evident that the Allied Florists' Association of New York is making excellent progress with its co-operative advertising idea. The president, Mr. A. M. Henshaw, was very much interested to learn what had been done during his absence in Europe, and expects to announce the date of the large mass meeting very shortly. Without doubt this meeting will be held early in April.

Mr. Aubrey S. Nash, the secretary, had many questions fired at him from florists outside the town during the week of the International Show. According to Mr. Nash, great interest in co-operative advertising is being shown by the floral trade in general. He said that the retailers in particular wanted to know when the Allied Florist's Trade Association advertisements were to appear in the daily papers.

### A PUBLICITY OPPORTUNITY

There is an excellent opportunity for the florists to gain valuable publicity the coming week when George Beban comes to Loew's new State Theatre in the Sign of the Rose. There is no question but what the management would co-operate with the florists and that the lobby of the splendid new theatre might be filled with floral tributes bearing the names of Boston florists. The florists might signalize the occasion by special exhibits of flowering rose plants in their windows. Here is a suggestion for Secretary Naukam of the Florists' Alliance.

### PLANT CONFERENCE SUGGESTIONS

At the Plant Conference to be held in Washington May 15th, the S. A. F. Tariff and Legislative Committee wants to present to the F. H. B. a constructive program showing what the florists' trade wants and requires. If you will not be there yourself you can at least express your views through this Committee. Are you for or against Quarantine No. 37? What changes in Q. 37 do you suggest? On which plant products do you wish the quarantine lifted? What additional items do you want quarantined? This Committee will welcome any constructive suggestions if addressed to me at 95 Chambers St., New York.

Yours truly,
JAMES G. McHUTCHISON,
Chairman.

# FORCING BULBS DISCUSSED

## Interesting Meeting of the Gardeners' and Florists' Club of Boston

Winter bulbs and bulb culture was the subject which received attention at the regular monthly meeting of the Gardeners' and Florists' Club of Boston at Horticultural Hall, Tuesday night. President Judd was in the chair, and there was a good attendance.

Mr. Eugene M. Naukam, secretary of the newly organized New England Florists' Alliance, was called upon,

Herman Bartsch

and explained the work and prospects of the Alliance, and urged the florists present to come to him and be thoroughly informed about the plan if they were in doubt concerning any of its details.

Mr. Herman Bartsch, of the W. W. Edgar Co., Waverley, was then introduced by President Judd, and gave a very valuable talk on his experiences in the handling of bulbs for the winter trade. He spoke particularly regarding tulips, which he said were most in demand, although they were the hardest of all winter bulbs to succeed with. In former years it was customary to start them in frames, but there was a continual loss from mice, broken pans, and the like. Now his company starts them in a special shed in which are arranged decks about fifteen inches apart and reaching to the ceiling. The floor of each deck is covered with sandy soil which is kept moist. The pots are not covered, as was formerly customary. Mr. Bartsch said that the sandy soil under the pots tends to promote the formation of roots at the bottom of the pot, while if the pots are covered, the roots grow too near the top. He exercises the greatest care to keep the soil under the pots moist all the time.

Mr. Bartsch praised the Darwins, which began to come into market about ten years ago, Pride of Haarlam being the first. The Darwins are prized because they last longer than the other kinds, and are more showy. Some cost even less than the old early varieties. They make sturdy growth, and respond well to good treatment.

It is necessary to study the varieties. Pride of Haarlam, for example, is still a good kind, but is not so valuable in March as earlier, because it gets too tall. It is six inches taller than in February. Murillo is a grand variety but must be grown cool. When it first comes out it is white, but if kept for ten days in a shady place, it will become a nice pink. It requires more handling than most kinds.

The most expensive bulbs are not always the most profitable to grow They are not graded but sell according to the size of the pans, largely, regardless of whether they are expensive or cheap bulbs. Mr. Bartsch declared that a dollar was too low a price for an eight-inch pot. A dollar and a quarter would be nearer right. The pots themselves cost 19½ cents, and by the time the bulbs have been flowered the total cost is sixty-five cents a pan, not counting what loss there may be from bad bulbs, breakage, etc. He said that in Chicago he had noticed that the price was often based on the number of bulbs in the pan.

Mr. Bartsch declared that tulips are rather particular as to soil. One year he grew them in soil which had been used for chrysanthemums, and got a very poor crop. There seems to be something about chrysanthemum soil which other plants do not like.

Christmas, he said, is too early for marketing tulips profitably. It's hard to get them ready before January. Mr. Bartsch gave a list of good tulips for forcing, and said that about seventy-five thousand bulbs of early tulips and Darwins are forced at the Edgar place. There was some discussion of the tulip Clara Butt, based on the re-

marks of Mr. B. F. Letson, who called it one of the cheapest and best for commercial purposes.

A discussion followed Mr. Bartsch's talk, after which Mr. Golby spoke about the forcing of tulips from the viewpoint of the private gardener who is able to use more expensive bulbs than would be profitable for the commercial grower.

W. N. Craig spoke briefly about the forcing of lilies, and exhibited a plant of Lilium giganteum grown from very small bulbs supplied by Mr. F. W. Fletcher, formerly of Auburndale, Mass., but now located in Orlando, Florida, where he hopes to grow lily bulbs commercially. Mr. Craig also showed some tiny plants of Lilium regale and Lilium formosum, three weeks old, from seed. He spoke of several lilies good for forcing, and mentioned the fact that Lilium regale does not force well until it has been grown in pots for one season, which interferes with its commercial use as a winter flower.

## BOSTON SPRING SHOW

### Garden Prize and Gold Medal Go to Allen Jenkins

While bulbs are featured at the Spring show in Boston, which opened Thursday, March 23, and will continue through Sunday, many other plants are shown. A first prize of $200 in the amateur class and a gold medal are awarded to Allen Jenkins, gardener for Mrs. Homer Gage of Shrewsbury, Mass. This is in the bulb garden class and the exhibit is very creditable, although the garden is small.

A remarkably fine display comes from the Edwin S. Webster estate, Chestnut Hill, includng finely done ericas, primroses, cyclamen and hydrangeas. This exhibit is splendidly staged at one side of the hall. L. D. Towle of Newton has an interesting group of plants, which includes one of the largest azaleas ever seen in the hall.

Richard M. Saltonstall of Chestnut Hill features schizanthus, cinerarias and lachemalia. From the Hunnewell estate, Mr. Hatfield is showing beautifully grown Rhododendron Kaempferi and the new R. Louisa Hunnewell, as well as a little known species from the South.

Andrew W. Preston of Swampscott and William A. Riggs of Auburndale are showing some particularly well grown tulips.

The show is not as large as in some years, but one hall is filled and the quality of the stock is high. Chester J. Hunt of Little Falls, N. J., lectures this afternoon and Sunday afternoon.

# THE NEW YORK SHOW

The way in which the florists in and around New York rally to the support of the International Flower Show each year does them great credit. They are making this exhibition an institution known the world over. The show which closed last Sunday was perhaps the most creditable ever held. It was staged wonderfully well For one thing, every inch of space was used to advantage, and the general layout, somewhat different from previous seasons, was a marked improvement.

It was interesting to find the spirit of rivalry among the big producers as keen as ever. It is becoming exceedingly difficult for the judges to award the prizes for the gardens, because of the great difference in their character. When you come, for example, to set the rockery of the Julius Roehrs Company against the rose garden of the A. N. Pierson Company, how is it possible to say that one was better than the other? Both were splendid It is not strange though that the Julius Roehrs people captured the gold medal of the Garden Club of America as the best exhibit in the entire show, because of its novelty and the careful attention to details with which it was carried out. The background of tall cedars, and the combination of rockeries and running water was most delightful Native Cypripediums, acaule and spectabile, were an interesting feature.

F. R Pierson's landscape effect display of bulbs I found most pleasing. A white paled fence w bordered with daffodils against background of boxwood, and the center fountain was surrounded by purple and white hyacinths. The velvety lawn in this exhibit was particularly fine.

I was pleased with the effective use of Paul's Scarlet Climber in the garden of A. N. Pierson, Inc It was planted at the base of a splendid white columned Greek temple. Along the front of the garden was a massive fence in ivory white, covered with Tausendschon roses.

Few exhibits attracted more attention than the orchids of which there was a splendid display. The Julius Roehrs Company alone had 350 plants in nine classes, and A. N. Cooley, of Pittsfield, had several wonderfully beautiful and very rare orchids.

I think the public was especially pleased with the garden arrangement from Wadley & Smythe, of New York, who have not before exhibited in this section. They staged a formal garden, the walks of which were lined with bay trees and orange trees, the latter in fruit. And of course the oranges made an immediate appeal to popular fancy.

Everybody was interested in Mr. Charles H. Totty's display of the new yellow rose, Souvenir de Claudius Pernet, which received much attention. There was some criticism of the foliage, however.

Another new rose, Mrs. Warren Harding, a sport of Columbia, shown by A. N. Pierson, aroused much interest. Private gardeners in particular seemed much pleased with it.

The hydrangeas and the Cinerarias exhibited could not be called very good. One batch of Cyclamen from Mr. J. Stuart, gardener for Mrs. F. A. Constable, Mamaroneck, N. Y., was remarkably fine, but commercial Cyclamen as a rule were not as good as those often seen around Boston. Some particularly good Primula obconicas were noted.

Better Darwin tulips have seldom been seen than those at the New York Show. Many of them were wonderfully done, and included several of the newer and more highly prized varieties. F. R. Pierson's wonderful Easter lilies, plants four and five feet high, and carrying eight to fifteen flowers, were a revelation to me. I was not at all surprised that they won first premium.

Another and exceedingly captivating exhibit was that of Kurume azaleas shown by Dreer of Philadelphia. They were magnificent plants, and if I can borrow a word which everybody seems to be using just now, I was greatly intrigued by Pink Pearl and Snowflake. The Dreer people certainly scored a hit with these azaleas, which seem certain to become of commercial importance before very long. I was much impressed by the specimens of Taxus cuspidata in the Julius

CONGRATULATIONS
to
MR. and MRS. E. G. HILL

## A. PERICAT, Orchid and Azalea Grower

**Collingdale P. O., Darby, Pa.**

Roehrs exhibit. These Japanese Yews, with the fine color shown by the new growth, were very handsome, and were viewed with much interest.

I think it was in F. R. Pierson's exhibit that the tall white birches in full leaf were to be seen while in the Julius Roehrs garden were some specimens of Cornus florida in flower.

Bobbink & Atkins, who won a gold medal for the best formal garden, had a charming arrangement set with azaleas, shrubs and little apple trees in blossom. It seemed to me that rare good taste was shown in their garden, as well as much thought.

Traendley & Schenk made a great show in the One Thousand Cut Rose competition, and are being widely congratulated on capturing the first prize of $500.

Altogether it was a noteworthy exhibition, and can be set down as an unqualified success.

### THE MARKET

Remarkable vitality is being shown by the flower market. Instead of a glutted market, such as is commonly seen at this season, everything is being cleaned up daily. Prices are good, and the growers are happy. You can't buy carnations under five cents, and you pay ten for Laddie. You can get roses for six cents, but you must pay twenty-five for Hadley with twenty-one inch stems. Crusader costs about as much, while Russells, Pilgrims and Premiers are twenty cents.

There are too many callas, and you can buy them for a dollar a dozen. Easter lilies have come along too early. Few people want them now, which accounts for the low prices they are bringing. Daffodils are four to six cents, unless you want King Alfred, when you must pay eight.

A few spikes of larkspur have come in, and that they are welcome is shown by the price of fifty cents each which has been paid. Antirrhinums are four dollars a dozen, and are coming good again. Valleys have gone up to eight and ten cents where they used to be, while violets continue to hold their own at $1.25, which means good stock. You can buy poor violets for fifty cents if you want them.

### GLADIOLI FOR COLOR

#### Some Valuable Recommendations from B. Hammond Tracy

Mr. B. Hammond Tracy, the well known gladiolus expert of Wenham, Mass., has an interesting discussion of gladioli and their care in his spring catalogue. One whole page is given over to classification with respect to color, and on another page the following suggestions are given:

"For the pink garden we highly recommend Pink Wonder, Pink Perfection, Daybreak, Delice, Gretchen Zang, Dawn, and Halley, a favorite variety which should be in every garden because of its wonderful spike of salmon pink flowers. Large flowered lavender and yellow gladioli are the dearest possessions of every hybridizer and good varieties of these colors are very scarce. Lavender and mauve blooms of Cattleya, Nora, Conspicuous, and Mary Fennell, and the deeper blue of Baron Josef Hulot remind one of orchids, and when planted or arranged with such yellows as Flora, Sunrise, Golden Measure, or Yellow Prince, give an effect which is pure satisfaction.

"White varieties are always in demand and no planting or decoration is quite complete without them. The new White Wonder and Albania are magnificent specimens of glistening white gladioli of great size and substance. Older varieties such as Lily Lehman, Europa, Glory of Holland, and L'Immaculee are matchless for contrast in the blue garden.

"A very unusual color combination, one seldom found in flowers, is that of the deep rose-cerise of Mrs. Watt and the royal blue of Baron Josef Hulot. It is a very perfect reproduction of the French Rosenblue.

"A careful study of varieties listed under 'Named Varieties' will suggest many colors for both planting and cutting, and such varieties as Crimson Glow, Mystery, Mrs. Frank Pendleton, Sunset, Maize, Mrs. Francis King, Independence, and Loveliness, should find a place in every garden."

### B. E. THORNTON, LAWRENCE FLORIST, DEAD

Benjamin E. Thornton, for more than forty years a member of Thornton Bros., Florists, of Lawrence, Mass., died Sunday, March 19. He leaves a widow, a son and three daughters.

### BOSTON

Everett E. Cummings, the well known sweet pea grower of Woburn, has added the dairy business to his list of enterprises. A car load of fourteen cows has just been received from Maine, and have gone into Mr. Cummings' big cement barn. Besides handling cows and sweet peas, Mr. Cummings grows a great number of cucumbers.

J. Newman & Sons Corp., florists of long standing in Boston, are soon to occupy new quarters at 200 Washington Street, which they have leased for a term of years. For a long time the Newmans were at the lower end of Tremont Street, but afterwards moved to a new store near the corner of Boylston Street.

Penn had a St. Patrick Day window display which attracted a great amount of attention. The chief feature was Miss Virginia Morgan, a harpist, who dressed in typical costume symbolized the Harp of Erin. During the afternoon and evening Miss Morgan played appropriate selections.

## FLORISTS TO MEET APRIL 1

### New England Alliance to Have a Grand Get-Together Occasion at the City Club

It is announced that a meeting of the New England Florists' Alliance will be held at the City Club in Boston on the evening of Saturday, April 1. There will be a banquet at 7 o'clock, but all who are not able to be present then are invited to come later in the evening. This gathering will not be limited to members of the Alliance. In fact, all florists, no matter what branch they may be in, are asked to be present, in order to hear a statement of what the Alliance is doing and hopes to accomplish. Several new members have been admitted since the last list was published, and the Alliance is making steady progress, according to the new secretary, Mr. Eugene M. Naukam. The following is the notice of the meeting which is being sent to members and others:

"We Florists Must Stick Together"

CO-OPERATE to protect the more than $60,000,000 worth of business done annually in our industry and increase it.

Attend the general meeting of Florists at the Boston City Club, Saturday, April 1, 1922, 7 P. M.

Supper for those who are hungry at 7 P. M.

Come as early as you can, be there some time during the meeting.

This will be an open forum where all can express themselves regarding the New England Florists' Alliance.

The Constitution and By-laws will be open for discussion as well as many other matters of importance to the trade in general.

Come or send an authorized representative to act for you.

Let all meet at the City Club, Boston, Saturday, April 1, 1922, 7 P. M. or as soon thereafter as possible.

If you are coming to supper notify E. M. Naukam, 77 Summer St., Boston, Mass. Phone Beach 4114 on or before noon, Friday, April 24, 1922, so reservation can be made.

You be there—I'll be there—We will all be there.

## BUFFALO FLORISTS ACTIVE

Mr. W. H. Grever is acting as chairman of the Western New York Florists' Publicity Committee during the illness of the permanent chairman; W. H. Eiss. Mr. Eiss was compelled to submit to an operation, but is now fast recovering. Mr. Grever, Mr. Weiss and Mr. Sivers have been appointed a committee to call on retailers who have not yet signed up, and are reporting good results. The growers in the Buffalo section have recently shown much more interest in publicity work than ever before. In fact, they are coming to set a pace for the retailers.

## FLOWERS FOR MAYORS

### One Way in Which Attention is Being Called to the Indianapolis Show

The F. T. D. is helping to gain publicity for the National Flower Show, which opens in Indianapolis today, in an interesting way. They recently sent each member a telegram reading as folows:

"F. T. D. Members: Deliver Saturday A. M., March 25, box of cut flowers, basket or blooming plant, your own selection and value, to the Mayor of your home town, using a card reading: 'On the opening of the Fifth National Flower Show today it gives me great pleasure to send a message of flowers by wire to you. Signed, Mayor, Samuel Lewis Shank, City of Indianapolis.'

"P. S. Be sure and do your best, and remember this will mean local publicity for you. Be sure that your local papers get told of this. Charge up to your own publicity account. Let us have your receipted bill, and state what you sent to the Mayor."

# CYCLAMEN IN AMERICA

## Notes and Criticisms of Stocks and Methods by an English Writer

Cyclamen as grown in the United States are discussed at considerable length by a writer in the Gardeners' Chronicle of London, England, under a New York date. It is enteresting to get his point of view. Growers doubtless will be interested in the article, parts of which are reproduced as follows:

"It is astonishing how the Cyclamen has been taken up by American growers during the past two or three years; until the Germans were able to get their crops or seeds over here in 1919 there was not nearly enough seeds to meet the demand, and as there were only two or three growers in U. S. A. producing seed, the supply of English seed had to go round as far as possible.

"Since 1919, German seed has been coming into this country in quantity, and every plant grower up and down the country has tried his hand. Some, especially those who always specialized in Cyclamen, have made a great success of the plants, and, incidentally, much money; others have had bad luck with them, and especially this season. Mite is a serious pest, and, in a general way, it is only those with some European experience who have kept this and other pests in check, due, of course, to the fact that they know the importance of cleanliness, and growing the plants in moist, cool conditions.

"I may be wrong, but I do not think anyone at home produces such wonderful plants of Cyclamen as are produced by a few growers here, including Messrs. Roland, Boston; Craig, Philadelphia; Petersen, Cincinnati; and Lehnig, Hackensack. All these growers have had European training, and probably have European trained labor. Thos. Roland is of English birth, and is one of the greatest pot-plant growers in this country. His largest Cyclamen plants, well over two feet in diameter in 8-inch pots, were retailing this Christmas in New York at $20, say, £8 each. I may state that for quality of flowers these commercial growers' plants are not so fine as I have seen in England; generally speaking, English seed produces finer flowers, but not such vigorous plants as the German seed.

"At least I am informed that this is so, but for all that I have seen plants raised from English seed in March carrying well over 100 flowers, and nearer three feet than two feet across. These were shown in New York by a private gardener, a Scotchman named Stuart. He is a great enthusiast on Cyclamen, and as he was in England this past summer he made a pilgrimage to Harlington, Middlesex, just to talk Cyclamen with the veteran grower of the St. George's Nurseries, Mr. Tom Avery. I often think that had Mr. Avery been in America during the past ten years he would be rolling along the highways in his twin-six motor-car instead of handling a water-can. I may mention that the commercial growers here mostly sow in flats and transplant the seedlings singly at a fairly early stage of their development. The marvel about the seedlings is that they grow so well in large houses, despite the hot summers here; shading is done with scrim on wires, and watering or spraying by means of a hose. I have never seen anyone using a can but I assume they do adopt this method of watering when the plants are small.

"Ashes are used on the benches, which are rarely solid. I have not met a grower who gives his plants cold frame treatment in the summer, although there are some that do so, even in Canada.

"American growers make two or more sowings, the first as soon as the seed is available. In this respect the Germans get in first; moreover, as they have been sending such large quantities, doubtless some left-over stock is utilized; the wise grower prefers such seed, because it germinates more readily than fresh, but others think of fresh seed only, and therefore do not start sowing before some time in August. Plants from the early sowings in the hands of expert growers begin flowering in October, but there are some who can get good plants in 4-inch and 5-inch pots from March sowings.

"Regarding potting, plants required for blooming early in winter and for the Christmas trade are in their flowering pots by September or October, but later plants are potted even so late as December. Repotting, of course, checks the blooming somewhat, but it results in finer and more

substantial specimens. If allowed to get pot-bound, the plants do not last long after reaching the buyer's home.

"American growers are no wiser than growers in England when it comes to watching for new plants. Indeed, I might hazard that the general run of commercial growers here are even more chary of trying a new thing than growers in England: they wait until someone leads the way, then all follow suit, roses and carnations excepted.

"There are probably various reasons for this: many growers are of foreign extraction or foreign born, none too well versed in the English language, and therefore not given to reading much. Others, like some at home, are suspicious, too slow, or too busy to bother about things they know nothing of. And then, of course, there are some who know so much that they do not interest themselves in what others are doing; they assume they are far ahead of the outside world. Luther Burbank once said he was too much concerned with his own work to pay much heed to what others were doing. Such people live in a world of their own; there are lots of them everywhere."

## THE MAYFLOWER BILL

At last the reason has been disclosed why the legislature of Massachusetts reported against the Burrage bill to save the Trailing Arbutus. It seems that a representative from Cape Cod brought his influence to bear on the conservation committee, and filed a letter from the head of the Cape Cod Farm Bureau protesting against such legislation on the ground that large numbers of poor children earn a good part of their clothing by picking and selling these flowers. It was argued also that the flowers go to the poor people in the cities who otherwise would not see them except in the cars of the more prosperous.

The representative in question claims that the damage to the plants is not done by the commercial pickers, but by automobile parties who tear up the plants by the roots. It is stated that the flowers have been picked and sold by the Cape Codders for over forty years, and the claim is made that while the Arbutus is dying out in pine groves, it is increasing among oak trees. It will be of value to get the report of some authority on the latter statement.

A fire at the potting shed of the greenhouse on the estate of Mrs. Hannah P. Weld, at Brookline, caused about five hundred dollars damage.

**FLOWER SHOW SPECIAL**

Don't forget the dates for the great National Flower Show at Indianapolis : — March 25th to April 1st. Opens on a Saturday, closes on a Saturday. Eight days of Enthusiasm for the Advancement of Horticulture. We will be there with an exhibit and wish to meet you.

Our stocks of Ribbons, Baskets and Florists' Supplies were never finer than at present, and we can take good care of your orders at lowest market prices. Let us hear from you.

## MR. CAMPBELL ON DIGGING AND PACKING

Mr. W. E. Campbell, President of the Elm City Nurseries, New Haven, Conn., spoke before the course in nursery practice at Massachusetts Agricultural College on February 28th, giving a lecture and demonstration on the digging and packing of nursery stock.

Mr. W. E. Campbell

For packing, Mr. Campbell recommended rye straw where it can be used, also sphagnum moss and shingle tow. He estimates that the average cost of packing on retail orders is 7% of the value of the stock. He then demonstrated all methods of packing, from small mail orders to car lots. Parcel post and express were recommended as the best methods of shipment.

## CHANGES AMONG GARDENERS

A. Fournier has become superintendent of the Bradley-Martin estate at Westbury, L. I. Mr. Fournier was formerly superintendent of the Hall D. Cravath estate.

Peter Morrison has become head gardener to Hamilton Kean at Elberon, N. J.

Karl Bauch is now gardener on the Mrs. Charles Kohler estate at Suffern, N. Y.

Carl Peterson has become superintendent of the Henri Bendje estate at Great Neck, L. I.

Robert Marshall has become superintendent of Planting Fields, the estate of W. R. Cole at Oyster Bay, L. I. Mr. Marshall succeeds Arthur E. Thatcher, formerly of the Arnold Arboretum in Boston and the Bar Harbor, Me., Nurseries. Mr. Thatcher has gone to England.

**Following up Sales.** There are some marked differences of opinion in the nursery trade concerning the extent to which nurserymen should follow up their sales. The president of the American Association of Nurserymen has said in a public address: "The nurseryman must deliver to the planter or to the transportation company as the case may be good trees in a healthy and vigorous growing condition. The nurseryman's duty and responsibility should end there. He has already taken his risk with the elements and natural enemies for three or four years in producing those trees. It is not up to the nurseryman to carry his responsibility on over and into the back yard of the planter."

In his recent much quoted address Mr. John Watson takes sharp issue with this statement. He declares that it is up to the nurseryman to follow his stock until it is not only planted, but growing and thriving. He quotes with appreciation the advice of former Secretary of Agriculture Meredith as follows: "When you make a sale, follow it up and ask the man if he has planted that stock at the right time; if he is using an insecticide, suggest that he spray the stock; if it needs to be covered in winter drop him a note and say 'Don't forget to cover up that stock you bought'."

Now there ought to be a great deal of unanimity of opinion in this respect if it was realized that follow-up work is not done out of philanthropy or pure good will. It is done with a definite purpose to create more business by establishing close personal relations between buyer and seller. There are some nurserymen, to be sure, who seem to argue that if most of the trees die, so much the better for the nurserymen, because the garden maker will have to buy more. That is about as iniquitous a line of reasoning as can well be conceived. The garden maker may buy again, but it will be from some other nurseryman. On the other hand, the nurseryman who can gain the confidence of a customer is going to keep him and win many of his friends.

No one expects all trees to live. The percentage of loss is always certain to be much larger than one could wish for the good of the business. But this percentage will be less if the follow-up system is maintained, and what is more, the customer will be much more likely to accept the responsibility for whatever loss may come.

Some people have the idea that the follow-up system means simply sending along additional advertising matter in an effort to make another sale. In its best development it is a series of more or less intimate communications, brief preferably, and breezy if possible, but designed obviously to be of service. The customer who is handled in this way will be in the right frame of mind to make use of the next catalogue you send him.

---

**Chamber of Horticulture.** While the question of a Chamber of Horticulture is being discussed in a tentative way in the United States, Canada is going ahead with a similar plan. A largely attended meeting was recently held in Toronto to discuss the establishment of a Canadian Council of Horticulture, and a provisional constitution has been drawn up. A committee has been appointed to draft a proposition for the establishment of a medal of honor in horticulture.

The nurserymen in the United States are particularly keen, apparently, for the development of some such institution in this country as that which is proposed across the line. Many members of the S. A. F. have also given their approval. With such a Chamber, representing all of the horticultural interests of the country, which would include, of course, fruit growers and similar lines, much could be done to mould public opinion and secure the support of legislators in a way which would be of immense advantage to the trade.

---

**Thoughts by the Way.** To what shall we attribute the present good business in flowers at a time when there usually is stagnation? Isn't it fair to give a little credit to good publicity work.

The splendid co-operation of the F. T. D. in making the Indianapolis show a success will not be forgotten. It is the kind of co-operation that counts.

We see a few florists' automobiles that are not a credit to the trade. The public is likely to judge you by your machine. Keep it looking well.

We haven't heard so much greenhouse talk in many months. It isn't all talking either. The contracts are being signed.

# GRAFTED ROSES

## OLD STORIES

Myth and legend add much to the pleasure we take in our flowers and trees. We like to find the four-leaved clovers and the even-ball leaves for the good luck they bring us. When we see the poplar trees shaking at their boughs we recall the long punishment they have had for stealing the cup which Hebe lost in the forest. The quivering aspen tree still silvers for legend says it was the wood of the cross. The birches are clad in white for they hope Orpheus will return to play to them that they may dance and make merry in the forest.

Longfellow's poem brought to the nursing of the Yankee soldiers in the Civil War. We do not associate with these lilacs the name of syringa, which, as children, we gave to the sweet, white blossoms picked in our grandmothers' gardens, now known as the Philadelphus.

Many stories gather about our little pansy known to Germans as the stepmother, from the story she told to children of her taking the two green chairs but were leftovers and the French we like to connect these pretty pussy-faced blossoms with heartsease and thought. Epigaea repens is a lovely dainty little flower nestled under its rusty green leaves, but all the attention which is being given to the arbutus this winter comes largely from its being the May flower loved by the Pilgrims the flower of Priscilla and John Alden, now the floral emblem of our state, the grand old Commonwealth, of Massachusetts.

M. B. CASE

Hillcrest Gardens, Westerly, R. I.
February 26, 1922.

## NOW FOR INDIANAPOLIS

### National Flower Show Opens Today—Big Attendance Promised

The National Flower Show at Indianapolis opens today, March 25, under auspicious conditions. In spite of the cold from Cleveland, Toronto the country ever have united in the success of the show and a big attendance is certain.

In addition to the large and prize being offered by the Society of American Florists and Ornamental Horticulturists the American Rose Society, the American Carnation Society and other affiliated organizations, special prizes are being offered by many individuals and business concerns.

The official schedule of time calls for the following events on Saturday, March 25 by garden growers: Parade of flower trucks and floats; horse and automobile parade; judging of prizes; visit to gifts and talk; the famous motorcycle, open cockpit, no windscreen parade; prizes for flower balls in flower trucks and automobiles; awards; prizes and flower parade; prizes in gifts and talks. Monday, March 27, the most attractive for amateur and commercial growers; awards available. Tuesday, March 28, judging of premiums by private growers, open amateur and commercial growers. Wednesday, last day for display; awards and available to private and commercial growers. Thursday, March 30, display of commercial and private growers. Friday, March 31, awards closed.

# PLANTS

## FOR THE HARDY GARDEN

We have a splendid collection of the following varieties suitable for spring planting.

IRISES LILIES LARKSPURS
CAMPANULAS HOLLYHOCKS PHLOXES

Also Conifers and other Hardy Shrubs. Over 100 acres devoted to Nursery Stock. A complimentary copy of our 1922 Garden Annual mailed on request.

**R. & J. FARQUHAR COMPANY**

6 SO. MARKET STREET BOSTON, MASS.

# RAMBLING OBSERVATIONS OF A ROVING GARDENER

I find much satisfaction in the fact that some of the growers are giving attention to the wonderful Kurume azaleas from Japan, which ought to prove of no little value commercially, as well as for forcing in private greenhouses. I think the Dreer exhibit at the New York Flower Show opened the eyes of many people to the value of this azalea. Now I find that Mr. Alphonse Pericat, the well known orchid grower of Collingdale, Pa., has also developed a good stock of these azaleas. Many florists have been asking where they can be obtained, and it has been difficult until now to give them an answer.

I presume that other growers of these fine plants are accumulating stock in different parts of the country, just as nurserymen are quietly building up their supply of Regal lilies. Naturally, however, those nurserymen who have been forehanded and enterprising enough to get an early stock will get the cream of the trade. The Kurume azaleas have a wide range of color, varying from white to pink, rose, cerise, lavender, mauve, magenta, salmon, vermillion and bright red to deep scarlet. They are wonderful plants, and deserve widespread popularity.

---

The catalogue of Joseph Breck & Sons, of Boston, which always comes like an old friend, appears in a new dress this year. The cover is symbolic of one hundred years, during which the firm has been doing business. In the background the North Market Street building is seen, while in the foreground an out-of-door picture suggests the Breck Robinson Nurseries at Lexington. In a foot-piece is a very interesting sketch of the Faneuil Hall and Quincy markets.

It is a big book, but gives much space to garden and farm implements, as well as to plants, seeds and bulbs. An interesting feature is a table of contents so carefully worked out and subdivided that readers can turn almost instantly to any article which they may be seeking. The firm stars seeds and plants which they particularly recommend, a helpful idea.

In the novelty pages seeds are advertised of the Kurume azaleas now coming into popularity. Grown from seed, these azaleas will produce flowering size plants in about three years. Many growers will be very glad to learn where seed can be obtained. Seed is also offered of Acacia Baileyana, which has been much in evidence in the florist shops this year.

---

It has seemed to me that nurserymen do not always take advantage of local opportunities for increased business with churches, club houses and the like. Many organizations, religious and otherwise, are willing to spend money in beautifying their grounds if the matter is put to them in the right way. I am reminded of this fact by a newspaper item concerning the dedication of the grounds of a Methodist Church at Babylon, N. Y., which has been greatly beautified by the Hicks Nursery. The dedication of the grounds was an original feature, and took place at an evening service. All about the church evergreens and flowering shrubs had been arranged, and the expense was borne by one of the Sunday School classes.

---

The friends of T. J. Behrens, of the Retreat Greenhouses, Oxford, Ohio, who have seen the new white rose, Dorothea, recently registrated by him, believe it has a great future. Mr. Behrens has been working for two and a half years on the production of this rose, which is a cross between Ophelia and Columbia, two old standard favorites. The new rose has ninety-two petals, and is said to be one of the most perfect and beautiful roses ever produced. Mr. Behrens now has twenty plants which he expects to increase to four hundred by next spring, and is said already to have received an attractive offer for the rose from one of the state's biggest florists.

It is interesting just now, while Hamamelis mollis, the Chinese witch hazel, is in bloom in the Arnold Arboretum, to read that this plant has just been given the first award for garden merit by the council of the Royal Horticultural Society. This award is to be given for ornamental plants of proved and outstanding excellence for garden decoration. Hamamelis mollis, as it grows in the Arnold Arboretum, is truly a handsome and remarkable plant, the best of all the witch hazels, not excepting the Japanese species. It produces fragrant, golden yellow flowers in profusion, in clusters along last year's twigs.

The Wonderful Kurume Azaleas
Both Plants and Seeds are Now Available

# George Watson's Corner

"You in your small corner and me in mine."

Like many other Quaker City folks the writer had to make a flying visit to the New York Show. It was a grand show and a great credit to everybody taking part in it. The New England and Pennsylvania exhibitors especially are worthy of praise for their good work. They rose grandly against the local spirit, and not only that, but they are to go further and keep the good thing going at the Indianapolis celebration—which, of course, will be even more country-wide in its showings.

The exhibitors at the two great shows, coming so close together in March, New York City and Indianapolis, are largely the same people—although the audiences are entirely different. Great results follow in both cases. We must extend our grim sympathy, however, to those hard workers; and while they hustle and sweat—and the rest of us sit around and smile—they have the satisfaction of knowing that their reward will come along in due course. When that happens the smile will be on the other side. Then it will be: "Hah! what will you have: one of these specially nice fifty-cent cigars"; or "Hah! how would you like to take a trip down to the Bahama Islands with me? My yacht is down at the wharf now, and we could sail tomorrow or next day." Oh boy! Let's walk down Picadilly!

Billy Stephens (alias Burton's Billy), a well known figure in the cut flower market here for a quarter century, is still on the job, and hale and hearty—even if whiskers are turning grey. He is an active cog in the Berger wheel and a welcome visitor every day among the retailers. He has been with the Berger Company now for a good many years, and is highly esteemed by his employers for faithfulness and efficiency.

Emil Wohlert, who used to run a florist place down Swarthmore way, is now associated with his brother, A. E. Wohlert, in the landscaping line at Narberth.

Philip Freud of the Michell forces has been laid up with the grip for five weeks. He is back on duty again, and has already got two new window masterpieces bringing in the dollars. He has been thirty years on his job, and we all hope he may stay another thirty.

George Burton commends our comments in a recent issue on the best way for a grower marketing his flowers. He says he has been shipping to the Leo Niessen Co. for the past twen-

IRVINGTON, N. J.

ty-two years, and still sticks to them—in spite of all temptations. George is a son of his father, and a wise guy. He also thinks that the wholesalers should stand strong for Horticulture, after the fine way it has stood up for them. Verb sap. It ought to be two full pages or something like that the next time, Hugo. We need the money.

The seed stores are busy at last. Six deep at the counter, except on a rainy day. No more Saturday afternoons off for the sporting element for a while.

We passed a little joke along to our lawyer friend, Dan Donahue, last issue. He simply smiled and said, "Hm, have you made out your income tax sheet yet?" We said nothing, but a friend at my elbow said, "By gorry, how about this one of mine." So the two of them got busy on it and after half an hour they were shaking hands in the most cordial manner. After we got down into South Penn Square, I said, "Well, how did you like Dan?" "Say, George, that's the smartest lawyer in Philadelphia. I've saved twenty-seven dollars and fifty cents from that little talk, and I thought I had the thing down to a fare-you-well." The point to this is, never be too sure. Consult Dan.

The Clement will was probated at Palm Beach March 8th. The estate is stated in value as a million dollars and over, and, outside of bequests to relatives, is left in trust to the testator's widow, who lives at the home farm in Hempstead, Long Island. The Captain was a great lover of roses and had a fine collection of them at his three estates: Hempstead, Castine, and Palm Beach.

The William Henry Maule Co. is issuing a strong incentive to all the wide-awake growers the world over. The reputation made by the founder of the Company is being upheld by his successors, and his high ideals are theirs. Their 1922 catalogue is an inspiration for all who go in for gardening—whether wholesale or retail. This splendid publication, which tells the whole story of horticulture up to date, is free for the asking. Ask them for a copy.

The Acacia is having its usual innings at present, the lovely yellow sprays bringing up old remembrances and traditions which have come down to us from ancient days—from Hindostan and Egypt and Armenia, down the more recent days of the Christian Era. The variety most seen at present is A. pubescens.

*When writing to advertisers kindly mention HORTICULTURE*

The latest issue of the National Nurseryman, a monthly representing the nursery interests, is worthy of high commendation. It contains many interesting articles on the development of landscape work, and practical suggestions for active workers in all departments. The editor, Ernest Hemming, is a past master in his line, and has an international reputation as a nurseryman and landscape gardener. He knows what to put in his monthly, and what to keep out. Not from the printer's standpoint—which is generally based exclusively on the advertising part of it; but from the higher standpoint of the advancement of horticulture. The latter, of course, brings the advertising in natural sequence—and brings it legitimately. When you note a good thing—talk about it. Boost it. So we say: all hail to the good N. N.

Mark Mills of the W. K. Harris Co. misunderstands me a little. I do not object to green. I love the shamrock. I love everything green that's natural. Green grass, green trees, green everything. Sure. Everybody does. That's not the point. The point is that I object to a green carnation. It isn't beautiful. It's an outrage. A perfect white carnation is one of Mother Nature's greatest masterpieces, and we all bow in reverence before it. If some wild beast rushes along, and splashes our idol with green mud, just to affront us, we have a right to go for him, hair, toe nails, and blood! Dye is all right in its proper place. But it must be true to nature. Nature abhors an outrage and a green carnation is an outrage. Down with it. Down, down, down, down, down among the dead things may it lie!

### GENERAL NEWS.

J. L. O. Quinn & Co., florists of Raleigh, N. C., have sold their business to the J. J. Fallon Co., of Lynchburg, which will continue it at the present stand.

The Floral Nursery, Inc., at New Kingston, Pa., near Harrisburg, is planning to build a new range of greenhouses, including a plant house, two carnation houses, a chrysanthemum house, and a house for sweet peas and roses. While this concern was incorporated only last spring, it has developed rapidly.

## THE TALK OF THE TRADE

From my observations through a good part of New England and New York state, I am forced to say that there is a larger amount of poor lilies this season that I have ever seen. There are some good lots, fully as good as we have had in recent years, even though they are not up to the pre-war standard. But the growers with the good lots are the exception. The main difficulty is short stemmed plants. Added to that is the low count and more than ordinary amount of disease, bringing the lily question this Easter to the point where there seems little doubt about everything being cleaned up readily at fair prices.

I am forced to the conclusion that there is a very good reason for this low quality of lilies. The Giganteums in particular are below standard. It has been a matter of discussion for some time past among men who should know the inside facts of lily importing and lily culture, and it seems to be the opinion of these men that the trouble is mainly due to unripened bulbs. For instance, the Formosums, which arrived the earliest and were started right along, did not begin to give the same satisfactory results as those which came in on the later shipments and were started along slowly.

Admitting that the Japanese farmer is digging the bulbs before they are thoroughly ripened, I don't think that the blame should be entirely laid at his door. It's true there are some growers who, realizing the conditions, will ask when placing an order for lilies to have them shipped from the later arrivals, and even then hold them back, sometimes putting them in cold storage for two weeks or more, before planting.

On the other hand, there are growers who make the one important stipulation in placing their lily orders that they must be shipped early. They don't seem to realize that that is where they are making the mistake. It must be well known to any grower of bulbs that the earliest stock shows the greatest percentage of sick bulbs, lowest flowering results and poorest quality. With lilies, whether they be Formosums or Giganteums, the earliest stock has surely shown the poorest results. The grower, who is satisfied to take lilies from the later shipments and start them along slowly, has benefited decidedly from this method of treatment. December 10, for instance, this year, was not too late to start Giganteums and get good results. This stock came along with better stems and higher count than that which was planted earlier.

I believe, though, that we are promised better days in the future. From this year on there will be increasing quantities of lilies, and within a very few years the Japanese lily farmer will have caught up on his stock, so that there will be ample supply, and of course that will mean that the price will come down. Probably not to the old pre-war figure, but possibly half way between that low cost and the present high cost.

With plenty of stock available it will become more necessary to see that this stock is harvested in a way that will assure good results. Otherwise it will mean a loss of business for the importer bringing in stock not sufficiently ripened.

Here is the way in which the Boston Traveler gives Henry Penn a nice bit of free publicity:

"HENRY PENN—this is the name that goes with that mammoth quill pen and the slogan, 'Say it with flowers' is celebrating the 15th anniversary of his birth today, away out in Indianapolis. He didn't go out there to celebrate, because the ban on celebrating is no less complete there than it is here in puritanical old Boston, but it happens that the annual national flower show is opening there today, and since he is one of the high lights in that organization the show couldn't go on without his presence. No, he doesn't say that he originated the now popular and much parodied or paraphrased slogan, 'Say it with flowers,' but he was the first to use and popularize it, since when he has striven to have all the members of the flower association employ it. It

is one of those phrases that have 'caught on,' and it promises to hold on indefinitely.

"Mr. Penn has done more than to popularize the giving of flowers, much as that is to his credit. He has done important work in pushing good citizenship campaigns throughout the United States, and in aiding in uplift work. It may be a good deal like 'carrying coals to Newcastle,' but we hope somebody will remember to send 45 roses to greet him at his desk when he returns from the 'Hoosier State' on Wednesday."

When in Fall River recently I was much interested to find that Mr. Warburton was forcing a considerable number of Spanish iris from California grown bulbs. He is among the growers who have been very successful with these bulbs, and who find the California stock entirely satisfactory. It has been necessary to learn how to grow them, however. What would be called a forcing temperature has been avoided. The bulbs have been flowered in a house which has been

kept cool from the start. They threw up a great crop of grass which presently fell over in rather discouraging fashion. Then, however, flowers began to come, and have continued to bloom profusely. The blooms have had a fine sale in the Fall River trade, and Mr. Warburton likes them very much.

It's seldom one sees a better lot of Baby Ramblers than those in the greenhouses of Mr. W. W. Hannell, Watervliet, N. Y. They are well grown in every way, timed perfectly for Easter, foliage and flowers well colored, showing they haven't been forced too much. The entire stock all the way through is of even form, heavily budded, and I think just about as well as one can do it. Mr. Hannell also has a nice lot of hydrangea, just about the stage to reach Easter right.

Mr. C. S. Strout and his wife, of Biddeford, Me., are back home from their southern trip which was begun immediately after the Hartford Show. They bring with them two handsome silver cups which testify to the skill of Mr. Strout on the links at Pinehurst.

The many friends of Mr. P. Welch, pioneer wholesale florist and former president of the S. A. F., will be sorry to learn that he is seriously ill at his home in Boston.

## APPOINTMENT FOR FLORIST

### John F. Dowd Secretary of Boston Americanization Committee

Florists of Greater Boston have been much interested in the announcement that John F. Dowd has been appointed by Mayor Curley secretary of the Americanization Committee, with headquarters at City Hall. When Mr. Dowd entered his new office he found his desk piled high with floral tributes from his friends in the trade. Conspicuous among them was a huge floral horse shoe from florists in the wholesale district.

Mr. Dowd, who is still a young man, has been in the employ of Galvin, Inc. for more than ten years, much of this time as a buyer for both of the Boston stores. Mr. Dowd, who lives at 24 Clarence street, Roxbury, will have a salary of $3,000.

John F. Dowd at his desk

## ALLIANCE IN SESSION

### Important Meeting at the City Club in Boston—By-laws to be Revised

More than forty florists attended the meeting of the New England Florists' Alliance held at the City Club, Boston, last Saturday night, in spite of the fact that one of the worst blizzards of the season was raging. The attendance in itself was enough to show the interest of the members. W. H. Elliott presided, and Secretary Eugene M. Naukam was at hand to answer questions. As a matter of fact Mr. Naukam spent most of the evening on his feet, as there were many matters upon which those present sought enlightenment. Mr. Naukam reported on national publicity work, and then reviewed the work of the Alliance. He said that seventy per cent of the original members had sent in their reports, which constituted a very good showing. Compliments had been received, he said, from florists in other parts of the country who were watching the Alliance and its progress. One particularly good letter had come from Mr. J. F. Ammann. About six hundred dollars has been collected so far in assessments, he said.

During the evening every florist present was called upon to express his opinion of the situation, and many important points were brought out. The two matters which seemed most in the minds of the members had to do with parts of the by-laws, and the attitude of the salesmen in the market. A vote was passed authorizing the board to re-draft the by-laws and to report at the next general meeting, to be held after Easter. It may be that the new by-laws will provide for a representative of the salesmen on the board of directors, providing they will form an organization of their own and present candidates. According to some of those present, the salesmen, by refusing to come into the Alliance, will hurt themselves as well as hurt the success of the movement. Secretary Naukam expressed himself as perfectly willing to make another attempt to meet them in the market, although previous attempts have been wholly without success.

Mr. Fred Palmer, of Brookline, was warmly applauded after Secretary Naukam had outlined the way in which Mr. Palmer figured his reports, taxing himself in every way possible with justice to himself. Mr. Palmer said that he believed in carrying on the flower business in a systematic way, and that he had been thorough-

ly convinced of the benefit of a generous advertising campaign. He had organized an advertising department in his own business, and believed that much of the demand for flowers during the last few years had come from the national advertising appropriation.

### FLOWER MARKET SITES.

#### A Location In Park Square Seems to be Most in Favor

Some twenty sites have been looked at by the committee which is to recommend a location for the new quarters of the combined flower markets. Nearly half of these sites were in the vicinity of Park Square, and a large majority of the florists seem to favor the erection of a building in this part of the city.

The general opinion seems to be, also, that the corporation should own its building rather than renting a marketplace any longer. To all intents and purposes the two markets are now united as an organization, although they will retain their separate locations until the end of the year, by which time the new building must be ready for occupancy, owing to the expiration of the lease of the building where the Flower Exchange has its present quarters. Many details yet remain to be settled.

The report of the committee on a new location is expected to be made shortly, and probably there will be a dinner to celebrate the event as soon as a definite plan has been adopted.

The committee consists of nine members, with Mr. William H. Elliott as chairman. It includes the original committee of three from the Growers' Association, consisting of James Wheeler, Gordon Fisher and William Sim. Working with it is a committee of three from the Co-operative Market, consisting of Edward Wood, Thomas Roland and Mr. Elliott, and three from the Exchange Market, W. C. Stickel, Andrew Christensen and Allan Peirce.

### BOSTON NOTES

The many friends of Mr. Ivar Ringdahl will be interested to know that he recently lectured on the culture of Christmas and Easter plants before the students at Cornell University. For fourteen years Mr. Ringdahl was in charge of Thomas Roland's pot plant department, but now is in business for himself at Rome, N. Y.

# THE CUT ROSE OUTLOOK

## Mr. Charles H. Totty Writes About the Business Situation and the Newest Offerings

In the American Rose Annual for 1922, Mr. Charles H. Totty, of Madison, N. J., is given a prominent place, with an article on the rose cut-flower outlook for 1922. As the editor, Mr. H. J. McFarland, says, no one is better acquainted with the place of the rose in the cut-flower market than is Mr. Totty, who is the treasurer of the Rose Society. Mr. Totty's article in part is as follows:

"The rose is really the fundamental basis on which the bulk of the cut-flower business is conducted. This applies both in volume and in the value of the flowers sold every day. While it is true that the rose never loses its hold on the public mind, at the present time the rose is more popular than ever. This situtation has been brought about, of course, by the fact that the new introductions coming in every year maintain interest.

"There is no doubt but that the popularity enjoyed by the carnation several years ago was caused by the advertising and publicity afforded it by Thomas W. Lawson. That period however, has passed. Now the rose cut-flower men are alive and active, and to my mind represent the progressive end of the florists' business They are the men who talk 'cost of production,' 'returns per square foot' and other terms, well known to the efficiency expert but not so often understood by the florists.

"Christmas, 1921, was marked by a large supply of long-stemmed flowers in the market, which did not, however, bring nearly the prices of recent years. The 'pinching' business, that is to say, the blooming of the plants that had been 'stopped' to produce quantities of flowers for Christmas, had been slightly overdone. The growers of our acquaintance who had large crops for Thanksgiving, getting then comparatively poor prices for their flowers, did not come in very strong by Christmas, but came in with a wonderful crop again the last two weeks in January when the market was bare of good roses on account of the Christmas pinching, and then secured good results.

"The lesson of last Christmas is, that the long-stemmed, expensive rose-supply can easily be overdone. While the demand at such seasons is for medium-length stem, or what is known in the parlance of the trade as 'No. 1' and 'Extras'—a demand that is practically unlimited—there is only a very limited call for the extra long-stemmed roses. The wise grower observes the signs of the times and governs himself accordingly.

"A variety such as Columbia, for instance, gives stems amply long enough for all average purposes without any pinching whatever, and this should be borne in mind by all growers.

"Another outstanding fact is, as we predicted two years ago, that Mme. Butterfly has taken the place of Ophelia in all of the large markets. It is a much kinder, a stronger grower, and several shades better in color. Every day one notices in going around the

## THE FLOWERING CRABS
(MALUSES)

The Flowering Crabs have few rivals among the gorgeous spring-flowering trees and shrubs. At the Arnold Arboretum one of the important events of the year is the blooming of the Crabs followed by the showy fruit.

Of easy culture, and planted singly or in masses give remarkable and quick results. While beautiful on the small lawn Flowering Crabs are used to the greatest advantage on a large scale in woodland and other mass plantings, as are Dogwoods and Hawthorns. No group of plants have greater value than the Maluses for enlivening open forest parks and country roadsides; they present striking effects when planted on parking strips of boulevards or wide city streets.

Boxford-Highlands Nursery offers the finest varieties.

Send for Catalog of Hardy American Plants and Specimen Evergreens.

market that until Mme. Butterfly is sold, there is little call for Ophelia. Yet I do not want to decry the wonderful influence that Ophelia has had on the cut-flower industry, for I must note that Mme. Butterfly, Columbia and the wonderful new Hill's America are all children of Ophelia.

What is new? Next year it will be Hill's America. When we say this variety is going to supplant Columbia in the markets of the country, it sounds like a tall story, now that every grower knows how to grow and cut Columbia. Not so long ago, when Mr. Hill distributed Columbia, and we in our humble New Jersey way collaborated, the complaints were long and loud regarding it. It would not produce perfect buds; it was this and it was that, and the retailers predicted it would never make a cut-flower success. That, however, is now ancient history, for Columbia rapidly climbed to the top.

"This fault is entirely overcome in the case of Hill's America. Not a single flower have we seen malformed or flat or disfigured in any way, in our test of this variety. This alone stamps it as an advance over Columbia. The bud is long and pointed, a feature that always gave Killarney most of its charm as a beautiful rose. It is for these reasons that I predict that Hill's America is going to chase Columbia out of the market.

"How is Angelus progressing in the market? Here we have a curious condition. For years the only white rose that could be sucessfully handled was White Killarney, which for a while was very productive. This eventually produced Double White Killarney, which is a wonderful variety where it can be grown without mildew, although it is not free-flowering. Therefore the growers have been looking for a white rose that would be free and clean-growing. Then the 'flu epidemic came in the fall of 1918, and what up to then had been the almost invariable custom of sending only white flowers to funerals was changed. Any flower, regardless of color, was gratefully accepted on account of the scarcity. This fashion of using different colored flowers for funerals has been continued up to this time, wherefore the florist is no longer obligated to grow white roses. Consequently, the strong demand for a good white rose is no longer with us.

"Red roses are still in a very satisfactory condition. Crusader enjoys a measure of popularity in some markets, and Hadley also, but the latter produces so few flowers that it is hardly worth growing. We hear stories of wonderful red seedlings from the North and West, and there is no question but what one or two good red roses could be well taken care of. Just at present one must be satisfied with either Crusader or Hadley, until something better presents itself. Milady is also well received by some growers.

"Some of us believe that rose growers can look to the future with more equanimity than can any other branch of the profession. Their product, when well grown, always has the pull on the market, and I believe this condition will continue."

## NEW ENGLAND NOTES

W. T. Walke, of Salem, reports nearly seven thousand lilies in his greenhouses this season. The recent addition to Mr. Walke's greenhouses has given him a large amount of extra space.

Dr. Frederick S. De Lue, originator of the Golden Giant sweet corn, has made arrangements with C. S. Clark, of Wageman, Ohio, to grow this variety in large quantities. Beginning with the present season, Mr. Clark will have the exclusive handling of this corn for the wholesale trade.

## MASACHUSETTS HORTICULTURAL SOCIETY

The following exhibitions have been announced by the Mass. Horticultural Society:

May 4—11. Special Exhibition of New England Wild Flowers and Wild Ferns.

June 3—4. Rhododendrons, Azaleas, Irises.

June 17—18. Peony Exhibition.

June 24—25. Roses, Strawberries, Sweet Peas.

August 12—13. Gladiolus Exhibition.

August 26—27. Exhibition of the Products of Children's Gardens.

September 9—10. Dahlia and Fruit Exhibition.

November 4—5. Autumn Exhibition, Chrysanthemums.

## NEW STORE IN NEW BEDFORD

The opening of the new flower store of H. B. Sowle, in the Jacob Building, New Bedford, was made a momentous occasion by the many friends of both Mr. Sowle and his son. Among the floral tributes at the opening was a six-foot horse shoe of red carnations from H. M. Robinson & Co., of Boston. The Neidinger Co., of Philadelphia, sent a standard of American Beauty roses on a pedestal, with a canopy concealing an electric light over the top. Mr. Sowle, whose main store has been located on Ashland street for thirty-two years, is naturally well known throughout New England.

## NEW ENGLAND

J. J. Gagnon is erecting an addition to his greenhouse at New Haven, Ct. It will be 40 x 150 feet, and cost $4,000.

Abram Benbow is to re-open his flower shop near the Village Green at Norfolk, Conn., next month.

Miss Clarissa Fullerton, of the West Elm Flower Shop in Brockton, has been visiting in New York.

Fred R. D. Pulsifer and Mrs. Esther F. Kendrick, his sister, have begun remodeling and expanding their plant at 231 Washington St., Gloucester. The Pulsifer Nursery was started by the present owner's grandfather. Edwin Bray will stay with the new organization as foreman.

E. L. Bradley, of Lenox St., New Haven, is to increase his gladiolus and dahlia business, with which he has been very successful.

RAIN WHEN YOU WANT IT

7 GRADES
7 PRICES

When you get a price from anyone on a watering system; know **what it stands for.**
Make sure you surely know **exactly what you are going to get.** Get your dollar's worth. Get a system with years of reputation back of it as your guarantee. The Skinner System has over a score of years back of it.
If it's a price basis you want to buy on, we have 7 grades and 7 prices to choose from.
The highest grade costs just twice as much as the lowest.
All 7 grades, however, have the following standard Skinner System features.

1. All pipe best quality galvanized.
2. Accurately drilled at 3 feet intervals.
3. Patented Silver Stream Nozzles throughout.
4. Globe Valve for pipe connections.
5. Brass flush valve for end of line.
6. Roller bearers for wood or pipe posts.

So, when you get a price from anyone, know what you are getting, **besides price.**
We sell you a watering system, but what you really get is satisfaction. Guaranteed satisfaction.

Discount on Contracts for consecutive insertions, as follows:

Three months (6 times), 10 per cent; six months (12 times), 20 per cent; one year (24 times), 30 per cent.

Page and half page space, not consecutive, rates on application.

SUBSCRIPTION RATES:

One Year, in advance, $1.00; To Foreign Countries, $2.00; To Canada, $1.50.

**The Easter Cover.** There is special significance in the cover used on this number of Horticulture, because the lilies illustrated there were grown from American bulbs. These bulbs were grown at Orlando, Fla., by Mr. Fletcher, formerly a florist in Waltham, Mass., where he was well known as an expert Antirrhinum grower. Mr. Fletcher sent the bulbs to the Secretary of the Gardeners' and Florists' Club of Boston, with the request that he experiment with them, to see how well they would force in the North. The result was most satisfactory. The plants grew very tall, with good clean stems and flowered very freely. They were far ahead of most of the Giganteums seen.

It is pleasant to thus find support to the claim of the government that lily bulbs for forcing can be grown successfully in parts of America. Nevertheless it is not to be assumed that a commercial industry will result. Experiments in forcing American-grown bulbs on anything like a large scale have proved far from satisfactory. Invariably so far as we can learn the bulbs have shown an entire lack of uniformity in their habit of growth and in their flowering. Houses have shown plants of all sizes, and the flowering period has varied by months.

Moreover, the bulb growing industry in Japan has become so nearly normal again that bulbs will soon be available in plentiful quantities at much cheaper prices than they can possibly be grown for here. It is to be feared in some quarters that the Federal Horticultural Board is planning to ban lily bulbs under the pretense of fostering another home industry. Let us hope that misgivings along this line have no basis in fact.

---

**The National Show.** Now that it is over, there are still some people who believe that postponing the National Flower Show until next year and holding it in Cleveland would have been a wise plan. Nevertheless, the show at Indianapolis was a distinct success, and the unsparing efforts of the western florists, aided by equally energetic labors on the part of many from the East, deserve nothing but praise. One thing is certain, the people of Indianapolis were privileged to witness an exhibition such as was never staged in a city of that size before. The way in which they responded, too, brought no little satisfaction to those upon whom the burden of the show's success rested.

One feature of the affair much commented upon was the very exhaustive reports in the newspapers. Publicity was given without stint. As a result the show benefited, and furthermore the city itself benefited, getting a vast amount of advertising throughout the country.

Another feature to be commended was the part taken by the retail florists in putting over the big show. The spirit of co-operation and whole-souled helpfulness which they showed might well be emulated in the East, where retail florists as a rule are likely to be lukewarm in their support of the shows. The retailers can do more than any other class of people, probably, to increase attendance. They did their part nobly at Indianapolis.

---

**A Lilac Walk.** Mayor Curley of Boston has a proposition for a five-mile walk in the park system to be bordered with lilac bushes. This is a fact to be borne in mind by firms having a plentiful supply of lilac stock to dispose of. It is a serious question, though, whether such a proposal has much to recommend it. To be sure, there will be a fine burst of color for a short time, but there will be scale to fight for the rest of the time and the very difficult problem of keeping the public from helping itself to the flowers. That particular part of the parkway will be crowded for a brief period and neglected the rest of the year.

How much better to make a planting that will give color and cheer all the months of the year, flowers from Spring until Fall and bright berries through the winter. Then there will always be something of beauty to enjoy. If one is particularly fond of lilacs he can find an annual display in the Arnold Arboretum such as is not easily matched.

The city has a perennial bed in Franklin Park that is very well done and very effective. If more people knew about it and how to reach it, it would be a source of no little pleasure. A similar diversity in shrubs would be equally well worth while.

And why not keep to good earth walks after all? Isn't it possible that people get enough of cement walks in the city proper? Let us have real earth to walk on in the parkways. If there is any mud, it is only for a very few weeks, and it would not be at all beyond reason to put down temporary board walks. Walking down a five-mile lane of lilacs on a cement walk has a pretty artificial suggestion. In fact, it does not sound at all inviting.

# GRAFTED ROSES

## CHANGES IN AND AROUND NEW YORK.

Several New York stores have found it necessary to add to their staffs recently, either to meet the demands of a rush of early spring trade or as a phase of their steadily increasing activities. Carter's Tested Seeds, Inc., of Barclay street, has taken on E. P. Prince in the flower seed department and W. E. Atwood in the general inside and outside sales department. John Kriens has joined Rynveld Bros. of 1123 Broadway as eastern traveling man. And Colin Timmis, formerly of A. T. Boddington's, is now in charge of the flower seed department of the William M. Hunt Company store.

Meanwhile, out on Long Island, Charles Donahue, who for a number of years has been connected with John Lewis Childs, Inc., announces that he has opened a flower, seed and plant store under his own name at 261 Jericho Turnpike, Floral Park, N. Y. With a quarter-century of experience behind him, he is now ready to hand out seeds, bulbs, flowers and plants as well as advice as to their care and the construction and management of gardens.

Almost simultaneously with the above, we learn that the Childs establishment, also at Floral Park, has opened a Horticultural Information Bureau and Department of Landscape Gardening. It solicits visits to its offices, grounds and greenhouses and the consultation of the expert landscape gardener who has been placed in charge of the new department.

## STANDARDIZED PLANT NAMES

We have a note from Harlan P. Kelsey, secretary of the American Joint Committee on Horticultural Nomenclature, to the effect that the pre-publication price of $3.50, $3.75 west of the Mississippi River, in Canada and abroad, for the official catalogue of standardized plant names, is good on all orders accompanied by cash, up to May. An extension of time was made necessary, as it was found impossible to get out the prospectuses to organizations in time for their members to avail themselves of the special pre-publication price.

## NEW ENGLAND

According to a newspaper report Louis N. Terages, of Waterbury, Conn., has sued Armour & Co. for $30,000, setting forth that he leased a cooler for the purpose of storing ferns, and that the temperature was allowed to rise to fifty-five degrees, with the result that the ferns withered and died.

Roy V. Peavey is manager of the new Sunset Flower Shop which has been opened at 45 Main St., Gloucester, Mass. Mr. Peavey was for nearly seven years connected with W. F. Barington, in the cultivation of plants and flowers. The new store is finished in white enamel, and is nicely equipped.

# Easter Plants

EASTER LILIES. 6-in. pots, 4 to 8 blooms, 25c per bud and bloom each.

HYDRANGEAS. Very best French varieties; pink, blue and white, $1.25, $1.50, $2.00, $2.50, $3.00, $4.00, $5.00, $7.50, $10.00 and $12.50 each.

ROSES. Tausendschoens and Roserie, $2.00, $2.50, $3.00, $3.50, $4.00, $5.00, $7.50 each.
Baby Ramblers, red and pink, fine for basket work, $1.50, $2.00, $2.50 and $3.00 each.
Magna Chartas, very good, $2.00, $2.50, $3.00 each.

BOUGAINVILLEAS, $5.00, $7.50, $10.00 and $12.50 each.

GENISTAS, 8-in. specimen plants, $4.00, $5.00, $7.50 each.

PANDANUS VEITCHII, 6-in., $2.00 each.

DRACAENA MASSANGEANA, 7-in. heavy, $4.00 each.

Cash with order, except from regular customers. Packing material charged at cost, and all goods travel at purchaser's risk and expense.

### TALK ON BULBS.

#### Mr. Chester Jay Hunt Heard at the Boston Flower Show

In connection with the recent flower show at Horticultural Hall in Boston, there were two excellent lectures on "Bulbs" by Mr. Chester Jay Hunt of Little Falls, N. J. Mr. Hunt was introduced by Miss Marion Roby Case, whose generosity makes these lectures possible.

In his discussion of daffodils Mr. Hunt said that the highest-priced bulbs were not necessarily the best. These bulbs were likely to be those which while scarce had proved valuable for breeding purposes and were sought by commercial growers on that account.

Mr. Hunt said that as a rule the varieties at the poeticus end of the list could be grown in heavier soil than those at the large trumpet end, and that they could thrive with more fertilizer and more moisture. He did not advocate organic manures for daffodils. He said that bassal rot did not spread in the ground and that it was not to be feared. It often affected bulbs during shipment, however, making them light and soft. Such bulbs should be rejected.

Daffodils of the lighter colors will endure partial shade. The poet's type and those with short trumpets are best for naturalizing. The double sorts and those with long trumpets should not be used for that purpose. Daffodils look best, he said, when planted in mixed borders or under and in front of hardy shrubs. Planting at the base of a house is to be avoided. The best time for planting is as soon as the bulbs arrive. If they can be put in the last of July, so much the better. If bulbs are to be lifted and held for replanting, the work can be done as soon as a third of the leaf has turned yellow. With the poet's narcissus, the leaf can be almost green. The bulbs should be stored in as cool and airy a place as possible. It is best to have them in shallow boxes which are not piled up, for the air must circulate freely among them. Do not store them in paper bags.

Sunday afternoon Mr. Hunt lectured on "Tulips," which he advocated planting among peonies or with shrubbery. He said that they were of special value in the garden, where quick results were needed. If scarlets and reds are omitted, it is almost impossible to go wrong in the matter of color. On one occasion he received many compliments on the beautiful color scheme in his garden, when he had simply planted the tulips alphabetically.

Mr. Hunt recommended deep planting, that is seven inches to the bottom of the bulb. When planting beds he liked to dig out the soil to the requisite depth and spread a layer of sand for the bulbs to rest upon.

He said that failures were due mostly to water on the beds, freezing of the beds and keeping the tulips too long in one place. Every six years the bulbs should be moved or the soil replaced.

Bulbs are ready to lift when the old flower stems can be wrapped around the finger without breaking. Tulips will grow in almost any soil but prefer that which is rather heavy, if well drained. No manure should be used. Bulbs will flower even if planted upside down. Curiously enough late

planted tulips are the earliest to flower. Election Day is Mr. Hunt's big planting date. Plant about the time the leaves are dropping for best results.

### THE AMERICAN ROSE ANNUAL FOR 1922

While several articles in this year's issue of the American Rose Annual just published are devoted to the commercial end of the business, more space is devoted to outdoor roses. There are several very valuable chapters on insect pests which visit roses and the kinds of soil in which roses grow best. Much attention is also given to black spot and mildew; a suggested remedy for mildew coming from Russia is a spray of bicarbonate of soda dissolved in water in the proportion of one ounce to the gallon.

The reproduction of Pres. E. G. Hill's paper read before the Philadelphia Florists' Club is an interesting feature.

A chapter on the staging of rose shows will be helpful to new societies. Several other articles deal with rose shows in various parts of the country, indicating their growing popularity. There are many high tributes to the late Walter Van Fleet.

As usual, the book is handsomely illustrated, the frontispiece being a portrait of Pres. Robert Pyle. Only the high spots have been touched in the book, which abounds in interest and value.

# PLANTS
## FOR THE HARDY GARDEN

We have a splendid collection of the following varieties suitable for spring planting.

**IRISES LILIES LARKSPURS**
**CAMPANULAS HOLLYHOCKS PHLOXES**

Also Conifers and other Hardy Shrubs. Over 100 acres devoted to Nursery Stock. A complimentary copy of our 1922 Garden Annual mailed on request.

## R. & J. FARQUHAR COMPANY
6 SO. MARKET STREET BOSTON, MASS.

### THE NEW PETUNIAS

A lovely group of pictures of flowers was shown in the early winter at Messrs. Doll and Richards gallery on Newbury Street, Boston. Miss Laura Hills had caught the very spirit of the flowers she painted, especially of the exquisite petunias of which there were several pictures.

A year ago I visited the garden of Mrs. Theodora B. Shepherd in Ventura, California, where I found many interesting succulent plants, the lilac-flowering fuchsia and the petunias. Some seeds sent to me from there after my return to Weston are now blossoming in the greenhouse. They are of the variety known as the Fluffy Puffers which well describes their fluted petals. There are a few off shades among them, but the loveliest are the Tyrian pink of Ridgway's color with a soft yellow eye. When cut they keep well as the buds open in water. Some placed deep in water yesterday had filled their stems so full that they were crisp and care had to be taken not to break them. They also have the delightful faculty of adapting themselves to the vases in which they are placed, which I have often noticed with snapdragons and nasturtiums.

M. R. Case, Hillcrest Gardens, Weston.
March 29, 1922.

### GENERAL NEWS NOTES.

Peter Morgen has recently returned to Huntingburg, Ind., from Roanoke, Va., and purchased the Siebold greenhouse which he formerly owned.

## EASTER SUGGESTIONS

Corsage bouquets are always largely in demand at this season. Look over your stocks and be sure you are well prepared. Our supplies of ribbons of all kinds were never finer and we can take good care of your orders at the lowest market prices.

Also our "Queen Mary" Corsage Shield as per illustration the ever popular and best on the market. Everything in Fancy Florists' Pins and all other Florist Accessories. Ask us for prices.

## VISITS BOSTON FLORISTS

### Annual Spring Trip of M. A. C. Students

The annual spring trip to Boston was made on Friday and Saturday, March 24 and 25, by students in floriculture of the Massachusetts Agricultural College, Amherst, Mass.

Early Friday morning a tour was made of the wholesale flower markets, including the Boston Flower Exchange, Boston Co-Operative Flower Market, Welch Bros. Co., H. M. Robinson & Co., and the B. A. Snyder Co. Most of the flowers seen here were of excellent quality, roses, sweet peas and carnations being exceptionally fine. The making of wire designs at H. M. Robinson's was particularly interesting and instructive. The florists' accessories, such as baskets, plant stands, ribbons, etc., commanded considerable attention.

After the visit to the wholesalers the next "attack" was made upon Penn, The Florist. The window displays were up to the usual Penn standard. One window contained handsome baskets of waxed fruits, artistically arranged and staged. The other window featured potted rose plants of Baby Rambler and Frau Karl Druschki, hydrangeas, and bulbous stock. Besides the interest in the potted plants and cut flowers for sale in the store, there was an opportunity to watch the making up of some sprays and baskets in the rear of the store.

At Houghton-Gorney's store pansies, bulbous stock and orchids were especially featured with several good specimens of acacias. California Eucalyptus and Redwood were here used for the backs of sprays. This certainly seemed novel and therefore particularly interesting.

Thos. F. Galvin's store on Park St. was next visited, and as usual "welcome" was written on the door-mat. The air of dignity, spaciousness and quality certainly predominated in this store. The cut flower and plant stock was excellent. American Beauty roses were in evidence together with Hoosier Beauty, Columbia and Ophelia.

Carbone's store on Boylston St. was of extreme interest because it showed some of the possibilities of other lines of goods which can be sold along with flowers. Garden furniture, antiques and artistic China were commanded their share of interest, together with flowers. However, the latter were not the least subordinated because of these side-lines.

That there are still a few good orchids in our country, despite quarantine 37, was proven by a houseful at this same range and the thousands at Mr. Dolansky's range in Lynn. "Orchids from seed" is a hobby also indulged in by Mr. Dolansky. "There is only one other flower as beautiful as an orchid, and that is another orchid," was the remark of one in the party.

The last visit was paid to Mr. William Sim of Cliftondale who grows carnations by the acre. Thousands upon thousands are making merry for their master here. The seedling collection was of unusual interest, and gave promise of what we might expect in the future of Miss Dianthus Caryophyllus.

After the very pleasant and instructive visit at Mr. Sim's the party dispersed, feeling confident that floriculture was the profession, and that in the future Penn, Sim, and Roland were not going to have such an easy time of it.

A vote of thanks is hereby extended to the parties herein mentioned for their kindness, cordiality and well wishes which they bestowed upon the embryo florists.

R. T. M.

## FLORISTS PLANNING A LONG TRIP

The transportation committee of the New York Florists' Club is planning an excursion trip in connection with the S. A. F. Convention to be held at Kansas City in August. After the convention the party, which is expected to number fully a hundred, will proceed to St. Paul and go from there to Duluth, where they will board a Great Lake steamer, which will provide one of the most enjoyable features of the outing. At the end of the water trip Buffalo will be reached. Niagara Falls will then be visited and the tour over the Great Gorge route made, after which the party will start for home. The cost, covering all transportation and meals, will be $220.

Chairman Paul Rigo, of the Henshaw Floral Co., 35 West 18th street, New York, has been particularly active in arranging for this trip, and is receiving many congratulations on the itinerary which he has mapped out. No doubt florists from Boston and other cities will be made welcome, if they wish to join the party.

## GREATER BOSTON

Leonard Ross of the Azaleana Nurseries in Taunton has been flowering some handsome specimens of the Louise Hunnewell hybrid azalea which was developed on the Hunnewell estate in Wellesley. Mr. Ross also has another hybrid which is just coming into bloom. It is a cross between Azalea Amoena and Azalea Kaempferi.

Thomas Curley has taken over the florist shop of Harry Bean, at 224 High street, West Medford. He has had much experience in the florist business, and his many friends wish him every success.

Roco Zepaio has taken possession of the greenhouses at 53 Winter street, Arlington, Mass.

## ADVERTISING and SELLING

### SELLING NURSERY STOCK

Mr. Nelson A. Coons, of Rhinebeck Floral Company, of Rhinebeck, N. Y., has some well defined ideas on advertising matters, some of which he discussed before the nursery class at the Massachusetts Agricultural College. He says bluntly that much catalogue advertising is wasted because the catalogue is not properly written, well printed, or intelligently distributed. He said that small, timely circulars, well written, often bring the largest amount of business. He declared that cheap work in getting out catalogues was money wasted, and that the best time to send out advertising is not the planting season, but when the plants are in bloom, as everybody is then interested. He said that personal letters are very effective, and should be distinctly personal, trite, stale formulas being avoided.

Every selling letter should serve to do four things,—attract attention, arouse desire, convince the mind and stimulate action. These are the fundamentals of salesmanship.

Mr. Coons said that the best place for a salesman to sell stock is on the ground where it is to be planted. When a salesman arrives with a prospect, he must keep in mind the following points. He must determine the conditions, analyze the attitude of the customer, get the customer's point of view, attract attention to his goods, meet and anticipate all objections, state his price carefully, and close the sale quickly.

In closing the speaker said that the poorest way to sell stock is to enter into a price cutting competition with other nurserymen.

### NEW PENNSYLVANIA NURSERY.

The Holmes Seed and Nursery Company has been organized at Harrisburg, Pennsylvania, with a capital stock of $250,000. This is an outgrowth of the old Holmes Seed Company. The new company has purchased the Fritchey farm, seven miles from Harrisbury, containing 112 acres. The farm buildings are to be changed to nursery packing houses, storage sheds, etc. Propagating greenhouses and farms will be started during the summer. Evergreens, roses, chrysanthemums and hardy flowers from seeds as well as flowers for cutting will be grown. Considerable attention will be given to gladioli and dahlias, as well as peonies, iris and cannas. The officers of the new company are H. L. Holmes, president; George A. Gorgas, vice-president; D. A. Caley, secretary; Dr. L. C. Goldman, treasurer.

### CONNECTICUT NURSERYMEN'S ASSOCIATION

The following committees have been appointed for the Connecticut Nurserymen's Association:

Executive—The officers and F. S. Baker, Cheshire; C. R. Burr, Manchester, and Paul Hubbard, Bristol.

Legislative—John Barnes, Yalesville; Stephen Hoyt, New Canaan; C. H. Sierman, Hartford; L. T. Cummings, Bristol, and C. R. Burr, Manchester.

Entertainment—W. E. Campbell, New Haven; Henry Kelley, New Canaan, and F. S. Baker, Cheshire.

Publicity and Membership—F. S. Baker, Cheshire; George Harris, Manchester, and R. B. Faxon, New Haven.

Forest and State Park Conservation—Stephen Hoyt, New Canaan; Neal Milane, Middletown, and Norman Barnes, Yalesville.

F. J. RIPPIN,
Secretary.

**Mr. Grower---"WIRE TIE"**

will be extensively used this Easter for tying up hyacinths, lilies and fuchsias, in fact, any plant you tie to a hyacinth stake. Samples free from your dealer or direct.

$2.00 PER 1000

**WM. F. BUSCHARDT,** 6 East Woodland Ave. BALTIMORE, MD.

# THE NEW JAPANESE KURUME AZALEAS

**Christmas Cheer**—This name was suggested on account of its brilliant coloring, a real Christmas red, a rich cochineal-carmine, semi-double. $20.00 per 100; $150.00 per 1000.

**Daphne**—Pure white with just a faint suffusion of delicate mauve towards the ends of the petals reminding one of the sweet Daphne odora, single. $20.00 per 100; $150.00 per 1000.

**Flame**—A most brilliant madder-red with coppery suffusion lighting up wonderfully under artificial light, single. $50.00 per 100; $450.00 per 1000.

**Peach Blow**—A beautiful peach blossom pink, shading lighter towards the centre, a perfect gem, single. $25.00 per 100; $200.00 per 1000.

**Pink Pearl**—Suggestive to the popular Rhododendron Pink Pearl in color. A beautiful salmon-carmine shading lighter to the centre, flower semi-double and remarkably free in large full trusses. $25.00 per 100, $200.00 per 1000.

**Snow**—Purest white, the semi-double flowers being of most graceful shape and remarkably free-flowering and lasting in good shape for an unusually long time. $25.00 per 100; $200.00 per 1000.

**Hinamayo**—Introduced some 6 to 8 years since but still very scarce. It is a gem for freedom of bloom, very early. Color a lively pink with crimson suffusion, single. $15.00 per 100; $140.00 per 1000.

**Choice Mixed Varieties.** $12.00 per 100; $100.00 per 1000.

**THE ABOVE PRICES ARE INTENDED FOR THE TRADE ONLY**

Unquestionably these new Azaleas are the most important flowering plants that have come forward since the introduction of the Lorraine Begonias and its types and the French Hydrangeas, and we believe they will in a short time due to the ease with which they are handled, their many varied colors and the satisfaction which they will give to the amateur become even more popular than these standard favorites.

The illustration here shown is a 5-inch pot plant, the photograph of which was taken just eighteen months after the cutting was inserted in the propagating bench. It is one of the plants that was shown in our exhibit at the International Flower Show at New York which attracted so much attention. This plant demonstrates the speed with which good salable plants with an abundance of flowers can be developed.

It will be noticed that with the exception of the variety Hinamayo introduced some 6 or 8 years since we are offering these new introductions under descriptive English names and not under the Japanese names under which they were imported. This may be open to criticism but in explanation of same we will state that the Japanese stock supplied to us was so badly mixed, 3 or 4 different colors having been supplied under one label so that identification was impossible. Furthermore, we believe the trade as well as the public in general will better appreciate the descriptive names under which we are now offering them.

**Your assortment of early spring and Easter flowering plants has been greatly curtailed through the effects of quarantine 37. Your customers complain of this lack of variety and sameness. The Kurume Azaleas will help to relieve some of this monotony.**

**We are now booking orders for delivery fall of 1922 and spring of 1923 of good 2¼-inch pots of the following varieties:**

**Apple Blossoms**—The name conveys an idea of the color of this dainty flower, which is a delicate old rose suffusion on a silvery white ground, flowers single. $20.00 per 100; $150.00 per 1000.

**Cherry Blossoms**—The general color effect of this gem is that of cherry blossoms, the centre of the flower being a delicately lilac-tinted white shading to a delicate mauve-pink at the edges, semi-double. $20.00 per 100; $150.00 per 1000.

### DIVIDING PEONY CLUMPS

#### Points on Saleable Divisions from T. C. Thurlow's Sons

In their excellent annual catalogue, T. C. Thurlow's Sons, Inc., (Cherry Hill Nurseries) of West Newbury, Mass., enclose an insert which contains some important information regarding the dividing of clumps for planting. Some of them are as follows:

In dividing clumps for planting we have found that the best results were obtained when the divisions were composed of two or three strong healthy roots averaging in size that of one's thumb and at least four or five inches long with a sufficient number of strong vigorous buds to make a well balanced plant. On the more common varieties the smaller roots with only one or two small eyes are usually discarded as we do not feel warranted in waiting for them to develop into saleable sized plants. Indeed it is a question whether a very small, weak division will ever achieve the vigor and qualities of the parent plant. The small roots with tiny buds will do better and really amount to more in the end if left attached to the larger divisions and in the long run produce more buds.

Results have gradually led to the establishment of general quotations on one year plants or strong divisions to equal one year plants in size. For quicker results in permanent locations two or three year clumps are recommended.

We are writing this as a number of inquiries are coming in asking us for divisions smaller than those we usually send out and at prices proportionately less. To all such we earnestly and conscientiously advise that wherever possible you plant our one year plants or full sized divisions equal to one year plants.

If, however, you do not feel like incurring as large an expense and are willing to wait a longer time before

## HENRY F. MICHELL, 518-516 Market Street, Philadelphia, Pa.

seeing the peonies of your choice in their wonderful bloom, we can supply you with smaller divisions at proportionate prices. This size will usually consist of a strong vogorous root with one or more eyes, for in no case will we send out small inferior roots with weak eyes. We will be glad to advise you the prices and varieties in which we can supply these.

A number of points should be observed in the planting and care of these small divisions as they should be given nursery care. They should be planted in good garden soil where they will receive plenty of air and light and not be crowded or shaded by larger plants, they should receive enough water and plant food through the summer and be mulched for the first three or four winters. Under no conditions is it advisable to move or divide these plants under four or five years as constant dividing has a tendency to gradually weaken the vitality and in the end one will never get representative plants or blossoms.

### GENERAL NEWS NOTES

John F. Horne & Bro., florists of Allentown, Pa., have moved to new and larger quarters at 32 North 6th street.

### THE PLANT CONFERENCE

Florists are well pleased with the postponement of the plant quarantine conference to be held at Washington. The original date was March 15, but it was postponed to April 19 at the request of the florists. The new postponement to May 15 comes at request of the American Association of Nurserymen, who say that April is the one season of the year when the nurseryman must be on the job to get out his orders and do his planting. The later date will give the florists additional time in which to prepare a constructive program.

### GENERAL NEWS

Stanley G. Barnes has opened a new flower shop in Binghamton, N. Y., on the west side. Mr. Barnes also has a store on Chenango street, which will be in charge of Mr. Adams.

L. C. Stroh & Sons, florists of Batavia, N. Y., have let a contract for a new greenhouse, 40x150 feet, to be built by the American Greenhouse Co., of Chicago.

Ralph S. Wykoff has leased the store in the Oneonta Hotel at Oneonta, N. Y., for a retail florist shop in conjunction with his greenhouse on Globe street.

The benefit of HAIL INSURANCE was forcibly illustrated by a number of violent hail storms in New England last year.

Be wise and send to **John G. Esler, Sec'y of Florists' Hail Association, Saddle River, N. J.**, for Hail Insurance literature.

**DO IT NOW.**

## George Watson's Corner

"You in your small corner and me in mine."

We'd all like to be rid of this shifting Easter. Make it a fixed date, say the second Sunday in April. The Winter festival of the old heathens was turned into Christmas by the Pope—and Old Yule which had always held sway had to bow to the inevitable. Why not the same with the Spring festival. If Tom Daly will start this, we can count on that Welshman Lloyd George, and the commercial florists the world over, to a man! The word Easter is derived from the Anglo-Saxon "Eostre," the Goddess of Light or Spring, and was celebrated in April.

William Kleinheinz, supt. of the Widener gardens at Elkins Park, paid us a visit the other day. He looks well after his two months' vacation in Bermuda, etc. Looks hale and hearty, but puffs a little after walking up one flight of stairs. Get that. One flight. Yes; I fear he weighs a little over the two hundred now; and we really ought to have a passenger elevator in the Pennock building. If this ever appears in print; your uncle has gone on a vacation. Wants to live a little longer.

Charles Sim, the landscape gardener of Rosemont, who has been on the sick list 16 months, called recently. He sails on the S. S. Haverford, May 2, for a trip to regain health among the Grampian Hills in his native "Bonnie Scotland."

S. S. Pennock, Junior, who went under an operation at the hospital some weeks ago, returned to his home in Lansdowne on the 16th inst. We congratulate him on his convalescence, and trust he may soon be around again full of his accustomed vim and pep, and holding up his enviable record as a champion in tennis and other outdoor sports.

A. F. Jackson of Sellersville blew in on us the other day. He is an old time Battles boy, and has made good as a grower and retailer in a live neighborhood. Sellersville is beyond Norristown, but they claim they are friendly, and the housewives do not have to carry in their shirts from the wash strings of a Saturday afternoon—when the boys go down to spend the week-end. "Take in y'er sarks, gudewife; here comes the Brechiners." That's what Jack Dunham would have called "charcasm."

147-187 LINDEN AVE.,
IRVINGTON, N. J.

John Habermehl is right on his job and giving them the best at the lowest in flowers around the Bellevue Stratford and the Ritz Carlton. And as a corollary he can still tell a good Scotch or Jew story in real style. Even Bill Graham has to laugh, and he objects to anything that reflects on the Macphersons!

Herman Schoenfield takes his hat off to nobody on his fine showing of Easter lilies this year, not even to Campbell, although he admits Al has a pretty good lot. And he has thousands of other fine things: hyacinths, tulips, daffs, and so forth. Why, the dashed things would sell themselves, only, he lives down Essington way, and the bunch hasn't got the habit yet of racing down here. So he has to come to town once a week and tell a few of them about it. Herman better get busy and study the advertising game a little. Then he wouldn't have to work. The orders would fall on him like apple blossoms in May, and he wouldn't have to make that weekly trolley ride, one hour straight.

Mark Mills and William K. Harris have made the writer a gift, with their own and St. Patrick's compliments, in the shape of a nice Easter plant in a 7 inch pot. They call it "The only Green Hydrangea in America," and say it is a great novelty. I thank the gentlemen, and while I fear they wished to joke me a little on the green carnation, this little gift is not dyed, and it will lose the green shade after a while, and develop into several other lovely colors as the days roll by. So it will stay by me a treasured gift for many a day. Much obliged folks. No cusses this time! (If they mixed green dye with soil which some suspect, maybe I will have to take all this back.)

1918 is the date of the last edition of the Florists' Directory. We expected a new edition every year; but there has been a lapse due to various unavoidable causes—hard to explain. Anyway, the welcome news now comes that the new edition for 1922 will be on hand by April 10th, and Philadelphia and vicinity can get a copy at the publisher's price of five dollars by sending word to George C. Watson, 1614 Ludlow St. The book runs to 500 pages, and is revised up to date. The book is very complete.

The Robert Craig Company certainly have some fine Easter Show this year. It is worth going out to see. Some of the old timers say "hav'n't we seen that Easter Show thousands of times, and hasn't it always been

fine." That is true enough; but we want to emphasize the fact that the younger generation of Craigs are not falling behind on the splendid record of past years. They are quite up to date, and have some wonderful novelties, in addition to the regular standbys in roses, dracenas, and crotons. Aeroplanes of rambler roses; the same roses trained to crosses eight feet high; but what's the use of talking, you've simply got to go out there and see them.

# CRAIG'S Quality Easter Plants

## ROSES

We desire to make special mention of our large stock of Roses, growing upwards of 10,000 plants in the following varieties. We have no hesitation in saying we are the largest growers of forcing Roses for Easter in America. We are positive our stock will please the most critical buyers, as the quality was never better. It has been grown cool and will prove very satisfactory.

**LADY GAY**

In grand condition, trained into tall, globular, and pyramidal shapes, **$2.50, $3, $3.50, $4, $5, $6 and $7.50 each.**

**Special ball shapes, $2.50, $3, $4, $5 and $7.50 each.**

**Baskets, $7.50, $10 and $12.50 each.**

**Umbrellas, $6, $7.50 and $10 each.**

**TAUSENDSCHOEN (THOUSAND BEAUTIES)**

This was our finest and most popular Climber last year, and this year our stock is large and the plants are much finer.

Trained plants, tall, globular and pyramidal shapes, **$1.50, $2, $2.50, $3, $3.50, $4, $5, $6, $7.50, $10 and $12 each.**

**Baskets, $10 and $12.50 each.**

**Umbrellas, $6, $7.50 and $10 each.**

**EXCELSA, NEW CLIMBING ROSE**

This variety is known as the Red Dorothy Perkins. The color is brilliant and it is bound to prove the most popular red Rambler.

We offer splendid plants in 6-inch, 7-inch and 8-inch pots, **$1.50, $2, $2.50, $3.50, $4, $5, $6, $7.50, $10, $12 and $15 each.**

**Baskets of Excelsa, $10 and $12.50 each.**

**Umbrellas, $6, $7.50 and $10 each.**

**ROSIERE (NEW)**

Dark sport of Tausendschoen. Very beautiful.

A great improvement on the popular Thousand Beauties (Tausendschoen) and consequently a welcome addition to this section. While it has the same habit of growth and general characteristics as Thousand Beauties, the color is superior, a deeper and more even shade of cerise-pink or carmine.

Trained plants, fans, globular, and pyramidal shapes, **$2, $2.50, $3, $3.50, $4, $5, $6, $7.50 and $10 each.**

**Baskets, $10, $12 and $15 each.**

**Umbrellas, $6, $7.50 and $10 each.**

In addition to the above trained Roses, we have also trained some very special designs, such as Aeroplanes, Crosses, Chairs, Pergolas, etc., at **$10, $12.50, $15, $20, $25 and $30 each.**

**PAUL'S SCARLET CLIMBER**

One of the most promising climbing Roses yet sent out. Vivid scarlet, semi double flowers of medium size, produced in large clusters and in great profusion. The color does not burn or fade. This Rose has been exhibited extensively in Europe and received numerous awards.

**5- and 6-inch pots, trained plants, $1.50, $2, $2.50 and $3 each.**

**HYBRID ROSES**

Including Columbia and Mrs. John Dunlop. Very fine plants in bud and flower for Easter sales.

**6-inch pots at $15 and $18 per dozen.**

**MAGNA CHARTA**

Exceptionally well grown and well flowered stock. Considered by all to be the very best Hybrid Rose for Easter sales.

**5½-, 6- and 7-inch pots at $18, $24, $30 and $36 per dozen.**

**BABY RAMBLERS, ORLEANS**

Exceptionally fine.

**5½- and 6-inch pots, $15, $18 and $24 per dozen.**

## DRACAENAS

There is no other variety of foliage plant so attractive as the highly colored Dracaena. The small and medium sizes can be used to great advantage in making up the popular Easter baskets, while the large specimens have always been in great demand for decorative purposes. We are now growing more Dracaenas, in greater variety, than any firm in the country.

**DRACAENA GODSEFFIANA**

Green and white leaf, very hardy, fine for baskets.

**2½-inch pots, $20 per 100.**
**3-inch pots, $35 per 100.**
**4-inch pots, $60 per 100.**

**FANCY DRACAENAS**

We are offering a collection of the new and rare Dracaenas, including Imperialis, Amabilis, Pere Charon, Mandaiana, etc. Very handsome for home decoration or for fancy combination baskets.

**4-inch pots, $9 per dozen.**
**5-inch pots, $15 per dozen.**
**6-inch pots, $18 and $24 per dozen.**
**7- and 8-inch pots, $3.50, $4 and $5 each.**

**DRACAENA MASSANGEANA**

The variety with the golden stripe down the center of the leaf. The best of all Dracaenas for the house. We have an exceptionally large stock, well colored and of the very highest quality.

**4-inch pots, heavy, $12 per dozen, $100 per 100.**
**6-inch pots, $2 and $2.50 each.**
**8-inch pots, heavy, $4 and $5 each.**
**10-inch pots, heavy, $7.50 each.**

**DRACAENA FRAGRANS**

Plain green leaf.

**4-inch pots, $9 per dozen.**
**6-inch pots, $18 and $24 per dozen.**
**8-inch pots, $5 and $6 each.**
**10-inch tubs, $7.50 each.**

**DRACAENA LORD WOLSELEY**

One of the very best varieties for Easter and Christmas, being bright red in color. An excellent Christmas variety.

**2-inch pots, $20 per 100.**
**3-inch pots, $35 per 100.**
**4-inch pots, $60 per 100.**
**5-inch pots, $15 per dozen.**
**6-inch pots, $18 and $24 per dozen.**
**7-inch pots, $3 and $3.50 each.**

**DRACAENA KELLERIANA**

One of the finest foliage plants for combination baskets or boxes. Improved Godseffiana.

**2½-inch pots, $20 per 100.**
**3-inch pots, $35 per 100.**
**4-inch pots, $60 per 100.**
**8-inch pots, $5 and $6 each, made up, very handsome.**

**DRACAENA TERMINALIS**

Exceptionally well colored.

**2½-inch pots, $20 per 100.**
**3-inch pots, $35 per 100.**
**4-inch pots, $65 per 100.**
**5-inch pots, $15 per dozen.**
**6-inch pots, $18 and $24 per dozen.**

We would suggest ordering the above early, as the demand is always great.

**DRACAENA DE SMETIANA**

A strong, vigorous grower, with bold, dark green foliage, which becomes beautifully suffused and variegated.

**4-inch pots, $7.50 per dozen, $60 per 100.**
**5-inch pots, $1 each.**
**6-inch pots, $2 each.**
**7-inch pots, $3.50, $4 and $5 each.**

**DRACAENA WARNECKII (NEW)**

Silver and green leaf. Very durable.

**6-inch pots, $30 per dozen.**
**7-inch pots, $4 and $5 each.**

**DRACAENA LINDENII**

Same type as Massangeana, but with the golden stripes on the outer edges of the leaf.

**4-inch pots, $12 per dozen, $100 per 100.**
**6-inch pots, $2 and $2.50 each.**
**8-inch pots, $5 each.**
**10-inch tubs, $7.50 each.**

**DRACAENA LONGII**

Improved sport of Dracaena Warneckii. One of the very best novelties in foliage plants introduced for years. Dark green outer edge with pure white stripe in center of leaf. Stock limited.

**4-inch pots, $5 each; 5-inch pots, $10 each.**

**DRACAENA TRICOLOR**

One of the finest introductions in recent years, coloring of green, white and pink.

**2½-inch pots, July delivery, $50 per 100.**
**4-inch pots, $18 per dozen.**
**6-inch pots, $3.50 each.**

## CROTONS

The Croton, with its highly colored foliage, is indispensable during fall and winter. We have the largest and most complete collection of Crotons in the world, carrying at the present time for spring sales over 50,000 in 100 varieties, all of the very highest quality and brilliantly colored. Immediate delivery.

**2½-inch pots, strong plants, $35 per 100.**
**4-inch pots, strong plants, $12 per dozen, $75 per 100.**
**5-inch pots, strong plants, $15 and $18 per dozen.**
**6-inch pots, strong plants, $24 and $30 per dozen.**
**8-inch pots, strong plants, $4, $5, and $6 each.**
**10-inch pots, strong plants, $7.50 and $10 each.**
**12- and 14-inch pots, specimen plants, $15, $20 and $25 each.**

**CROTONS (NARROW LEAF TYPE)**

**Delicatissima, Golden Thread and Florence.**

These varieties are indispensable for table decoration and we predict a great future for them, as nothing surpasses them for use in artistic arrangement.

**2½-inch pots, $35 per 100.**
**4-inch pots, $12 per dozen, $75 per 100.**
**5-inch pots, $18 per dozen.**
**6-inch pots, $24 and $30 per dozen.**

**CROTON PUNCTATA**

One of the most satisfactory and finest varieties for basket work and centers of ferneries.

**2½-inch pots, $20 per 100, $175 per 1000.**
**3-inch pots, $35 per 100.**
**4-inch pots, $50 per 100.**

Every retail store and grower should feature Crotons this Easter and spring. We know our stock will please you and your customer.

**CROTON LEAVES AND SPRAYS**

Cut Croton Leaves and Sprays have been supplied by us in the past few years to some of the leading florists, who have featured them in mantel, table and funeral work. Cut Crotons will last in a cool place from three to four weeks. We can supply them every day in the year.

**Very highly colored sprays at 50c each; cut leaves, $5 per 100.**

When you have orders for funeral or table work "out of the ordinary," order Craig's Cut Crotons.

### TRAINING FLORISTS.

#### Prof. Thayer Talks to Gardeners & Florists' Club.

There was an excellent attendance at the meeting of the Gardeners' and Florists' Club in Horticultural Hall, Tuesday evening, April 18, to hear Prof. Clark L. Thayer, of Amherst Agricultural College. Prof. Thayer showed a number of attractively colored views taken on the campus, and outlined the work of the college in giving boys training in horticulture and floriculture.

Special interest was shown in an announcement that the college expects to start a special two-years' course for gardeners next fall. The plan is to have six months of school work, after which the boys will be sent on to private places for practical experience during another six months. Then they will return to the college for a final year's study. After that they are to be sent out under the supervision of the National Gardeners' Association.

This is the nearest approach to an apprenticeship system for the practical training of gardeners which has been attempted in this country, and the experiment will be watched with interest.

Prof. Thayer explained that placement work is already being carried out in other lines, the boys taking two terms of school work and then six months in practical work on established plants. He described the greenhouses and told of the work which was being done in grafting roses, propagating carnations, and so on. He also said that considerable attention was being given to marketing.

At the close of Prof. Thayer's remarks Prof. Ralph Curtis, of Cornell, spoke briefly in regard to the trainings of boys for important positions on estates, saying that there was no expectation that the boys would be ready for superintendents' jobs at the close of the four-years' course. They needed actual practice before they were fitted for advanced positions.

Two new members were admitted to the club, James MacRae, of 50 Goddard Ave., Brookline, and Philip R. Bridgman, of Auburndale.

There was an excellent exhibit of plants, including the new carnation Betty Jane, shown by Mr. Cahill, representing Roman Irwin, of New York. These carnations came from St. Louis, and were five days on the road, yet they looked as fresh as though gathered the day before. This carnation is a cross between White Wonder and Ward.

W. W. Edgar Co. sent in some good specimens of Lilium candidum. Mr. T. W. Little had a fine exhibit of Cineraria stellata, Schizanthus, Marguerites, Genistas and Senecio Multibracteatus. The latter plant was discussed at some length, as it is rare, although easy to grow either from seeds or cuttings. Mr. Little said that he gave it a carnation temperature, and had no difficulty with it. He treated it practically like Cinerarias ,and found it excellent for cutting. Mr. W. H. Golby exhibited some good specimens of Marinelli carnations.

At the May meeting of the club there will be a talk by Mr. Frost, of Arlington, on Tree Surgery and the Care of the Apple Orchard. Mr. Frost is an expert in both lines.

## THE TALK OF THE TRADE

Much was said earlier in the season about California grown iris bulbs and, judging from the results obtained from many growers, a great deal which was said was not by any means warranted. It has been shown without any doubt that California grown iris bulbs can be forced with the best of results. It is true, there were failures, and this applied particularly to the variety Tingitana. Those growers, however, who used the precaution of not planting too early and of carrying the stock along slowly, got good results, even from this variety.

Mr. Hans Jepson, of Maywood, Ill., says that he obtained good results from Tingitana, and that instead of growing them at fifty degrees at night he started them at forty degrees and held them as near that temperature as was possible. He has also marketed a lot of Filifolia, with almost a hundred per cent crop.

I am also informed that W. A. Rowe Floral Co., of Kirkwood, Mo., have had wonderful success with the Spanish iris, and they have no doubt at all about the ability to force the California grown stock. Several growers who have announced to me about disappointing results with their iris bear out the idea that it has been largely a mistake of the grower, and not with the stock. For instance, they seem to agree that Tingitana gave the lowest percentage of blooms. In some cases this variety gave practically no flowers at all. But in each and every case these were the growers who started their bulbs as soon as they received them and carried them along warm. It's a fact that the later the variety and the lower the

Courtesy Boston Transcript

Easter Display in the Park St., Boston, Store of Thomas J. Galvin, Inc.

temperature, the better they have flowered.

It is also the opinion of these growers that they will have good results the coming year from these bulbs which they are carrying over. By giving them a thorough ripening and resting and planting as late as possible, with low temperature, they expect good results.

W. C. Stickel, of Lexington, Mass., has some of the Dutch variety carried over from his own stock which are doing equally as well as the California grown Dutch iris. He expects a nice crop the coming year from his carried-over bulbs, but expects to follow out the experience of this year, in avoiding too early planting and in keeping low temperature.

It is a matter of much satisfaction to the growers to find that there is a chance to do this crop successfully, and they are well pleased that those gloomy reports prematurely made in the early season are not being found true.

---

Mr. Paul M. Halbrooks, of Newark, Ohio, seems to have learned the secret of gaining publicity. In a rerent issue of the local newspaper, Mr. Halbrooks, who is known to his friends and the general public as Posey, is given nearly two columns of descriptive write-up, which ought to be the best kind of advertising. As a matter of fact it makes good reading, for Mr. Halbrooks has had an interesting career. He has given thirty-five years to the floral business, and is right, I think, in considering himself as much of an artist in his line as a painter or a sculptor in his. Mr. Halbrooks is particularly fortunate in his assistants, so that each summer he and his wife can take a three months' trip to their cottage in northern Wisconsin, visiting the principal cities and florists en route.

---

At the last meeting of the Gardeners' and Florists' Club, of Boston, there seemed to be considerable confusion over the definition of breeder as applied to tulips. If I am not mistaken, a breeder tulip may belong to any species, although most commonly in the trade it is applied to the Darwins. It is the habit of tulips to carry self colors for several years and then suddenly break into various shades. They are breeders until this breaking process takes place, after which they are numbered among the broken forms. I believe there are no yellows among the breeders.

At the same meeting there was some question about the proper use of the terms, daffodils and narcissi, whether they were so called daffodils, jonquils or poets. Gardeners are cultivating the plan of calling all these flowers daffodils, which is, I believe, a common practice in England. Actually they are identical. The daffodil is really the English name, while the narcissus is the Latin name. In common use it seems most convenient to speak of the large, trumpet flowered bulbs as daffodils, and to make a distinction when referring to the poets and allied forms, which are already known to the public as narcissi.

---

One of the incidents of hard times and high income tax seems to be that the owners of big private residences who have greenhouses want their gardeners to grab every dollar they can get in the city flower markets with any surplus they may have. The wholesalers do not like to handle such business as it is too picayune. And the thought back of it is low-toned. A man wealthy enough to have his own private conservatory for his own pleasure and that of his friends ought to keep it sacred from the sordid dollar spirit.

---

Of course judges are not infallible, but it was rather curious to find, at the recent bulb show in Boston, that a first prize for the double tulip Schoonoord had been awarded to a pink variety. Of course Schoonoord is a white tulip. Properly speaking, this pan entered in the Schoonoord class should have been disqualified. As a matter of fact, it looked very much like a straight Murillo and very well done. But perhaps the award cuts were placed on the wrong pans.

---

Mr. J. K. Alexander, of East Bridgewater, Mass., who grows commercial dahlias on a very large scale, has made a new bid for fame. While he already has about fifty acres under cultivation, he has recently purchased adjoining land which he will use for dahlias and other plants. He is having his entire place laid out with drives so that visitors can pass up and down the beds without leaving their machines. One of the Boston papers recently published an article about Dahlialand, which it calls "The World's Biggest Flower Bed." It is understood that Mr. Alexander is soon to erect another large warehouse for the storage of dahlia roots.

Florists are sometimes criticized for not being more eager to take on new plants. Growing flowers under glass, however, is a highly specialized industry, and unless conservative methods are followed a profit can easily be turned into a loss. There are many good flowers which might well be grown except for certain drawbacks. At the last meeting of the Gardeners' and Florists' Club of Boston, Senecio Multibracteatus came in for much discussion and the belief was expressed that there would be a good sale for it if florists should grow it. Undoubtedly that is the case. It certainly would appeal to the public as a pot plant. It is easy to propagate and easy to grow. But—and here is the rub—it is very slow coming into flower. Florists cannot afford to use much space for such plants. They need quick returns.

---

While hydrangeas help to fill the gap created by the loss of the Belgian azaleas at Easter time, the lack of these azaleas is still keenly felt. There are few flowers that were so satisfactory, all things considered. It is sincerely to be hoped that the new Kurume azaleas from Japan will be taken up widely. There is every reason to believe that they will make first class florist plants. In any event, greenhouse men all over the country should experiment with them this season.

---

## NEW ENGLAND

Robert Holmes, son of Eber Holmes, the well known rose grower of Halifax Gardens, has finished his course at the Amherst Agricultural College and has taken an important position near Montreal.

Louis Wyre of Ansonia, Ct., is to open a new flower shop in that city. He is well known in the trade, having had thirty years' experience.

G. Leighton Stearns, formerly manager of A. A. Pembroke's florist store on Cromley Street, Salem, has opened a flower shop for himself at 260 Essex Street.

Mr. Eugene Appleton has become associated with the Westminster Greenhouses at Providence. He will have full charge of all the greenhouse and landscape work. He is a man of much experience and an excellent grower.

The last meeting of the Florists' and Gardeners' Club, of Northampton and Holyoke, was held with F. D. Keyes & Sons. A splendid display of Easter lilies made by Mr. Keyes was a special attraction.

## EASTER SALES

There has been no better Easter business for many years than this season. This is the general report from all quarters. It wasn't possible to get any lilies in the Winthrop Square market, Boston, after noon on Saturday.

It had been prophesied in some quarters that there would be an over supply of lilies but, as it proved, there was a shortage. Retail prices were uniformly fifty cents a bud, with but few exceptions. Only one department store in Boston put in lilies this year, selling them for thirty-five cents a bud. Lilium candidum was offered in considerable quantities, but did not sell as well as giganteum. Great numbers of Tausendschon roses were sold; some of the finest specimens ever seen in Boston were shipped in by Gibbs, of Lynn. The new red rose, Paul's Scarlet Climber, was seen in small quantities, but made a great hit. Harold Ryan, of Cambridge, was one of the growers to send in some good specimens.

Potted hydrangeas, particularly pink varieties, sold remarkably well. They have largely taken the place of azaleas. White lilacs in pots, which were expected to sell well, dragged somewhat, and there was very little sale for snapdragons, although great numbers were offered. Saturday before Easter was rainy and cold in Boston, but Sunday itself was a beautiful day, creating a big last-moment rush for flowers.

## NEW PROVIDENCE STORE.

### Fisher Establishment One of the Finest in New England.

Seldom does a new flower store start out under more auspicious circumstances than the establishment of Fisher, the florist, of Providence, R. I. The store, which was thrown open to the public on April 10, was crowded with visitors all day, fifteen thousand people passing through the doors. Three thousand begonia plants and twelve thousand cut blossoms were given away. The visitors included the Governor, Lieutenant Governor, and the Mayor of the city.

The new store is a hundred feet deep and twenty feet wide. It is finished in French gray up to eight feet; then there is a wide band of gold leaf, with Oriental blue above. The floor is of tile, and the furnishings are in Italian art ware. A tremendous Easter business was done.

This is the second of three stores, and possibly more, to be established under the Fisher name. Associated with Mr. Fisher is Mr. Silverman, formerly located on Winter Street, Boston. A Fisher store has been conducted at New London for some years. In September the third store in the chain will be opened in Boston.

Mr. Fisher will have personal charge of the Providence store at present, while John E. Clark will look after the business in New London.

## PASSING OF M. H. WALSH A GREAT LOSS

News of Michael H. Walsh's death at Woods Hole was received with sadness all over the country. Although Mr. Walsh was in his seventy-fourth year he had been very active until recently. Few men have done so much to make climbing roses popular, and many of the roses now in general cultivation were originated by him. The Minnehaha rose won him a gold medal in 1917, and among other honors given him were the grand prize of the Massachusetts Horticultural Society, the George Robert White gold medal of honor, and the gold medal of the American Rose Society.

Mr. Walsh was born in Wales, but for forty-seven years was on the Fay estate at Woods Hole. First he was gardener for Mr. J. S. Fay, and then went into business for himself. One of his sons is Congressman Joseph Walsh. He leaves three other sons, two of whom have been associated with him in Woods Hole, and two daughters.

## THOS. F. GALVIN, JR., USES THE RADIO

Probably Thos. F. Galvin, Jr., of Boston, is the first florist to make use of the radio in a way to increase his business. On the Thursday night before Easter Mr. Galvin delivered a talk on the Easter lily from the Medford Hillside station. He told of the culture of the lily, and how it is grown for Easter Sunday. Incidentally the novelty of his talk won him considerable attention from the Boston papers.

The Rochester Greenhouses, at Rochester, Ind., are to be increased by a new structure, 30x150 feet, which will be devoted to sweet peas and carnations.

RAIN WHEN YOU WANT IT

7 GRADES
7 PRICES

When you get a price from anyone on a watering system; know what it stands for.
Make sure you surely know exactly what you are going to get. Get your dollar's worth. Get a system with years of reputation back of it as your guarantee. The Skinner System has over a score of years back of it.
If it's a price basis you want to buy on, we have 7 grades and 7 prices to choose from.
The highest grade costs just twice as much as the lowest.
All 7 grades, however, have the following standard Skinner System features.

1. All pipe best quality galvanized.
2. Accurately drilled at 3 feet intervals.
3. Patented Silver Stream Nozzles throughout.
4. Globe Valve for pipe connections.
5. Brass flush valve for end of line.
6. Roller bearers for wood or pipe posts.

So, when you get a price from anyone, know what you are getting, besides price.
We sell you a watering system, but what you really get is satisfaction. Guaranteed satisfaction.

Says Sam: An atom of action is worth a ton of talk.

**Co-operative Competition.** St. Louis florists did their Easter advertising in the most approved fashion. Other cities should study the methods of the St. Louis brethren and profit by them. Growers and retailers co-operated in one big spread and did it well. In the center of the advertisement is a strong argument for the purchase of flowers. It is terse, to the point and effective. It was paid for collectively by the growers. It is the way in which they did their part. Surrounding this center copy are the individual announcements of the retailers. The latter present their special claims, and yet join in the general layout. Here we have a combination of co-operation and competition. Growers and retailers share the expense of publicity in a spirit of harmony and helpful co-operation. No better way of solving the advertising problem has yet been devised.

**Mother's Day.** What is to be done about Mother's Day? Plain efforts are being made in some quarters to discredit it. Candy makers, book sellers and others are endeavoring to take it away from the florists. Is this sort of thing to be allowed? By no means. The florists have a unique opportunity to build up an institution which can be counted upon for sure returns year after year. How is this to be done? First of all by advertising. It is hardly necessary to advertise at Easter or on Memorial Day. People will buy flowers on those occasions, anyway. It is different on Mother's Day. Then buying must be stimulated and the demand created. Advertising will do it—if done in the right way.

The florists of Hartford, Conn., put out a co-operative advertisement last year that was calculated to make every man in the city feel cheap and unworthy if he did not remember his mother with flowers.

At the same time, it devolves upon florists to emphasize the use of colored flowers. Let the people be told that there is no special sentiment or merit in a white carnation. Then prices will be lower—and the future of the day depends largely upon moderate charges. It is out of the question from the grower's standpoint to have Mother's Day associated with any flower exclusively. The public must be educated away from such an idea. This is a point to be stressed.

**College Made Gardeners.** It is obvious that increased respect is being shown by the trade and by private gardeners throughout the country for the agricultural colleges. There was a time not many years ago when experienced men in both lines were inclined to scoff at the pretensions of colleges and college men. They contend that the only way to become a successful florist or a proficient head gardener is to start at the bottom and work up. Now the fact is being realized pretty generally that a boy who has the theory of horticulture as a foundation on which to lay his practical work can advance faster and make himself more capable and become in the end a better gardener or a better florist than the boy who has no such advantages.

The remark is still heard occasionally that college boys think so highly of themselves that they are not willing to take a humble position after graduation, but expect a superintendent's or foreman's position immediately. Such remarks are not justified. At a recent meeting in Boston, W. N. Craig, formerly president of the National Gardeners' Association, said that he had employed several boys from the colleges, and had found them perfectly willing to do any kind of work required of them. They manifested no sign of a swelled head, but on the contrary seemed eager to learn everything they could about the operation of a large estate. Several of these boys have developed far enough to occupy excellent positions.

Other men, both florists and gardeners, have expressed themselves in the same way. We recently heard Prof. Clark Thayer, of Amherst College, say that college work was expected to be only preparatory. He realized that several years of practical experience on a commercial or private place is necessary to fit any graduate for an advanced position. He believed that the boys themselves realized this fact now, and accepted it.

There is a dearth of skilled private gardeners in this country, men who are capable of supervising large estates. This country lacks the apprenticeship system which prevails across the water, and which keeps a new crop of gardeners coming on. The colleges are now stepping into the breach and preparing courses which should in a few years remedy this difficulty. The National Gardeners' Association is largely responsible for this movement. It is pleasant, too, to find that the florists are co-operating with the colleges in their efforts to equip men for greenhouse work and other branches of floriculture. It is a good augury for the future.

The ten-weeks' nursery course at Amherst College the past season was a successful experiment, and we are glad to learn that a similar short course is to be held next spring.

# GRAFTED ROSES

Once again we remind you that we are grafting Roses. We have a big lot of very fine Manetti and can take care of your requirements.

## PRISCILLA AND ROSES THAT ARE NEEDED

Writing in the American Rose Annual just issued, Mr. Wallace R. Pierson, of Cromwell, Connecticut, tells why Priscilla was withdrawn from the market by the Montgomery Co. and A. N. Pierson, Inc. He then goes on to say:

"On both places Priscilla has done well this winter, and has sold well In some cases, Priscilla has friends who call for it. They understand the rose, know its value, and appreciate its uses. The shortage of winter roses has given this wonderful winter bloomer a place in the market, but Priscilla will be an object lesson to those who do not place a very high estimate on color.

"Priscilla is now being used by Montgomery in his hybridizing, and it is to be hoped that from this wonderful plant may come a new rose which will combine all the good attributes of Priscilla with a color which will be bright, lively, and lasting. Give us a color that will please and hold! Combine with it the fragrance of Hadley! Give us the stem, neck, and form of this rose, and add the vigor and productiveness of Priscilla! Then you will be giving us what the rose world will welcome. It is a free and open field.

"We want, and are suffering for, a new forcing yellow sort to take the place of Mrs. Aaron Ward and Sunburst. We need a crimson which has a heavy petal that is underlaid with scarlet and that does not turn blue. We need a real red rose, not a crimson, that will grow and flower as Priscilla does, and when we get these we shall have made progress. They will come! Some of them are now in sight, and the Montgomery seedlings which are blooming now and the thousands which are just emerging from the seed-beds are the promise of the future. American winter-blooming roses will continue to improve."

## BUYS COTTAGE GARDENS NURSERIES.

The Cottage Gardens Company, Inc., of Queens, N. Y., have purchased the entire stock and plant of the Cottage Gardens Nurseries of Eureka, California, recently liquidated by court order.

The plant will be operated as a branch of the eastern establishment and the principal products will be Azaleas and Rhododendron Pink Pearl for forcing purposes.

A large production of Ponticum stocks for grafting Rhododendron is also contemplated, as the climate of that part of California is admirably suited to the growing of that plant.

It is understood that W. B. Clarke of San Jose, California, at one time sales manager of the defunct concern, will have the sales agency.

D. S. Ward, President of the Company, who is now in Eureka, expects to devote a great part of his time to the management of the Eureka Plant, while R. T. Brown, Vice-President, will continue to look after the interests of the Company at Queens.

# RAMBLING OBSERVATIONS OF A ROVING GARDENER

I spent Sunday wandering through a lot of garden books. I use the word wandering advisedly because much of the time my mind was really in the garden out of doors. As a matter of fact, I should have wandered when reading some of them if there had been nothing but a hand organ outside. I wonder if I should put the best one first or last. Probably I had better put it first, because otherwise the printer may chop it off at the last minute, for lack of space.

**Truly Rural.** This is a book of essays by Richardson Wright, editor of the House and Garden. It tells about his adventures in making the house and the garden which he himself occupies, and is very good reading. There are a few rather staggering paragraphs, and the book is nowhere dull. What I can't understand, though, is how Mr. Wright, being a mere editor, could get together so readily the money with which to pay the painter, the carpenter and the seedsman. He says it was a miracle, and I think it must have been. Houghton, Mifflin Co., Boston, publishers.

**Hope Farm Notes.** There are thousands of people the country over to whom the Rural New Yorker is a sort of country life Bible in weekly instalments. And the first department to which many of them turn is the Hope Farm Notes. Now the Hope Farmer is really Herbert W. Collingwood, the editor, a unique and able character in many ways. How Mr. Collingwood can turn out his two columns, week after week, year in and year out, without having them lose their freshness and charm, is a mystery. The secret must lie in his knowledge of and delight in human nature. Some of his best essays have been made up into this book, which will be treasured by the Rural New Yorker family and many others.

**Gardening With Brains.** This is a poor title. It implies an insult to amateur gardeners everywhere, the inference being that the author, Mr. Henry T. Fink, is the only garden writer who possesses brains, although willing to let his fellows profit by his good fortune. If one has ample leisure and a notebook, he could probably accumulate not a little valuable information through the aid of this ample volume. But the actual practical cultural facts could be gathered into half the pages, with room to spare. Harper & Bros., New York, publishers.

**A Book About Bees.** Seasoned bee keepers wouldn't have much use for this book. Amateurs will find a lot of interesting and helpful information in it, and it will make good reading for anybody who is interested in bees because of their marvelously complex and yet thoroughly well organized lives. E. P. Dutton & Co., New York, publishers.

**Rose Gardening and Bulb Gardening.** Two books from the pen of Mary Hampden. Both are English, so that the cultural directions contained in them do not wholly fit American conditions. At the same time both books are packed with valuable information, set forth tersely and clearly. The illustrations are excellent, and both books will be helpful to gardeners anywhere. Charles Scribners' Sons, New York, publishers.

---

The new dahlias offered by Dreer include a gorgeous French creation called Camille Frachon. It is a glistening aniline red, deepening to a rich garnet, forming a halo around the yellow disc. Skagerrak is a new cactus dahlia of a clear clean lemon yellow color. Another new yellow dahlia of the cactus type is Democrat, and is particularly good for cutting. California Beauty is a hybrid cactus and probably the nearest approach to pure copper yet produced. It keeps well when cut, and is very decorative. Helen Durnbaugh is another hybrid cactus dahlia which comes from California, but thrives well in the east. It is a delicate blush in color, deepening to a soft rose.

---

One of the features of the Indianapolis Show which attracted special attention from visitors was the exhibit of sweet peas shown by W. Atlee Burpee Co., of Philadelphia. There are few flowers that make a stronger appeal to the general public, and the Burpee exhibit, containing as it did a wealth of the most beautiful varieties, was surrounded with eager flower lovers most of the time. The display was awarded the gold medal, and first prize under Class 501. The Burpee people also received special certificates of merit for the following new sweet peas: Chevalier, Milkmaid, Spokane, Lady Fair, Quaker Maid, Robin Hood.

Burpee's Sweet Pea Exhibit at Fifth National Flower Show

## BOSTON

Fitzgerald, the florist of Huntington Ave., is planning some extensive alterations on his store. He expects to make a new entrance on Blagden Street, which is now at the rear of the store. Then he will put in a gallery over the window for the bookkeeping department. This will give him much additional selling space, and greatly enhance the appearance of his already attractive store. Mr. Fitzgerald had a wonderfully good Easter trade, being obliged to close his doors at noon on Sunday for lack of stock.

Simon Mickels has leased the store at 180 Canal Street, where he will open a florist shop.

There will be an important meeting of the American Orchid Society in Horticultural Hall, May 6, at 3 P. M. The election of officers will take place at that time, and a large attendance is hoped for.

## NEW ENGLAND

Mrs. Alvin L. Parker has opened a florist store at her home on North Street in East Jaffrey, N. H.

Walter McCann, formerly foreman of the Allen Winden estate greenhouses at Lenox, has become superintendent on a large estate at Millbrook, N. Y.

---

It is seldom that so many flowers have been seen at a funeral as when the late Sir John Eaton was buried at Toronto. It was the greatest funeral in the history of the city, and all local florists as well as those in other places were called upon to supply an enormous number of floral tributes.

## EDWIN JENKINS ON SWEET PEAS

At the recent gathering of florists at Cornell University, Mr. Edwin Jenkins, superintendent of the Belle Fontaine Gardens at Lenox, Mass., spoke on the out-door culture of sweet peas. He particularly emphasized the need of preparing the soil thoroughly, giving good drainage and planting early. But he warned against mixing any of the sub-soil with manure and using it in the trenches. A rich loam is best, he said, but sweet peas will grow on other types of soil if the conditions of drainage and fertility be good. He declared that it paid to start sweet peas indoors as early as the middle of February.

To account for its popularity, Mr. Jenkins compared the sweet pea to some of the other well-known garden flowers in respect to ease of culture, cheapness, freedom from disease, rapidity of development, adaptability to different sites, and continued production of flowers after picking. He asserted that the sweet pea is superior in all these features.

The following is a list of thirteen varieties which Mr. Jenkins recommends as being very desirable:

| | |
|---|---|
| White | Constance Hinton |
| Dark Pink | Hercules |
| Light Pink | Lady Evelyn Eyre |
| Cream | Felton's Cream |
| Cream | Mrs. Dalton |
| Maroon | King Manuel |
| Lavender | R. F. Felton |
| Rose | Roseabelle |
| Scarlet | Scarlet Emperor |
| Purple | Royal Purple |
| Orange | Robert Sydenham |

James A. Reburn has taken charge of the William C. Osborn estate at Garrison, N. Y. Mr. Reburn was formerly general manager of Fern Brook Farm at Mt. Kisco, N. Y.

| | |

**A NEW BOOK**

INTENSIVE STRAWBERRY CULTURE

Written by an expert of 40 years' experience.

Designed especially for people with small holdings and yet not to be overlooked by the big grower. Gives the most approved methods of handling strawberries for large crops and quality fruit.

Write for free prospectus or send $1.00 for the Book.

**Louis Graton**

WHITMAN, MASS.

**THE FLOWERING CRABS**

(MALUSES)

The Flowering Crabs have few rivals among the gorgeous spring-flowering trees and shrubs. At the Arnold Arboretum one of the important events of the year is the blooming of the Crabs followed by the showy fruit.

Of easy culture, and planted singly or in masses give remarkable and quick results. While beautiful on the small lawn Flowering Crabs are used to the greatest advantage on a large scale in woodland and other mass plantings, as are Dogwoods and Hawthorns. No group of plants have greater value than the Maluses for enlivening open forest parks and country roadsides; they present striking effects when planted on parking strips of boulevards or wide city streets.

## FAMILY TREE OF BOSTON FERN

### Origin of Varieties Shown by Brooklyn Botanic Garden Chart

A very unique chart has recently been installed in one of the Brooklyn Botanic Garden greenhouses. In this house there are two groups of cultivated ferns. Accompanying the chart, and arranged partly according to the relationship as indicated on the chart, are numerous varieties of Nephrolepis, about 75 different kinds. Practically all the forms represented on the chart will be maintained constantly in this house, together with a collection of English varieties of Boston Fern and other forms of interest.

In connection with the chart, there is framed the following statement:

"The ferns in this house include practically all the best kinds for use as house plants. On the left bench are the kinds commonly sold as "table ferns" because so many are raised and sold to fill fern dishes. Many of them are useful also as larger pot plants, and can be grown by anyone who can raise other house plants successfully. Even in ordinary apartment conditions, with dry air, drafts, too much heat, too little light, fumes from illuminating gas, irregular or too much water, they may be expected to remain decorative for weeks, sometimes months.

# ADVERTISING and SELLING

## USES MINIATURE AUTOMOBILE

### Novel Advertising Scheme Originated by the Louise Flower Shop of Washington

A miniature automobile which runs around the city of Washington delivering notes and letters, and occasionally a box of flowers, has proved an excellent advertising scheme for the Louise Flower Shop.

Everywhere the small auto and its small driver go there is attention. Children stand on the corner watching the unusual car until it is out of sight. In the downtown streets there is always a crowd around it, no matter at what time of day it appears there. The name of the flower shop is on the car in large letters, and so there is no possibility of the passer-by not knowing where it is from.

To make the affair still more attractive two Negroes have been engaged to run the car. These boys only work after school hours, one being a schoolboy of short stature, just sixteen years of age; the other a dwarf about twenty-one years old, who is still going to school.

The boys are dressed in uniforms, one wearing bright red to match the car, and the other a suit of royal blue, with black trimmings. Both wear tall hats, which have the words, "Louise Flower Shop" on a band around the crown. The boys are proud of their jobs and keep the little car shining and neat.

## WILD FLOWER SHOW

### Coming Exhibit at Horticultural Hall to be Most Unique

Unusual preparations are being made for the special exhibit of wild flowers and ferns to be held at Horticultural Hall, Boston, May 3-7. This exhibit will be put on by President A. C. Burrage, of the Massachusetts Horticultural Society, who has been preparing for it for many months. Hundreds of plants were collected last season and are now being forced under glass at Beverly. So much skill is being shown that flowers ordinarily blooming in September, as well as the spring flowers, will be open during the show.

The entire floor in the large hall has been taken up in order to make possible the laying out of a pond, the construction of a brook, and the arranging of evergreens to form a miniature forest. The wild flowers and the ferns will be shown under conditions as near natural as possible. Without doubt the show will be as big a success as the exhibition of native orchids which Mr. Burrage put on last year.

## NEW ENGLAND FLORISTS' ALLIANCE

Eugene M. Naukam, secretary of the New England Florists' Association, spent Easter week with his family in Buffalo.

The following are new members:

Eric R. Anderson, Bacon St., Natick, Mass., G.

Mishawan Flower Co., Eric R. Anderson, Prop., Woburn, Mass., G.

Arnold-Fisher Co., 58 Wyman St., Woburn, Mass., G.

Philip Rittner, 166 Canal St., Boston, Mass., R.

J. McKenzie, Cambridge, Mass., R.

Garry W. Bates, 253 South St., Randolph, Mass., G.

J. L. Beasley, 443 Mass. Ave., Arlington, Mass., R.

Max Fine, 198 Dartmouth St., Boston, Mass., R.

Mrs. Edmund Hunt has opened a flower shop at 23 Central Street, Southbridge, Mass.

**WANTED**

By experienced nurseryman and florist, nursery or florists' stock to grow and market if desired; splendid land, located twelve miles from Boston; best of train service; could handle Gladioli, Dahlias, Iris, Peonies, Fruits, Shrubs and general hardy nursery stock on contract or otherwise; am in the market for salable hardy stock for spring.

E. E. RANDALL, Nurseryman,
Reading, Mass.

# THE NEW JAPANESE KURUME AZALEAS

**Christmas Cheer**—This name was suggested on account of its brilliant coloring, a real Christmas red, a rich cochineal-carmine, semi-double, $20.00 per 100, $150.00 per 1000.

**Daphne**—Pure white with just a faint suffusion of delicate mauve towards the ends of the petals reminding one of the sweet Daphne odora, single. $20.00 per 100; $150.00 per 1000.

**Flame**—A most brilliant madder-red with coppery suffusion lighting up wonderfully under artificial light, single. $50.00 per 100; $450.00 per 1000.

**Peach Blow**—A beautiful peach blossom pink, shading lighter towards the centre, a perfect gem, single. $25.00 per 100; $200.00 per 1000.

**Pink Pearl**—Suggestive to the popular Rhododendron Pink Pearl in color. A beautiful salmon-carmine shading lighter to the centre, flower semi-double and remarkably free in large full trusses. $25.00 per 100; $200.00 per 1000.

**Snow**—Purest white, the semi-double flowers being of most graceful shape and remarkably free-flowering and lasting in good shape for an unusually long time. $25.00 per 100; $200.00 per 1000.

**Hinamayo**—Introduced some 6 to 8 years since but still very scarce. It is a gem for freedom of bloom, very early. Color a lively pink with crimson suffusion, single. $15.00 per 100; $140.00 per 1000.

**Choice Mixed Varieties.** $12.00 per 100; $100.00 per 1000.

**THE ABOVE PRICES ARE INTENDED FOR THE TRADE ONLY**

Unquestionably these new Azaleas are the most important flowering plants that have come forward since the introduction of the Lorraine Begonias and its types and the French Hydrangeas, and we believe they will in a short time due to the ease with which they are handled, their many varied colors and the satisfaction which they will give to the amateur become even more popular than these standard favorites.

The illustration here shown is a 5-inch pot plant, the photograph of which was taken just eighteen months after the cutting was inserted in the propagating bench. It is one of the plants that was shown in our exhibit at the International Flower Show at New York which attracted so much attention. This plant demonstrates the speed with which good salable plants with an abundance of flowers can be developed.

It will be noticed that with the exception of the variety Hinamayo introduced some 6 or 8 years since we are offering these new introductions under descriptive English names and not under the Japanese names under which they were imported. This may be open to criticism but in explanation of same we will state that the Japanese stock supplied to us was so badly mixed, 3 or 4 different colors having been supplied under one label so that identification was impossible. Furthermore, we believe the trade as well as the public in general will better appreciate the descriptive names under which we are now offering them.

**Your assortment of early spring and Easter flowering plants has been greatly curtailed through the effects of quarantine 37. Your customers complain of this lack of variety and sameness. The Kurume Azaleas will help to relieve some of this monotony.**

**We are now booking orders for delivery fall of 1922 and spring of 1923 of good 2¼-inch pots of the following varieties:**

**Apple Blossoms**—The name conveys an idea of the color of this dainty flower, which is a delicate old rose suffusion on a silvery white ground, flowers single. $20.00 per 100; $150.00 per 1000.

**Cherry Blossoms**—The general color effect of this gem is that of cherry blossoms, the centre of the flower being a delicately lilac-tinted white shading to a delicate mauve-pink at the edges, semi-double. $20.00 per 100; $150.00 per 1000

**Henry A. Dreer** 714-716 Chestnut St. Philadelphia, Pa.

# WINDOW LIGHTING

By J. DANIELS

An authority on lighting has stated that the show window is a miniature stage, and much in regard to the artificial lighting of the window can be learned from a stage manager. In stage lighting, all lighting sources are concealed so as not to annoy or distract the audience by bright lamps. Various lighting methods are used to secure striking effects. The stage manager changes intensities, colors, direction in such a way as to utilize psychological influence of lighting.

In order that the merchant may utilize stage lighting effects in his window, new equipment has been designed recently that makes it possible very easily to obtain these results. First, however, it is necessary to consider the light source used. The universal method of obtaining light for show windows is the type C, incandescent lamp. It gives a steady light and can be easily concealed. It is made in a number of different sizes, allowing extreme flexibility, the most popular sizes for window lighting, however, being the 75, 100 and 150 watt lamps. The "C" lamp is also made with blue glass, thereby obtaining a daylight color which allows the goods to be shown in practically their daylight value.

The distribution of light from the incandescent lamp is approximately the same in all directions, therefore they should be equipped with reflectors to direct the light on the goods displayed, rather than allow it to illuminate the ceiling or sidewalk. Many types of reflectors have been designed especially for window lighting and are of different shapes in order to give the correct control of light desired for windows of different shapes and construction. Tests have shown that the most efficient reflectors are those of the prismatic and mirrored glass type. The prismatic glass reflector is useful where a transparency is used to allow a small amount of light to be transmitted through the glass. The manufacturers of window reflectors furnish information as to the proper type to use for different cases.

The intensity of illumination depends to some extent on the color of goods shown. Goods of light colors do not need as great an amount of light as dark colored material. Where the color of goods is likely to vary, the lighting installation should be designed for the darkest materials and the switching arrangements can be such as to cut out one-third or one-half the lighting units when lighter goods are shown. Consideration also must be given to the location of the store. A show window on a brightly lighted street should have a greater intensity than a window on a side street in order that a sufficient contrast might exist between the street and window lighting to compel attention.

The colored lighting effects used on the stage to such great advantage can now be obtained in the show window. Lamps, superficially colored, have been used to some extent in the past, but have proved unsatisfactory, due to the short life of the lamp

There are now on the market screens of gelatine or glass that can be applied to and removed from any of the standard window reflectors quickly and easily. The use of such equipment opens a new field to the window trimmer of great possibilities. Different effects can be expressed. Red suggests fire and action; blue, coldness, Winter; yellow, sunshine; orange, Autumn; green, Summer; purple, luxury. The simplest way to use color is to flood the window with one color, or two or more different colors may be used coming from different directions. An effective picture has been obtained by flooding the window with one color and the use of a spotlight to light an important object with white or any other desired color.

The subject of window lighting has been receiving increasing attention, as merchants realize the enormous advertising value of the window. Many well decorated windows have been spoiled by poor lighting or rendered useless a large number of hours during each day. With the variety of equipment now obtainable, these conditions are rapidly disappearing and it behooves every florist to make sure that he is doing justice to his displays by lighting them in such a manner as to make them easily seen and enhance their beauty to the throng passing his store each day.

### THE PLANTS OUR GRANDMOTHERS LOVED

In many an old time garden in New England are plants which for generations have been treasured, since our grandmothers planted them by their homes in the early colonial days. Who that has spent a summer in New Hampshire or Vermont does not know the beautiful red rose which still grows by the old cellar there, though the houses have fallen and their tenants departed.

On May eleventh, under the auspices of the New England Branch of the Woman's National Farm and Garden Association at 5 Commonwealth Avenue, the home of Mrs. Walter C. Baglie, who has most generously offered her music-room for the occasion, there is to be a sale of these perennials, from ten in the morning to six o'clock in the afternoon.

Among the plants which have been offered are yellow Scotch roses, ladies' delights, ribbon-grass, sweet rockets, fuchias, blue honeysuckles, hardy garden pinks, larkspurs, sweet williams, phlox and many another old time favorite. Nor have the gardens of historic interest failed to respond to our call. From the Padre's garden in Santa Barbara there will be gladiolus bulbs, ivies and box from Mount Vernon, dainty little shrubs from the Arnold Arboretum, and plants from the Wayside Inn in Sudbury, and from the gardens of Emerson and the Old Manse in Concord.

We can picture these well known historic places, we can see the plants at Mrs. Baylies' and dream of the coming beauty of flowers, but we want also to think of the gardens from which the other flowers have come, where they have been tended, cherished and cared for till now they have been sent to our sale to help in the great democracy of flowers.

"Wondrous truths, and manifold as wondrous, God hath written in those stars above. But not less in the bright flowerets under us stands the revelation of his love."

M. R. CASE,
Hillcrest Gardens, Weston.

### NATIONAL FLOWER SHOW

The work of winding up the affairs of the Fifth National Flower Show held in Indianapolis is engaging the close attention of the Administration Offices of the Society, and is gradually approaching completion. It would not be just or advisable to issue an authentic statement at this time, but it may be said that there is no occasion for misgivings as to a satisfactory financial issue. The matter of the return of the subscriptions to the Guarantee Fund is receiving early attention, and as the gross receipts from the Show are pretty well determined checks will be forwarded to the subscribers very shortly.

Rentals of trade space produced a little over $13,000, and the catalogue about $2,500. Gate and trade tickets yielded nearly $28,000, and the special premiums presented amounted to about $5,300. Receipts from other sources amount to a sum in the neighborhood of $12,900. With the exception of a few bills covering trade space, practically all moneys to be credited to receipts have been turned into the treasury.

The sum to be paid out in premiums amounts to about $13,000. The awards are in process of checking and confirmation, and checks covering money prizes, and medals and other material prizes will go forward to the winners very shortly.

The expense side of the account is, necessarily, requiring considerable time, operating expenses, rentals, and petty expenses not being as easily determined as receipts. As soon as everything can be tabulated, a detailed report will be prepared and the National Flower Show Committee are in hopes this may be accomplished within the next two weeks.

Chairman George Asmus, whose foresight and energy made the Show possible under circumstances which at one time were most distressing, may be congratulated upon the successful issue of the Show, which to many is most remarkable.

JOHN YOUNG, Sec'y
Apr. 17, 1922.

The benefit of HAIL INSURANCE was forcibly illustrated by a number of violent hail storms in New England last year.

Be wise and send to **John G. Esler, Sec'y of Florists' Hail Association, Saddle River, N. J.**, for Hail Insurance literature.

**DO IT NOW.**

## George Watson's Corner

"You in your small corner and me in mine."

Robert Crawford and Edward Alburger were in the obituary columns last week. Of all the good words said about them, none sounded better to me than that they were both good men and true. I knew them both for over thirty years, and was always proud of their friendship. They were real men. Toed the mark to the lowest or the highest emergency that the true man is called on to foot in his walk through this mortal sphere. Men among men, and made their mark. I bow my head in respectful farewell.

Brother Engler means well; but this "non-mowable-lawn-grass," he wants, would be a knock-out for the Pennsylvania Mower Co., and the Philadelphia Mower Co., two ancient institutions which have made our state famous the world over. You might as well talk free trade to John Dobson the wool man, or to the Manufacturers' Club of Broad and Walnut Sts. To a mower man, a scythe man, a rake man, and many another man, the idea sounds like poison or gas or a submarine. Then there's the advertising department of Brother Engler's paper. Maybe it would have something to say on the subject. Belay with the marlinspike!

"And all the latest tango shades"—that is the way a recent Pennock advertisement read. They are talking about sweet peas; but just what they, a conservative, scrupulous, conscientious and celestial firm mean by using the word "tango" is rather mysterious. The word is not in the dictionary. Neither is it in the encyclopedia. And the live young wires about town tell me it's a dance and not a color. The first thing we know, they will be handing us:—"meticulous," "fuliginous," "proleffic," and "rufous," so that we may be all quite up-to-date in the Mother Tongue. W. Atlee Burpee will please take notice. He might get into another London Fog.

If the Florists' Club of Philadelphia is live and up to date it should invite Miss Jarvis to be its speaker at its next meeting—first Tuesday in May. Let the subject be:—

**What Miss Jarvis Thinks of the Florists**

and let her get up on the platform and hand it to them good and strong. She can do it, and she'd be proud of the chance! Talk about having a scientist from Boston or Washington to draw a crowd about "platitudinous pulcherrimas," or some other such exciting subject. They wouldn't be in it with Anna. She has the pep, and could fill the hall to overflowing.

After Miss Jarvis had had her say we expect President Campbell as chairman would call on his vice and take the floor. Vice Presidents come in handy sometimes, although as a rule they are mostly ornamental. Fif-

teen minutes would probably be allowed for say and rebuttal then the floor would be taken by Edward Reid. Mr. Reid has had a long experience in the business and is well known and respected the country over. He is also a keen logician inherited from his Caledonian ancestry and what he said would surely be worth listening to.

The magnolias are simply lovely this year. One grand burst of glory—as you make for your early morning train—and come near missing it by simply having to stop and feast your eyes on the gorgeous fascination. There may be a lot of reasons. Weather just right or climax conditions favoring a fine show after years of gathering up to it. Whatever it is, put 1922 down as some magnolia year! I am referring to the kinds that bloom before the leaves. Philadelphia is about the northern limit for many of them. There used to be a fine one at Broad & Walnut Sts. that W. R. Smith planted and bragged about for half a century. Of course the skyscrapers had to have their way.

Steve Mortensen is a specialist in roses but he also takes a keen interest in all the side lines of the business. You ought to see his lively countenance when Sam Pennock tells him his consignments went really in to the top notch column of all the top notch growers of the past ten years. But what's new, says he, isn't there something else I can grow and make more money on, and then Steve listens and listens. That boy is some listener, and the first thing you know he hands you something.

We cannot bring our outstanding ideas of the wholesale trade to a focus without saying a little word for Jack Berger. He has stuck to it through all these many years, and he still holds good. A lot of them have been attacked with "cold feet," but Jack keeps on getting bigger and bigger every year. A true son of his father, and a credit to him. This is no reflection on the other live-wires in the wholesale business, but just a little rosebud, dropped in no angelic, aerial flight, across the banks of the green Delaware. Jack, I knew your old Daddy well, and I delight in the fine success of all his boys! Put that down in cold print.

Frank Ross has got the fundamentals of the advertising game doped down to a fairly good basis. He is telling the readers of the Record, the Inquirer, and the Bulletin, that notwithstanding the big demand for Eas-

ter, and the general rush, that he sells right along at bargain prices. His old slogan, which made him famous some years ago—"The Best at the Lowest"—still holds good with him, and he seems to get the multitude with him on that idea—at all four of his new and up-to-date stores, in different parts of the city. The millionaire does not care how much he pays, so he gdes to Chestnut St., and they soak him. Frank says: "there are other people just as good, even if they have not so much money," and he can hand them the joy of flowers for little money. The best at the lowest. Guess we'd better see Frank.

Talking about advertising, there are many still among us who remember Godfrey Aschman. He was the boy who could get up a good one and he kept it up for years and built a business by it. It is one of these Heavenborn gifts that seems to pass with the passing. Few understand it any more than they do true poetry from Limericks. The ideal is there, in the true stuff. Most of us can no more explain why it appeals than we can fly. But it's there, all right. If you can put poetry and personality into an ad it will make you famous, and bring you wealth. So get busy. Our space rates are very reasonable.

Mr. Henry Eaton has become superintendent of the estate of Mr. Jere Downs of Winchester.

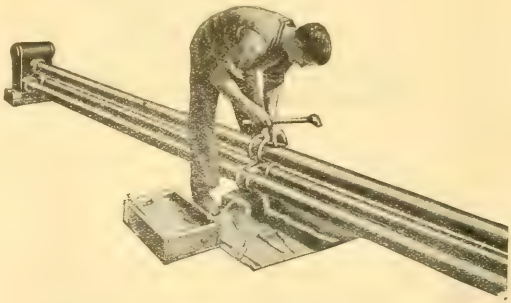
# Old—But Young

You might think we mean Mr. Lewis, but we don't. It's about the youth and age of some heating pipe that we had in mind.
Or to be exact, what Mr. Lewis most courteously reminded us, ought to be put in your mind.
Along in March he wrote us a letter.
A voluntary letter written just because he thought you folks ought to know one more of the dependable points about us, that he knows. Here is what his letter said.

"It may interest you to know that there is some piping in a greenhouse across the street from me that your firm put in for my grandfather, E. B. Lewis, some time between 1865 and 1870.

There have been several boilers put in and connected up to the pipes since the first one, and also two or three houses rebuilt over the pipe. But the old pipe is still doing business just as good as the day your men fired up the first time. Even the brick foundations are still in place."



And now let us add to Mr. Lewis' comments, that when we first started in business (which was many years ago), heating was all we did.
We used to heat 90% of all the greenhouses then built in the East.

Finally, one of the greenhouse building concerns came to the conclusion that they would go after some of that heating business.
So, just to return the compliment, we decided to build greenhouses as well as heat them.
That happened a long time ago.
So you see we have always been strong on the heating side of greenhouses.

Our chief heating expert, "old war horse MacArthur" as we call him, has been with us for many years.
He started in doing what that chap below is doing.
He knows heating from the bottom up. Being one of your hard headed, sound sensed Scotchmen he's not much on theory.
But he is a bear cat when it comes to facts. Based on facts, he bases our heating.

Exactly the same high grade materials that went into the work we did for the grandfather of Mr. Lewis, we are putting in our work today.

Taxes and JackFrost come around every so often in spite of all you can do.
Don't let Jack catch you napping on your heating this year.
Send for us now. Get what needs to be done, done.

### NURSERY TREES REAL ESTATE.

#### Taxation as Personal Property Resisted by Nurserymen.

A matter of great importance to nurserymen everywhere has just been decided at Middletown, R. I., where several nurseries are located. A controversy had arisen over the taxation of growing nursery stock. Local officials levied on the stock, claiming it was tangible personal property. The nurserymen contended that as the trees and shrubs were firmly annexed to the soil they should properly be taxed as real estate. They also contended that it was unjust to keep taxing the same trees year after year while they are growing, and before it is possible to market them. The ruling has now been made in favor of the nurserymen who have been paying the tax under protest. A town meeting is to be held to vote on rebating the taxes already paid in.

### EVERGREENS SUFFER BADLY

Reports continue to come in showing that much damage was suffered by evergreens in New England the past season. The damage seems to have been done late, too, as trees which were in good condition in March are now badly burned and apparently half dead. On some private estates the loss has been very heavy. This loss has also extended to rhododendrons. The American Arborvitae is among the trees which have suffered badly. Taxus canadensis has also been hard hit.

It is interesting in this connection to have a statement from Mr. Kirkegarde, of the New England Nurseries at Bedford, Mass., that a block of Taxus canadensis on his place was badly damaged while a block of Taxus cuspidata standing beside it was uninjured. The Japanese Yew seems to be proving one of the hardiest and most satisfactory foreign plants ever introduced. Mr. Kirkegarde says that the demand for evergreens has been unusually large this year, especialy in the trade.

### THE MARKET.

After a very dull week the market is brisk again, and doubtless will remain good until after Mother's Day. Carnations started in on Monday at eight cents, with a promise of gradual advance in price. The market is being cleaned up well of all flowers except snapdragons. It will be necessary for florists to advocate the use of other flowers than white carnations so far as possible. There won't be nearly enough whites to go around.

## *To All Orchid Lovers:*

## ATTENTION!

**The Federal Horticultural Board has called a conference for May 15th, at Washington, D. C., to discuss Quarantine No. 37.**

**At a previous conference in 1920, at which were present over twenty Orchid men, we had, as well, two hundred signed protests from prominent Orchid growers against the embargo on Orchids. Only two men spoke in favor of the Quarantine.**

**In spite of the prevailing sentiments that the Quarantine should be modified, the Board decided that inasmuch as Orchids could be raised from seed no change in the regulations were necessary. Since that time, however, the effects of this embargo have been disastrous to the Orchid interests. If you are in favor of modified restrictions that will provide reasonable protection against pests without destroying our Orchid industry by prohibiting importations, send your protest and, if possible, reasons for same to**

*DO IT NOW!*
**We need your reply before May 15th**

## THE TALK OF THE TRADE

I learn from Mr. N. H. Eiss, of the W. A. Kasting Co., Buffalo, that the florists of that section are planning to spend a thousand dollars for Mother's Day advertising. Mr. Eiss is chairman of the publicity committee and a great believer in the value of printer's ink for moving flowers. It seems to me that the Buffalo florists have been particularly successful in their co-operative work. A thousand dollars is a very fair amount for a city of that size to raise. As a matter of fact, it goes almost three times as far as the same amount would go in Boston, because of the lower newspaper rates.

Compared with it the $400 which has been appropriated by the New England Alliance for advertising in the Boston papers seems pretty small. Of course the Boston campaign is only beginning, however, and it is to be expected that within a year or two several times $400 will be available for Mother's Day advertising. There is no doubt of the fact that Mother's

Wild Flower and Fern Show in Boston

Day can be made a big event for the florists in Boston as in other parts of the country. I was privileged to see in advance some of the copy which is to be used in the Boston papers. It is well gotten up and should be effective in stimulating interest among flower buyers.

I have been interested to learn that there is a heavy call this year for dahlias of the older varieties, such varieties as Countess of Lonsdale, Queen Wilhelmina and W. W. Rawson. Many of the growers were not prepared for this demand, and exhausted their stock early in the season. It appears that the public is getting surfeited with new varieties, and has been disappointed because of the difficulty found in wintering many of these newer kinds. Perhaps this partly explains the tendency to call for the dahlias which have been tested and found reliable.

There has been an unprecedented demand for dahlia roots this year. Gladiolus corms have sold almost as well, and there are few growers who will not make money this season. The call for Primulinus Hybrids is growing, and needs to be encouraged. This is a flower which florists at least should favor. If amateurs become familiar with it in their own gardens, they will be more likely to buy forced blooms out of season. I see no reason why florists should not sell bulbs of this kind to their trade.

Without doubt the Primulinus Hybrids are the most satisfactory of all gladioli for forcing. According to Mr. B. Hammond Tracy, it is possible to have flowers in bloom every month of the year, with the possible exception of December. So far it has proved difficult to get flowers in bloom at Christmas time when they probably would sell well. To accomplish this result it will be necessary to force the bulbs at a low temperature. The tendency in the fall is for them to come along too fast, and it is hard to hold the bulbs after September.

I recently heard of a little kink which may be of value to growers who force Primulinus Hybrids. A certain grower who has been very successful with these bulbs tried placing them on top of the boiler until they were well dried out. They then forced readily and gave excellent spikes.

Florists who grow gladioli out of doors as well as under glass should understand that the best flowers do not come from the largest bulbs. According to some growers it would be much wiser to grade bulbs by their ages instead of by their size as is done now. When a bulb reaches large size it is likely to have passed its prime. It is becoming decadent. Bulbs which a florist might not dare offer his customers because of their small size may prove the very best bloomers when grown in his own patch.

What would florists do if it were not for the telephone? In many communities it is depended upon to an astonishing extent. I was surprised, however, when William Miller & Sons, of West Lynn, Mass., told me that seventy-five per cent of their orders came in over the telephone. This seemed all the more strange because the location of Miller & Sons was a fairly central one, and their chief customers among employees of the great General Electric Co. I assume that the Millers have learned how to handle telephone trade especially well. In fact, Mr. Miller senior was answering a call when I entered the store, and from the tactful manner in which he dealt with his absent customer I could see that he could readily make and keep friends by wire.

There are other florists who have greatly extended their business by proper use of the telephone, especially where they have kept a list of customers and had someone with a pleasant voice call them at intervals with suggestions. When it is possible to develop a system by means of which birthdays, wedding anniversaries and similar occasions are kept track of, an unobtrusive suggestion that flowers might be welcome often proves a splendid business getter.

Growers one after another are putting in the blower system of heating by means of which they can use screenings or other very fine grades of coal. Of course such coal can be purchased at a very low price, the total cost including hauling not being in many instances over $3 or $4 a ton. The forced draft is obtained by use of an electric motor or a gas engine. The Arnold-Fisher Co., rose growers, of Woburn, Mass., have a triple system, including electricity, gas and a steam engine, so that no matter what happens they are pretty sure of having power to keep their blower in operation. Some growers depend wholly upon electricity, but this is taking a chance, because occasionally a severe storm or other disturbance breaks down the wires and cuts off the current.

The only out about this forced draft system which I can see is the tremendous amount of soot and dust which accumulates. I recently visited the large establishment of Mr. Stephen E. Shaw, of North Dartmouth, Mass., where such a system has been in use for several years. Mr. Shaw finds it very satisfactory as well as economical, but has to keep constantly cleaning out fine dust-like refuse. In fact he had to change his boiler house, putting a monitor shaped ventilator on top before the help could remain in it for any length of time. The change made did away with the trouble very nicely.

Mr. Shaw says that the soot which he takes out is being used largely on heavy clayey soil, and is helping to make it more amenable to cultivation and better for the plants which he grows in it.

Mr. Shaw has plans all made for the erection of a new house of King construction. It will be added to another King house already standing and will be used for the growing of carnations. Although Mr. Shaw grows a wide variety of material, Mr. Shaw specializes in carnations, and grows most of the leading kinds, including Laddie and Maine Sunshine. He finds his market mainly in Fall River, New Bedford, Taunton and other nearby places. In one of his houses I saw some of the best Marguerites that I have come across this season.

Improved conditions in the business are shown by the increased tendency of growers to make contracts for new buildings. Mr. Harold Patten, at Tewksbury, Mass., is going ahead with his new King house, which will be one of the largest in his extensive range. A lot of filling was required before this house could be put up, but it is being supported by extensive cement foundations, so it is not likely to settle much. The rapidity with which this house is being erected is illustrated by the fact that within ten days from the time work was started the house was ready for glazing.

## WHITE MEDAL GOES TO A. C. BURRAGE

The George Robert White medal of honor, established by the late Mr. White, who bequeathed $5,000,000 to the city of Boston, has been awarded to Albert C. Burrage of Boston in recognition of his services to horticulture. The trustees of the Masachusetts Horticultural Society made the award, on the recommendation of Prof. Charles S. Sargent, vice-president of the society.

The medal will be struck in gold at the United States mint in Philadelphia.

## WILD FLOWER AND FERN SHOW.

### Unique Exhibition Held in Boston and Largely Attended.

Another success has been added to the long list of unusual flower exhibitions held in Boston. The wild flower and fern show at Horticultural Hall, which opened on the 4th and closes tomorrow, the 11th, has attracted tremendous crowds. It is different from any show ever staged in America, and credit for its conception and execution is due largely to Mr. A. C. Burrage, president of the Massachusetts Horticultural Society.

As the floor of the main hall was in rather poor condition, the Society decided to have it removed entirely before the show. It thus became possible for a pond and brook to be dug out of the earth underneath. The rest of the ground was smoothed off and walks laid out, being covered with pine needles. The sides of the Hall are banked with large evergreen trees, between thirty and forty truck loads being used for the purpose. Among the trees and accentuating the outline of the hall are rocks and stones, all brought from Mr. Burrage's place at Beverly Farms. At one end of the hall is a huge waterfall containing thirty tons of rock. The center of the hall represents a swamp, and in it are growing many plants usually found in such locations, including the tall swamp blueberry in full bloom, and the splendid Lobelia cardinalis.

To get together all the plant material shown was a tremendous undertaking. Representatives of Mr. Burrage under the direction of Supt. Douglas Eccleston scoured New England's woods and hillsides for many months. They were obliged to lower a man 125 feet with a rope to get some of the Woodsias growing in crevices on the side of a Vermont cliff, and the tiny willow Salix uva-ursa, which grows only six inches tall, was found above the timber line in the White Mountains.

Forcing the wild flowers so as to have them in bloom simultaneously was very difficult and taxed all of Mr. Eccleston's rare skill. There were some failures. Most of the Cypripediums bloomed too early on account of the warm weather. Rhododendron Maximum came very slowly, like some others. One of the most remarkable feats was in getting the Fall Aster into full flower. The fern collection with its 48 different kinds is practically complete. It represents surprising knowledge and enterprise.

Following is a list of the wild flowers forced for the show:

| | |
|---|---|
| Flowering dogwood | Bunch berry |
| Moccasin flower | Small Solomon's seal |
| Pink lady's slipper | Great laurel |
| Showy lady's slipper | Pink azalea |
| Small yellow lady's slipper | Wild honeysuckle |
| | Rhodora |
| Large yellow lady's slipper | Swamp rose |
| | Blood root |
| Trailing arbutus, or Mayflower | Pitcher plant |
| | Early saxifrage |
| Dog-tooth violet | Skunk cabbage |
| American beech | Wake Robin |
| Wintergreen or Checkerberry | Large white trillium |
| | Painted trillium |
| Closed gentian | Hemlock |
| Rattlesnake plantain | Bellworth |
| Yellow fringed orchis | Swamp blueberry |
| Small purple fringed orchis | Cranberry |
| | Arrow wood |
| Swamp pink | Sweet white violet |
| Liver leaf | Canada violet |
| Large blue flags | Purple violet |
| Juniper | Birdfoot violet |
| Mountain laurel | Lance leaved violet |
| Sheep laurel | Round-leaved violet |
| Sugar maple | Pale laurel |
| Bog rosemary | Labrador tea |
| Wood anemone | Wild yellow lily |
| Wild columbine | Wild red lily, or wood lily |

## NEW MARKET HOUSE

### Boston Florists Will Soon Make a Decision—Consolidation Completed

Boston florists will soon know where the new wholesale market is to be located. A meeting of all the members of both markets is to be held in the near future, probably on Saturday, May 20, at Young's Hotel, at which the whole question will be gone over. The committee, William H. Elliott, chairman, has inspected a large number of sites and will recommend at this meeting that a choice be made between several of the best. These sites are in different parts of the city and the members will be given considerable latitude in making their selection.

The question will have to be decided, too, as to whether the markets shall have rented quarters or a new building. If a new building is voted for, the members must decide between a cheap and a more costly structure. There seems to be a feeling that a really worth while building should be erected. Such a building will cost a lot of money, however, and the growers must reckon on this fact. With the right kind of building, practically all the trade interests can be housed under one roof in a most convenient way.

A meeting was recently held at Young's Hotel at which the details of consolidating the two markets were completed, through an arrangement of exchanging stock. The present officers of each market will continue to serve until October, however.

## PRES. BURRAGE RE-ELECTED.

### Important Meeting of the American Orchid Society in Boston.

Following a luncheon at the Algonquin Club in Boston last Saturday, a meeting of the American Orchid Society was held at Horticultural Hall, about thirty members being present. Pres. A. C. Burrage was in the chair. The secretary's report showed 118 members, 35 being life members. Forty-four of these members are in Massachusetts and sixteen in New Jersey. Mr. Burrage was re-elected president, Theodore E. Wickwire, Jr., of Buffalo, W. A. Manda of So. Orange, N. J., Oakes Ames of North Easton, Mass., Vice-Presidents; Louis Burke of Philadelphia, Treasurer; Alfred J. Loveless, Lenox, Mass., Secretary. These were re-elections.

The treasurer's report showed $3,200 on hand, which amount is to be kept as a working fund.

On recommendation of Pres. Burrage it was voted to compile a list of all the American wild orchids, there being a constant demand for such a list. The statement was made that Pogonia rotundifolia and Orchis junifolia were rapidly approaching extinction. W. H. Lincoln, of Pittsfield, Oakes Ames of North Easton, and W. H. Child of Boston were appointed to locate as many groups as possible and report.

Mr. Thomas Roland advocated a big notional orchid show which should represent all parts of the country. It was voted to have such a show in 1924 in Boston, nothing but orchids being exhibited.

It was voted that the society strike a gold, a bronze and a silver medal to be awarded at the society's shows, and also offered at other shows. This was on motion of Mr. Joseph Manda.

Pres. Burrage has distributed handsomely bound copies of the by-laws and membership list, the cover having a splendid picture of cypripedium aucaule in colors.

## FRED AMMANN APPOINTED.

Mr. Fred Ammann has been appointed Field Manager of the F. T. D. and expects to start shortly on a trip through the middle and southern states. Eventually he will cover the whole country and his work, it is believed, will be of the greatest value in developing the F. T. D. No man is better fitted for this work than Mr. Ammann.

Page and half page space, not consecutive, rates on application.

SUBSCRIPTION RATES:

One Year, in advance, $1.00; To Foreign Countries, $2.00; To Canada, $1.50.

**Sam Says:** **When florists forget to pay their bills, send them a bunch of forget-me-nots with their monthly statement.**

---

**Pushing Mother's Day.** Special attention is called to that portion of Mr. S. S. Pennock's Florida address in which he discusses the development of Mother's Day from a florist's viewpoint. Mr. Pennock treats the matter in an optimistic but sane and practical manner. Without question Mother's Day has a big future for florists if it is properly nurtured. In some sections of the country it has already been made a big business getter, largely through co-operative work and advertising. Its future in any section will depend entirely upon what the florists in that section make it.

---

**As to Quarantines.** All branches of the trade are keenly interested in the hearing before the Federal Horticultural Board to be held at Washington, beginning May 15. One important point in connection with this hearing is the fact that Secretary Wallace, of the Department of Agriculture, is to be present. In the past the Secretary has simply OK'd the reports of the Board. Possibly he has decided that he will be wise to get some first-hand knowledge of the issues involved. It is also understood that representatives of several foreign countries are to be on hand.

It is true without doubt that a very strong sentiment in favor of retaining the quarantine now exists. With the passage of years many nurserymen have worked up stock in excluded articles and are becoming more satisfied with the embargo.

At the same time there is a pretty general feeling, inspired partly by business necessities and partly by moral sentiments, that the quarantine measure should be reconstructed so as to make it fair and equitable, even though its salient features are to be retained. Without doubt there are many items, including certain of the bulbs, which ought to be removed from the restricted list. They are items which never should have been placed on the list at all, unless the embargo is in fact a tariff measure and not simply an effort to keep out injurious pests and diseases.

At its best the embargo is in effect a tariff. It is recognized and accepted as such. Even those who believe in it admit this fact. The whole matter would be on a much higher plane if a sincere effort were made to create a quarantine which would aim only at the exclusion of dangerous plants, even though this danger might be somewhat remote.

Any attempt to extend the embargo and to make it in fact a genuine protective measure, with a view to excluding all plants of all kinds from foreign lands, would be fought with the utmost vigor, and rightly. Any action of this kind should come through Congress, and be labeled for what it is, a tariff proposition.

---

**State Quarantines.** Present tendencies are discouraging. This is especially true in the apparent inclination of the various states to put up the bars against other states. It will be impossible to do business if this sort of thing keeps on. Take California as an example. An act has been passed which makes it necessary for those shipping stock into California to pay an initial fee of $10 and then deposit a bond of $1,000. This bond must be renewed every year. The act also includes measures which require a shipper to pay for losses from plants which develop insect pests after they have reached the state, if we are correctly informed. This rule applies not only to shippers of fruit trees, but also to orchid growers, and to them is an especial burden because eastern orchid men do a large business with California.

So far as we can see the chief beneficiaries under this arrangement are the bonding companies. If we should search for the nigger in the woodpile, it is quite possible that we might run down some of these same concerns. Certainly they would profit immensely if other states one by one should require bonds for nurserymen and propagators shipping into their territory.

But what of the nurserymen and propagators themseves? It is safe to say that they could not long endure such a situation. Now this quarantine mania, which has become an internal affair, is fostered by the situation at Washington, and it is there that we must look for initial relief. Quarantines are needed. Everybody in the trade admits that. They ought to be safe and sane quarantines, however, based on reliable facts and figures, and so just in their operations that no section of the trade will suffer in order that some other section may profit.

Let us hope that these matters will receive due consideration at Washington, and that the whole subject will be discussed in such a dispassionate and open-minded way that the Board itself will be rehabilitated in the opinion of the trade the country over, and that the points at issue will be setted fairly, honestly and once for all.

### GETTING TOGETHER.

**Prof. Waugh Approves Co-operation of Colleges and Gardeners.**

Dear Sir:—

I must commend your excellent editorial on "College Made Gardeners" in Horticulture on April 25th. It is very obvious that the college men and practical gardeners and florists are getting together rapidly at the present time. The splendid co-operation which we received from the nurserymen's association in our nursery course this winter is typical.

I believe both sides should receive equal credit for the present improvement in the situation. The colleges are more ready to accept the advice and co-operation of the practical men, while on the other hand the practical florists and gardeners readily realize that a college education in scientific and theoretical horticulture is a real advantage if supported by sufficient practical experience.

What we really want is some kind of co-operative course which will include both the theoretical studies at college and a practical apprenticeship in nurseries, gardens and greenhouses. This is what we are securing in a small way in our nursery course and what we hope to accomplish in a much larger and more effective manner through a co-operative arrangement with the National Association of Gardeners.

**Choice Orchids**
**HYBRIDS**
Laelia-Cattleyas, Brasso-Cattleyas, etc.
**G. E. BALDWIN CO.**
Mamaroneck, N. Y.

Permit me to call attention to one slight error in your editorial, however. You refer twice to this institution as "Amherst College." Amherst College is a very different institution which though located in this town has no connection whatever with the Massachusetts Agricultural College. Ours is a state institution and belongs to the people of Massachusetts. The fact that there are two separate colleges in this town and that they have no connection with one another is not generally appreciated by outsiders, and possibly has been overlooked by yourself, though I think you are well aware of the fact.

FRANK A. WAUGH,
Head of Division of Horticulture,
Massachusetts Agricultural College

### BULBS IN FLORIDA.

**F. W. Fletcher Tells of His Experience with Longiflorum.**

Editor Horticulture:—

In your Easter number I note your kind editorial notice of the longiflorum bulbs grown by me. I have a little different viewpoint than yours on the longiflorum bulb situation. Before undertaking the culture of these bulbs here we looked over the ground pretty carefully. Bulbs of these lilliums are grown successfully in various parts of this country, from Florida to Michigan, but bulbs grown further north than this latitude would hardly mature in time for florist's use.

Our bulbs can be thoroughly ripened and in the hands of the trade in July. Whether difficulties, now unforeseen, may bob up and change my present opinion that it is possible to grow all the longiflorum bulbs required for forcing in this country, right here in Orange county, Florida, I do not know. If they do I will be the first to make the fact public. Please bear in mind that none of these bulbs will be on the market for some years. Perhaps not then.

As to whether the Japs can "come back" and so clean up their stocks as to restore public confidence in their quality is a question. Bermuda has not done so, but the Japanese are a patient, far-seeing people and they must realize that the only salvation for their lily trade is to have a thorough clean-up—a matter of some years. No trade can long endure whose shipments show a waste of 40%, no matter if prices are reduced.

F. W. FLETCHER.

Orlando, Fla., April 18.

A new horticultural society has been formed at Sudbury, Ont., in which much interest is manifested. The organization starts off with one hundred and twelve members, and the new officers are as follows: President, Mr. J. Laberge; 1st Vice-president, Mrs. W. J. Bell; 2nd Vice-president, Mrs. J. A. Fraser. A show is being planned for in the near future.

Michael J. Costello has opened a flower shop at 394 Washington Street, Brighton, Mass. For many years Mr. Costello was connected with the Elliott Greenhouses.

# RAMBLING OBSERVATIONS OF A ROVING GARDENER

Years ago I used to spend much time in the J. Horace McFarland establishment at Harrisburg, Pa., where many of the country's seed catalogues as well as the American Rose Annual are printed. There I occasionally met Mr. John Davey, the father of tree surgery. At that time Mr. Davey was busy perfecting his organization. He used to tell me something about the plans which he had in mind, and the high goal at which he was aiming.

I have been tremendously interested in the years that have elapsed since that time in watching the unfoldment of his plans and the gradual and yet rapid development of the Davey idea and organization. Apparently the whole scheme has evolved itself along just the lines which Mr. Davey had at that time laid out. When an enterprise is planned and executed in a manner like this, it is almost certain to prove a great success.

Not long ago Congressman Martin L. Davey, John Davey's son, and general manager of the organization, said: "Davey tree surgery has been before the public nearly as long as the automobile, and its development has been almost parallel. You will easily recall the automobile of fifteen or twenty years ago. You remember that it often broke down, and many times was laid up by the roadside. You will recall its imperfect mechanism, its poor lighting, the hard job of cranking. Well, the fundamental principles of the automobile were the same then as now. The wonderful advance has been made in the refinements and the mechanical improvements. Just so with Davey tree surgery. The fundamental principals were the same fifteen or twenty years ago as today. But honest effort and a determined purpose have produced refinements and mechanical improvements and scientific accuracy that are marvelous and inspiring."

It seemed to me that this was an unusually good statement of the facts. And yet it leaves out reference to the personal equation and the knowledge of men which have been most important in making the Davey organization what it is today.

It was Mr. John Davey's idea in the first place to build up a staff which should be thoroughly imbued with the Davey spirit, as well as equipped with a thorough knowledge of Davey methods. This idea has seen its fruition in a body of men doubtless larger in numbers if not more scientific in training than even Mr. Davey dreamed of. To become a member of the Davey Institute of Tree Surgery is something to be sought after much like an appointment to West Point. Scores of applicants are turned down to one man who is accepted. In the Institute the young men receive a thorough scientific education, plus practical training.

When ready to be sent out into the field they are robust young athletes as well as master tree surgeons. Squads of Davey men are to be found all over the country, wherever there is work to be done. A chief expert is kept forever traveling from squad to squad, keeping an eye on the work. Once in a while he finds a man who is not measuring up to the requirements, and immediately he is dismissed. More often he finds one who is doing exceptional work, and he is advanced.

Before new men are put on, they are given careful practical training at the company's headquarters. If they show an aptitude for tree surgery they are later taken to Kent, Ohio, where the Davey Institute is conducted. Here a regular school is carried on, with a course which covers two years. There is no other school in the world that teaches tree surgery, so that the Davey Institute is unique. Its studies include not only the mechanical and theoretical end of the work, but botany, dentrology, pathology, entomology and spraying.

Besides the Institute at Kent, there is a research department where all the problems of tree surgery are carefully studied out. It is an interesting fact that when experiments are to be made, and there are many, they are made on trees belonging to the concern, and not on those of its clients. One valuable thing which the Institute has done is to work out a list of forbidden trees. That is to say, trees which are not worth spending very much money on.

All these things being true, it is not strange that estate owners prefer to have their trees handled by men who have given the subject years of

study, and who know exactly what they are doing, rather than to trust these trees to the hands of men who, while claiming to be tree surgeons, lack all or most of the requirements of the Davey organization.

I am writing these things because recently I was again brought into contact with the Davey people. Of course I knew in a general way of the tremendous progress which was being made, but I was amazed when I dug into the details and got something like a comprehensive viewpoint of the Davey system and the Davey organization. It's a great thing for horticulture in this country that it can include such an organization. Long may it live and grow!

## SKILLED GARDENERS.

### Positions Not Men Needed, Says a Correspondent.

Dear Sir:

I enclose clipping from your valuable paper which is bound to be misleading to many young men.

There is not a dearth of skilled gardeners capable of the supervision of large estates.

There is a dearth of positions for the many excellent men who will need such places.

The war and income tax have seriously impaired the large estate owner's capacity to keep up luxurious estates.

Proof of this is the fact that scores of estates that employed a large number of all kinds of gardeners are being converted into Country Clubs. I have spoken to leading golf architects who confirm my statement.

There are opportunities with better wages for a man who can direct a few hands and work hard himself, but the day of the kid gloved gardener is a sad relic of the past.

I can quote the names of several excellent men at present unemployed whose former excellent employers are deceased or the place cut out, men who were household words in garden lore a few years ago.

I trust you will give a little space in your friendly magazine, that I have always boosted as being well supplied with moral courage.

Very truly yours,

(Signed) W. R. FOWKES.

## HORTICULTURAL CLUB OF BOSTON

At the regular May meeting of the Horticultural Club of Boston, Mr. Thomas Roland presided in the absence of the president and vice-president. The principal speaker of the evening was Mr. B. Hammond Tracy, of Wenham, who gave an interesting talk on gladioli and their cultivation. It is expected that the president of the club, Mr. Ernest H. Wilson, assistant director of the Arnold Arboretum, will be back from his extended trip to Australia and India late in June.

## LEGION POSTERS.

### Of Great Help in Pushing Mother's Day Sales.

Secretary Naukam of the New England Florists' Alliance is busy distributing three hundred copies of Mother's Day posters being put out by the American Legion. These posters supplement the advertising being done in the Boston papers. If it were not for these two means Mother's Day would not be given much prominence in Boston. The American Legion Posters are very attractively gotten up, and should be of great value to the florists. They read as follows:

MEN OF THE AMERICAN LEGION
WOMEN OF THE AUXILIARY
MOTHER'S DAY

Sunday, May 14th

is your day. You served home and country and know what Home ties mean.

Wear a Flower
in Honor of your Mother. Write to her if you can't be with her.

Send Her Flowers
Go to Church in Remembrance of her.

The American Legion and the Women's Auxiliary have arranged National and Local programs for observance of Mother's Day. See any officer at the local Auxiliary unit or Legion post for information.

RAIN WHEN YOU WANT IT

Bobbink & Atkins of Rutherford, N. J., do no flirting with the weather. They make sure of having rain when they want it.

## Stops Your Dry Weather Terrors

Some things stop things after a while. But the Skinner System stops the crop stops, **at once.** You don't have to wait till next year to get results. Results start resulting, right before your very eyes, the minute you turn the valve. You don't have to wait on sky rain, wait for you.
You snap your fingers at dry weather and say, "Get to thunder out of here, I'm boss from now on."

But whatever you do, don't put off buying until you have enough money to equip an acre. At once buy one of our portable sectional lines 200 feet long, that waters 10,000 square feet; **four moves of it waters a full acre.** Every day you put off ordering, you not only put off bigger profits, you just plain **cheat yourself** out of them. Don't wish for rain. Turn a valve and have it.

**The Skinner Irrigation Co.**

**100 CANAL STREET TROY, OHIO**

SKINNER SYSTEM OF IRRIGATION

# ADVERTISING AND SELLING

Does it pay to use addressed envelopes when sending out your bills? This is a question which many a florist has no doubt often asked himself. One advertising expert who has analyzed the situation believes that it does pay. He reasons somewhat as follows: Most men when paying their monthly bills begin with those which come with return addressed envelopes. They follow the line of least resistance. They avoid the labor of writing an envelope if they can readily do so. A return envelope is a small thing, that may pay for itself many times over. Some business men go so far as to use stamped envelopes as well. They find that this increases the number of early checks appreciably.

One other matter in sending out bills is worthy of note. Avoid a stamped or printed message reading, "A prompt settlement will be appreciated." This sort of thing is resented by customers who pay regularly. If the customer asks for a receipted bill, by all means send it back promptly, and mark "Thank you" over the signature. It leaves a good impression. You can go even further, if you like, and establish a more intimate relation with your customer by using a variety of acknowledgments, as "Your prompt settlement helps us," or, "We appreciate your way of doing business."

### RESURRECTING OLD ACCOUNTS

Almost every florist who does a credit business knows what it is to have customers who for some reason or other stop buying. Oftentimes it is possible to get these customers back by making an effort to learn what the reason actually is. The very fact that the store shows an interest in the customer may be enough to win back his trade. This interest at least breaks down whatever little antagonism may have been aroused, and shows the store is sincerely interested in keeping faith with its patrons. Sometimes it pays to send a tactful man or woman to see the customer. If this is not feasible, a letter may be written. A letter worded somewhat as follows has been found successful:

"You have not favored us with your trade for some time and, since you did favor us in the past, we cannot but feel that in some way we have failed to give you the satisfaction which as a good customer you deserved. Perhaps there was a misunderstanding. Perhaps the fault was ours. Won't you give us a chance to make good on it? All we know at present is that you are not trading with us. We don't know why. And whether the severed relations are due to conditions beyond the control of either of us—even if you feel that you do not care to honor us further with your patronage—we would sincerely appreciate your telling us why you have stopped dealing with us. Assuring you of our sincere desire," etc., etc.

The letter given above will at least win a high percentage of replies, perhaps fifty per cent. It is pretty safe to say that the other fifty per cent have left you for some reason that is not easily changed.

### AUGUST HAENDLER DEAD

The many friends of August Haendler, proprietor of the Old Town Nurseries, South Natick, Mass., will be grieved to hear of his sudden death, which occurred Friday, April 28, the funeral being held on Sunday. Mr. Haendler died of pneumonia, being ill for only three days. It was about eighteen years ago that he started his greenhouse business, having come to this country from Saxony. He leaves a wife and four children.

### NEWS NOTES

A large rose garden is to be laid out on the Common at New Bedford, Mass.

The Board of Park Commissioners of Holyoke, Mass., recently accepted the invitation of Chairman George H. Sinclair, to visit the Sinclair Greenhouse establishment and inspect the growing plants.

Fred Ruff, who has been superintendent of a private greenhouse in Nashua, N. H., for several years, has joined the staff of S. A. Goddard at Framingham, Mass. Mr. Ruff is a very well known greenhouse man, formerly having been in the employ of George Buxton of Nashua.

E. Reinhart and W. J. Adams have opened a new flower store on South Washington street, at Valparaiso, Indiana. A new greenhouse is being constructed by them north of the city.

# S. A. F. & O. H. Department

The annual meeting of the Executive Board of the Society was held in the Woman's Art Building, Indianapolis, Ind., on Monday and Tuesday, March 27 and 28. The meeting was presided over by President S. S. Pennock.

Secretary Young read his report of the Washington Trade Exhibition, which showed that a profit of $6,520.61 had been realized. The total receipts were $10,408.43, and disbursements $3,887.82. On motion of Mr. Roland the report was accepted and ordered to be made part of the minutes.

The Secretary then presented his annual financial report, which showed that there was a balance in the permanent fund of $49,167.68, and in the general fund of $16,653.01.

Vice-President Murray reported as to the renting of the Auditorium in Kansas City for the August Convention. Secretary Young also reported that he and President Pennock had visited Kansas City and looked over the Auditorium, and it was found very suitable for the purpose of the Society, and it was arranged to secure it. It was also arranged that the sessions of the Convention be held in the same building. There was an area of 18,000 to 19,000 square feet available for the exhibits, and the rental terms were $1,000 if the public were not admitted, and $2,000 if the building was to be open to the public. President Pennock spoke of the fine reception he and the Secretary had in the Convention City, and of the enthusiasm existing among the trade over Convention prospects. It was arranged details as to trade space and other matters be discussed at a later session of the Board.

Mr. Penn made a verbal report for the Publicity Committee. He stated that the work of the Committee had been very satisfactory so far this year, with more enthusiasm than had been shown in the past two years. The Committee were convinced that the florist business had prospered, and much of the prosperity was due to the Publicity Campaign. Two of the outstanding features of this success was the work of Messrs. Asmus and Ammann, who gave unselfishly of their time, and thanks were due them for their tireless devotion, and to the members of the Committee for their interest in the Campaign.

A meeting of the Committee had been held that morning, at which it had been arranged to spend in national advertising at once a further sum of $10,000, making a total expenditure of $20,000 already for 1922.

On motion of Mr. Hagenburger, seconded by Mr. Roland, a vote of thanks was passed to Messrs. Asmus and Ammann, and to the other members of the Committee.

Secretary Young referred to the fact that Past President Patrick Welch Boston, was quite ill, and moved that Mr. Penn be authorized to send him a message and flowers from the Board, conveying sympathy and best wishes for a speedy recovery. The chair suggested that the message take the form of a letter bearing the signatures of the members of the Board, and it was so ordered.

Mr. Culp referred to the matter of the resolution in regard to Quarantine No. 37 tabled by the Board the previous day, and read a substitute resolution which he moved be accepted and passed. The resolution was as follows:

"To the Honorable Secretary of Agriculture, Washington, D. C.

"The Executive Board of the Society of American Florists and Ornamental Horticulturists would respectfully urge that you direct the Federal Horticultural Board that no further extensions, or changes in rulings for application of Quarantine No. 37 be made without due notice and opportunity for a hearing be given to those whose interests will be affected by such contemplated ruling or change in application.

"A sufficient time having elapsed since the establishing of said quarantine to show its working efficiency and also where modifications or adjustments are needed for its harmonious action. We would also urge that the Board also be directed to take up, by conference, or otherwise, with those whose interests are affected, and are qualified to act, the various items and figures which up to this time have been brought to the attention of the F. H. B. as being unjust, unnecessary, or showing discrepancy in the application of said quarantine. The request being made, not in criticism, but with a view to harmonious adjustment and a maximum of benefit and efficiency in the working of quarantine 37 for the good of those who are interested it is deemed to protect."

The Board reconvened pursuant to adjournment, and President Pennock called for the report of the Committee on Amendments to By-Laws, Thos. Roland, chairman.

Mr. Roland presented a well thought out report, the dealing with which took up considerable time, especially as each amendment offered was carefully explained both as to purport and effect.

Mr. Ammann moved and the motion was carried, that an amendment be recommended directing that the Secretary be elected by the Executive Board instead of by the Convention.

An interesting part of the proceeding now took place. The matter of the medal of honor recommended by Ex-President Roland at the Washington Convention came upon the regular way, being on the business agenda for discussion.

Mr. Pierson in a short address spoke of the significance of an award of this kind, and referred particularly to the fact that in his opinion no Society had received more unselfish devotion than the devotion of George Asmus to the S. A. F. and O. H. He spoke of the manner in which Mr. Asmus had faced the National Flower Show situation in Cleveland, and of how he had the key to it in the change to Indianapolis. In recognition of this, and his past work of years, he wished, he said, to nominate Mr. Asmus for the medal of honor to be awarded this year. Mr. Hagenburger seconded the nomination, as also did Messrs. Knoble, Secretary Young, Ammann, Klingsporn, President Pennock, Treasurer Hess, and Mr. Roland, and a rising vote was called for, awarding the medal to one who had proved himself an unselfish worker for everybody selling plants and flowers. Mr. Asmus was not in the room at the time; Mr. Pierson was directed to locate him and present him at the platform. In the meantime, on motion of Mr. Roland, it was decided to make formal presentation of the medal at the Kansas City Convention. Mr. Asmus now appearing, amid applause and laughter, he was addressed by President Pennock, as follows:

"Mr. Asmus, there is a medal of honor which is awarded every five years to the person who has done the most, and made the most sacrifices for the Society of American Florists, and the gentlemen in this room have gone over the field very carefully and they have selected you to be the recipient of that medal. It gives us great pleasure today to hand you one of the biggest honors that the Society has ever handed any member. We believe that that honor is more than fully merited by the work that you have done in the past five or ten years, which has been prodigious in every way, your time unstintingly given, your business sacrificed, not only your business but your family as well. In the case of the flower show, you have given every minute, night and day as some men said, you slept on the job and never flinched. Even when you had the whole Board against you, you carried them through with your enthusiasm, your push and your energy.

"It gives us a great deal of pleasure to be able to award this medal to you, as a small recompense for the work which you have done in the past five or ten years. The medal is not ready to give to you at this time. We are sorry it is not ready, but it will be presented to you in August, at the convention in Kansas City."

Mr. Asmus made a feeling response. The feeling which prompted the award, he said was quite sufficient for him, reward enough for anything he might have done without anything more material. He was greatly pleased to accept the confidence and thought of the Society, and should always cherish the token.

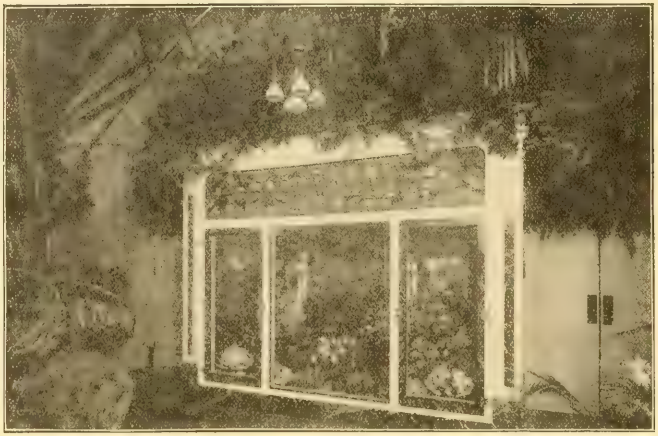
## NEW ENGLAND FLORISTS' ALLIANCE

Another meeting of the New England Florists' Alliance is to be held in the near future, when some important matters will be brought up for action. The following new members have been signed up:



James W. Ego, 174 River Street, Mattapan.

E. D. Kaulback & Son, 160 Pleasant Street, Malden.

J. W. Simpson, 12 Lexington Street, Woburn.

Fred McKenna has erected a new greenhouse at 42 Whittier street, Haverhill, Mass.

Beyer and Weber recently had the formal opening of their store at South Bend, Ind., when souvenirs were given to every visitor. This is the business formerly known as the Beyer Floral Shop.

# HOW SUCCESS IS WON

## Pres. Pennock Describes the Basic Principles of the Florists' Business

At the convention of the Florida State Florists' Association at Lakeland, Fla., Friday, May 5, Pres. S. S. Pennock of the S. A. F. made an important address on "Basic Principles Governing the Successful Florist." He said in part:

"It is ofttimes a good plan for a florist to bring in a certified public accountant and start his books out in the latest and most up-to-date methods of bookkeeping. By this I don't mean an elaborate, complicated system, but a simplified manner of keeping books, in order to know definitely how the business stands each month, and have it arranged so it will be known what branch or department of the business is making money, and what part isn't. The sooner the part not making money is cut out, the better. Of course, at times there are certain things that one would have to handle in order to cater to a general trade—even if the immediate returns are not discernible. In other words, it may be a deficit which would be chargeable to advertising.

"Another thought is that a great many times a person running a business is overimbued with some pet scheme and doesn't realize that that particular end of the business is losing money. If he had the figures each month showing a loss, then it would probably be cut out very much sooner than if he went on without knowing just how he stood.

"Collections and Charges are also very important features of a business. Be very careful to grant credit only to those whom you feel reasonably sure will pay. Oftentimes a moral risk is far better than a risk where there seems to be plenty of money, but very little principle. This kind of credit is more dangerous than giving credit to one starting out with a small capital and a good moral reputation. It isn't always safe to give credit simply on moral grounds, but at the same time it's a splendid guide, and many a successful business has gotten a good start by the fact of getting credit on its moral reputation.

"Courtesy is another thing that it isn't possible to have too much of, in one's business. Being always courteous to customers, under all circumstances, no matter whether the customer is wrong or right, builds for better business, and leaves a feeling that will bring back a customer, where discourtesy is sure to drive that same customer away.

"When it comes to the growing end, I am not quite as familiar with that as a grower would be, but I believe any one starting out in the business is pretty nearly as well off to start with a new place, even if it is in a small way, and plan his building for the future. If the business prospers, and it's far more apt to, with a well-laid plan, then each succeeding house is built according to this plan. In looking at some of the larger places that we have in our business today, one finds that they are more or less haphazardly built. Of course, they were built under strenuous circumstances, lack of capital, oftentimes, and other times lack of knowledge, but altogether they were not built as they would if there had been a well-laid plan made in the beginning, with the idea of making a large place of it. All these large establishments started in a small way, and had they realized they were going to be large concerns, then, of course, they would have made plans better suited for large places.

"In comparing our business with other lines of business, it is very evident that we are not suffering the way many other lines are and have suffered. The farmer, for instance, the past year, has marketed most of his crops either at a very big loss or so near a loss that there has been no profit at all, but looking at the various lines of our business, we find the unsuccessful firms are very few and far between. I think this better business condition, which the flower business, in general, is and has been facing, is due primarily to publicity, which has been carried on in its various branches.

"We have before the public a slogan, which is conceded, by advertising authorities, to be the best slogan that has ever been introduced in any business in this country. "Say It With

Flowers" is known from one end of the country to the other, and the continual bringing of this slogan before the public has, without a doubt, helped every grower, wholesaler, and retailer in every line of the business, whether plants, cut flowers, or whatever it may be, and it is certainly up to every florist to back this National Publicity Campaign.

"While it may seem like getting back very little immediate return where a contribution of $50 or $100 or $500 is given towards the National Publicity Campaign, yet the results are sure to be far reaching and make for future business all over the country.

"Probably a number of you have noticed, recently, in the trade papers, the story of the co-operative advertising of the St. Louis florists. They came out just before Easter with a double page spread in the St. Louis papers, and all the St. Louis florists are very enthusiastic about the results that this brought them in increased business. They feel it was money very well spent, and was more than a paying investment for them. Collective local advertising cannot help but repay every city or town that takes up advertising of this kind.

"All holidays or special days are days that the florists want to encourage, as this brings in extra business, creating a market that otherwise would not be possible. Such days as Christmas and Easter do not need to be pushed nearly as much as some of the other holidays, but we have other days that can be made better florist days than they are at present. Christmas and Easter, the florist, as a rule, has pretty nearly as much as he can handle and handle satisfactorily.

"Mother's Day is, in certain localities, fast approaching in volume Easter and Christmas. To a great many florists it is a more satisfactory day. In Chicago, for instance, and other cities of the West, they feel that Mother's Day is a better day than Easter, which is very surprising considering the short time that Mother's Day has been in existence. They claim that Mother's Day appeals more to the masses than to just flower buyers, and that is what we want to strive for—more days to sell flowers to the general public.

"You will probably remember that I spent about six months in Germany, last year, in Child Welfare Work, and there, a birthday is the big day of the year of every one's life, and means more to them than any other day. Flowers are one of the things that are given more than any other one article. At one of the places where I boarded, the lady was the recipient of flowers from a great many of her friends, on her birthday, and I think that she appreciated the flowers more than any other one thing that she received. There's no reason why the florists in this country shouldn't encourage birthdays more, reminding their customers not to forget the birthdays of those they love, by sending a few flowers. Then they would have more business every day in the year and not a spasmodic business, as holiday business is at present.

"Armistice Day is another day that can be made a florist's day, and with the united efforts of the S. A. F. and of the Florists' State Organizations, eventually be as popular and as good a day for the florists as Memorial Day is now, which in many localities is a splendid florist day.

"In the United States there are 15,000 or more florists, and only about 4000 of them members of the S. A. F. The dues are not very much, $5 a year, $50 for Life Membership, and I feel sure every florist who joins will fully realize that he couldn't spend $5 better than by joining the S. A. F.

"Now I want to say a word in regard to a state movement of this kind, where all the florists in the State are getting together. In union there is strength, and that is illustrated very truly if you look back to the Society of American Florists—what they have represented and what they have stood for in horticulture, and are doing today. They are now the parent body of many other organizations which have meant a wonderful lot for the flower business. As an example, I might mention a few of the affiliated organizations—The American Rose Society, The American Carnation Society, The F. T. D. and many others—all these doing their part to help push the flower business along."

The benefit of HAIL INSURANCE was forcibly illustrated by a number of violent hail storms in New England last year.

Be wise and send to **John G. Esler, Sec'y of Florists' Hail Association, Saddle River, N. J.,** for Hail Insurance literature.

**DO IT NOW.**

## George Watson's Corner

"You in your small corner and me in mine."

The Daylight Saving proposition went into effect in Philadelphia, 2 a. m., April 30th. This puts our clocks one hour ahead of Eastern Standard time, and should be remembered when placing orders. The farmer don't like the idea; but it seems to work smoothly enough in the cities. My own personal opinion of the proposition is that it's silly. There may have been excuse for it during the war but not now. However, it has one good side. It gives our baseballers and cricketers and golfers and other sports a chance to enjoy themselves a litle longer after their day's work is done. Which is at least something. Every cloud has its silver lining.

One would think, by reading recent articles in the horticultural press of the old world, that they have only just woke up to the iniquities of Quarantine No. 37 of the U. S. A. As a matter of fact, the horticulturists on this side have been doing their level best for the past three years to abolish or modify that fanatical proposition; but without avail. As Dr. Deaver says: We are governed at present by the epicene—long haired men and short haired women—but there is really a lot of common sense back of the American people, fundamentally, and it will show up in time. The fanatics get around, and do things with a rush, and it takes the slow-going sensible people sometimes a long while to undo their silliness.

Alphonse Pericat, the orchid specialist, is still out at his old location at Collingdale. If you ride out to see him, stop off at the same old crossing. But in addressing letters, it is well to add the word "Darby" to Collingdale as that now seems to be the postoffice headquarters. He is very strong on the new "Kurume" azaleas, in addition to his old standby—the orchid. Take the subway to 69th and Market streets, then transfer to Collingdale. You'll be there in a few minutes, and his place is worth going to see.

Ross Watts, of Birmingham, Ala., was a recent visitor, and made a favorable impression on the seed trade of this city. He is a member of the McVay firm of seedsmen in Birmingham, who make a specialty of manufacturing various insecticides for the wholesale trade, in addition to conducting a seed store. Their specialties are known as "Vaycide," and the factory is conducted on independent lines, under the corporate title of The Vaycide Company.

We extend a cordial welcome to Brother Manning, the new representative of the Florists' Exchange in Philadelphia, and wish him every success in his new field. He is a young man, and, while he still has his mark to make among us, the outlook seems very favorable. His official headquarters are 1714 Ludlow street. This, in itself, shows good judgment, as the location is not only in the heart of the city, but in the center of the wholesale cut flower business. From Seventeenth to Mole, you can go in an almost straight line, and do not have to burrow nor take an airplane. From Mole to the Bellevue is a little more difficult but the new scout has evidently made it all right, as we met him in Habermehl's yesterday. We feel sure he will be a good booster for the Sesqui Centennial in the near future.

We have heard here in the Quaker City with some anxiety of the serious illness of P. Welch of Boston. We trust the reports are exaggerated and that he may soon be around again in his old time form. Forty years ago he was located here in this old burg, showing us the Boston way of conducting the wholesale cut flower business, and selling the Boston grown Bon Silenes; and many of our old timers still remember him from that time. But he has also been an ardent worker along progressive lines

ever since, and no matter where he was wanted, from Maine to California, he was always ready to sacrifice his personal interests for the public good. So here's wishing for his speedy recovery.

Miss Baker is a strong adherent of the Pollyanna principle of being always cheerful—no matter what happened. At her request we read the book a good many years ago and was much impressed by it. Even an old iconoclast has to take his hat off to the old lady who had only two teeth left. She was glad because they hit. So don't get too worried just because all your Easter lilies didn't bloom in time, or because the moles ate up a lot of the tulips you were counting on. Even if you have no teeth at all you can still go see Dr. Hyman, who I believe still hangs out in the Dobson Building, although I have not been down that way for a year back.

The William H. Moon Company's catalogue is one of the best nurserymen's publications we have seen this season. That little picture with the shaded area, where they deliver free, is one of the finest touches. Another fine feature is the pages introductory, devoted to dry and wet, sandy or heavy, high or low, and the various things suited to these situations; the information given looks dry and uninteresting but when you dig into it a little—why you've simply found an unexpected gold mine.

Seedsmen, as a rule, refuse to give commissions to employees or agents. But in the stress of business many things are done. You take him to dinner, you do this, you do that, you do the other thing. Your business is to get there! All of which is very much human nature, as it has been since the world began. Of course, when the human sympathy idea is brought out in the open, and commercialized, as it has been in New York City for some years past, the human element evaporates, and it becomes a case of procurator and vamp. Big houses, like Dreer, Henderson, Farquhar, Vaughan, and all the other leading lights, drew the line, and said:—"Nothing doing, outside of straight, legitimate business." That's the way it ought to be, all over!

## GENERAL NOTES.

Adolph Sandelle is to erect a greenhouse 35x145 feet at New Britain, Conn.

## LANCASTER COUNTY FLORISTS' ASSOCIATION.

At the last monthly meeting at the Hotel Brunswick Mr. Chas. Newbold and Miss M. S. Miller were elected to membership in the club.

President Harry K. Rohrer called on Elmer Weaver for a report from the cut flower growers on Easter. He said that the growers who compared this year's prices to those of the past few years would be disappointed when they got their returns from the commission houses, as on account of the extreme heat the early part of the week immediately proceding Easter the wholesale houses were filled to the doors with stock, much of which was too ripe for a satisfactory business. He also said that the volume of sales was unprecedented but even with that much of the stock was in evidence after the bulk of the business was done.

Mr. Rudolph Nagle reported for the plant grower that everything saleable had been sold and at fair prices, that bulbous stock especially were called for in excess of any preceding Easter.

Mr. J. Moore of The Rosary reported for the stores that they were more than satisfied with the business done and that, while they had to handle more stock that in former years to secure the same cash receipts, the demand was unusually heavy and everything saleable in both cut flowers and plants moved to good advantage.

Dignified, Exclusive Profession not overrun with competitors. Crowded with opportunity for money-making and big fees. $5,000 to $10,000 incomes attained by experts. Easy to master under our correspondence methods. Diploma awarded. We assist students and graduates in getting started and developing their businesses. Established 1906. Write for information; it will open your eyes. Do it today.

## SUPPLIES

The John C. Meyer Thread Co. were the first to introduce the Meyer green Florists' threads that would not fade or change color for Florists' use. Ask any of the wholesale Florists or growers about the Meyer green Florists' thread and they will tell you it is the best. It will go twice as far as ordinary thread and the Florist can do better work with it. Write for prices and samples and we will see that you get the best thread in the world.

# Back of the Name "Hitchings"

# Is The Workmanship Of Hitchings' Workers

The iron that goes into Hitchings houses and boilers, is the cleanest, truest iron we can get.

The designs of those houses and boilers are the most efficient our engineers have been able to produce, after years of experience.

But good material and good design alone could never have produced Hitchings houses and boilers.

There had to be a third factor—**good workmanship.**

It's the workmanship on our products that we are most proud of.

It's the workers back of the workmanship, back of those products, that makes the name "**Hitchings**" stand for what it does stand for in the greenhouse and boiler field.

### NEW ENGLAND NOTES

Miss Gertrude Brady has taken a position with the Belmont Flower Shop, of Brockton, Mass.

According to a local paper the employees at the Montrose Greenhouses in Wakefield had an interesting time on a recent Saturday when two of their number, Michael F. Glynn and Edward McMann, indulged in an exciting 100-yard dash. At the firing of the pistol by David McEvoy, the men started. Glynn stopped to pull up his rubber boots, and McMann got fifteen yards ahead. Glynn soon caught up with him, however, and finally with a bound cleared the line, with a yard to spare. Mr. Glynn modestly attributed his victory to the help his rubber boots gave him.

Warren Lothrop passed away recently at Hingham, Mass., aged 54 years. He was long in the florist business, having started with the cultivation of violets.

Florists of Brockton, Mass., have protested against the unfair competition of transient vendors, especially during the Memorial Day season. They request that licenses be refused from May 15 to May 31. The petition was signed by W. W. Hathaway, Jahn the Florist, Brockton Public Market, Belmont Flower Shop and West Elm Flower Shop.

F. H Woodruff & Sons are to establish a large addition to their seed warehouse at Milford, Ct.

Delay the Florist, now on Riverside Ave., Medford, Mass., has leased the store which has been occupied by William F. Leahy at 24 Main Street for many years.

Mr. A. Didge, Jr., has been appointed New England representative of the D. A. Bartlett Co., the tree surgeons of Stamford, Conn. His office is to be in Boston.

### WILD FLOWER SHOW

People in Boston are still talking about the wild flower and fern show at Horticultural Hall, one of the greatest events of the kind ever held in the city. The show was attended by 82,923 persons, the largest day's attendance being 12,750.

Edwin H. Lincoln, of Pittsfield, Mass., who exhibited several hundred photographs of native New England flowers, was awarded a gold medal by the Massachusetts Horticultural Society. Mr. Lincoln has been photographing wild flowers for twenty years, and has accumulated probably the finest collection of photographs in the world. The collection shown in Boston was purchased by the Boston Public Library, the Atheneum Library and the Natural History Society.

Vol. XXXV MAY 25, 1922 No. 10

## THE TALK OF THE TRADE

There will be plenty of business for Memorial Day. The first of the week flowers were moving slowly, but the call for plants was heavy. Apparently potted material is going to be very much in demand and in my opinion the future of Memorial Day from the viewpoint of the grower rests with plants in pots. People buying for cemetery use want something that will last. That is one reason why they turn to prepared wreaths. Give them an ample supply of potted plants in good condition at a fair price and the call for them will increase faster than the growers can keep up with it.

There are none too many hydrangeas or potted roses. The stock of these plants was pretty well cleaned Some growers have hydrangeas not up at Easter and on Mother's Day. yet in flower. Good roses have been hard to find. There is no over-supply of geraniums in flower. Some are offered in bud but buyers want blooms at this time.

It is to be hoped that few members of the newly formed New England Florists' Alliance will adopt the plan of one man. This man paid in his money, and then, according to reports, promptly reduced the pay of his employees sufficiently to cover his assessment. Naturally this arrangement has not tended to create harmony in the establishment.

Flower seeds vary remarkably in quality, a fact which is not always borne in mind. All too often the price is the first consideration when it really ought to be the last. Most men who grow pansies commercially have learned this fact, and are willing to pay what seems like a high price for seeds from strains which they know will give good flowers on long stems and in desirable colors.

The same point holds good with other seeds. An example in point has been established by the W. W. Edgar Co. in Waverley, Mass. Last year Mr. Edgar grew some very good salvias out of doors, and saved some of the seed. This year that seed was planted and germinated almost a hundred per cent better than any other salvia seed which he planted. Few flower growers are in a position to attempt the home growing of seed, and probably wouldn't get very far if they did, as the big establishments know how to handle this business much better than the average florist. At the same time an experience like this emphasizes the fact that there is a very wide difference in the quality of the seeds, one which may mean many dollars of profit or loss in the long run.

The only good showing of astilbes which I have seen this year was in the store of Julius, the Florist, in New Bedford. These were very fine plants of the Queen Alexandra variety, just such plants as we used to have in abundance at Easter time. Mr. Julius had hoped to have them ready for the Easter trade this year, but they did not come along fast enough, even though Easter was late.

After visiting Mr. Julius's store I

New Begonia Frau Helen Harms

was prompted to make a few inquiries, and found that a considerable number of growers here and there are building up a stock of astilbes, with the expectation of having them for future Easters. It seems quite possible that these plants will again be seen in our markets, although never at such a cheap price as when they could be purchased abroad where labor is much lower.

Tailby & Son, of Wellesley, Mass., are getting together a fine lot of Godfrey callas for Memorial Day. Mr. Tailby grows them in pots, and has 500 handsome specimens. He believes that there will be a good demand for these potted callas before the 30th.

Few growers in New England produce a greater amount of Asparagus plumosa and Asparagus sprengeri than A. S. Lake, in Wellesley, Mass. Mr. Lake has been very successful with these crops, and has learned also how to make the benches do double duty. After the sprengeri has been cut down pretty well, he uses the space between the rows for growing sweet peas, stocks and centaurea. Unfortunately he cannot pursue the same tactics where plumosa is grown, as this crop is shaded.

## MARKET HOUSE SITES

### Considered by Stockholders of Boston Markets

A meeting of the stockholders of the flower markets in Boston was held at Young's Hotel last Saturday night to consider the question of a new site for building or leasing. About 70 were present with William N. Stickel in the chair.

Mr. William Elliott was called upon as chairman of the committee and told of the different sites inspected. He said all but 7 had been rejected. These 7 were submitted to those present and a vote on them taken. It was shown that there was no unanimous choice, sites in several parts of the city being favored. The prices for the lots with the buildings ranged from $250,000 to $500,000. The whole matter of selecting a site was finally left with the standing committee, to be reported upon at another meeting a little later.

In order to ascertain how much money could be raised blanks were passed and 50 of those present signed, pledging altogether $454.50. It was pointed out by Mr. Thomas Roland that this was really an investment, with the owners as the tenants. The meeting was adjourned subject to call.

## SWEET PEA EXHIBIT

### Show To Be Held in Boston Promises To Be of Unusual Interest

Much interest is being shown in the fourth annual exhibition and convention of the American Sweet Pea Society, which will be held at Horticultural Hall, in Boston, June 24 and 25. The exhibition will be a joint one in connection with the Massachusetts Horticultural Society, and for that reason an especially fine exhibit of sweet peas is anticipated. It will be doubly interesting to the public because the usual June Rose Show of the Massachusetts Horticultural Society will be held at the same time. The combination will undoubtedly attract a great many people.

Secretary William Gray of the Sweet Pea Society says: "I believe the sweet pea show could be made one of the finest exhibitions of the year. I would like to see a summer show on this side take on the importance that is given such shows across the water—a show that will develop the amateur spirit in this country. I believe that the Horticultural Society which will encourage a show of this kind will be doing a great work for the promotion of horticulture.

"Boston, being the logical place to hold such an exhibition in New England and also by reason of climatic conditions being more favorable for roses and sweet peas than in most sections of the country, there can be full assurance that such a show would become in time a great feature if proper support and publicity were given. Of course the exhibition would need to be continued from year to year, and I am sure that if this hope is realized the American Sweet Pea Society will be a hearty supporter."

The Bulletin and Schedule of the American Sweet Pea Society which recently came to hand contains much interesting material, including an article on "Sweet Peas under Glass," by William Sim an article on "Everybody's Flower," by Edward Jenkins, and a classification of sweet peas made by the Floral Committee. The classification should be of special interest to all growers.

It is to be hoped that florists will take note of Class 25, which provides for the best example of decorative art by florists, a basket, centerpiece or bridal bouquet of sweet peas. The first prize is a silver medal and $15.00, the second prize a bronze medal and $10.00.

At the convention to be held Saturday, June 24, the election of officers will take place, reports will be read and there will be a special report on the trial ground at Cornell University by Prof. A. C. Beal.

## THE NEW BEGONIA FRAU HELEN HARMS

The begonia Frau Helen Harms, being put out by Joseph Breck & Sons Corp., of Boston, is proving its value both indoors and out. This begonia was originally introduced into this country in 1910, and has proved very satisfactory wherever tried. It seems to grow equally well in greenhouses and out of doors. It is a tuberous rooted begonia, with dark green foliage. While the leaves are small, they are produced in great abundance. The flowers, which are borne very freely, are about the size of a half dollar. When the plants are full grown they are eight or ten inches high.

When this begonia is flowered out of doors, the blooms are a clear orange in color, but when flowered under glass are a light yellow. Thus far the stock has been remarkably free from disease, and seems to stand up surprisingly well under long continued wet weather. It may be beaten down by heavy rains and wind storms, but quickly revives.

There is one very unusual feature of this begonia. The strongest sunshine seems to have no effect upon it except to make it grow the faster. Frau Helen Harms was awarded a first class certificate of merit by the Massachusetts Horticultural Society for 1920, and a year later was given a silver medal by the same society.

Private gardeners are finding Frau Helen Harms a welcome addition to their greenhouse stock, and there seems reason to believe that when stock becomes plentiful enough this begonia will be given a warm welcome by retail florists.

Frank Terry, formerly with J. K. O'Brien, the Boston florist, has become eastern manager of the Climax Manufacturing Co., box makers. H. V. Eldrich, who formerly represented the Climax Co., has gone with the Boston Box Co.

Snell and Bronner are enlarging their greenhouses in Mohawk, N. Y., by adding 6,000 square feet of glass.

## FLORISTS' AND GARDENERS' CLUB OF BOSTON

At the May meeting of the Florists' and Gardeners' Club of Boston, held at Horticultural Hall on the evening of the 16th, with Pres. Judd in the chair, several new members were admitted, their names being Prof. Clark L. Thayer, Amherst, Mass.; Frank Roberts, 11 Dexter Ave., East Watertown, Mass.; Antoine Blazic, Center St., Jamaica Plain, Mass.; and Patrick A. Lyons, 80 Haven St., Dedham, Mass.

It was voted to have the June meeting take the form of a Ladies' Night, and J. C. Harris, Chairman of the Entertainment Committee, promised some unusual features, including a Swedish Glee Club of 25 voices, and a soloist from the Boston Symphony Orchestra. It was also voted to have the annual picnic in July as usual. Details were left in the hands of the executive committee.

The exhibits were not numerous, but included a new sweet pea shown by James Donald and some handsome Calceolarias shown by Thomas Hill. Mr. Seagrow showed some Marshall strawberries grown under glass in six inch pots. He said that he had made his first picking a week previous, and had strawberries measuring four inches, with fourteen fruit to a pot.

The speaker of the evening was Prof. Harold Tompson, of the Market Gardening Experiment Station at Lexington, a branch of the Massachusetts Agricultural College. Prof. Tompson reviewed the work of the station, and gave much interesting information about vegetable growing. In his introductory remarks he said that he favored more practical training for boys who are going out of the colleges. Some graduates don't know enough to harness a horse, having had no farm training.

He spoke of the food value of vegetables, and said that the value of vegetable products in New England amounted to $15,000,000 a year, according to the census, but in reality was much greater. He spoke of experiments being made with asparagus, a thousand plants being grown and careful records of each plant kept. The best producers were then taken, separated and planted in a new location, to see whether the trait of high productivity was inherent or due to some special causes. They were able to get asparagus at the rate of seven tons per acre from some kinds, and only two tons from others.

Experiments are being made with John Baer tomato seed obtained all the way from Canada to the southern states. They use John Baer because that has the widest range of any seed which they could find. According to Prof. Tompson fifty per cent of the vegetable gardeners' troubles begin with the seed. He recognized the seedsmen were doing their best but labored under many difficulties. He said that in many instances it had been worth while for vegetable growers to produce their own seed.

In discussing the matter of fertilizers Prof. Tompson said that it was on record that manure used on a field in 1876 was still showing effects, none having been applied since. Some of the market gardeners have never used commercial fertilizers, even though doing a business of from $25,000 to $150,000 a year. Manure on a large place costs from $2,000 to $4,000 a year, in addition to the expense of hauling. Prof. Tompson advocated the addition of acid phosphate to manure, using fifty pounds to a cord or twenty-five pounds to a ton. He said the best way to handle the manure was to make a wide pile with straight sides and a flat top with a hollow to hold water. The acid phospate could be spread over each layer as the pile was made. It helps to prevent the escape of ammonia. Even refuse vegetables of all kinds spread over the top of a manure pile will help to accomplish this purpose. Turning, although commonly done, tends to release the ammonia. One log grower near Boston has a mechanical beater which reduces the manure to very fine particles.

Speaking of cover crops Prof. Tompson said he liked timothy and clover. Rye is good when the land is kept working most of the time. Red clover is good on sweet soil and alsike for soil which is more acid. The new annual clover called Hubam promises well.

Lime is needed for vegetable growing. On Long Island cabbage and cauliflower is kept growing on the same ground without much loss from clubroot by using heavy applications of lime each year.

The interesting information was given that spinach had been found to winter over well on new ground, while it would not do so on old ground. The same result has been found in the case of veitch and clover. The explanation is a little uncertain, but he believes it has to do with the amount of available phosphoric acid in the soil.

Special experiments were being made, Prof. Tompson said, looking for the eradication of plant pests. This season special attention was being given to the squash vine borer. He thought that it was a help to plant squashes after the 10th of June. Prof. Tompson brought out the fact that much time was required to get accurate results and that he was cautious about making statements which had not been checked up for several years.

Prof. Tompson was given a rising vote of thanks at the close of his talk.

## TO CUT OUT LAUREL

### Carbone, Inc., of Boston, Not to Handle This Material After July 1

Much interest has been created by the announcement that Carbone, Inc., one of the biggest florist concerns in New England, has decided to abandon the use of laurel in its decorative work, and that it also will cease to sell Mayflowers. This decision came about as a result of the agitation over the threatened extinction of the wild growth of New England. The Legislature failed to pass the bill asked for to prevent the commercializing of the Mayflower, but the Carbone Co. decided that public sentiment was against the sale of these flowers, and so gave them up.

Then came the question of laurel, which is, of course, a very much more important item. All florists use great quantities of this material, tons of it being employed at the Carbone store in the course of a year. This store, however, caters to a Back Bay clientele, made up largely of people who have joined the newly formed society for the preservation of wild flowers and who heartily approve the action taken. The date for beginning the innovation was set ahead because orders had already been taken for work during June which involved the use of laurel.

Undoubtedly the Carbone Co. is the first concern in the country to take such action as that stated, and florists everywhere will watch with interest to see how it solves the problem thus presented. The Carbone Co. has decided to make the experiment for a term of five years, and believes that in the meantime it will have learned how to obtain and use other materials equally satisfactory. It plans to utilize the products of evergreen trees, magnolias from the south, and other such foliage as can be obtained without permanent damage being done to the country's native plants.

**Memorial Day.** Even the undertakers are taking advantage of Memorial Day opportunities to stock up on wreaths. It seems curious to see an undertaker's window filled with these offerings, and we are moved to wonder what the ultimate result of the tendency in this direction is going to be. This year wreaths are being sold, not only by department stores but in grocery stores, fruit stores and on the sidewalks, and, of course, there are also scores of temporary stores taken for no other purpose.

This sort of thing means sharp competition for the florist. We fear it means that the Memorial Day trade is slipping away from the florist altogether, or at least in large measure. The number of prepared wreaths disposed of outside legitimate trade avenues is almost unbelievable. It is impossible to say to what extent natural flowers would have been purchased if the artificial materials were not available, but, without question, substituting has meant a great loss to the grower. This loss is not only actual but potential. In other words, it is cutting down the opportunity for legitimate expansion.

Now if people get into the habit of buying artificial material for Memorial Day, who is to say that the practice will not spread to other occasions. In fact, attempts have been made to introduce artificial goods at Christmas. There is great danger here, and we believe that before long it will have to be recognized and dealt with in some vigorous way.

---

**Mother's Day Prices.** It is a very significant action which was taken by the florists of Hackensack, N. J., in announcing that they were going to boycott carnations because of the increased price for Mother's Day. These Hackensack florists prepared an advertisement urging that roses and sweet peas be used in the place of carnations, and informed the reporters that the wholesalers were advancing the price from four cents to twenty cents each. Here is the way one paper framed the item:

> "New Jersey florists assert that commercializing the observance of Mother's Day by the wholesale dealers would make it necessary for them to charge thirty-five to forty cents for each carnation, which they believe is more than their customers want to pay."

It is unfortunate that situations like this should arise. Every year the papers throughout the country harp upon the high prices of the carnations sold for Mother's Day observance, and intimate, sometimes guardedly but more often in pointed language, that the florists are rank profiteers. It is a question whether the bad effect of such publicity is not offsetting all the gain which comes to the florists from the extra Mother's Day business. It is exceedingly detrimental to the trade to have the impression get abroad that florists seek to gouge the public at any time of the year. It reacts upon the industry through all the rest of the season. Many far-seeing and up-to-date florists recognize this fact and are doing their best to change the situation. One prominent grower in Buffalo, for example, set a price of eight cents on all his carnations, and notified the retailers selling his stock that their price must reflect his charges. The effect of this action was seen in several ways. There were few stores in Buffalo which charged more than $3.00 for the very best grade of carnations.

As a matter of fact, the price was kept down to a reasonable figure to a much greater extent than might be expected under such circumstances throughout the country. And if Mother's Day is to serve the florists to the extent it is capable of doing, a sane policy must be followed.

---

**Quarantine Conference.** The fact that Secretary of Agriculture Wallace was in the chair at the Plant Conference in Washington last week gave a feeling of confidence to all present, unless perhaps to the members of the Federal Horticultural Board. At the conference there was a full and complete discussion of all the points at issue. Everybody had an opportunity to express himself without the fear of being cross-examined or put in an unpleasant position. Secretary Wallace evidently wanted the facts, and all the facts, and was determined to have them. Of course the presence of representatives from England and Holland gave additional importance to the conference. All that can be done now is to await the results, but there is a general disposition to believe that the Secretary of Agriculture, being a fair minded and broad gauged man, will deal with the matter in a way to meet the approval of all concerned, even though it may not coincide exactly with their desires.

## A. N. PIERSON, Inc., Cromwell, Connecticut

### "ARE WE DOING OUR PART?"

#### Mr. Penn Writes About Advertising And Publicity

The writer recently read an article by A. D. Lasker, Chairman of the United States Shipping Board, who quoted the following: "Advertising is an American product and we are the only nation on the face of the earth that knows how to advertise. Advertising as we understand it today is a comparatively new product, no older perhaps than twenty-five, and I place that limitation upon the life of present day advertising in order that I may gracefully say that I have had the wonderful opportunity of seeing it develop from mere type on white space to its present position."

The above paragraph struck a peculiar thought in my mind as applied to florists and floral advertising except that we have developed our own in the few short years since our national campaign started. It is masterful in its entirety the progress we have made during the past five years when we consider our own development in this direction from many standpoints, namely:—when scanning our lists of contributing members to note the names of many who originally felt it was an unnecessary essential to help the sale of flowers but who now have acknowledged their error and contribute and boost also,—then the type who realizes the importance of selling more flowers now and considers that of late years we have forgotten the gluts we used to hear about so frequently also the numbers of campaigns started locally after noting the success of other centers, so all in all, it is most pleasing to note our progress in this direction.

We hope some day to treat our advertising with words of instruction how to use and keep flowers—how to grow and keep flowering plants—how to properly remember friends and relatives when telegraphing flowers to distant cities, so that our future advertising will consist of more constructive activity in the sale of more flowers.

The improvement in the kind of advertising we are all doing today is so marked that our trade as a whole is benefiting daily in the successful strides made in this direction. The florists of the west benefit by the progress made by his brother in the east as does the florist in the north by his brother in the south, thus the entire business profits in the general success.

Now the only feature that seems lacking in this entire march of progress is the need of more funds to keep our national program activities on the move. We are doing very well for the amount we receive but we should have a greater number of subscribers to our fund to show real results that will advance the still further sale of more flowers to the buying public by continually reminding them that every day is a flower-buying-day.

This can and will be accomplished when we all contribute to the national fund.

So keep our good work moving and let each of us do our part in its maintenance.

HENRY PENN,
Chairman, National Publicity Campaign.

### LANCASTER COUNTY, PA., FLORISTS' ASSOCIATION

The May meeting was held in the work room of the W. B. Girvin establishment after an inspection of the vast area of glass. Roses and carnations constitute the main crop of cut flowers, but there is a general assortment of other stock to supply the stores of Reading, Lancaster and suburban towns.

The speaker was Mr. Holdridge, who is crop pest adviser for the Department of Agriculture of the Bureau Plant Industry of Harrisburg.

The June meeting will be in the form of an automobile run to visit the H. A. Dreer establishment at Riverton, N. J. The date of this run will be decided by Mr. J. D. Eisele, manager at Riverton, as we will want to see all that can be seen in one day.

An invitation was extended by the Reading Florists' Club to join them in a picnic in July; the invitation was accepted and our own picnic postponed until some time in August.

The Secretary was instructed to write a letter to Mr. John Young asking that the S. A. F. make an effort to get the present exorbitant express rates modified.

Mrs. M. J. Brinton was elected to membership in the Association.

Mr. Holdridge presented the members present with bulletins on Snapdragon Rust and the Chrysanthemum Midge, the meeting adjourning about 9 p. m., when the run back to Lancaster was made in one of the several driving rains we had at intervals the past twenty-four hours.

ALBERT M. HERR.

# RAMBLING OBSERVATIONS OF A ROVING GARDENER

Apparently this is going to be a big year for peony growers. Even the florists are planning for a larger sale of cut blooms than in the past. The popularity of the peony is growing as fast as that of any flower. Especial interest is being manifested in the novelties, one of the best of which is President Wilson, a peony which aroused much interest and enthusiasm wherever shown last year. This peony is a large, soft rose pink, changing to shell pink, with curved petals, and is very fragrant.

Another introduction is Katherine Havemeyer, with broad, rounded, flesh pink guard petals, somewhat notched at the ends, with center petals that are narrow and fringed. This also is highly perfumed. Both these peonies are introductions of the Cherry Hill Nurseries at West Newbury, Mass.

Rosette, introduced by Desert, is an early mid-season peony of much value. It is a delicate shell pink in color, illuminated with salmon pink at the base of the petals. Another good new one is Jeannot, also from the hands of Desert. This peony has cup-shaped flowers of soft shell pink, with a slight lavender tint, and with salmon pink lights at the base of the petals.

Mr. A. B. Franklin of Minneapolis has introduced a number of excellent new varieties, the best being perhaps Mabel Franklin.

While the newer peonies are constantly winning favor, the old kinds are not being overlooked. There are few of the old timers which are not readily surpassed. Duchesse de Nemours is one of these. While introduced in 1856, it is still of good form and will be grown for a long time.

---

I have been interested in a note on keeping roses published in Gardening Illustrated. The writer tells about budding such varieties as Dorothy Perkins, Hiawatha and Minnehaha on tall briers from six to nine feet high, pruning the plants so as to obtain a growth in umbrella shape reaching to the ground. Oftentimes wire trainers are used, the shoots being tied in place and kept at an equal distance around the tree. The wires are also a protection against severe winds which might easily blow the heads off so tall a stem.

---

Would that every city had an institution like the Brooklyn Botanic Garden. This institution is of tremendous value to the horticultural industry, as it helps to create a wider appreciation of the flowers and a better knowledge of the way in which to handle

Peony Duchesse de Nemours

them. It carries on classes throughout the year in which anybody with a common school education can obtain practical instructions on botany, propagation of plants, the handling of flowers in the greenhouse and outside, and the like. Trips are made to nurseries, private places and other gardens once a month. Garden plans and floral decorations are studied at first hand. Lectures are given by well-known men in the horticultural world, and an opportunity offered to get in touch with the leaders in the profession.

In addition the Garden co-operates with the local schools, members of its staff give lectures to the pupils, and open the greenhouses for classes from the schools. It sells many packets of seeds and supervises home gardens. It has a course of instruction in the making and management of children's gardens and in nature study. Likewise it has courses for teachers, and altogether offers educational features seldom found in any institution outside of a college.

## ORIGIN OF THE RAMBLER ROSE.

Many of the newspapers have been attributing the origin of the Rambler Rose to the late Michael H. Walsh, of Woods Hole. The mistake is corrected by Walter Austen, of Dorchester, who writes as follows:

No one knows the origin of the Rambler Rose, but it was first obtained by and brought out and put upon the market by Turner of Slough, Eng. Slough is one mile distant from Stoke Pogis, where the poet Gray is buried. Turner himself first saw it in a cottager's garden in Scotland and, being a florist, was naturally attracted by it and purchased it of the old lady who inhabited the cottage, took it to his nursery at Slough, propagated others, and sold the first consignment in London under the name of "Turner's Crimson Rambler." This was the first instance of its origin on the market, since when many sports, such as Dorothy Perkins (pink, white, yellow) and others have sprung from it through sports and crossing. I mention these facts not to in any way detract from the deceased the many honors he may have acquired as a rose grower to which he doubtless was worthy, but to put you right on the face of the origin of the Rambler Rose, as I feel sure you would not deprive the "introducer" of the honor it brought him, and to whom the honor should belong.

WALTER I. AUSTEN.

**A NEW BOOK**

"INTENSIVE STRAWBERRY CULTURE"

Written by an expert of 10 years experience.

Designed especially for people with small holdings and yet not to be overlooked by the big grower. Gives the most approved methods of handling strawberries for large crops and quality fruit.

Write for free prospectus or send $1.00 for the Book.

WHITMAN, MASS.

## EXTERMINATING RATS

In connection with the crusade for the extermination of rats in this country it is interesting to observe that in different countries different methods are employed to destroy these rodents. An interesting method is described in the Queensland Agricultural Journal, which is as follows: "Put down a tempting bait and surround it with a ring of caustic soda. Outside the ring of soda place a ring of wet rags or bags. The rat, to reach the bait, must walk over the wet bags, and so wet its feet. He then walks over the caustic soda, which, of course, burns him. He will next lick off the irritating substances, and becomes a dead rat. The same procedure may be adopted at the main entrance to a rat's tunnel. Close up all the holes possible, and put wet rags at the entrance, and soda outside, and then the bait."

## HOFFMAN'S BIG WINDOW BOX JOB

Probably the biggest job of window box decoration that has been done in New England this season, unless possibly it is that of Filene's store, is the Copley Plaza Hotel. Hoffman the Florist has been doing this work for the past seven years. This season he used 840 plants, mostly arborvitaes and junipers, from Little Tree Farms in Framingham. The cost of this work was $800. Of course a few trees will have to be replaced, but the general planting is expected to remain in good shape until next spring. These window boxes filled with evergreens add notably to the appearance of the hotel, and have been much commented upon.

## CHRISTENSEN GREENHOUSES SOLD

The greenhouses of Andrew Christensen at Stoneham, Mass., have been sold to Joel Whittemore, who will continue to grow carnations therein. Mr. Whittemore is a thoroughly experienced carnation grower, having been associated with his father, Henry J. Whittemore, for a number of years. There is no doubt but what he will make a distinct success. Mr. Christensen is giving his attention to his new enterprise in Reading, where he is building greenhouses and lay-

## GOLD MEDAL FOR DOUGLAS ECCLESTON

The many friends of Douglas Eccleston, superintendent for A. C. Burrage at Beverly Farms, are pleased to learn that he was awarded a gold medal at the Massachusetts Horticultural Society as a result of his work in setting up the recent wild flower show. Frederick Pocock, his able assistant, received the Appleton gold medal at the same time.

## PEONY PHOTOGRAPH CONTEST

The Mohican Peony Gardens at Sinking Springs, Pa., have adopted an unusual advertising plan by means of which they should greatly increase the number of photographs available for their catalogue. They announce a prize contest, open to all who purchase peonies from them. They ask for photographs of peonies growing in gardens unsent. The prizes consist of peony roots to the value of $50, $30 and $15.

## NEWS NOTE

William Wunderlin and Raymond Emory have leased the No. Jefferson Street greenhouses at Hartford City, Ind.

# ADVERTISING AND SELLING

The concern known as L. C. Fields, the Florist, of Kansas City, Kans., is probably the only one in the trade which gives a bond guaranteeing the quality of its stock. It is a plan which has brought a vast amount of advertising, and has done much to build up the business. Every box of flowers which goes out contains this bond, which is a nicely prepared piece of paper, with an attractive border, reading as follows:

FIELDS
GUARANTEED FLOWER BOND

If these flowers are not satisfactory in every respect, they will be replaced with other flowers or the money will be cheerfully refunded.

L.C. Fields.

It was last Christmas that the Fields people began putting out these bonds. They were enclosed in all boxes in which Christmas flowers were shipped. According to Robt. Fields, now in charge of the business, only six comebacks were reported, and he was very glad to make good in each case. One shipment of flowers had been frozen on the way. In another a pot had been broken. In a third the plant itself had been broken. In two others the flowers were said to be wilted, and in the sixth the plant was in an unhealthy condition because kept too long without watering. Complaint in each case was made by telephone and replacements were delivered at once. Now of course every reliable florist wants to make good if he has an opportunity. Mr. Fields considers that this bond brings the opportunity to him because having received it the customers are almost certain to take advantage of it. It offers an opportunity for the person who receives the flowers to make the complaint without notifying the giver, in case the flowers were a gift. A recipient of a flower remembrance might hesitate to tell the donor that they did not arrive in good condition, but will make such a complaint direct to the florist.

The bond also works well with flowers which are sent for funerals. It invites close scrutiny from whoever opens the box, and in case of mistakes or lack of quality it may be possible to make the proper corrections immediately and before the flowers are needed. The use of the bond creates a feeling of confidence in the Fields establishment, and according to Mr. Fields the public has not abused the bond. In very few cases has there been any attempt to impose upon the florist as a result of this offer. One other point is well worth attention. The employees of the store realize the importance of having every shipment of flowers in perfect condition, and thus are encouraged to throw all wilted stock or what is not in first class shape into the trash pile.

Naturally the Fields concern has taken advantage of the opportunity to make the bond of advertising value. It has used newspaper space liberally. In fact no other florist in the community has used as much space by fifty per cent. Quarter pages are common with the Fields, and at Easter time a full page is used. Results have been shown in a great increase in the volume of business within the past few months.

## "INTENSIVE STRAWBERRY CULTURE"

Mr. Louis Graton, who is well known among strawberry growers as the originator of the St. Martin strawberry, has just issued a little book called "INTENSIVE STRAWBERRY CULTURE," which contains a great amount of exceedingly valuable information about the growing and marketing of strawberries, based upon his personal experience lasting over many years. This little book should be of interest to every strawberry grower, whatever the size of his enterprise, but is especially valuable for the small grower. In fact it was for the man with only a small amount of land that it was written. Inasmuch as it describes the methods which Mr. Graton himself has followed, it will be read with particular interest by those who know of his success. It costs $1.00 and can be obtained from this office or from Mr. Graton direct.

Otis L. Bullock, of Mishawaka, Ind., has purchased the plant of the Attice Floral Co., which has been owned by W. H. and Earl F. Francis for the past two years. Mr. Bullock was formerly employed in the Vaughan Seed Store, in New York City, and has taken courses in horticulture at both Cornell University and Illinois University.

## FORCING AND GROWING BULBS

Lilies merit cool treatment until well rooted. Then letting them get gradually warmer will spell success, where failure results from pushing them too fast. If dug too early a higher temperature exists than when fully developed, and if much care is not taken, spongy bulbs and poor lilies are the result.

Several years ago gladioli were forced, and failure was the rule because they must have a cycle of rest. Growers planted early and few spikes were cut. When the bulbs were kept cool until well into January, then put into a warm temperature until February, success followed.

Hollanders as a rule laugh at American grown Holland bulbs. **"It can't be done."** The time is not far off when our Holland friends will get awake.

We have forced American grown Emperor, Victoria, Barri, etc., for some years and we never had anything superior to our own Emperors, Victorias, etc. this year. As they are now blooming in the field, about every nose has a bloom or bud. A few Hollanders are watching our trials and have been disillusioned as to "It can't be done." These men are alive to the probable future, and if Q. 37 puts on the "index" narcissi, etc., they will come over well informed and ready to make a "can-be-done" success.

Tulips, hyacinths, etc., will be in the same class.

Since the days of Pitcher & Manda I have kept in touch with trials at bulb growing on this side. They were not failures but wrong methods or lack of capital compelled the growers to discontinue their work.

C. BETSCHER.
Dover, Ohio.

## GENERAL NEWS

Mr. D. W. Davis has opened a new flower store on East Front Street in Berwick, Pa. The store is handsomely finished in moss green, and has extra large display windows. There is a conservatory at the rear of the store, with concrete benches.

Alfred G. Bennett has opened a new florist store at 19 Sutthim Road, Jamaica, N. Y.

An office building and packing house is being erected by the Rhinebeck Floral Co. on the Astor property at Rhinebeck, N. Y.

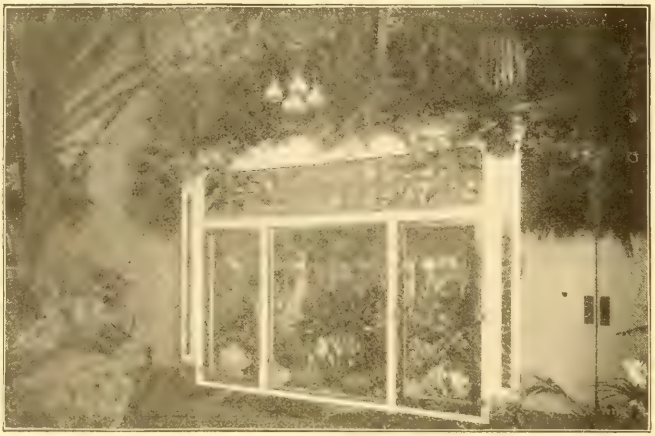
## FLOWERING CRABS IN THE ARNOLD ARBORETUM



Malus theifera, which is one of Wilson's discoveries in western China, promises to be a good addition to the list of early flowering Crabs. Its long, upright, and spreading, rather zigzag branches make it easy to distinguish at any season of the year; they are continuously studded with short spur-like laterals which bear numerous clusters of flowers rose-red in the bud and pale or almost white when fully expanded. In central China the peasants collect the leaves and prepare from them the palatable beverage which they call "red tea." Malus theifera has now flowered for several years in the Arboretum, the largest plant being in the Peter's Hill collection where it is a conspicuous object.

In the color of its rose-red flowers drooping on slender stalks Malus Halliana with its variety Parkmanii, which has double flowers, is perhaps the most distinct of all Crabapples. It is a small tree with erect and spreading branches which form a narrow, vase-like head, and dark green leaves; the globose reddish fruit is not larger than a small pea. It is well known in Massachusetts gardens, having been sent by George R. Hall, in 1862, to Boston, where it was first planted in Mr. Francis Parkman's garden on the shores of Jamaica Pond. The Parkman Crab is a favorite in Japanese gardens where it is known as "Kaido" and was no doubt imported into Japan from China, where the single-flowered form was found by Wilson.

Malus floribunda, by many persons considered the most beautiful of Crabapples, was introduced into Europe by Von Seibold in 1853 from Nagasaki in Southern Japan. The place where this little tree grows wild still remains unknown, and by some persons it has been considered a hybrid of Chinese origin; more probably, however, it originated on one of the high mountains of Kyushu. Japanese botanists and nurserymen confuse it with the Parkman Crab, and Wilson did not find it in Japanese gardens. It is a broad, round-topped tree-like shrub sometimes twenty-five feet tall, with stout branches and slender, arching and pendant branchlets. The clusters of flowers are white when fully expanded and are rose-red in the bud, and as they open in succession the two colors make a handsome contrast. The fruit is about the size of a pea, yellowish or yellowish-brown. On some plants it falls in early autumn and on others it remains on the branches during the winter or until devoured by birds, who find it one of their most palatable winter foods.

Malus floribunda rarely fails to produce abundant crops of flowers and in this climate has proved to be one of the most satisfactory and reliable of all the arborescent shrubs or small trees which have been planted in eastern Massachusetts.

A hybrid between M. floribunda and probably M. robusta appeared here among a lot of seedlings of M. floribunda in 1883 and has been named M. arnoldiana. It has the habit and abundant flowers of M. floribunda, but the flowers and fruit are nearly twice as large as those of that plant. It is a handsomer plant than M. floribunda, distinguished by its long arching branches, and one of the most beautiful Crabapples in the Arboretum.

# FLOWERS FOR FUNERALS

## Mr. B. F. Letson, of Carbone's, Boston, Gives Valuable Points Regarding Them

There are many ways in which florists and undertakers can work together, a fact which is appreciated by the latter as was shown at the recent convention of morticians, when Mr. Birket Foster Letson, of Carbone's, Boston, was asked to present a paper on Funeral Flowers.

Some of the points made in Mr. Letson's paper will be of value and interest to florists themselves. Mr. Letson said, for example, that morticians should discourage the use of set pieces, which are often sent to funerals, but made a distinction between the heavy, coarse pieces and the more artistic sprays, wreaths, crosses and palls.

Mr. Letson continued: "The practice of sending cut flowers is fast dying out in the east, except in cases of very large funerals, where a scheme of decoration is to be carried out. For the ordinary service the sending of cut flowers should be discouraged as it means the sending of vases, etc., to the house, and collecting them later. This always adds to the expense unnecessarily."

Mr. Letson deprecated the practice of renting baskets which obtains in some cities. These baskets are marked to be called for by the florist whose name they bear. This custom offers great opportunities to unscrupulous florists, who sell the basket and then put a card on it saying that it must be returned. He believes such practices should be stamped out.

### Opposes Wax Flowers

Mr. Letson also spoke against the use of wax flowers and prepared wreaths. He said: "I have seen many gravestones ruined by the chemical dye which oozes out of these artificial flowers and wreaths during the damp and rainy weather. It's far better to send a few real flowers, or even a green laurel wreath, than a large tribute of that awful artificial sham, the prepared flower, that suggests something dead and embalmed and then set up for the public gaze."

Speaking of color schemes, Mr. Letson named the following as flowers that go well together: Pinks of all but the violent cerise shade, light lavender, most shades of blue, most shades of yellow, the brilliant autumn colorings, as illustrated by the Primulinus Hybrids gladioli, and the beautiful single chrysanthemums. He spoke particularly of combinations to be had by using yellows and flame colors, combined with the blues of larkspur, or pinks, yellows and blues.

Mr. Letson then told how he made the preparations for funeral decorations. He said:

"My plan of action when called upon to take charge of flowers sent to a funeral service, is to go well equipped with fine wire, or good invisible twine that will not break, plenty of glass push pins (my best friends) because they will hold up almost any piece of flowers if the cord or wire is placed around the pin itself, but never on the glass peg, and, when the pin is removed, no hole is left to mar the woodwork.

### Stands for Flowers

"I also provide myself with the adjustable stands somewhat like a music rack. These in themselves are very ungainly, but a great deal can be done by fastening a spray of flowers on the upright bar of the stand, then a wreath on the rack and tilting at an angle sufficient to show the full form of the wreath. The stands can then be arranged in an artistic manner, being careful of the colors.

"While on the subject of stands, let me suggest that the rack on top could be much improved by being made of one rod just crossing the other, thereby not showing so much iron work. Similar adjustable stands could be made with round disk-like tops forming pedestals on which baskets of flowers could be placed. These, adjusted at different heights, would allow the individual beauty of each piece to show.

"I generally figure to arrive at the house or church in time to receive the first flowers as they come, to get the boxes opened and carefully remove the cards. I then make a general survey of the flowers, being sure to consult the friend of the family

who is generally on hand to take the cards, as to just what flowers are to be put on or nearest the casket. After placing these, I arrange the others in the best possible position, bearing in mind the fact that, unless crowded for room, everything does not have to be jammed together near the casket and that floral pieces show to much more advantage if they can stand apart from each other."

### Keeping Flowers Fresh

In regard to keeping flowers fresh Mr. Letson said:

"It is a very hard proposition to care for the flowers that are received at funerals from a long distance, but, in most cases, with a little care, they will come out all right. In the case of flowers received in very cold weather, it is best always to let them set unopened in the boxes for an hour or so to let the frost, if any has penetrated the heavy wrapping, slowly to come out. But, if the time of arrival is too late, sprinkle well with cold water, as this will absorb the frost and prevent the flowers turning brown. On the other hand, in hot weather it is the air that wilts flowers quickly, and they should be left in the boxes as long as possible.

"It is always a good plan to open all boxes to find out the condition in which the flowers arrive. If any appear wilted, they can be sprinkled with cold water and the boxes closed up at once, and in a short time they will be quite fresh again. Some flowers do not stand sprinkling with water, however, such as sweet peas, gardenias and orchids, as they will spot very badly in a short time.

"Covering flowers of all kinds with light tissue paper and then showering with water is a fine scheme. This can be done after they are arranged, if they show signs of wilt. One of the most important things is to be sure that no direct draft is blowing upon flowers, as it will cause them to wilt very quickly and does more damage than heat."

### Equipping Motor Cars to Carry Fowers

Mr. Letson gave several important points to the undertakers in regard to handling flowers. He said:

"A very good way to handle floral pieces in transport to the cemetery is to have your service motor fitted with a series of racks in sections that will slip into grooves along the sides of the car. These racks can be spaced about eight inches apart and, being in sections, as many as were needed could be used. By this arrangement wreaths and sprays could be laid in close together without fear of the top ones crushing the under ones and a greater number could be carried than by just stacking as is the custom now.

"Another plan that could be used to good advantage is to have a supply of heavy wire hooks, and if your service car has panel protecting slats along the sides, a goodly number of wreaths and sprays can be hung from these and ride very nicely. This would leave room on the floor of the car for standing large pieces which are often sent. As to loading up the top of the casket in the manner of stacking hay, that is not only bad for the flowers, a nuisance to the mortician, but looks bad to the friends and general public that attend funerals."

Mr. Letson pointed out that great care must be taken to remove cards sent with the different pieces, this being done before the service. He also emphasized the need of morticians familiarizing themselves with the names of the different flowers, so that they can write intelligent descriptions on the envelopes that contain the senders' cards.

### Flowers Replace Crepe

Mr. Letson said he did not know who originated the idea of using flowers instead of crepe on the door, but considered the plan a good one. He said that ordering the spray is usually left to the mortician, and that very artistic pieces can be made up with ivy alone, or combined with roses, orchids, violets or sweet peas, according to the taste of the family and the expense to which they are willing to go. At some seasons attractive pieces can be made with pink rambler roses, lilies, pink or white, and small gladioli. He said that morticians should arrange with the local florist to furnish for a stated sum door pieces that are artistic as well as practical as to lasting qualities. He considered the combination of ivy and violets or orchids one which lasts particularly well.

The benefit of HAIL INSURANCE was forcibly illustrated by a number of violent hail storms in New England last year.

Be wise and send to **John G. Esler, Sec'y of Florists' Hail Association, Saddle River, N. J.,** for Hail Insurance literature.

**DO IT NOW.**

## George Watson's Corner

"You in your small corner and me in mine."

C. U. Liggit is not worrying about business. He says his business is to make business. He does it too! You ought to see the mile-high pile of checks he sends out the 10th of the month. Really amazing! Miss Freund, his private secretary, is a very courageous lady, and dismisses all the would-be's and shysters without waste of time. I wish I had her nerve. Maybe it's that crucifix I saw hanging by her watch, front of her desk. When one goes out for a good and holy purpose, says the Holy Grail, the immortal spirit inspired within is unassailable by any merely human agency. I'm a Presbyterian myself; but I still carry the lucky bawbee in my pocket, and I won't walk under a ladder if I can help it. And I'm mighty careful what I do on a Friday—if it comes on the 13th. Conan Doyle thinks he knows a lot about the unknowable; but he is not the only one.

Mr. Wilson has given us a very interesting talk on grasses for golf courses in the "Seed World" for May 1. All of it very true, and beyond severe criticism. He is a little bit too harsh on the "real" seedsmen, however. If he will look back thirty-eight years ago, he will find that the Joseph Breck & Sons people in Boston were preaching the very same thing, and even a little more; and all first class seed houses, the world over, have been right in the forefront in the same line. Long before the Washington people got interested in the Agrostis family, the real seedsman knew all about them. And the real seedsman is not so dumb about the Festucas either. The trouble is, so many people call themselves seedsmen, who are not seedsmen at all. A large percentage are just grocers or storekeepers. If Mr. Wilson will take a glimpse at "Barenbrag on Grasses" he will probably be astonished to find that the seed trade has been fifty years ahead of Washington, right along. And probably is yet, for that matter.

Al Campbell comes out and waxes indignant because somebody has accused the florists of being profiteers. Of course they are profiteers. Why shouldn't they be? What are they in business for? The haggle of the market is what makes prices. Get all you can—no matter what they call you. If the horse is on the block—the highest bidder gets him. Then, there comes the glut season, when the amateur country folk bring in outdoor flowers for their city friends and ruin the market. It takes a whole lot of Easter and Christmas prices to make up for that, and your rent goes on just the same.

The American Florist is very nice to Miss Jarvis, and we take our hats off to the gallant and complimentary spirit in which they write of that lady. When Miss Jarvis started it, it was just a piece of ordinary silly sentimentalism, such as all women are liable to indulge in. Every one of the three hundred and sixty-five days of the year is somebody's mother's birthday. Why should we select Miss Jarvis' mother's birthday, any more than your mother's or my mother's birthday. No reason at all, and as I have often said, **"every day is mother's day"**; every one of the three hundred and sixty-five. Never forget her for a day or a minute. Also, give a little thought to old Dad. And Aunty. And sister Kate. Which shows where the whole thing begins and ends. Silly sentimentalism. But the florists saw a dollar looming and, like good business men, they were on the trail right away. I don't blame them. I'm a business man myself. If people want to spend their money, why shouldn't I get my share!

The peony crop will be later than it was last spring, as we have experienced a late, cold, season up to May

15th. But, from the looks of it, we are going to have a banner crop, the best in many years.

Rosa hugonis is among the first of our Spring Beauties. Some lovely sprays of it were brought in from his home in Lansdowne on the 12th by Samuel S. Pennock, and they were much admired by everyone. Another wonder he handed the fascinated crowd, was sprays of that commercial commodity, the Leucothoe, in bloom. The flowering sprays are terminal, and pure white, about three inches long to the spray—the individual blossoms being small like a miniature canterbury bell. About a hundred of them on each spray, no larger than a pea, and beautifully formed and fringed.

William Kleinheinz, supt. of the Widener Estate at Elkins Park, was one of the favored in getting an invitation to the concert given by the Kelly Street Chorus on the 15th inst. at Witherspoon Hall. The Madame and several other lady friends were in his party. Mr. Littlejohn is a great lover of music, and he enjoyed this wonderful rendition of the up-to-date, and will not soon forget it.

B. J. Dulaney, of the J. Charles McCullough Co., of Cincinnati, was a recent visitor. He booked some good orders, notwithstanding the lateness of the season. The grass seed trade, according to his idea, has come back to its own.

Robert Craig, Sr., arrnved home in Philadelphia, May 14th, from his winter estate in Porto Rico, where he has been sojourning since last October. He reports having had a most enjoyable seven months in this climatic paradise, where everybody is lovely and the goose honks high. After a two days' rest among the home folks he paid us a visit at the great horticultural center of the Universe, the Pennock Flower Market, at 16th and Ludlow and greeted all the boys. Mole street next, then Jersey and other interesting places.

H. H. Battles sailed on Friday, May 12th, for Europe. He could not wait for Sunday (Mother's Day) as he felt that his boys were so well trained they could handle anything, no matter how big. He expects to be in London for some time. He rather likes London. Then Paris. And by and by, Constantinople and—we were going to say Jerusalem—but we fancy he will be more interested in the evolutions in Pomerania. They have a nice breed

*When writing to advertisers kindly mention HORTICULTURE*

of canines there. Then there is Timbuctoo, to look up. We have talked about that a good deal; but few of us have seen it yet. My argument has always been that the cassowary does not hibernate there— and, being from Missouri I've got to be shown.

Mark Mills is still on the upward trend, one mountain to another. Higher, Higher. Cough up your dollars, boys. Boost the business. A ten, a hundred, a thousand—whatever you can afford. The point is—you are boosting the business.

What's the use of writing to a man who is so rushed that he has no time to write. And then wasting fourteen agate lines of space to tell the world about it. The Southern Florist evidently thinks that the rush to write is inherent in all of us, and that the editor must obey the impulse and ask everybody to write and rush, and if they are too rushed to write, he will put the name in the paper anyhow, and let it go at that. If that's the southern idea of conducting a horticultural journal well after all is said and done we must confess that they have had precedent to go upon when you look over a lot of the stuff that has appeared in the northern journals during the past quarter century. I've no objection to contributing to the gayety of nations; but the inborn spirit of thrift says: Our advertising rates are very reasonable. Send along your copy.

**BECOME A LANDSCAPE ARCHITECT**

Dignified, Exclusive Profession not overrun with competitors. Crowded with opportunity for money-making and big fees. $5,000 to $50,000 incomes attained by experts. Easy to master under our correspondence methods. Diploma awarded. We assist students and graduates in getting started and developing their businesses. Established 1906. Write for information; it will open your eyes. Do it today.

# King GREENHOUSES

STANDARD DESIGN FOR KING FLAT RAFTER HOUSES 69 TO 76 FEET WIDE

## *Wide houses make wide gables*

To be good gables they must be held rigid and not cast too much shade. Notice the steel posts—these posts go down below the frost line to a concrete base, then up through the cement wall and are bolted to the steel end roof rafters.

Being held firmly top and bottom, the point that would spring is therefore in the middle.

The middle line is just about over the top of the doors at the first gable purlin.

At this point we put diagonal braces extending from the intersection of the first purlin and posts to the intersection of the roof purlins and rafters.

The gable, therefore, can neither blow in nor blow out and is what we started out to get—a rigid gable.

### WELCH BROS. CO. BUSINESS TO CONTINUE AS FORMERLY

While the passing of Patrick Welch will be a serious loss to the firm of Welch Bros. Co. in Boston, it will not affect in any way the conduct of the business, which is incorporated, and which will be carried on along the same lines as formerly. The widow and children of Mr. Welch have received condolences from all over the country. Few men in the trade were better known not only in the United States but also in Canada. He will be particularly missed from the Society of the American Florists, where his counsel was always considered of the best. He will be greatly missed, too, by the members of the Horticultural Club of Boston, with which he had long been connected, and of which he was a vice president. Whether it was a convention of the S. A. F. or a dinner of the Horticultural Club, he was always an ideal presiding officer, fair, open minded, and possessing a remarkable fund of parliamentary knowledge.

### FLOWER MARKET SLUMPS

The flower market has experienced a tremendous slump the past week. A year ago carnations were selling for three cents at this time. Now they can be bought for almost any price. It is the same way with roses and practically all the other stock. The best indication of market conditions is evidenced by the number of street vendors who are peddling flowers. An effort is being made to get them out of the market in some way at some price, but the amount of money being received is ridiculously low.

### NEWS NOTES

The Clinton, Mass., Floral Shop, of which Florence McCarty is manager, did a fine bit of advertising for Memorial Day. The florists in the smaller towns are beginning to realize that advertising is as important to them as it is to their big brothers in the large cities.

Vol. XXXV JUNE 10, 1922 No. 11

## THE TALK OF THE TRADE

There are never enough plants of Dracaena indivisa in 4 1-2, 5 and 6 inch pots to supply the demand until May and June, but there really is very little reason why any grower who has land to spare should not raise his own stock and have plants as good as he can buy, and which will cost him less. It is too expensive a proposition to raise Dracaenas in pots, because the growth is too slow in that way and the room taken up is also a big cost. Put them out into the field as early as the ground is open, keep the soil well cultivated, and wherever possible have well drained, light soil. A 2 1-2 inch plant set out early in the season will make fine, strong stock when it is time to lift it in the fall. They then can be carried along in a cool temperature with little expense, and will make ample financial returns.

So much has been said about geraniums that it may become a tiresome subject, but I think it will bear saying once again, that there is a short supply. Unless my judgment is far wrong, there will not be a large supply for next season. Those growers who have the space available should carry along their stock plants and see to it that they do not sell too close now, or they will be obliged to buy for the coming season. Good 2 1-4 inch stock of most all sorts can be bought now at a lower price than a few months ago and if properly handled these will work into plants from which a good supply of cuttings can be taken throughout this coming season. It will be time and money well invested for the grower who needs 4-inch geraniums for the spring sales.

W. W. Walker, of St. Catherines, had a timely word to say in the Canadian Florist about the cost of growing Easter lilies. He has gone into the matter thoroughly, and I can't see that his figures are far wrong. They also apply quite closely to conditions in the States. The question of course, was left out as to the cost for heating, labor and other overhead expenses, and they will vary considerably according to location and local conditions.

However, I believe from what I have observed and the conversation I have had with lily growers that where the Giganteum lily is properly handled it can be carried through without a financial loss and in fact at reasonable profit. Of course the grower who retails his own stock has the advantage, but those growers also, who grow only to wholesale, have a fair chance of making this crop hold up, at least even with other acknowledged standard and profitable crops. It is only possible, however, to do this through the best of culture. Of course they must be timed properly, but above all they must be handled in such a way as to get a good average count of blooms per bulb.

J. V. Laver, of Erie, Pa., had as fine a lot of 4 inch Pelargonium Easter Greeting as one could ask for, and had no trouble in moving it at Mother's Day sales. Plant stock of this character is being largely used in some sections for Mother's Day, and is bound to become more popular as time goes on. Baby Ramblers in small sizes will also be used; and the buying public is taking very kindly to the idea of plants for Mother's Day.

Plant growers around Lancaster, Pa., are having a very successful season, and have been turning out some excellent stock. Geraniums in particular have been well done, and this applies especially to H. R. Rohrer and Bros., who have made large shipments of top quality geraniums.

I happened to have the good luck to drop in on White Bros. of Medina, N. Y., at just the time to have it proved to my entire satisfaction that the white rose called Medina is nothing more or less than a true sport of Sunburst. Of course there has never been any question in the mind of White Bros. that this was a Sunburst sport, and no one knowing these gentlemen personally would question their statement, yet there is quite a similarity between

Good Example of a Church Decorated for an Elaborate Wedding

the rose called Medina and the rose Kaiserin Augusta Victoria.

However, I saw a plant on the White Bros. place of the rose called Medina, which also carried at the same time a yellow bloom like Sunburst. It seems to me that this should do away with any doubt which may exist about the parentage of the rose. From the way this rose does in Medina, I am not surprised that White Bros. think so well of it. They evidently get good production, and it seems that there is a place for it in their section at least.

Fred G. Lewis, of Lockport, N. Y., is erecting new glass, King Construction Co. being the builders. Mr. Lewis has found his business growing so fast that it is absolutely impossible to keep up with the demand. He is particularly successful with the Lorraine types of Begonia. His stock of these Begonias is in good shape, and he has commenced shipping, but he can't begin to keep up with the calls. His retail trade this season has been exceptionally good, and in all he has a fine prosperous piece of business.

There are so many angles to the question of prices on Mother's Day that I hate to dip into the subject at all. Yet I can't help saying a word in praise of those retail florists who have made a move to keep prices down within reason. No matter how you may look at it, it is dangerous to merchandise stock with such wide variation in prices as we find asked for in the case of cut flowers. It is not for me to say just how a change can be brought about to have prices hold more evenly, but I know very well it isn't possible to furnish all the white carnations or all the carnations of any color that would be called for at Mother's Day, particularly if the price was kept down within reason. In talking with quite a number of progressive men in our business, I find that many think that they would rather do less business on this day and not get their customers to feeling that they were imposed upon.

I was interested to find that P. R Quinlan, of Syracuse, N. Y., set a price of $2.00 per dozen at retail for carnations, and sold at that price only so far as they could supply. When their stock was exhausted they stopped. I have also found that many retail florists in New York state and Pennsylvania have been doing all that was possible to make Mother's Day a day for miscellaneous flowers and plants, and they are certainly meeting with success.

There seems to be no doubt that Mother's Day is here to stay, regardless of the antagonism of the daily press, as well as other influences directed against it. It is up to the florists to take advantage of this day and get their part of the goods. It can only be kept running along in a smooth way by eliminating prohibitive prices.

I have been interested to find that there is considerable disagreement among the orchid growers in regard to Quarantine 37. Some of the growers—and I am speaking of those in commercial lines of course—are bitterly opposed to the quarantine, while others accept it on principle, although believing that its operation ought to be postponed for several years until a stock of American grown material can be obtained. Growers who depended upon the species, and believe that best results can be obtained from them, want the quarantine removed.

Growers, on the other hand, who are already growing from seed, take a somewhat different view. It is well known that several concerns now have as many as fifty thousand plants on the way. Whether or not these will prove as satisfactory as imported stock remains to be seen. The growers believe they will. It will be five or six years longer, however, before this stock is ready for the market, as orchids make a slow growth. In the meantime the income of orchid men has largely been cut off. There are several points in regard to orchid importations which are peculiar.

## PORTLAND FLORISTS PROTECTED

As a result of the vigorous protests made by the florists of Portland, Me., the mayor of that city has ordered the park department to stop selling surplus flowers, plants and shrubs from the city's greenhouses to individual purchasers. It has been the custom in past years to dispose of Memorial Day stock not needed for the parks and cemeteries in that way. The florists have been trying for a long time to stop this unfair competition and when they intimated that legal proceedings might be begun the mayor took action.

## MARKET HOUSE SITUATION.

It is understood that no definite action has yet been taken in regard to the new market house in Boston. Several sites are still being discussed.

## SEC. NAUKAM RESIGNS

### Leaves Boston to Accept Lucrative Position in Buffalo

Eugene M. Naukam, secretary of the New England Florists' Alliance, has presented his resignation, to take effect immediately. Mr. Naukam goes to Buffalo, where he has accepted a flattering offer from the Standard Oil Co.

In conversation with a representative of Horticulture Mr. Naukam said that he left Boston with deep regret. He thoroughly believes in the Florists' Alliance, and hopes that it will become a powerful factor in the life of the florist trade in the east. He said that he had made warm friends in Boston, and would like to have stayed with the Alliance. In addition, however, to the lucrative position which has been opened for him in Buffalo, which is his home city, some personal matters have arisen which make it desirable that he be located there for the next few months at least.

Eugene J. Naukham

The directors of the New England Florists' Alliance were loath to accept Mr. Naukam's resignation, having much confidence in him, and the work he was doing . It is expected, however, that a new secretary will be obtained, and the office at 77 Summer Street maintained as during the past months. There have been constant additions to the membership, and while progress has not been as rapid as had been hoped, yet much had already been accomplished. Letters have been going out the past week to all the members and to others interested, showing the advertising which has been placed and giving a general resume of the situation.

## BOSTON FLOWER SHOW

### Rhododendron, Azalea and Iris Exhibit at Horticultural Hall

There was a very satisfactory display at the Rhododendron, Azalea and Iris Show at Horticultural Hall, Boston, June 3 and 4. The most conspicuous rhododendron displays were made by the Cherry Hill Nurseries, of West Newbury, and T. D. Hatfield, superintendent of the Hunnewell Estate at Wellesley. Both exhibits contained several interesting seedlings. One of the Cherry Hill seedlings has been named for William C. Rich, secretary of the Massachusetts Horticultural Society.

The iris exhibit was particularly strong, among those showing being Mrs. Grace Sturtevant, of Wellesley Farms, who is very well known for her work with irises, and Mrs. Homer Gage, of Iristhorpe, Shrewsbury. Supt. Jenkins, of the Iristhorpe Estate, paid more attention to artistic arrangement than most of the exhibitors. Mrs. C. W. Willis, of Bedford, had a fine showing of iris, including several of the most improved varieties. Mrs. Willis is what might be called an advanced amateur, but does all the work in her iris garden with her own hands.

Mr. Hatfield exhibited one of Mr. E. H. Wilson's introductions, Kowiltzia amabilis, a remarkably handsome shrub. He also showed a seedling azalea which is a cross between Arborescens and Calendulaceum. Mr. Hatfield states that he has several other colors produced by the same cross which should make excellent plants. Still another novelty from the Hunnewell Estate was a branch of Spiraea Henryi.

Henry Stewart, of Waltham, exhibited a growing plant of the Battlebush, Metrosideros floribunda, and a plant of Dendrobium thyrsiflorum, which attracted much attention because of their immense size.

The awards were as follows:

### AWARDS FOR PLANTS AND FLOWERS

**H. H. Hunnewell Fund, No. 3.** Rhododendrons—Decorative display covering 72 sq. ft.: 1st, T. C. Thurlow's Sons, Inc. Twelve varieties Rhododendrons, one truss each: 1st, T. C. Thurlow's Sons, Inc. Six varieties, one truss each: 1st, T. C. Thurlow's Sons, Inc. Azaleas—General display in variety covering 24 sq. ft.: 1st, T. C. Thurlow's Sons, Inc.

**John Allen French Fund.** Irises—24 vases, 12 varieties, 3 spikes in a vase: 1st, Miss Grace Sturtevant; 2d, Iristhorpe. 12 vases, 6 varieties, 3 spikes in vase: 1st, Iristhorpe; 2d, Miss Grace Sturtevant. Collection of Irises, any or all classes admissible: 1st, Iristhorpe; 2d, Miss Grace Sturtevant.

**Prizes offered by the American Iris Society.** To the exhibitor making the most comprehensive display of Irises in any and all classes: Iristhorpe, Bronze Medal. For the best display of Irises, arranged for effect by an amateur, to be awarded to the exhibitor winning it three times: Iristhorpe, the Hillcrest Gardens, Silver Cup.

**Gratuities**—Arthur Lyman, display of Rhododendrons and Azaleas: Henry Stewart, specimen Metrosideros floribunda; Henry Stewart, specimen plant of Dendrobium thyrsiflorum; Henry Stewart, display of Oriental Poppies.

**First Class Certificate of Merit.** Walter Hunnewell Estate, Kolkwitzia amabilis.

**Honorable Mention.** Walter Hunnewell Estate, seedling Azalea, arborescens calendulacea; T. F. Donahue, display of seedling Peonies; Miss Grace Sturtevant, vase of seedling Peonies.

**Vote of Thanks.** Walter Hunnewell Estate, display of cut shrubs in bloom; Cherry Hill Nurseries, display of Leucothoe Catesbaci; Walter Hunnewell Estate, display of 100 blooms of hybrid Rhodedendrons.

**Awards for Vegetables. William J. Walker Fund.** Asparagus—24 stalks: 1st, Hillcrest Gardens, Reading Giant; 2d, Oliver Ames, Palmetto; 3d, Arthur Lyman, Argenteuil. Beets—12: 1st, James Donald, Crimson Globe. Carrots—12: 2d, James Donald. Cauliflower—3 heads: 3d, James Donald, White Queen. Cucumbers —4: 1st, Coonamossett Ranch Co. Lettuce—4 heads: 1st, W. Heustis, May King; 2d, Oliver Ames, Big Boston; 3d, Arthur Lyman, May King. Rhubarb—12 stalks: 1st, Oliver Ames, Victoria; 2d, James Donald, Victoria; 3d, Arthur Lyman, Victoria. Spinach—1 qts.: 1st, Hillcrest Gardens, Victoria; 2d, Hillcrest Gardens, Thickleaf; 3d, Arthur Lyman, Long Standing. Collection of Vegetables —6 varieties: 1st, Hillcrest Gardens; 2d, James Donald.

## AMERICAN ROSE SOCIETY

### Annual Meeting to be Held at Syracuse, N. Y., June 15

It has been announced that the annual meeting of the American Rose Society will be held at Syracuse, N. Y., June 15. Although invitations were received from several people, it was felt that Rev. Dr. Mills, president of the Syracuse Society, was entitled to special recognition in establishing local rose societies throughout central New York state. After the judging by designated members of the executive committee in the morning, there will be luncheon at Skaneateles Lake, an afternoon meeting in Mrs. Hitchcock's rose garden and an evening session with speakers in the Exhibition Hall.

Mr. J. Horace McFarland has been released as chairman of the membership committee upon his request, and Joseph J. Lane, of House & Garden, was appointed to fill the vacancy. The society now has a membership of 2487.

Conard & Jones have propagated 1700 plants of the Rose Mary Wallace for the Department of Agriculture at Washington. Stock of this rose is to be distributed in two-year sizes to firms which have made application by December 1, 1923.

## SAMUEL J. FASSETT MARRIED

Samuel J. Fassett, manager of the Bigelow Nurseries at North Grafton, Mass., was recently married to Miss Agnes Bouret. The couple were attended by Mr. and Mrs. Albert Leslie of Worcester and guests were present from Rhode Island, Connecticut and New York. After a short wedding trip the couple will be at home at the Bigelow Nurseries. Mr. Fassett is receiving the congratulations of many friends in the trade.

## FLOWER PEDLER MUST KEEP MOVING

Isaac Hirsch, a vendor of flowers, who is well known in the Back Bay district of Boston, was in court a few days ago charged with selling flowers on the public streets without having a permit. Hirsch pleaded guilty, but the case was placed on file, as he promised to keep moving instead of remaining on corners. The law is so construed, it seems, that a person may sell flowers on the streets if he doesn't stand for more than five minutes in one place.

## AMERICAN LEGION EMBLEM IN FLOWERS

Anton J. Rositcksy, city florist of Lynn, Mass., was very successful in reproducing the gold star button, which is the emblem of the American legion, with plants grown in a municipal greenhouse for Memorial Day. The emblem was reproduced in one of the large flower beds on the common. More than six thousand plants were used, including Sweet Alyssum, Lobelia and Alternanthera. The plants were so arranged that they formed a perfect gold star in a white field, with an outside circle of blue. The words "American Legion Post 6" were worked into the button. Mr. Rositcksy has been in charge of the Lynn greenhouses for two years, and has been so successful that the erection of additional houses is being contemplated. The surplus of plants grown by Mr. Rositcksy for the park department is sold to dealers. Before Mr. Rositcksy entered the employ of the park departtment he worked for Frank J. Dolansky, the orchid grower.

## GENERAL NEWS NOTES

James Massadon and Harry Maragus of Hornell, N. Y., have purchased the flower shop of Spiros Condas at Corning. Messer. Massadon and Maragus already have a flower shop in Hornell and will carry on both stores.

The Seed World, of Chicago, has changed editors, Mr. N. C. Helms, who has filled the editor's chair ever since the paper was established, going to California. Mr. W. L. Oswald, who is well known to the seed trade, replaces him.

**The Late Patrick Welch** The passing of Patrick Welch, of Boston, has brought a sense of personal loss to hundreds of florists all over the country. Mr. Welch was a man who made friends and kept them. Moreover, his prominence in the S. A. F. and his constant attendance at conventions and committee meetings had made him more widely known than the average florist. He was a man who could be depended upon at all times and in all places. As a presiding officer he was always self-possessed and resourceful. His good judgment made him sought for in many emergencies. He was a member of the old guard and treasured the traditions of the early days of the industry. He built up a big business in Boston, but was almost as well known in Albany and Montreal for his connections in those cities. It will be hard to fill his place. Mr. Welch was a director of the Horticulture Publishing Co., and his associates in this organization deeply mourn his loss.

**Vacations for Employees** The vexed question of vacations will have to be decided very soon. Some firms have established a definite program which works well. In other establishments nothing systematic has been done along this line, and there's always more or less friction each year. As a rule the plan which has given most satisfaction is one which allows two weeks' vacation with full pay to all office people who have been with the concern for at least a year, and one week to those who have been employed for less than a year but more than six months. Some concerns give their house men and laborers a ten-day vacation, and some two weeks, with pay. Others allow their help to take a vacation if they like, but without pay. One large house allows all of its employees to have two weeks with pay, and as many more weeks as they want without. This concern employs a few extra people during the vacation season, so that too much extra work is not imposed upon those who remain.

Beginners and young men who are in line for a permanent position like this temporary work because of the opportunity it offers to learn the business and make a good impression. Oftentimes the understudies obtained in this way soon become permanent employees.

If several people are allowed to be away at one time and no extra help is taken on, the remaining employees are apt to complain about the extra labor imposed upon them. A peculiar situation has been reported from one concern which allows an extra day of vacation for each year the employee has been with the firm. The first year's vacation of ten days is always scheduled, and those who have been with the house for twenty years get a full month as a result of the extra added days. Unfortunately, no extra help is taken on, and there has been much objection, especially from employees who have been with the concern only a short time, because of the extra work they had to do to make up for the absence of the long-time men.

Employers have an excellent opportunity to test the calibre of the company's employees and gauge the work which is actually being done by their permanent people if they employ extra help during the vacation season. Sometimes it is learned that the old employees have not been doing nearly as much work as they were capable of, while, on the other hand, it has sometimes been ascertained that men whose work has not been valued very highly are really entitled to promotion and increased salaries.

**Arboretum Rose Garden** Few proposals for the improvement of Boston which have been made in recent years have attracted more attention than the plan to develop a great rose garden at the Arnold Arboretum. Prof. C. S. Sargent, the director, has dreamed of such a garden for many years and this seems nearer fulfillment now than ever before. Mayor Curley is very much interested in the subject, as well as in the general work which the Arboretum is doing and the opportunities which it offers to the public. Money from two funds is now available, and a rose garden of the kind contemplated would make Boston famous throughout the horticultural world. It would not be simply a show garden, but would contain all the species and varieties from every part of the world that can be made to grow here. If the plan should be carried out according to Prof. Sargent's ideas, the Arboretum rose garden would be the most complete of any in existence.

It has often been said that the Arnold Arboretum is better known in other lands than in America, and that Boston people have neglected it. During the last two or three years, however, the public has learned to know and appreciate the Arboretum, and according to a recent account seventy thousand people passed through the grounds in two weeks this spring.

Naturally the Arboretum is of tremendous value to nurserymen, many of whom visit it in the course of a year. It is a fact, though, that nurserymen have not been as keen to take up the newer species and varieties tried out there as might be expected. The Arboretum is the great testing place for shrubs and trees of all kinds. Wide use ought to be made of it.

## BEDDING PLANTS --- WELL ESTABLISHED

**HELIOTROPE CENTEFLEUR**
3-inch, $8.00 per 100, $70 per 1000.
4-inch, $20.00 per 100.
5-inch, $50.00 per 100.

**ACHYRANTHES. Brilliantissima and Panache de Bailey.**
2¼-inch, $5.00 per 100, $40 per 1000.
3-inch, $7.00 per 100.

**ALTERNANTHERA. Aurea nana (green), bushy stock. Brilliantissima (red).**
2¼-inch, $5.00 per 100, $40.00 per 1000.

**CALADIUM esculentum.**
4½-inch, $15.00 per 100.

**SALVIA. America, Bonfire, Zurich and Splendens.**
2¼-inch, $5.00 per 100, $40.00 per 1000.

### KANSAS CITY CONVENTION

President Pennock and the Secretary are now giving their attention to the preparation of the program for the big gathering at Kansas City, Aug. 15-17. Prominent in the program will, of course, be a place for discussion of the National Publicity Campaign, and arrangements are being made for prominent speakers. The report of the National Flower Show Committee and a discussion on it will also be featured. A meeting of the State Vice-Presidents will find a place, as also will a meeting of the Florists' Hail Insurance Association. Other features of special importance are also planned, President Pennock is particularly anxious to include discussions of many problems in these days of interest to florists and worthy of the attention of the Society. He invites suggestions from members as to topics believed important enough to be brought before the Convention, and assures those sending these suggestions that they will have most careful consideration. Such suggestions should be presented as early as possible to the Secretary.

Information as to hotel accommodations and other matters tending to the comfort and convenience of visitors will shortly be forthcoming through the local committees.

JOHN YOUNG,
Secretary.

### NATIONAL PUBLICITY CAMPAIGN

From the Secretary's office this week is being mailed to all members of the Society and subscribers to the Campaign proofs of the series of advertisements to appear in the national magazines during June, July and August. These advertisements are in column form, and will appear in The Red Book for July; McLean's Magazine (Canada) June 15 and Aug. 15; Life, June 15, July 20 and Aug. 17; Collier's, June 3 and Aug. 5; Outlook, July 19 and Aug. 16; Vanity Fair, July; Atlantic Monthly, July; World's Work, July; American Magazine, July; Literary Digest, June 10 and August 12; Century, August; Scribner's, July; House Beautiful, June; Sunset, July; Independent, June 10; Harper's Magazine, August; and Review of Reviews, August. It might be well for those interested to procure copies of these magazine numbers, so as to see how well the advertisements look and are placed.

Since the publication of the three previous advertisements our wonderful slogan, "Say it with Flowers," has been appreciably referred to, cartooned, and exploited in a great number of publications and in other ways, showing that our campaign loses through a temporary cessation of our publicity work. During the period when scarcity of funds, mainly through neglect on the part of many of our subscribers to make good their pledges, made advertising expenditures impossible, our slogan seemed to vanish from sight, and all outside reference to it lost. A resumption of our publicity has again brought it to the front, and we are enjoying a tremendous amount of prestige which costs the campaign nothing at all. Could a better argument be advanced as to the worth of our Campaign to our industry?

If our delinquent subscribers would make good their pledges, much more publicity could be provided, and it is sorely needed. Bills are now going out to all in arrears on their pledges, and immediate remittances are urged, so that the Publicity Committee may be able to place advertising contracts for the Fall season. As it is expected that there will be great pressure upon magazine advertising forms in the Fall, contracts ought to be placed two or three months ahead, so that the best class magazines may be open for our use. A magazine cannot add to its pages after an edition is planned, and several large publications are already in press with numbers two months ahead of datings.

JOHN YOUNG,
Secretary.

### VIOLATION OF PLANT QUARANTINE

The Federal Horticultural Board has penalized the National Bulb Farm Inc., Benton Harbor, Mich., claiming that in a shipment of bulbs received under special permit other varieties were substituted. Therefore the shipment containing the substituted material is refused entry, all existing permits issued to the National Bulb Farm, Inc., are cancelled and it is stated that no further permits will be issued until the Board is convinced that similar fraudulent practices will not be repeated.

# RAMBLING OBSERVATIONS OF A ROVING GARDENER

Rhododendrons have bloomed exceptionally well this year, it seems to me. Certainly the display in the Arnold Arboretum has seldom been better and I have seen some splendid displays on private estates. Properly planted this shrub is exceedingly valuable for landscape work. It needs the association of other plants to be most effective, and is particularly at home when partly shaded by evergreen trees. It is a pity that rhododendrons are not more enduring and easier to handle in the eastern states. As Prof. C. S. Sargent points out, the climate here is hostile to all broad-leaved evergreens. There are some kinds which thrive but the number is limited. There are spots in the west such as Portland, Ore., and on the shores of Puget Sound where it may be possible to establish large and comprehensive collections, perhaps equalling those of Europe.

Plants of the native Rhododendron maximum collected in the middle and southern states have been planted in recent years in considerable numbers in this part of the country, but the Rhododendrons chiefly used in the gardens of eastern North America are hybrids of R. catawbiense of the high slopes and summits of the southern Appalachian Mountains. Names have been given to a large number of plants made originally by crossing this species with the Himalayan R. arboreum and other Indian species, with the Caucasian R. ponticum and with R. maximum, and by raising seedlings from these hybrids. Most of these hybrids and their offspring have been raised in England; several good varieties have originated in Germany and Belgium, and a few have been produced in the United States many years ago chiefly in the Parsons Nursery in Flushing, Long Island.

The best of these hybrids for this country have been made in England but only a comparatively small number of them are hardy, the hardiest being those in which the catawbiense and maximum blood predominate. Rhododendron ponticum, a tender species, has been used almost exclusively for the stock on which these hybrids have been grafted, and the tenderness of the stock has evidently affected the constitution of the graft; and it is this stock which may cause the death without other apparent causes of plants which have flourished in this country for thirty or forty years.

R. ponticum is favored by nurserymen because the plants are quickly and cheaply raised and easily worked, but for really hardy and reliable Rhododendron hybrids for this country R. catawbiense, although more difficult to work, should be used for stock according to Prof. Sargent. Even better than any grafted plants are those obtained from layers, a slower and more expensive process, formerly much

**Rhododendrons Are Particularly Satisfactory When Planted Beside a Stream or Pond**

practiced in the Kanphill Nurseries by Anthony Waterer who raised the best Catawbiense hybrids which have been planted in New England. A few of the hardiest and handsomest of these plants which can be grown in this climate are Atrosanguineum, Charles Dickens, Mrs. C. S. Sargent, Henrietta Sargent, Catawbiense album, Album elegans, Roseum elegans, Hannibal, H. W. Sargent, Discolor, Melton, Album grandiflorum, Purpureum grandiflorum, Purpureum elegans and Lady Armstrong.

---

The hardiest Rhododendrons in this climate are R. maximum and R. catawbiense; the former, which in the valleys of the southern mountains is sometimes a bushy tree up to forty feet in height, but at the north is much smaller, is distributed in isolated stations from Nova Scotia through New England and eastern New York to Pennsylvania; from Pennsylvania southward along the Appalachian Mountains it is very abundant at low altitudes, often covering the slopes of narrow valleys with almost impenetrable thickets.

---

The iris has been having its innings the past week, and evidently is growing in favor with great rapidity throughout the country. Many exhibits have been held, and the third annual meeting of the American Iris Society in connection with the spring show at the New York Botanical Garden was a great success.

In his report Secretary R. S. Sturtevant said, I am told, that he expected the membership to increase during this year well over last year's record of 650. He was quite right in saying that the shows were the greatest means of publicity which the society had.

The iris in the test gardens have proved very successful. There are more than a thousand varieties now planted there, and fully five hundred varieties were in bloom at the time of the convention.

In the exhibits at the hall the John Scheepers Co. attracted much attention by the new variety, Asia, which I am informed is a remarkably fine iris.

I was glad to find Miss Grace Sturtevant and her brother, R. S. Sturtevant, of Wellesley Farms, Mass., making an extensive exhibit.

Although Pres. John C. Wister, of Philadelphia, is now in Europe, he was re-elected. Mr. Sturtevant was, of course, re-elected secretary. Mr. Frank H. Presby, of Montclair, N. J., continued as treasurer. These men are enthusiastic iris growers, and have done much to make the society a success.

---

The peony people are just as active, and great preparations are being made for the convention which is to be held in London, Ontario, June 17 and 18. Mr. James Boyd, of Haverford, Pa., one of the best known peony growers of the country, made a splendid display at the annual show of the Pennsylvania Horticultural Society at Haverford, as did William S. Ellis, of Bryn Mawr, with whom he was tied in points. This was a splendid show, and very largely attended. The new rose, Mary Wallace, originated by the late Dr. Van Fleet, was exhibited at this show, and naturally attracted much attention.

---

Mr. T. F. Donahue, of Newton, Mass., who for several years has been acquiring fame as a peony amateur, showed some very fine new seedlings at the iris exhibit in New York. He also had an attractive display of peonies at the rhododendron and iris show in Boston, and probably will have a comprehensive display at the London, Ont., convention.

---

Peony shows are already being staged in the states further south. Harrisburg, Pa., held its first peony exhibit May 29 in the Assembly Hall of the public library. It proved a decided success. This show was held under the auspices of the garden section of the Harrisburg Natural History Society. John Brinton, Camp Hills, was chairman, and Parker T. Barnes secretary.

---

Williamsport, Pa., had its peony show on June 1. It was combined with the rose show and was held in A. L. Zimmerman's store, Mr. William Gibson was chairman.

---

Iris growers in Indianapolis, Ind., have become so numerous that they have decided to form a society composed of growers in that city and nearby towns. The Bankers' Trust Co. of Indianapolis has been holding shows which have helped to increase the interest. At a recent exhbiit there were 54 competitors, and more than a hundred varieties of iris were on display.

## ORIGIN OF THE RAMBLER ROSE

In regard to the rambler rose article by Walter I. Austen in Horticulture, May 25th, page 245, I would say that the crimson rambler is a multiflora hybrid.

The Gardeners' Chronicle, "London, Eng.," series 3, vol. XVI, page 249, says: "A plant of this rose was sent from Japan to a Mr. Jeuner in England by Mr. R. Smith, Prof. of Engineering, Tokio, Japan. Mr. Jeuner named the rose Engineer, and gave the plant to J. Gilbert, a nurseryman at Lincoln, Eng., who exhibited cut blooms of the rose at Royal Horticultural Society's Show, London, in 1890, and received an award of merit. Turner & Sons, Slough, Eng., purchased the stock from J. Gilbert, named the rose Crimson Rambler and sent it out in 1893.

Philadelphia, Pa. DAVID RUST.

---

THE AMATEUR'S BOOK OF THE DAHLIA, published by Doubleday, Page & Co., price $3.00. Mrs. Charles H. Stout has given dahlia growers a book which will remain standard for many years. Few people in the country could have covered as much ground or done it in as excellent language as Mrs. Stout. Mrs. Louise King, in her introduction, says truthfully: "Notable achievement in America in the way of hybridizing by amateurs is very rare. It is, therefore, all the more remarkable that Mrs. Stout should have spent already ten or twelve years in her occupation with the dahlia."

RAIN WHEN YOU WANT IT

# He Bet On the Wrong Thing!

Heard the other day of a man who lost his house, barn, tools—everything—by fire.

The pitiful part of it is that he didn't have a cent of insurance.

He is beyond middle age—hadn't saved any money—so there he is a helpless, beaten man, just because **he took a chance.**

"How foolish" you say.

More criminal than foolish, for this man had a family who will suffer because of his poor judgment.

He took the small end of a 200 to 1 chance of not having a fire, and lost. By the same token, what kind of a bet are you making right now with the weather? Still trusting to rain—which seldom comes when it is most needed?

Say, friend, what's the use of taking chances with weather any more than with fire, when you can insure against fire and fully protect yourself against dry weather.

There is no reason why you can't have a Skinner System when our Sectional Portable lines cost so little and can be put up so easily.

They water big areas for little money. $49.75 buys a 50 foot Sectional Portable line. $39.75 for 100 foot.

You can bet your bottom dollar, we'll ship it promptly.

**The Skinner Irrigation Co.**

# Nurserymen's Program

## The American Association to Meet in Detroit, June 28-30

An elaborate and varied program has been planned for the 47th annual convention of the American Association of Nurserymen, which is to be held at the Hotel Wolverine, Detroit, Michigan, June 28, 29 and 30. Pres. M. R. Cashman, of Owatonna, Minn., will be in the chair. An address of welcome will be made by Hon. James Couzens, Mayor of Detroit. Mr. J. Edward Moon, of Morrisville, Pa., will respond for the Association.

On Wednesday evening there will be a get-together banquet, with Mr. Moon as toastmaster. This banquet has been arranged by the "Rambling Baby Ramblers." The fact that Paul V. Fortmiller will be in charge is sufficient to assure the success of this feature, and some real post-prandial surprises are promised. The program for Thursday and Friday is as follows:

**Thursday Morning—9 O'clock**

"Are We Fooling Ourselves"
Mr. A. F. Lake, Shenandoah, Iowa
"The Establishment and Progress of the Nursery Training Course at the Mass. College of Agriculture, Amherst"
Mr. Richard M. Wyman, Framingham, Mass.
Report of Market-Development and Publicity Committee
Chairman, Mr. F. F. Rockwell, Bridgeton, N. J.
"State, Sectional and National Associations"
Mr. Paul C. Lindley, Pomona, N. C.
"Advertising"
Major P. F. O'Keefe, Boston, Mass.
"Organizing Sectional Florists Assns. and their Relation to their National Publicity Campaign"
Mr. J. Fred Ammon, Edwardsville, Ill.
"Publicity"
Ex-Mayor Breitmeyer, Detroit, Mich.
Discussion of Publicity for 1922-1923

**Thursday Afternoon—2 O'clock**

Election of Officers and next place of meeting
"Progress in Propagating American Fruit Seedlings by Bureau of Plant Industry"
Prof. L. B. Scott, Dept. of Agriculture
"The Development of the Horticultural and Pomological Work of U. S. Dept. of Agriculture"
Dr. L. C. Corbett, Dept. of Agriculture
Report of Special Committee to assist Mr. F. P. Detwiler, U. S. Dept of Agriculture, in ocmpilation and republication of an edition of Quarantine Regulations
Chairman, Mr. A. H. Hill, Dundee, Ill.
"Federal Control Restrictions: Their Application and Effect—Present and Future"
Dr. C. L. Marlatt, Chairman, F. H. B.

**Friday Morning—9 O'clock**

"Standardization"
Mr. E. S. Welch, Shenandoah, Iowa
"What's Around the Corner"
Mr. Henry B. Chase, Chase, Alabama
"Nurserymen's Mission in the Landscape Field"
Mr. Walter E. Campbell, New Haven, Conn.
Unfinished Business
Question Box
Parting Thoughts. "God be with you till we meet again." All sing.
Adjournment

**Friday Afternoon—2 O'clock**

Trip through the Flivver Factory. In charge of Arrangements Committee
Mr. Chas. Ilgenfritz, Chairman

### PROVISION WAIVED

**Bonds Not Required For Shipping into California**

Dear Sir:

I was interested to read your editorial in the issue of "HORTICULTURE" of May 10th, 1922, calling attention to the serious difficulties raised by the California horticultural law, which requires ex-state nurserymen proposing to ship stock into California to pay a license fee of $10.00 and deposit a bond of $1,000, conditioned upon the freedom of the nursery stock in the shipment from insect pests and plant disease and from misrepresentation.

It would be interesting for you to know that this provision of the California Horticultural Law has been waived by the commissioner of horticulture of California after consultation with the attorney-general, who has held that this provision of the law was unconstitutional.

Yours truly,
CURTIS NYE SMITH.

Boston, Mass.

### F. W FLECHER'S SUCCESS

In a recent issue of the Southern Florist there is an interesting reference to F. W. Fletcher, now living in Florida, which will read with much interest by his many friends in Massachusetts, his former home.

"F. W. Fletcher is a New Englander who purchased property at Orlando seven years ago; he came four years ago to reside permanently. In his rather long career he has introduced perhaps 100 plants into commerce. He is interested at present in the 'leather-leaved' fern, in lily bulbs, and in the breeding of Primulinus hybrid gladioli and watsonias, for both the bulbs and the flowers. He ships weekly to Philadelphia and also does a local retail business.

"Mr. Fletcher believes that Orange county, Florida (the county in which he lives), is capable of supplying the nation with longiflorum lily bulbs. It appears that he found the leather-leaved fern in a private collection and from the small start there obtained introduced it to commercial floriculture.

It is probably the best shipper of all ferns now in the trade. He told of shipping a few cut fronds of it from Massachusetts to Florida in July, having his daughter ship it back to him, and keeping it fresh on the table for three weeks. Philadelphia has taken especially kindly to it he says.

'He grows elegant sweet peas outdoors which he cuts from December to May."

## WEEDLESS LAWNS

### Rhode Island State College Formula Said to be Working Well

A bulletin from the State College at Kingston, R. I., says that the practicability of the sulphate of ammonia treatment to obtain weedless lawns has been demonstrated by home owners in every part of the United States and in foreign countries. The announcement of this plan over a year ago has given the college wide publicity, and over five hundred letters have come to the college from New York state alone.

The bulletin says that wherever it has been possible to obtain the true Bent grass seed, and sulphate of ammonia has been used according to directions, the lawns are slowly but surely freeing themselves from the unpleasant mixture of weeds. It also says:

"As is now common knowledge, the weedless lawn treatment makes use of the discovery that our finest lawn grasses, either Rhode Island Bent or Creeping Bent, will thrive in a soil more acid than that which is favorable to the ordinary weeds. Hence, by using fertilizing materials, especially sulphate of ammonia, which makes the soil acid and at the same time supply the needed plant food, a favorable condition is produced to give the handsomest velvety lawn, without the fear of intrusion of undesired weeds.

"The sulphate of ammonia method as recommended by the Experiment Station of the Rhode Island State College does not require the plowing up of your present lawn. Early in the spring, on a dry day, apply evenly a mixture of sulphate of ammonia, acid phosphate and muriate of potash, (obtainable from any fertilizer dealer) at the rate of two hundred fifty pounds each, per acre. A few days after applying the fertilizer, rake in Rhode Island Bent Grass or other Bent Grass seed at the rate of at least thirty pounds to the acre.

"Repeat the application annually or oftener as required. This treatment does not work suddenly, but slowly causes the weeds to disappear and the lawn to assume the much desired even, velvety appearance."

## THE USE OF STONES

This last winter the catalogues were more beguiling than ever, especially those from Mr. D. Y. Andrews in Boulder, Colorado, and from Strand's Nursery, Tailor's Falls, Minnesota, for they contained descriptions of hardy, new shrubs which piqued our curiosity to try them.

The plants came and were set out, then came the harsh spring winds which dried their stems. One prunus gracilis dried entirely at the top but we kept its roots moist by placing stones over them and it is now making such a lusty growth that we wonder whether in the good soil of our garden it will remain "a miniature species producing abundantly little red plums when no more than two feet tall."

The Jamesia Americana, or wild mock orange, had not so good a root as our other shrubs which came from Boulder and it was slow to start, but we also tried the stones about its roots to keep it damp and it is now leafing out well. We feel that if these hardy plants from Colorado and Minnesota once get well started at Hillcrest, we shall have a great deal of pleasure from them.

Some of those which we are trying are the Buffalo Berry, Russian olives and the F. J. Grootendorst rose from Strand's Nursery, and the Rubus deliciosus and rosa stellato or desert rose from the Rockmount Nursery in Boulder.

The Grootendorst rose is described as having foliage like a Rugosa, "blooms continously like the Baby Rambler, bright red, beautifully fringed in clusters." We are interested to see its fringed petals. The Rubus deliciosus is admirably reproduced in the glass flowers in Cambridge.

M. R. CASE.

Hillcrest Gardens, Weston.
May 27, 1922.

## JOHN WATSON IN A NEW POSITION

John Watson, formerly of Princeton, N. J., who has had a very active part

John Watson

in the American Nurserymen's Association, having been secretary for several years, has become associated with the Du Bois Press of Rochester, N. Y. In the new connection he expects to build up a good line of nursery business, as the Du Bois Press makes a specialty of catalogues and color printing. Mr. Watson is a man of unusual ability in many ways, being a particularly forceful writer and speaker. He ought to make a decided success of this new venture, and his many friends believe that he will.

## BOSTON GARDENERS' AND FLORISTS' CLUB PICNIC

Plans are rapidly taking shape for the annual picnic of the Gardeners' and Florists' Club of Boston, which will be held at East Milton, on July 20, beginning at 10.30 in the morning. As usual there will be a long program of sports, and refreshments will be provided. The officers hope that those members wishing to make contributions will do so as early as possible, and not wait until the day of the event.

Ladies' Night will be held at Horticultural Hall the evening of June 20. The program promises to be the best ever.

The New England Landscape and Tree Preservation Co., of New Bedford, is undertaking the laying out and improvement of some elaborate estates in Vermont, as well as in other sections of New England. Mr. Arthur M. Horn is the head of this concern, which is comparatively new.

## SAME OLD STORY

Moral: It pays to advertise.
Bill Jones refused to advertise,
He thought himself "too wondrous wise";
He said, "Instead, I'll take the chink
That I would spend in printer's ink
And save it for a 'rainy day,'
For advertising doesn't pay.
The people know I have the goods,
And if my store was in the woods
They'd wear a path up to the door,
For I've got bargains here galore
Although not strictly up-to-date
The price is right, at any rate,
And he who likes, his wares can shout,
But as for me—just count me out."
But time passed on, and so did Bill—
his business is no more;
A sign which reads "For Sale or Rent,"
is fastened on the door.
His neighbor, Smith, has got his trade,
(he doesn't handle "trash"),
The staff of clerks are on the jump,
with hardly time for "hash."
His novel "stunts" to get the "biz" are
known both far and near,
And when he comes to figure up—he's
always "in the clear."

*Every Reader of "Horticulture" Needs*

**DR. L. H. BAILEY'S**

**Standard Cyclopedia of Horticulture**

Six large quarto volumes. More than 3,600 pages. 24 full page exquisite color plates. 96 beautiful full page halftones. More than 4,000 text engravings. 500 Collaborators. Approximately 4,000 genera, 20,000 species and 40,000 plant names.

**IMPORTANT NEW FEATURES**

**KEY TO IDENTIFICATION OF PLANTS.** This is a device to enable one to find the name of a plant. The name thus found is quickly referred to under its alphabetical location, where full information will be found in regard to it.

**SYNOPSIS OF PLANT KINGDOM.** This is one of the most important features of the new edition. It constitutes a general running account of the classes, orders, and groups of plants, with a brief sketch or characterization of 215 of the leading families comprising those that yield practically all the cultivated plants. These family descriptions give the botanical characters; the number of genera and species and the ranges; a list of the important genera; brief statements in regard to the useful plants; and diagrammatic illustrations.

**ILLUSTRATIONS.** There are 24 colored plates; 96 full page half-tones; and more than 4,000 engravings which serve as guides in the text.

**THE GLOSSARY.** This is an analysis of all technical terms that are used in the work and in similar works. It comprises botanical and horticultural terms with brief definitions.

**TRANSLATION AND PRONUNCIATION OF LATIN NAMES.** In Volume I is inserted a list of between 2,000 and 3,000 Latin words used as species—names of plants, giving the English equivalent or translation and the pronunciation.

**CLASS ARTICLES.** Special effort has been made to secure the best cultural advices for the plants requiring peculiar or particular handling. Here are some of the titles of these articles; Ants; Autumn Gardening; Bedding; Diseases; Drainage; Floral Designs; Formal Gardening; Hotbeds and Coldframes; Insects; Landscape Gardening; Lawn Planting; Orchards; Rock Gardening; Subtropical Gardening; Tools and Implements; Village Improvements; Window Boxes, etc.

**GENERAL INDEX.** The final volume contains a complete index to the entire work, enabling the reader to locate volume and page of any subject he has in mind.

WE ARE MAKING A SPECIAL CASH PRICE FOR THE COMPLETE SET OF $45.00

HORTICULTURE, - 739 Boylston St., - BOSTON, MASS.

# ADVERTISING AND SELLING

I wonder how many florists take pains to instruct their salesmen in all the branches of floriculture so far as it is possible for them to do so. This is a point which, although greatly neglected, is of immense importance. It is utterly impossible for any men or women to sell goods, whether they be flowers or something else, intelligently, forcefully and with confidence, unless they are thoroughly familiar with the line. A clerk is immediately at a disadvantage if he finds himself unable to answer his customer's question. His salesmanship loses its punch, and he probably loses his sale.

In any establishment big enough to hire outside help, it is worth while imparting as much information as possible about the way in which flowers and plants are grown, and especially about the varieties which are sold and their habits. Oftentimes clerks in a flower store are heard giving advice to their customers which is absurd on the face of it, and shows a lamentable lack of knowledge. This is a good way in which to lose customers, and a poor way in which to hold them. It may be possible to bluff through a situation, but the after effects are almost sure to be felt.

Florists will be wise to send their sales people through the markets, and out to the greenhouses from which their stock comes. If there could be classes for flower salesmen it would be of great benefit to the industry. Moreover, if florists would supply books on floriculture and trade papers for their help, their business would soon reflect the slight investment. It would be well worth while for florists to subscribe for the trade papers for all of their sales people and insist that these papers be read. As a matter of fact, many inexperienced salespeople develop a surprising interest in these matters when they have begun to familiarize themselves with them. And this interest is, of course, reflected in the work which they do. Genuine service is the only kind that makes customers feel that a particular store is the store for them to shop in, and this feeling is inspired only by helping the customer in every way possible to meet whatever problems may be bothering him.

A florist salesman should know the seasons of the different flowers and plants so that he will be informed as to when they will be in stock and when the stocks are likely to run low. This often makes it possible for a salesman to take orders ahead. A good salesman will also take pains to learn the preferences of his customers, which will go a long way towards helping the proprietor in his buying.

There are several ways in which store help may be inspired to learn their stock better. If you yourself as proprietor talk over these matters with them frequently and in an intelligent way it will start them thinking along these lines. Ask the new salesmen to listen to you when you are selling, and then take pains to adopt the plan which you wish them to use. Encourage your help to ask questions. It is well worth while to take advantage of the experience and research of others. In fact, you can perhaps learn something by asking questions yourself. Sometimes the results of years of study are told in a few words if the speaker be a specialist. One thing is certain. The man who knows his goods thoroughly, and can talk about them entertainingly, confidently and enthusiastically, will be the one to make the best show.

Much attention is being paid these days to store windows, not only the interior arrangement but also the location as respects the entrance. The shape of a store window may have a very definite effect upon the sales. The show window is of the greatest importance in increasing transient business, and this isn't concerned wholly with the goods which the window displays.

Many stores are finding increased value in vestibule windows, which are increasing in popularity. This is especially true with comparatively small stores which do not have a great amount of window space at their disposal. Vestibule windows have been known to increase the business of the store 25 per cent. Possible customers who get inside the vestibule and see something in the window which attracts their attention are much more likely to enter the store than if they see the same article from the outside. Moreover, during rainy weather the vestibule serves as a shelter for pedestrians. Passersby seeking refuge from a shower examine the merchandise displayed in the windows, and some of them are enticed into the store itself.

One concern which has installed one reason why they are so popular with store keepers is the fact that they popularize one of the oldest weaknessces of human nature—curiosity. Where the whole window front is visible at once there is no such stirring of curiosity. It is admitted that a good window is a great asset. That being true, if a good window can be bettered, it will become more of an asset than before.

## FLORICULTURAL NOTES FROM CORNELL

Lectures for the spring semester ended June 6th, and examinations are now in progress. At the close of the examination period several of the students will leave for practical work during the summer. Others will remain at the college for the courses given during the summer term. J. F. Larrabee and J. C. Curtis will be with F. R. Pierson at Tarrytown; H. P. Everts and R. B. Farnham on the Geo. W. Perkins Estate, Riverdale, N. Y.; A. H. Jackson at Fosgate Farms, Granbury, N. J., and J. H. Ford with A. L. Miller, Jamaica, N. Y.

Mr. H. A. Pratt, an instructor in the department, who has been working for F. A. Danker in Albany for three months, will resume his duties at the College, June 15.

David Murray, who has been superintendent of the college greenhouse for twelve years, has resigned to accept a more lucrative position as manager of the greenhouses of the Bool Floral Co., Inc. Mr. Murray has been very efficient in his management of the greenhouses, and most courteous in his associations with the students. His leaving is deeply regretted by both faculty and students.

## MR. PENN'S TRIBUTE.

Mr. Patrick Welch was a man of rare ability. When called upon for opinions and facts, he was ever ready to give unbiased views and had an unusual way of reasoning out the proper channel to pursue. He was a tower of strength in bygone days upon questions of natural importance to the Society of American Florists and the older generation would always look upon Pat Welch's advice with great favor.

He was a credit to the craft and will be missed as the years roll on.

HENRY PENN.

### HIGH COLOR IN FLOWERS

I feel to justify my partiality to high color among flowers, especially because some persons of exquisite taste, no doubt, have recently elevated their eye brows, and shrugged their shoulders, in unfeigned pity for one so uncultured as to express a predilection for the rich reds, yes, and the brilliant reds in flowers.

Doubtless my tastes are crude and childlike in this admiration of the reds. I have waded in a swamp, possibly at the risk of my life, over the tops of my rubber boots, especially worn for the occasion, to gather a few sprays of the Cardinal Flower, and proudly and triumphantly bore the precious beauties to my home, where they delighted all beholders. Would a white, or a pink, or a yellow flower, even if as rare, have created such a sensation?

I am free to confess to a weakness, if weakness it be, for the rich, attractive reds of the flowers. But I am not alone in this admiration. From my favorite window, which affords frequent views of glorious sunsets, and more simple views of my humble garden, I am often delighted to observe our too-rare visitors, the humming birds, poised on iridescent wings, while they sip their "tea" from the delicate cups of the incomparable Monarda.

I admire the chaste purity of a white rose. A pink Killarney has a refined beauty all her own. But a rose garden would not be complete without a red rose or two. Sweet peas of the lavender and other pale shades appear faded out to me, and seem to require a little high color to complete the picture.

And the peonies, with their long, long lists of the pink shades, dozens, yes, hundreds of them almost as like as peas in a pod. Is not that a little monotonous? Does it not cause longings to gaze on those single Japanese creations, which look like fragile chalices brimming full of rich wine? Even the now too-rarely seen "piney" of the old gardens makes its appeal to those few of us who are unsophisticated.

I have not written this in depreciation of all the beautiful shades between the white and the red. I have written it simply in defence against the pretentious attitude of those who see beauty differently. With all the beauty resident in the flowers, there is surely enough variety to satisfy all tastes. And I claim the right to especially admire the beautiful reds.

LOUIS GRATON.

Whitman, Mass.

### STARTING FERN SPORES

Fern spores, as everybody knows, are produced in great abundance and yet new fern plants are not usually numerous. There are many vicissitudes in the life of a sporeling and few come to maturity. The spores are so exceedingly minute and the conditions for growth are necessarily so exacting that young plants are easily discouraged. Those who grow ferns from spores find that great care must be taken in preparing the soil. Usually it is sterilized by baking and even then other low forms of life may overrun the young plants before they fairly get started in the world. Often the spores are sown on a block of peat which is kept moist and sheltered from the sun and wind. Noticing how frequently sporelings are found on the outside of flowerpots in the greenhouses, some growers stop up the hole in the bottom of a pot, fill the pot with water and sow the spores on the outside. The water seeps through just fast enough to give the proper amount of moisture. An improvement on this method is to hollow out one side of a soft brick and fill the hollow with sterile soil upon which the spores are sown. The brick is then placed in a saucer of water and "kept close" as the growers phrase it. This method of growing plants may also be followed in the case of minute seeds which are difficult to start in ordinary seed pans or flats.

—American Botanist

### NEWS NOTE

Mr. Arthur W. Williams has become head gardener for Miss Marian Roby Case, of Weston, Mass., having charge of Miss Case's unique farm called Hillcrest, where many town and city boys get exceptionally good training along out of door lines. Mr. Mezit, who has been winning many prizes for Hillcrest, remains at the farm.

The first greenhouse ever erected in Hawley, Pa., has just been completed for the Sands Bros. The work was done by the King Construction Co., of No. Tonawanda, N. Y. The greenhouse has already been stocked with sweet peas, snap dragons, roses and chrysanthemums. The business will be managed by Ralph Sands, assisted by Wendell Hale.

## George Watson's Corner

"You in your small corner and me in mine."

Harry F. Betz at D St. and Wyoming Ave. is still very much in the swim, and well to the forefront as a florist and nurseryman. His early experience at Dreer's, and other first class places, is standing him in good stead now, and helping to push him along. Of course, the man inside is the big thing; but the proper training counts also. Harry has them both, and has shown us. Not very grammatical but you know what I mean all right.

---

Samuel S. Pennock is some wizard on new phrases. Lately he has handed two good ones in "De Luxe Roses," and "Tango Sweet Peas." But he will have to look to his laurels. Here is a new one from Oklahoma. Gynecocracy. What do you know about that?

Plutocracy, democracy, autocracy, and other forms of government were ably analyzed by that ancient prince of philosophers, Aristotle, about a million years ago. His dictum in the final windup of his book, was that after carefully considering every system of government, was this that: "That form of government is best, which is best administered." There's a whole lot of truth in that, when you come to think it over. So we would like to ask what this brave and commanding lady from Oklahoma, Miss Alice Robertson, means when she says that "gynecocracy" is the only, only. We've had "meticulous" and the "epicene" and the "epigone" handed to us lately, by Dr. Deaver, and Conan Doyle, and others; but this Oklahoma stunt is, as Lady Astor might say, a "Tuck-a-Dunt." Dictionaries cost money, why not stick to the good old Mother Tongue.

---

Grakelow knows a lot about the science of advertising. Ross knows a lot also. Of course they take different ways of puting their ideas into practice. But they have both "got there," and everybody has to take hats off. Where would Harry Battles have been today if he hadn't used his own particular little science of advertising. He knew how, and said nothing to nobody. Today he is hobnobbing with King George in Piccadilly, and giving pointers to Gay Paree. The next thing we know, he will be in Tokyo, and handing a few to the cultured Japs. Look out for them. They don't miss much, and are liable to go us one better on the hundred yard stretch.

---

There's some bad grammar in the foregoing paragraph; but I guess you all know what I mean. Personality and character counts for a lot in the advertising game.

Of course, location has something to do with it; but not so much as many people imagine. John Habermehl has the Bellevue and Ritz both of them big propositions; but to a little man, without originality and personality, they would mean sure failure. It takes a big man to handle a big thing, in a big way, and make money out of it. So, in the long run, it's the man, and not the location, that counts. They will come through an untrodden wilderness to see a real genius. Who was it said that, some poet up in Massachusetts—about a hundred years ago. Whoever he was he spoke the truth.

As for the growers, every one thinks he is smarter than the other, and knows what variety to go in for. When all is over, a year later, he says what was it Lady Astor said in Chicago—"Punk-a-Dunt"—or, "I don't care a Tinker's Dam" or something like that. Well, that's me, I don't care a "Punk-a-Dunt" I'm going to try something else next year. In a case like that the wise physician would say to the rose grower—go in for carnations. And charge him the usual fee. They're all crazy. You might as well get their money, doc!

---

Patrick Welch not only left his mark on horticulture, but every touch he put on, during his forty years or more of active work, was all with an upward

and forward tendency. While in a different sphere he had the enthusiasm of a Marshall P. Wilder in his chosen field, and his name will be long remembered. We must not forget that Boston has been a pioneer for many fine things, especially in horticulture, and Mr. Welch was a worthy standard bearer, in his particular line, and in his day and generation. So, in this our little bud of respect, love, and admiration, we speak of him as an honored compatriot—among the many who have adorned New England horticultural history for the past three centuries.

---

The Kelly St. Business Men's Ass'n, headed by its President, Louis Boss, did the Memorial Day honors on the 28th ult. by placing wreaths on their dear departed: Captain Clement at North Laurel Hill; Theodore Bird and John Allwood at West Laurel Hill; with the Kelly St. chorus and appropriate ceremonies. They would have liked to have gone further to Torresdale and Kellyville:—to memorialize other dear departed there, but time prevented. "The long day closes!" They did their best, and showed true feeling, in the way which we who are left behind love to express our emotions. Sing a song, drop a tear, and shed a rosebud; in memory of the loving hearts that have passed on.

---

We can only think of one man in the ring, when it comes to the question of roses. His name is Montgomery. Gurney Hill has made good. So has John Cook and a lot more; but Montgomery stands out, somehow, as a wonder. Some day if we ever get the time, we will write you the story; but space limitations forbid, just at the present minute.

Of course, we are talking only from the commercial standpoint. The money end. The amateur rosarian does not look on the rose world with the dollar in his eye. All he cares about is beauty and wonder. And he gets both—in the most inexhaustible degree. We call the rose the queen of flowers, and she certainly holds sway above all other claimants, no matter how you look at it.

---

Frank Adelberger was a recent visitor. He is still holding out on his old bailliewick at Wayne, Delaware County. Business is good; but he misses the good times we used to have around the old horticultural hall.

---

George Moss, our old Florist Club champion, is still in the ring, and keeping the bowling game up to the

C. U. Liggit reports that the St. Leonard Farm Co. have switched crops for the coming season from miscellaneous to roses. They will grow mostly Premier, Butterfly, Golden Ophelia, and Double White Killarney.

---

### ORIGIN OF THE PEONY

Peony plants were originally imported into western Europe from the north of China and the southern part of Siberia in the latter half of the seventeenth century, and later were introduced into the American colonies. There is no doubt that in the earlier days the florists of European countries improved the peony by selection, special culture and the chance fertilization of seedlings. But it was not until 1808 that the first light pink, the nearly white white Queen Victoria, also called Whitelil, was placed upon the market and is still popular both in European countries and the United States and Canada.

The Last Full Iron Frame House of Mr. Didato
(located on Hitchings Avenue) growing Sweet Peas

# Jimmy Didato Is Still Going Strong

Jimmy's friends have stopped shaking their heads.

Years ago they decided he would kill himself if he kept on working the way he was. But he kept right on, and kept right on making money, and kept right on building bigger and bigger houses.

Jimmy is into everything—himself

He says, "That's how I get everything there is in everything."

He also says: "Some day, after I get my range built as I have planned to do, then I'll do some sitting back and see to it that the other fellow works."

Of course, Jimmy thinks he will sit back. But he won't.

Furthermore, when he gets the range completed that he has planned for, he will go right on building just the same.

His last house is one of our top-notch Full Iron Framers, 66 feet wide and 170 feet long, built especially for sweet peas.

So satisfied has he been with everything we have built for him, that when his neighbor, Henry Schnitzpahn, thought of building, Jimmy saw to it personally that he came to the right firm.

As a result, we are just completing two houses, each 46 feet by 207 feet, for the neighbor.

We'll soon show you photos of them, and tell you all about it.

Steel is higher.
And going higher.
Good time to build. Won't be any cheaper.
Likely to cost more.

# INTERNATIONAL PEONY SHOW

## Gold Medal and Silver Cup Won By the Cherry Hill Nurseries

This year for the first time the International Peony Show, conducted by the American Peony Society, was held in Canada. The place chosen for the exhibtion was London, Ont., which might be called the Peony City, as peonies grow there to perfection, and are found in all its gardens. Opening on Friday, June 16, it continued through the next day, being attended by great numbers of people. In many ways it was the most successful show ever held by the Society. The good people of London made the best of hosts. They were on hand with trucks to convey the peonies from outside sources as soon as they arrived at the railroad station, and the officials of the city gave the visitors a very warm welcome. Some fifty thousand blooms were shown, many of them by local exhibitors.

The most notable display from the States was that of the Cherry Hill Nurseries, West Newbury, Mass., which sent a carload of flowers and staged a remarkable exhibit. The Cherry Hill Nurseries won not only the American Peony Society's gold medal for a collection of not more than 100 named varieties, but also the silver cup presented by the Movilla Gardens for a collection of double peonies, one of each, rating at 9.0 and over by the latest Symposium. Other exhibitors from the States were Henry S. Cooper, Kenosha, Wis., A. P. Saunders, Clinton, N. Y., L. R. Bonnewitz, Van Wert, Ohio, and T. F. Donahue, Newton Lower Falls, Mass.

Canadian growers fared well in the distribution of awards. Mr. J. C. Fairley of London won the second prize for the best bloom in the show, the first prize going to the Cherry Hill Nurseries for Avalanche. In this connection it is interesting to note that the Cherry Hill Nurseries won second prize with Avalanche at the International Show in Boston last year.

Miss M. E. Blacklock, of Meadowvale, Ont., was a consistent winner in several classes, as were T. H. Hill, of London, & S. F. Wood, H. M. Rolph of Markham, Ont., exhibited a table of Japanese peony seedlings which won honorable mention and attracted much attention. A variety called Gypsy, rose colored with a center of soft yellow, was especially fine. Secretary Saunders also showed some splendid Japanese peonies of unusual beauty.

Canadian growers as a rule are more familiar with European varieties than with those common in the States. They were particularly interested in the flowers shown by the Cherry Hill Nurseries. Walter Faxon seemed to be the favorite, and was discussed more perhaps than any other bloom shown, not excepting Avalanche, which was given first prize. The rose tinted and fragrant variety H. A. Hagen perhaps came next. Many people inquired why this wonderful variety is credited with only seven points in the Symposium. The only reply that could be made was that those who made up the Symposium had not seen it at its best.

Cherry Hill Nursery seedlings, Katherine Havemeyer, Pride of Essex, and Pres. Wilson, attracted much attention from American members of the society, as well as from Canadians.

Mr. Donahue exhibited a new pink variety called Mrs. C. S. Minott.

Among the best of the blooms with which Cherry Hill Nurseries won the gold medal in class No. 1 were Albert Crousse, Comte de Gomer, Avalanche, Enchantresse, Pierre Duchatre, Tourangelle, Mme. Geissler, Jeanne Gaudichau, Victorie de la Marne, Marie.

The awards in the other classes were as follows:

Harry A. Norton's Canadian Peony Garden

Class 2, collection of 10 named varieties, double. Cherry Hill Nursery first with blooms that included Alfred de Musset, Walter Faxon, Eugene Verdier, Claire DuBois, Albert Crousse, H. A. Hagen, Mme. Jules Dessert, Pride of Essex, Mont Blanc, Therese. M. E. Blacklock was second.

Class 3, 20 blooms, double white or cream. Miss M. E. Blacklock, first, with Mme. Emile Lemoine. T. H. Hill, second, with Baroness Schroeder.

Class 4, 20 blooms, double, named, light pink or pink and cream. Miss M. E. Blacklock, with Venus; Cherry Hill Nurseries with Sarah Bernhardt.

Class 5, 20 blooms, double, dark pink. T. H. Hill, with Mme. Forel. Miss M. E. Blacklock with Claire Dubois.

Class 6, 20 blooms, double, named, red or crimson. Miss M. E. Blacklock with Felix Crousse. T. H. Hill with Louis Van Houtte.

Class 7, 6 specimen blooms, double. Henry S. Cooper with Marie Lemoine. A. P. Saunders with La Perle.

Class 8, best flower in the show. Cherry Hill Nurseries with Avalanche. J. C. Fairley with Solange.

Class 85, collection of 6 varieties, white or cream. S. F. Wood with Avalanche, Bertrade, Marie Lemoine, La Rosiere, Blanche, M. Dupont.

Class 86, collection of 6 varieties, pink. S. F. Wood with Jeannot, Marguerite Gerard, La France, Modele de Perfection, Mme. Forel, Mme. Jules Dessert.

Class 87, collection of 6 varieties, red. S. F. Wood with Ed. Forest, Pierre Dessert, Karl Rosenfield, Felix Crousse, Augustin d'Hour, Delachai.

Class 88, 6 blooms, one variety, white or cream. H. Hartrey with Courronne d'Or. W. A. Ruse, London, with Marie Lemoine.

Class 89, 6 blooms, one variety, pink. H. Hartrey with Venus. Second, S. F. Wood.

Class 90, 6 blooms, one variety red. S. F. Wood.

Class 91, one specimen bloom, best flower in section, for a silver cup donated by Mr. E. Underhill, London. S. F. Wood with Albert Crousse.

Class 92, Perennials. Miss Maude Hill.

The judges were Bertrand H. Farr, Wyomissing, Pa., H. A. Norton, Ayers Cliff, Que., A. H. Fewkes, Newton Highlands, Mass., James Boyd, Haverford, Pa., A. M. Brand, Faribault, Minn., and A. P. Saunders, Clinton, N. Y.

### Officers Elected

Pres. A. H. Fewkes presided at the annual meeting and introduced Mr. W. E. Saunders as toastmaster, who called upon a number of well known peony growers present. The report of the secretary showed that ninety members had been admitted during the past year. The treasurer's report showed an increase in the financial balance of from $2,800 to $3,500.

The following officers were elected: President, A. H. Fewkes, of Newton Highlands, Mass.; Vice-president, Winthrop H. Thurlow, of West Newbury, Mass.; Treasurer, Dr. W. E. Upjohn, Augusta, Mich.; Recording secretary, W. F. Christman, Minneapolis; Corresponding secretary, W. E. Saunders, London, Ont.; Director, James Boyd, Haverford, Pa.
as corresponding secretary.

Prof. A. P. Saunders retired from the office of secretary as he is going abroad in September.

A. M. Brand of Minneapolis invited the society to meet in that city next year, and read many letters from women's clubs and other organizations supplementing his invitation, which the society voted unanimously to accept.

## FLOWER MARKET SITUATION

### Directors Empowered to Select Site—Capital Stock Increased

At a meeting of the stockholders of the Flower Market in Boston, Tuesday night, considerable progress was made. The directors were empowered to purchase or lease a site for the new market house. The matter of choice was left to their discretion. A vote of confidence was passed in the committee which had been passing on the various sites considered. The by-laws were so amended as to make possible the transfer of the stock from the Cooperative Market to the Flower Exchange. Another important vote was that to increase the capital stock from $20,000 to $250,000. The directors were authorized to issue this stock as they might deem wise.

## ALLAN W. PEIRCE MARRIED

Allan Wyman Peirce, son of Mr. and Mrs. E. Allan Peirce, of Waltham, a well known young florist associated in business with his father, was married recently to Miss Lillian May Roberts, of Lexington. The ceremony took place at the home of the bride's parents, with two clergymen taking part. Miss Alva Lind of Lexington was maid of honor and Nathan Smith of Waltham best man. Spring flowers were used lavishly for the wedding decorations. The young couple left for a wedding trip to Maine, and after their return will live at 331 Waverley Oaks Road, Waltham. An interesting feature of the occasion was the fact that the wedding took place on the 23d anniversary of the marriage of the groom's father and mother.

## THE MARKET

The flower market has improved greatly during the past week. Roses are bringing from 4 cents up to 20 cents, according to variety and grade, and Hadley is selling at 25 cents. The stock of long stemmed roses is rather short. Carnations are selling for 1 and 2 cents, with 6 cents for Laddie. Lilies of the valley are in strong demand and none too plentiful

**IRIS AND PEONIES**

Having a large stock of the following Iris will quote special prices for early delivery as I wish to clear the ground:

**Darius, Dr. Bernice, Halfdan, Ingeborg, Loreley, Mme. Chereau, Mithras, Mrs. G. Darwin, Mrs. H. Darwin, Sherwin Wright, Walhalla, Walneriana.**

Ask for price list and see what my customers say about the service they receive. Thank you.

**GEO. N. SMITH, Wellesley Hills, 82, Mass.**

## BOSTON PEONY SHOW

### Silver Medal Won by Cherry Hill Nurseries for Its Handsome Display.

The Peony Show at Horticultural Hall, Boston, June 17 and 18, was made a success through the enterprise of the Cherry Hill Nurseries, of West Newbury, which prepared a very attractive display, filling a large part of the hall, as well as entering many of the separate classes. It was, practically speaking, a Cherry Hill Nursery Show, although some excellent peonies were shown by several other exhibitors. A few well grown roses were also shown in advance of the Rose Show this week, and Miss Marian Roby Case, of Weston, had a splendid exhibit of fruit and vegetables, including many varieties of strawberries.

The Cherry Hill display was staged by Mr James R Wheeler, who is no novice at this work. The walls were banked with cedars, and cedar sprays were used to set off the great baskets of peonies. A display of this kind does much to make a flower show popular with the general public.

Mr. D. C. Stranger lectured on "Peonies and Peony Growing" both Saturday and Sunday afternoons.

The awards were as follows:

#### Herbaceous Peonies

Collection of 20 named varieties, double, one flower of each: 1st, T. C. Thurlow's Sons, Inc. Collection of 10 named varieties, double: 1st, T. C. Thurlow's Sons, Inc. Collection of 12 named varieties, Japanese single: 1st, T. C. Thurlow's Sons, Inc. Collection of 6 named double varieties, White: 1st, T. C. Thurlow's Sons, Inc. Collection of 6 named double varieties, Rose Pink: 1st, T. C. Thurlow's Sons, Inc. Collection of 6 named double varieties, Salmon Pink: 1st, T. C. Thurlow's Sons, Inc. Collection of 6 named double varieties, Red or Crimson: 1st, T. C. Thurlow's Sons, Inc. Collection of 12 named varieties, double: 1st, T. C. Thurlow's Sons, Inc. Collection of 6 blooms, Pink, one variety (For amateurs only): 1st, Wilton B. Fay; 2d, Robert C. Morse. Collection of 6 blooms, White (For amateurs only): 1st, Wilton B. Fay; 2d, Wilton B. Fay. Collection of 6 blooms, Red (For amateurs only): 1st, Wilton B. Fay; 2d, Robert C. Morse. For the most meritorious display of Peonies arranged for effect: T. C. Thurlow's Sons, Inc., a Silver Medal.

#### Gratuities

Wilton B. Fay, display of Peonies. Henry Stewart, display of Roses. Henry Stewart, display of Sweet Williams.

#### Vote of Thanks

T. C. Thurlow's Sons, Inc., general display. Walter Hunnewell, Estate, display of Roses. Hillcrest Gardens, general display of vegetables and flowers.

#### Honorable Mention

Hillcrest Gardens, Strawberries.

## GARDENERS' AND FLORISTS' CLUB OF BOSTON

Ladies' Night of the Gardeners' and Florists' Club of Boston, held at Horticultural Hall, Tuesday evening, was a great success. The attendance was very large, and one of the best programs ever listened to in the hall was given under the direction of J. C. Harris, of Penn's. It included numbers by the Swedish Glee Club, a violinist from the Boston Symphony Orchestra, the Philharmonic Trio of Boston, a pianist and a soloist. A special feature was the dancing of Marjorie Messer, a little miss from Peabody, who came on the stage in a paper rose bud, from which she emerged as the bud opened. It was a rare treat for all present, and at the close of the concert Mr. Harris was given a warm vote of thanks.

A few minutes were given to business previous to the concert, four new members being admitted and a committee consisting of Henry Penn, Thomas Roland and W. R. Nicholson being appointed to draw up suitable resolutions on the death of the late Patrick Welch.

**A Good Creed** Mr. Benj. Hammond, of Beacon, N. Y., who is ever alert in all matters which have to do with boys and girls, sent out attractive cards on Flag Day, containing a picture of the Flag, a poem and a sentiment of his own. Mr. Hammond preaches Americanism for every boy and girl in United States. The creed which he sets before them is: "Respect every-day labor. Cultivate the virtues, fidelity, patience, industry and fearlessness. Protect and help the weak. Sympathize with the suffering. Whatever your duty is, do it well. Keep your promises. Pay your debts. And be polite to all." If all boys and girls, their daddies and their grandads should subscribe to this creed, the world would be a better place to live in, and a mighty sight more comfortable to do business in. We like the way in which Mr. Hammond gets at the consciousness of the rising generation in the ways like his Flag Day card, and in his general garden program. It shows that he is looking well into the future.

**Florists and The Shows** It is a rather lamentable fact that the florists as a rule give very little attention to the flower shows in their home towns. In many instances they do not even take the trouble to attend any of these shows from one year's end to the other. It is impossible for them to realize, apparently, that the shows may become a very active agency for the expansion of their business. It is almost certain that in any other line of industry opportunities of this kind would be siezed upon with avidity. Prizes would be offered, for example, and displays would be made.

Just what a show can do for the florist industry was made apparent by a statement of Philip Breitmeyer at the International Peony Show in London, Ont. Mr. Breitmeyer said that before the American Peony Society held its exhibit in Detroit the sales of peonies on the part of the florists were few. In his own store, he thought he was well stocked if he had 200 flowers. Following the show the demand for peonies began to grow, so that now he is selling many times the number of blooms which he formerly put out, and keeps several hundred dozen in stock. Mr. Breitmeyer is convinced that the peony show was a very great factor in increasing the business of the florists of Detroit. The situation is one which no doubt can be duplicated in many other cities. In the flower shows the florists have a vehicle for publicity which they are unfortunately overlooking.

## EDITORIAL BRIEFS

So far the florists have done little worrying about the coal situation. A few have stocked up, and many have a little coal left over from last year. The rest, like the general public, are waiting to see what develops, although, of course, due to the fact that they use soft coal, they are better off than the public as a whole.

If hail storms continue as frequently in New England as has been the case in the last two years, it is safe to say that much more hail insurance will be taken out. The cost of replacing glass is not small. After the recent storm in Boston, both flower growers and vegetable growers were in Boston at 6 o'clock in the morning to get the first supply of glass, and there was a genuine run on the wholesale glass houses.

Peonies are fast coming to rival the rose in popularity. An unprecedented number of peony shows were held this year, and many orders are already being placed for fall delivery. There are few flowers which are grown on so large a scale. Private growers are not satisfied unless they have all the good varieties. In the garden of E. C. Shaw at Akron, Ohio, 20,000 blooms were counted this season, it is said, and Mr. Shaw is only one of many amateurs growing peonies on an extensive scale.

Undoubtedly weather conditions had a serious effect on the sweet pea exhibit at Horticultural Hall, Boston, Saturday, June 24, in connection with the annual meeting of the American Sweet Pea Society. At Newport, R. I., where some of the finest sweet peas are grown, the flowers had passed their prime a week ago. In seasons like this it is almost impossible to set a satisfactory date for a flower show of any kind.

When Representative John Kissel asked Congress to make the daisy the national flower, he would have been better off if he had not inserted the botanical name in his bill. He specifies Bellis perennis, which shows that he is barking up the wrong daisy, so to speak. Bellis perennis is, of course, the little English daisy which grows along with pansies in the spring, while what he has in mind is the common white daisy of the fields and waysides. As a matter of fact, this latter daisy is not a native American, having been introduced long ago from Europe. We believe that after the Congressman has made a little further investigation he will quietly withdraw his daisy bill.

# POINSETTIAS

## S. A. F. & O. H. Department

### KANSAS CITY CONVENTION AUGUST 15-17

From reports received, it would seem that a few prospective exhibitors in the Trade Exhibition have the idea that all the space in the Exhibition has been sold. This is not the case. The floor of the Exhibition Building is so laid out that there is a large oval space in the center, with arcades at the east and west. The space in the oval is, as has been announced, all reserved, but there are several very good locations still to be had in the arcades, none of them at a disadvantage in comparison with the other locations. Prospective exhibitors, therefore, are urged to send in their applications for space without delay, and may rest assured that with promptness on their part they will be accommodated with reservations.

All exhibitors are advised that any decorative material, coverings, etc., used on their exhibits must be fireproofed. This is not a regulation of the Society, but of the Fire Department of Kansas City. Indeed, it is a requirement in all cities of the first class. Exhibitors who carry such material with their exhibitions would find it advisable to have the fireproofing done before shipment, thus avoiding much trouble and delay.

#### Railroad Rates

Members and delegates, and dependent members of their families, journeying to Kansas City, will be able to purchase round trip tickets at the rate of one fare and one-half on the identification certificate plan, good via the same route in both directions only. Return tickets must be validated at Kansas City by ticket agents at the regular ticket offices of the lines for which they are issued, on any date to and including final return limit, providing a train selected reaches the original starting point prior to midnight of the date limit. Certificates will be furnished on application to the Secretary of the S. A. F. & O. H. One certificate will suffice for each member, and includes the dependent members of his or her family. These certificates should be properly filled out before presentation to the Ticket Agent.

### FLOWER SHOW AT NEW BEDFORD

A combined rose and peony show was held at New Bedford, Mass., June 14 and 15. A very extensive peony exhibit was made by T. C. Thurlow's Sons, covering three tables, and including 90 varieties brought from West Newbury by truck. Several fine seedlings were included. Leonard J. Hathaway made an extensive exhibit of peonies.

The principal rose exhibitors were Andrew J. Fish and Mrs. R. N. Gibbs. Mrs. Gibbs's collection included 25 hybrid tea climbers. Mr. Fish had nearly a hundred vases, and his display included the new Paul's Scarlet Climber, and the still newer Mary Wallace, the creation of Dr. Van Fleet, which was named at Portland, Ore., on the same day of his funeral. Mr. Fish also showed Dr. Huey, a very dark red, semi-double climber. The judges were Peter Murray and Z. R. Pinault.

Mrs. William W. Edgar, of Waverley, and her two daughters are soon to sail for Europe. They will make a trip through England and Scotland, and then go to the Continent, coming back about the middle of September.

# MICHELL'S

## Pansy Seed

Michell's Giant Exhibition, Mixed. A great strain, which for size of bloom, heavy texture and velvet colors and shades cannot be surpassed. ¼ gr pkt 30c, ½ pkt 50c, ¼ oz $1.25, oz $2.00.

# SUCCESS WITH PEONIES

## Interesting Lecture By David C. Stranger at the Peony Show in Boston

At the Peony Show at Horticultural Hall, Boston, June 17 and 18, Mr. David C. Stranger of Cherry Hill Nurseries, West Newbury, Mass., spoke both Saturday and Sunday afternoons on peonies and their cultivation. Mr. Stranger had many specimens of well grown peonies to use in illustrating his talks, and also exhibited divided roots of different sizes. Mr. Stranger's talks, which contained a great amount of valuable information, are condensed as follows:

"It is a great pleasure to meet with you people today and I trust that for a short time we can forget there is such a thing as professional peony growers and amateur peony growers, and feel that we are all met on one common ground as flower lovers. It is my pleasure to listen to and talk with many men, from whom I find I can learn a great deal about peonies.

"I think most of us had a trying experience last winter in that heavy ice storm when we saw tree after tree broken down beyond repair. We felt that nature was indeed harsh; but in a short time the ice went away, and the storm was just a thing of the past. Then the green grass began to appear here and there, the flowering shrubs and the irises came into bloom one by one. We could hear the song of the birds. Nature was calling to us with a call that took our thoughts away from business and out among the flowers. Yet there was something lacking until the peonies came. Then we felt that our happiness was complete.

### Peony Improvement

"Peonies have form and color that artists dream of but cannot transmit to canvas. Peonies have the grace and beauty that sculptors try to get and fail. To my mind the peony is the peer of all flowers because of the many remarkable uses to which it can be put. We call June the month brides choose because the roses are then in bloom. But there is a gradual shifting from the rose to the peony, which is just as adaptable for decoration and much lovelier.

"There are very few of us here, I suppose, who do not remember the pink and red 'pineys' our grandmothers had in their gardens. They were handsome but they had their faults. As a small boy I had a neighbor who possessed a peony plant as high as this table, a plant that bore from fifty to a hundred blooms. We boys got together one night and climbed the high picket fence to get some of the flowers. I remember the occasion because I had on a pair of brand new overalls and the overalls got caught in a picket and I wondered how I should explain

David C. Stranger

the tear to my mother. We took a knife and cut off two blooms each and hurried back over the fence. Then we sniffed of the blossoms and threw them away we were so disgusted with the odor.

"There are something over one thousand named varieties of the peony, according to the American Peony Society. Of this number perhaps one half have real merit. Some are more perfect in form than others; some have a lovelier color, but they are all far superior to the old fashioned peonies.

### Making New Varieties

"You have been willing to aid in cultivating the peony and in using your money to produce better kinds. The work of the hybridizers, like Lemoine and Dessert, are familiar to you. You know the wonderful creations they have produced. Can you look into any flower more beautiful in form and more delicate in color than these modern varieties. There are some you cannot describe. You feel they have the beauties of all flowers blended in one. Peonies like that are not the result of chance; they are the result of many careful hours of patient effort in securing the seed that produced the plant that grew the flower. Perhaps, after these seeds were planted, at least ten years passed before a bloom of such quality was produced.

"Thomas C. Thurlow, of West Newbury, perhaps was known to many of you; at least you have known about him. Twenty years ago he told his boys he would give them some pocket money if they would collect peony seeds. Now pennies do not grow on trees, and they are not often found in the pockets of a small boy. Therefore the Thurlow boys went to work vigorously. They must have collected four or five bushels of seed. The seeds were planted and in four or five years the blossoms began to appear. About two hundred thousand plants were grown. Mr. Thurlow was a remarkable man with peonies. He had the vision that very few men have to look into the future and see what marvelous creations might be brought forth. Yet in the course of time the peonies were forgotten because so many other pressing duties came. A few years ago, however, his sons began to look the field over. They cleared the land and decided that, of all the peonies growing there, fifty to seventy-five had merit. The others were bloomed another year, and in the end about two hundred varieties were reserved. It is only by close selection like this that improved varieties can be given the world. The man who simply names a lot of seedlings is not helping anybody. It is true that in a sense like will produce like but you cannot make a silk purse out of a sow's ear and you cannot take an old peony, propagate from seed and stand much chance of getting good new kinds.

### Hybridizing Methods

"People tell me that they have selected a peony and have taken the pollen from some other peony and cut away the stamens and planted the seeds from that peony. That they have called hybridizing. Now I believe that in that process man does one per cent of the work, and nature the other ninety-nine. In other words, the wind, the bees and the other insects introduce much more outside pollen than does the so-called hybridizer. Sometimes we find men who follow a different plan. I know one such man, a man for whom I have the greatest respect. The business world would call him slow. Certainly he does not count time as we count it. He doesn't look at the clock. He forgets all about dinner and doesn't know the day is done until darkness falls, when he is engaged in trying to put into the peony something which will make it more beautiful than any flower seen before. This man uses trans-

parent envelopes, which he places with the greatest care over each flower that he has fertilized by hand. He watched the flower through the envelope's face. When he takes off the envelope he holds up a sheet of paper in the direction from which the wind is blowing so as to catch any wandering pollen floating in the breeze. That man knows what he is doing, and the blood which goes into his crosses. Some people say that his life has been wasted. We who love peonies do not believe it. His is the true secret by which peony perfection is approached.

"A few years ago a man had a strong desire to get together one of the nicest collections of peonies that could be had. Having money in abundance he visited every peony grower in this country, and sent to France and sent to England to get every peony of any merit. He gathered together a wonderful collection. In a few years he produced some of the most exquisite blossoms. Then the man tired of the peony. He wrote a number of commercial growers, asking them what they would offer for his collection. It was my privilege to be with the firm that bought them. We got them for a mere song, not one twentieth of what he had paid for them.

### Restoring Poor Plants

"You would have said that was a good buy. It was in a way. Yet they were full of disease. The foreign peonies are grown too crowded. The ground becomes tooled. The growers are too limited for room. As fast as one variety is taken out another is put in. That makes for trouble. We had on our hands a lot of peony plants too poor to divide for making saleable divisions. Now, however, most of them have been restored. Can you wish a more perfect flower than this Sarah Bernhardt which I have in my hand? It was produced from one of those poor roots. In another year we will have still better blooms.

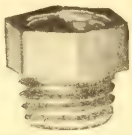
"We are on the right road to eliminate that dread disease Nematodes. Many of you have bought plants in that condition. It is the result of growing peonies on polluted land. The remedy is to remove the plants to fresh ground and use plenty of lime. We believe that peonies need lime in abundance. When we plant roots we dust them all over with lime as they go into the ground. We use bone meal and wood ashes as a fertilizer, and we are careful to have the eyes not more than two inches under the surface. We practice mulching with salt hay because it is cheap and doesn't introduce weed seed. I recommend a mulch of some kind if it is only grass clippings for at least three years.

"I have on the table a peony root such as you would get from any reliable peony grower for a plant one year old. You will note that it is a fair sized root. If the variety were very scarce you would get a plant about half the size. I am very much against dividing peonies too small. It takes years to get blooms from a root with only one small eye. I should like to ask if it isn't possible that cutting peony roots so close for commercial purposes is the reason why certain stocks deteriorate so rapidly. I once went to see a grower who had bought some Cherry Hill from us. If we had got three divisions in the length of time he had had the plants, we would have been satisfied. He had made fifteen divisions. As the result he had little weak plants that wouldn't bloom for years. I remember that when we first got Mary Woodbury Shaylor we were disappointed in the blooms, and I think it is violating no confidence to say that Mr. Shaylor in his eagerness to let people enjoy this peony had divided too closely. The blooms were not to be compared with those on older and more robust plants.

### Sterile Peonies

"In our nursery a few years ago we had perhaps five hundred plants of a certain variety, with only about fifty blooming. We visited another grower and found the same condition. The plants were sterile. We put them on the brush heap and so did he. You cannot afford to buy or sell from such stock.

### Wilt Disease



"Then we have the wilt disease, so-called. I admit that I do not know much about it although we occasionally find plants with wilted leaves. I believe that the trouble is usually due to some injury which is done the plant below the ground when it is small by the man who cultivates around it. Fungus gets into the wound and the plant suffers. I understand that there is another trouble called the wilt disease, but this is the only kind we have seen and it does not worry us. It can be avoided, I think, in all cases by using ground that is not sour and well drained. In fact, that is the remedy for most troubles that peonies have. If your plants are in bad shape, move them to ground where the drainage is good and use plenty of lime and wood ashes unless you are sure the land is sweet. Just about as much lime and wood ashes as you can hold in your two hands is enough for each plant. We had one season when the plants in a certain section were so bad that we steered everybody away from that locality. Now this trouble has all been done away with.

"If you wish to plant out peonies this fall, visit if possible the place where the plants which you are to buy are grown. Go to people who have peony gardens, ask them about the

Walter Faxon, One of the Most Popular Peonies at London

RAIN WHEN YOU WANT IT

The Portable lines are all equipped with the Famous Stream Nozzles, which are self cleaning—a patented, exclusive Skinner System feature

# What Then Is Thorough Watering?

My Dad, I'm glad to say, was a farmer
A regular farmer, not a collar and cuff fellow who lived in town and rode out to the farm.
He always used to say, "most summer rains just washed the face of nature and packed the soil; when what growing things needed was a gentle rain, that was an honest-to-God soil-soaker, that got right down to the roots and stood there for a good spell."
Now you and I might set forth all kinds of theories on watering, from now till the cows come home, and at the end we would get right back to Dad's way of looking at it. It's exactly the way we looked at it when designing the Skinner system of watering.

We designed a soil-soaking waterer and soil loosener, not just a surface wetter and packer.
To you it may look like just a pipe with holes bored and nozzles stuck in. But it's taken a score of years of the hardest kind of hard work and costly experimenting to get it where it is. And now it is where it is, it is a thorough watering system that does exactly what we say it will.
Which in turn is exactly what you want done.
It's all made up ready for prompt shipment.
200 foot portable sectional line costs only $79.75 complete.

**The Skinner Irrigation Co.**

286 FIFTH AVE. NEW YORK

SKINNER SYSTEM OF IRRIGATION

varieties which thrive best and where they got their stock. Then you will be able to buy intelligently. Fight shy of a man who wants to sell you small divisions. At the risk of repeating what I have said before, I want to emphasize again the danger of buying plants that have been divided too hard. Not only are they a long time in blooming, but they are likely to remain weak and to give poor stock from which to propagate.

### Planting Methods

"Let me say a word about the result of planting too deep. When that is done a new lot of roots is made above the original root growth and the stalks from these roots are invariably shy bloomers. Sometimes a plant will throw up stalks from the original roots and from the new roots. Then you will have a peony blooming well on one side and poorly or not at all on the other. If propagation is done from plants grown in this way, you are likely to get non-blooming stock. I believe that you can produce peonies that have blooming qualities and peonies that are practically sterile by the way you handle the stock. Some people spoil their peonies by too much kindness. They overfeed them with manure, making them soft and subject to disease. You will have no such trouble if you stick to lime, wood ashes and bone meal. It is needless to say, perhaps, that peonies like an open, sunny place where they do not have to compete with the roots of trees.

"Some people who do not use manure in summer think it is a good plan to mulch their peonies in the fall after frost comes. The danger in this plan is that maggots will be introduced, as they breed in manure.

"In the spring just as soon as the weather begins to get warm, get out with the peonies and cultivate them, because there is nothing which does so much good as stirring the earth, admitting the chemical elements in the air.

"Although the drainage must be good, peonies like plenty of water. You must be careful, though, not to get the water on the half open buds or it will give a brown tinge on the edges.

"The time to pick the peony buds is when they are one-half open. Then they have better color than if they open outside. They will have particularly fine bloom if they can be allowed to unfold in a damp place, perhaps in the cellar.

"Peonies are often improved by using a support which keeps the buds up out of the dirt when storms come. The best support we have found consists of three metal rods three feet long, bent into a ring at the top. A piece of barrel wire with a hook at each end is run through these rings and fastened together around the peonies. This support is light and inconspicuous, yet strong. It is easily put in place, and takes but little room when stored for winter."

## NATIONAL ASSOCIATION OF GARDENERS' CONVENTION

Plans are now well under way for the annual convention of the National Association of Gardeners which will be held this year in Boston, September 12 to 15.

President Robert Cameron of Ipswich, Mass., has selected the following convention committees, of which W. N. Craig, ex-president of the association, of Brookline, Mass., is general chairman.

Banquet and Entertainment Committee: Andrew Rogers, Chairman, James Methven, William Downs, Stewart A. Forbes, Henry Stewart, A. P. Dewar, L. B. Whyte, Gordon P. Stewart, John G. Duguid, William Till, Percival C. Veinot, James Donald.

Program Committee: Patrick W. Burke, Chairman, W. D. Nicholson, John Morris, W. D. Coutts, Thomas H. Westwood, Peter Arnott, Donald McKenzie.

Ladies' Reception Committee: Mrs. Hammond B. Tracy, Chairman, Mrs. W. N. Craig, Mrs. Wm. Anderson, Mrs. George Stewart, Mrs. Duncan Finlayson, Mrs. Andrew Rogers.

Finance Committee: William Kennedy, Chairman, Frank Murray, Peter Miller, Wm. Anderson, George F. Stewart, Eric Witterlow, Herbert W. Clarke, Wm. R. Thornhill, John L. Russell.

Transportation Committee: Walter H. Golby, Chairman, Julius Heurlin, Duncan Finlayson, Alfred E. Parsons, Wm. C. Rust, James Marlborough, B. Hammond Tracy, James Wheeler.

Publicity Committee: William N. Craig, Chairman, Gustave Thommen, E. I. Farrington.

The members of the association in and around Boston are most enthusiastic to make the 1922 convention, which will be the second N. A. G. convention to be held in this city, a rousing success to show how the association has progressed since the first Boston convention was held here.

# Talk of the Trade

Fred A. Danker, of Albany, is one florist who knows how to get good business out of dahlias, both as a cut flower and in plant and tuber sales. Mr. Danker is a dahlia enthusiast, grows a comparatively short list of the very best sorts, and nothing but the very best interests him, regardless of price. Cut blooms of choice dahlias as offered the public by the Danker store bring top prices, and it has been the aim of this store to take care in every way not to cheapen the dahlia as a cut flower.

The first part of June I saw plants in 5-inch pots of some of the best sorts in bloom in the store (not to sell as pot plants but to show the variety) and from these samples 4-inch pot plants for planting out are sold at mighty good prices, making this line a highly profitable one. It is the first time that I have ever seen the dahlia handled in a way which I think does it credit.

---

The severe storm of Sunday, June 11, did much damage to crops in the field, particularly asters and carnations. The area was through Massachusetts in general and New York State. Around Albany, Schenectady, and through to Syracuse and Rochester it was particularly severe. Much loss was experienced in field grown carnations, some fields being completely under water for a day or more. The probabilities are that carnations from the field will not be plentiful this season. The plants seem slow in starting, and in a general way not up to standard.

---

There seems to be an unusual lot of blind geranium stock this season, and I think it is entirely due to the methods of saving stock. Repeatedly during the last few weeks I have run across blocks of geraniums either with no buds at all or very late coming into flower, and in every case it is plain to be seen that the stock propagated from these plants would produce only similar stock for next season. In fact, it will result in a later flowering and more entirely blind lot of plants each season. I find it a fact, though, that in every case under my observation this blind stock is with the florist who saves his own stock for his own propagation.

Each season the first plants to flower are sold as soon as they show color. That means that the best stock is disposed of. Later, as the season nears an end, a lot of late plants which haven't flowered are left over. They are usually planted out for propagating purposes. Following that method for a few years very naturally results in blind stock. I don't think I have seen one blind lot of plants which come from cuttings or small plants bought from geranium specialists. I believe the grower making a business of geranium cuttings and plants at wholesale almost invariably watches his stock and keeps it in the best possible condition as to type, freedom from disease, and early flowering qualities.

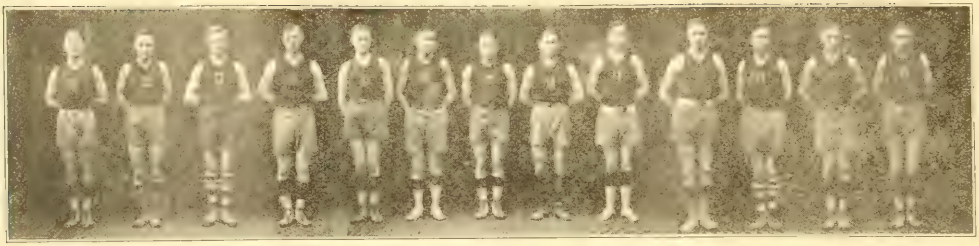
### TWENTY-THREE SHOWERS IN ONE ORDER.

Thos. F. Galvin, Inc., of Boston, had one remarkable order last week which consisted of 23 shower bouquets, one for each member of the graduating class of the High School at Walnut Hill. This is a commencement feature which florists can well afford to encourage. Without doubt there is much opportunity for developing graduation day business. In this case the Galvins used sweet peas with maiden hair fern, carrying out the class colors of white and lavender.

### A UNIQUE INVITATION



Mr. George N. Smith, the well known peony and iris grower of Wellesley Hills, believes in allowing others to share the beauties of his garden. He sent out invitations this year that were characteristic of his own original self, and which brought a lot of visitors. The cards read:

"PEONIES. These most beautiful expressions of the Creator's goodness are now in bloom. We wish all our friends (which includes everybody) might share with us this winsome display. Come and enjoy this harvest of delight. Visitors will not be importuned to buy." George N. Smith.

### NEWS NOTES.

L. A. Hutchinson is planning to erect a new greenhouse at Caribou, Me., this summer. Mr. Hutchinson has engaged C. C. Newell of Waverley, Mass., to take charge of the greenhouse. Mr. Newell is a Maine man by birth, but has had several years' experience in the best greenhouses of New England.

J. Gammage & Sons were quick to see the opportunity for publicity in connection with the International Peony Show at London, Ont. They carried a half page advertisement in one of the local papers, and did much to make the show a success.

*Class of 1922, Davey Institute of Tree Surgery. Thorough scientific education, plus practical skill trained into them, makes these young athletes master Tree Surgeons*

# A Million Dollar Business in Saving Trees

## *By Martin L. Davey, General Manager*

The business of The Davey Tree Expert Company is now running at the rate of one million dollars for 1922. It has taken more than twenty years of steady building to reach this volume. The Davey Company sells nothing but service—the service of carefully selected, highly trained, scientifically educated Tree Surgeons who save trees without guessing or experiment, when they can be saved. This service is available almost everywhere in the eastern half of the United States. Nearly fifteen thousand clients have been served up to this time, many of them regularly.

Lieut. Colonel Frank K. Hyatt, treasurer of the Pennsylvania Military Academy, in a letter written to The Davey Tree Expert Company, December 2, 1921, said:

> "Three of your men are performing tree surgery at the college and while I had only engaged them for two days, their work was of such character that I was compelled to hold them longer. In fact, they will probably be with us four or five days.
> "They seem to have thorough knowledge of their work and the foreman in charge is a very unusual man. It gives me pleasure to congratulate you on the character of work which your employees are doing."

This letter is typical of many hundreds of voluntary letters of commendation received by the Davey Company from its clients. They come regularly from every section served by Davey Tree Surgeons. It is significant that nearly every letter emphasizes the high-type men, their apparent skill and ability to do their work with accuracy and thoroughness and speed but more particularly the fact that they are diligent and zealous workers.

### The Evolution of Davey Tree Surgery Compared to the Automobile

I do not presume to say that every last client is 100% satisfied. That would be too much to expect from a human organization. But more than 95% of the clients are fully pleased with both the work and the service. Nor would I claim that the Davey organization has always been as good as it is today, nor that the methods employed have always been as remarkably good and successful as they are now.

Davey Tree Surgery has been before the public nearly as long as the automobile, and its development has been almost parallel. You will easily recall the automobile of fifteen or twenty years ago. You recall how often it broke down, how many times it was laid up by the roadside?

You remember its imperfect mechanism, its poor lighting, the hard job of cranking? Well, the fundamental principles of the automobile were the same then as now. The wonderful advance has been made in the refinements and the mechanical improvements. Then think of the really marvelous piece of machinery that you buy in the modern automobile!

Just so with Davey Tree Surgery. The fundamental principles were the same fifteen or twenty years ago as today. It was then relatively crude and imperfect. But honest effort and a determined purpose have produced refinements and mechanical improvements and scientific accuracy that are both marvelous and inspiring.

### Only Two or Three Men Out of a Hundred Applicants Are Finally Accepted

However, it is the human element of the Davey organization that I wish to describe. The high-type men, their surprising efficiency, their zeal and skill and knowledge are the result of something back behind. That something is a policy that could produce no other result.

From time to time we need additional men. We run advertisements in the cities within a reasonable distance of our headquarters, giving our specifications. Many replies are received. An information blank is sent to each applicant, in which he must give his life history. If a hundred information blanks are returned, our experience has shown that not more than fifty seem to meet our requirements. The others are cast aside.

We then send our representatives to these cities and notify the fifty to report at a certain hotel for personal interviews. Out of the fifty men thus interviewed, we select not more than five who seem to be the right kind.

### A Regular Training Field Where Practical Training Is Given to Every Man

These five are brought into Kent (Ohio) for practical training, where we maintain a regular training field. These five are put through a thorough course of practical training for several weeks, at the end of which we select not more than two or three as qualified and made of the right stuff.

Thus, out of an original hundred definite applicants, we get not more than two or three. The process of selection, though it is severe, works wonders and gives us unusual men for the very important work which we do.

Those who finally pass are sent out into the field, always under the direction of master Tree Surgeons. They simply grow into the work and acquire almost intuitive skill.

### A Chief Expert Travels Regularly From Squad to Squad

Then, we have a chief expert who spends all of his time traveling from squad to squad to check up on all the details of the work and the merit of each individual to see that our high standard is consistently maintained. Occasionally he tells us that a certain man is not our kind and should not be in the Davey organization. That man is promptly dismissed. Very often he tells us that certain men are doing especially fine work and recommends advancement. Such men are promptly advanced.

So the really good men remain with us—and they like their jobs mighty well. Naturally enough, they give superior service.

### Constant Supervision by Local Representatives

In addition to this, a number of squads are under the constant supervision of each local representative, of whom we have nearly thirty, whose highest self-interest requires watchful care of the interests of each client, to see that he gets the maximum service.

More than this, we require periodic reports on every man in our field force. Our local representatives give detailed monthly reports on the foremen under their supervision. Each foreman gives a monthly report in great detail concerning each man in his squad. Every bit of information from every source about each individual goes into his personal service record. And every one knows that his service record is complete and strives to keep it good.

### The Only Place in the World Where the Science of Tree Surgery is Taught

When a man in the field force has reached a proper state of development, he is brought into Kent to attend our resident school. This course covers two years—four months each year. We maintain a regular school with complete library and laboratory equipment and a corps of instructors with fine scientific training from various colleges and universities, plus special training in the Davey organization. There is no other school in the world that teaches Tree Surgery, so we maintain the Davey Institute of Tree Surgery as a matter of practical necessity.

In this school we teach only those things required to make real Tree Surgeons—nothing superfluous or unnecessary. The course includes Botany and Dendrology, Pathology and Entomology, Soils and the Feeding of Trees, Spraying and Fruit-growing, and above all the Theory and Practice of Tree Surgery.

*"Do it right or not at all."* — JOHN DAVEY

### Every Man in the Davey Organization is a Trained Man—Davey Trained

When a man has been with us long enough, has had the necessary amount of complete training, and has demonstrated to us his ability and qualifications, he is entrusted with the handling of operations—then and only then.

Every man in the Davey organization is a trained man—Davey trained. If a man should apply to us for employment and say that he is an expert and understands all phases of the work—recommend himself highly, we say to him, if we should happen to need men, "All right, you may start in at the bottom and show us." Very few of them ever come and we are just as well satisfied. Our experience has shown us that not more than one in ten of these so-called tree men from the outside is the right kind of man. None of them are real experts when they come to us. All of them have many things to unlearn.

### The Davey Research Department Does the Experimenting—the Client's Trees Are Never Experimented Upon

In addition to all these other things, we maintain a Research Department in charge of scientists of practical experience. It is their duty to work out every scientific and practical problem of Tree Surgery, as fast as possible. They have done wonderful work. The added data from every available source, particularly from the experience of the Davey organization, in addition to original experiments. Every experiment is conducted in Kent by our Research Department and never on the trees of a client.

For instance, our Research Department has worked out a list of "forbidden trees"; those which experience has demonstrated are not worth complete treatment or do not respond properly to treatment. On these trees our expert is permitted to do only first-aid work.

### A National Organization That Carries With It An Assured Protection to Tree Owners

There is no other national organization in our field. There are, of course, many local imitators. It is an unfortunate fact that there are mighty few good ones among them. We would be happy if they were all good and well qualified. But who will supervise them? Who will train them? Who will provide the discipline that will hold them to high-quality service? Who will pass judgment on the results of their work?

There are quite a number, who have never had any contact with the Davey organization, who claim falsely that they are Davey men. There are some, unfortunately, whom we have been obliged to let go for obvious faults, who attempt to capitalize on the prestige of the Davey name, to our detriment and to that of the profession we have built up and have endeavored to honor.

### The Unseen Things That Make Quality Are Only Possible Because of Large Volume

In the Davey organization it is the unseen things—rigid selection of men, practical and thorough training, supervision of chief expert and local representatives, resident school, Research Department, standardization of methods and organization disciplined that make real quality and lasting merit. On a business of nearly three-quarters of a million dollars in 1909, we spent three times as much on those unseen things which make quality as we made in profit. In spite of the depression, we did a business of almost six hundred thousand in 1921 and spent four times as much on these hidden things that make quality as our profit amounted to. The business of the Davey Company is now running at the rate of one million dollars for 1922.

Davey methods have been standardized. Davey work is the same in Boston as it is in Chicago, the same in New York as in Kansas City, the same in Montreal as in New Orleans. Davey experts are of uniformly high type, all thoroughly trained, all carefully selected and developed. And best of all is organization discipline that preserves and maintains a constant high standard down to the smallest details of work and service.

### A Tree-Man May Fool the Public But He Cannot Fool Us

It has seemed to me that the greatest thing the Davey organization does for its clients over and above all these other things is that of relieving the client of all worry and responsibility in the selection of the men who are to treat his precious tree. A tree-man may fool the public, most of whom know little about trees. But he cannot fool us. A man must be right in every sense of the word or he cannot go very far in the Davey organization.

We who know Tree Surgery values, select the men to whom the work of very great importance is to be entrusted. We know they are right and worthy of your confidence and our confidence or we would not send them to you. They come to you with our seal of approval.

They carry with them the most precious possession we have, our reputation. We are as jealous of that reputation as a good woman is of her good name. Business and professional success are merely result. The cause are behind the scenes. And that is the reason for this 44th story of the Davey organization.

**Davey Tree Surgeons are near you—If you live between Boston and Kansas City. They are easily available and handle operations of any size, large or small. Write or wire Kent, Ohio, or nearest office.**

JOHN DAVEY
**Father of Tree Surgery**

John Davey gave to the world the science of Tree Surgery. Before the extension of his last book, the science, Prince Peace, had ever the part of the scientific treatment of trees established John Davey founded the term Tree Surgery. Davey began by pruning and it was his interest in trees and their improvement and betterment has been developed and the science grown to be world wide but the instrument for practical realization was John Davey. It is true he has been to many able followers but it is the fact that the tree is a living being.—Extract.

ROTARIAN
MARTIN L. DAVEY
**General Manager, who made of a father's dream a business reality and built the Davey organization.**

"And yet the tree lives on because it has a very extensive life. This the decision, the hope and opportunities it has several processes that are said as new and beautiful as in any other form of life. It has the power to adapt itself to its environment. To be sure it lacks intelligence and a few more systems and the power of locomotion. But in all the other essentials possesses the free functions and as free as man himself.

This question of reforestation is of most vital importance. America cannot continue to exist as a whole forward meeting Nation unless we protect what we have and start to build up that which we have so ruthlessly destroyed. We can not afford to be a Nation of vandals much longer. America must forever or America's most drink the bitter dregs of national decline and impotency.
—Excerpts from a speech in Congress, March 3, 1921, by Martin L. Davey, of Ohio.

# DAVEY TREE SURGEONS

*Every real Davey Tree Surgeon is in the employ of The Davey Tree Expert Co., Inc., and the public is cautioned against those falsely representing themselves. An agreement made with the Davey Company and not with an individual is certain evidence of genuineness. Protect yourself from impostors. If anyone solicits the care of your trees who is not directly in our employ, and claims to be a Davey man, write Headquarters for his record. Save yourself from loss and your trees from harm*

# King
# GREENHOUSES
## KING SERVICE

In perhaps no business is a complete organization so appreciated and so necessary as in the greenhouse industry. To be assured of real service, satisfaction and courteous treatment has always been the desire of the grower. With this thought in mind the King Construction has left no stone unturned in an endeavor to furnish their clients an enterprise completely prepared to answer all the needs of the commercial and private estate growers. To meet this condition means to study the needs from all angles and to continually improve the various methods of doing things in order to put forth a product that will meet the requirements in the minutest detail.

The thoroughness of King Quality, Design and Workmanship in King Constructed Greenhouses is well known. These same features are built into all King Products and whether it is a pound of putty, a set of pipe hangers or a few shelf brackets, you are assured of getting the very best to be obtained.

Let us suggest that you get our list of King Products and then let us prove that for Quality of Design, Quality of Materials and Quality of Workmanship, King Products are unexcelled.

*When you think of good greenhouses, think of KING*

# AMERICAN ROSE SOCIETY

## Annual Meeting in Syracuse, N. Y., a Notable Event. President Pyle Re-elected.

This year's meeting of the American Rose Society, which was held in Syracuse, N. Y., June 15 and 16, was in many ways a notable event. Much had been heard about the work of Rev. Dr. E. M. Mills in organizing a string of rose societies across the state of New York, and Dr. Mills, with the other officers of the Syracuse Rose Society, made admirable hosts. The day began with a judging of the Syracuse rose show, which was staged in the auditorium of the Y. M. C. A. Unfortunately a ruinous rain storm which had lasted for four days cut down the number of exhibits. In spite of that fact, however, many blooms of high quality were seen. The judges were F. L. Atkins, of Rutherford, N. J., and John H. Dunlop, of Richmond, Ont. The beauty of the show was enhanced by an extensive non-competitive exhibit made by the city park department.

### The Luncheon

At noon the rosarians were whisked away over the hills and dales of this beautiful country to Lake Skaneateles, where luncheon was served. Following the repast there was a feast of reason and flow of soul, with Dr. Mills presiding. Mr. H. B. Dennison, who said that if he had his way all roses would be red, gave a cordial welcome to the guests, while Pres. Pyle responded for the American Rose Society. Leonard Barron, editor of the Garden Magazine; John T. Robert, lawyer, granger and farmer; A. L. Shepard, secretary of the Rochester Rose Society; F. L. Atkins and Prof. E. A. White, each in turn regaled the guests with wit and wisdom.

Pres. Robert Pyle

Luncheon being over, a twenty-mile run brought the visitors to the home of Judge and Mrs. Hiscock. Here was found a rose garden of luxurious appointments, exquisite taste and excellent culture. The roses were arranged in beds, twenty of a kind, and included the choicest varieties.

In this wonderful setting the business meeting of the American Rose Society was held. The members were pleased to learn from the treasurer that the financial condition was better than for many years. The officers of the society were re-elected as follows: President, Robert Pyle; Vice President, F. L. Atkins; Secretary, John C. Wister; Treasurer, Charles H. Totty; Directors, James Boyd, Dr. E. M. Mills and George Peterson.

### Evening Session

The evening session was held at the Y. M. C. A. in Syracuse, the open-

ing address being made by Dr. Mills, following which there were fifteen minute talks by Pres. Pyle, Samuel E. Hilger of the Auburn Rose Society, F. L. Atkins and Fred C. Wallace of Canandaigua. This was a very enthusiastic meeting and greatly enjoyed by the visitors.

The next day a trip was made to Auburn, where the officers were taken on a tour which included a visit to the prison, where separate rose gardens have been developed for the men and for the women, to the Auburn Theological Seminary, and to several gardens, including those of Gen. MacDougal, George Pierson, Mrs. C. W. Ross, and David M. Dunning. The garden of Mr. Dunning has long been a Mecca for rose lovers.

There was one specimen of Frau Karl Druschki which made veritable billows of bloom. The trunk was ten feet high, and as large as a man's wrist. Other fine roses were Mrs. Weymyss Quinn, Glorie Chedane Guinnessau, Maman Turbat, Lady Pirrie, Gustav Grunerwald, G. Amade Hammond, and Avoca, a plant in full bloom six feet high.

Mr. Dunning had a Lion rose on a trellis 12 feet high which was a perfect blaze of colors. He preferred Willowmere to Los Angeles, and Red Letter Day, while similar in color, was much more vigorous than Kitchener or Karton. Mr. Dunning's choice among Hybrid Perpetuals, of which there were many, were Anne de Dissbach, Baron de Bonstetten and Ulrich Brunner.

### The Ferrin Garden

At the garden of Mr. Ferrin, where little less than a miracle has been worked since April, 1920, when he began with bare ground, the visitors found some three hundred rose plants in full bloom, among them many climbers, the best of which was Paul's Scarlet Climber. Probably the most distinguished among the roses in this new garden were some planted only a year ago last autumn, but having heads of generous spread and twelve to eighteen blooms to a plant. Mr. Ferrin explained that it did not require a million dollars or a large property to have roses, but he moderately presented this little example of how he had started with a swamp and in less than two short years had demonstrated the possibility of a rose garden on a 30 by 100 foot lot within easy reach of a modest purse. The demonstration was indeed a delightful example.

Mr. J. H. McFarland was introduced as Editor of the Rose Annual and presented several groups of the best roses and those especially adapted for use as shrubs.

Mr. Atkins was introduced as father of the tree roses that Mr. Ferrin had planted, and demonstrated to the audience how tree roses may be successfully grown.

Returning through Auburn the party visited the scene of the rose show to be staged in the Chamber of Commerce the following day and as they left town were impressed with the completeness of Auburn hospitality by hearing the chimes from a neighboring church sweetly peal forth the "End of a Perfect Day."

### Rochester's Show

In this little two-day journey the officers of The American Rose Society were fortunate in being able to visit the Rochester rose show. For more than one generation has Rochester been known as the flower city, but it remained for the young blood of the present day of floral enterprises to put Rochester on the map again rosewise through capable career of this organization started by a master hand within the last two years and stimulated into active service by the rose patron of those parts, Dr. E. M. Mills. They have grown until the rose shows of this year mark a triumph for scope, extent and quality.

## George Watson's Corner

"You in your small corner and me in mine."

The late P. Welch, as I said in a recent story, came nearer being a Philadelphia than a Boston celebrity than most people are aware. In looking over some old correspondence I find this in one of Mr. Welch's letters:—"I first arrived in Philadelphia in July, 1876. I was sent there to sell the product of the Waban Rose Conservatories, of Natick, Mass. In September of the same year I was ordered home. My headquarters were at 112 South 12th St. I also made some sales, for a grower in the Western part of Pennsylvania, during that time; but that would not quite make me a Philadelphia commission man at that early date—for we did not know what that term meant then. Still, when all is said and done, I suppose I was one of the pioneers in the commission business which has grown, in the last forty-six years, to be of world-wide importance—especially under the genius of such men as Samuel S. Pennock, a Philadelphian of whom we all are proud, and who has been the leading factor in making the commission business the great and beneficent factor between grower and retailer which it has come to be at the present day. But I came pretty near being a real Philadelphian. I offered Edward Shippen eight hundred for a store at 11th near Chestnut but he wanted a thousand so the deal fell through. After that I was at Natick for a year before I started out in Boston on my own account." This is historical and interesting. It will especially please our esteemed friend, H. H. Battles, to which 112 South 12th St., as well as Boston, has many endearing associations.

---

The Goeller boys at Trenton have been branching out. It is no longer Goeller Bros. at 139 Hanover Ave., as the 1922 Directory states—but Joseph Goeller at 53 Hanover Ave., exclusively retail. Another brother has gone in to the growing end. The third brother devotes himself to landscaping; and the fourth to still a different branch. By the time the 1923 Directory comes along the data will be more up-to-date. These directory compilers have my sympathy. They may be all right today, but all wrong a week later. It looks as if they would have to install a radio, to keep

proper track of all the world wide changes that are constantly happening.

Robert Craig is around again and looking much better. We also had a call from Commodore Westcott but happened to be out. Our sub-lieutenant reported him looking pretty good which is nice as he has been under the weather a good deal for quite some time.

The shorter hours in the wholesale flower trade for the summer start on Monday, June 26, 7 a. m. to 4 p. m. except Saturdays, 1 p. m. Closed all day, 4th July. Don't forget, in placing your orders, that Philadelphia observes Daylight Saving Time. One hour ahead of Eastern Standard Time. It makes one smile to look up at the City Hall clock, under William Penn's statue, and see it say 10 a. m. and then look down at the Broad St. Station clock and see it say "You're a liar, it's 9 a. m." We will get over that kind of foolishness in time, of course. The war has left us a lot of queer relics. But we are gradually getting back to normal.

The Morris Wheeler buildings (between Pennock place and Broad St. Station) have disappeared in the past two weeks, and it certainly was some excitement for the old timers in the neighborhood while it lasted. Now Jim McNicholl's drills are on the job, making foundation for the new twenty story structure which will replace the old ramshackle. Central Philly is rapidly being born again, all right.

Edward H. Flood of the Johnston Brokerage Co. of Pittsburgh passed through on the 14th inst. He reports the glass business booming again, and that the various factories under his company's guidance are having all they can do to take care of the orders. Their New York City headquarters are at 296 Broadway. He stopped in Washington on his way East, and reports pleasantly on our old friend W. F. Gude. Like the rest of us, he wishes Bill had those handsome whiskers back.

# BURPEE'S SWEET PEAS

The Burpee Early Flowering Sweet Peas are recognized as leaders in their various colors and they are grown extensively by all florists who demand the very best.

The careful hybridization work carried on at Burpee's Fordhook Farms in Pennsylvania, the growing of the seed crops on Burpee's Floradale Farms in California, and our extensive indoor and outdoor trials give us a unique opportunity to supply the florists with the very best that can be had in Sweet Peas. Everything possible is done to insure the quality of Burpee's Sweet Peas.

### NOVELTIES

**BURPEE'S ORANGE.** In every way a beautiful variety of true glowing orange self with standard and wings of immense size Awarded Certificate of Merit at the International Flower Show, New York, March, 1921. Trade Packet $1.00; oz. $5.00; ¼ lb. $15.00; lb. $50.00.

**CHEERFUL.** The large pinkish cerise flowers are an entirely new shade in the Early or Winter Flowering Sweet Peas. The flowers are of enormous size and excellent form. Awarded Certificate of Merit at the International Flower Show, New York, March, 1921. Trade Packet $1.00; oz. $5.00; ¼ lb. $15.00; lb. $50.00.

**SUNBURST IMPROVED.** The color is a pleasing and attractive shade of rich salmon-pink. The large flowers which are borne on long stems grow vigorously and bloom freely. Oz. $1.00; ¼ lb. $3.00; lb. $10.00.

**MRS. WARREN G. HARDING. "The Harding Blue."** A deep shade of silvery blue, pure throughout with no suspicion of mauve or rose. The flowers are immense in size with a broad and much frilled standard. Trade Packet 50 cts.; oz. $2.50; ¼ lb. $7.50; lb. $25.00.

**MRS. KERR. "The Best Early Flowering Salmon."** Mrs. Kerr has created a sensation wherever exhibited as it is a flower of wonderful size in a most popular shade of clear and rich salmon. Trade Packet 50 cts.; oz. $2.00; ¼ lb. $6.00; lb. $18.00.

**WHITE STAR.** A first-class black-seeded white without any suspicion of pink or other coloring. Beautiful, large flowers borne in fours on long stems. Trade Packet 50 cts.; oz. $2.00; ¼ lb. $6.00; lb. $18.00.

### WHITE

**IMPROVED SNOWSTORM.** The flowers are very large, of excellent form, and pure white in color. Oz. 80 cts.; ¼ lb. $2.40; lb. $8.00.

**EARLY SANKEY.** A black-seeded white which was awarded a Special Silver Medal. Oz. 60 cts.; ¼ lb. $1.80; lb. $6.00.

### CREAM

**LEMON BEAUTY.** A pale lemon-colored variety with standard and wings softly tinted amber. Oz. $1.00; ¼ lb. $3.00; lb. $10.00.

**PRIMROSE BEAUTY.** Deep primrose flushed with rose. Grown under glass this variety attains a height of only 5 to 6 feet. Oz. 50 cts.; ¼ lb. $1.50; lb. $5.00.

**CANARY BIRD.** A splendid rich deep cream with flowers of great size beautifully waved and borne 3 or 4 on a stem. Oz. 50 cts.; ¼ lb. $1.50; lb. $5.00.

### PICOTEE

**DAINTINESS.** A strong grower with flowers of largest size. Pure white edged with rose. Oz. 60 cts.; ¼ lb. $1.80; lb. $6.00.

**EXQUISITE.** The ground color is a soft shade of primrose picoteed with deep rose-pink. Oz. 50 cts.; ¼ lb. $1.50; lb. $5.00.

### CREAM PINK

**DAYBREAK.** A pleasing shade of rich rose-pink on cream ground, slightly suffused with salmon. Oz. 60 cts.; ¼ lb. $1.80; lb. $6.00.

**RISING SUN.** Rose-pink on cream. A bright and most attractive flower. Grown under glass the plants attain a height of only 5 to 6 feet. Oz. 50 cts.; ¼ lb. $1.50; lb. $5.00.

### LIGHT PINK

**LOVELINESS.** The large flowers have a white ground, suffused soft pink and distinctly picoteed with rose-pink. Oz. 60 cts.; ¼ lb. $1.80; lb. $6.00.

**PEACH BLOSSOM.** A new and distinct shade of pale amaranth pink deepening toward the edges of the wings. Oz. $1.00; ¼ lb. $3.00; lb. $10.00.

**SWEET BRIAR.** Color a lovely shade of pink throughout, with a soft suffusion of salmon or amber. Grown under glass this variety attains a height of only 5 to 6 feet. Oz. 60 cts.; ¼ lb. $1.80; lb. $6.00.

### DEEP PINK

**CHEERFUL.** The very finest pink we have. Fully described under "Novelties." Trade Packet $1.00; oz $5.00, ¼ lb $15.00; lb. $50.00.

**ENCHANTRESS.** A bright rose-pink, becoming deeper toward the edges of standard and wings. Large, well-waved flowers growing in fours on strong stems. Oz. 60 cts.; ¼ lb. $1.80; lb. $6.00.

**PINK BEAUTY.** The color is a soft rose-pink on white ground, deepening toward the edges. Oz. 50 cts.; ¼ lb. $1.50; lb. $5.00.

**ROSE QUEEN.** A pleasing shade of rich pink with a suffusion of rose. Blooms early and profusely. Oz. 60 cts.; ¼ lb. $1.80; lb. $6.00.

### ROSE

**FORDHOOK ROSE IMPROVED.** A charming shade of rosy carmine with flowers of largest size borne in fours on long stiff stems. Oz. 50 cts.; ¼ lb. $1.50; lb. $5.00.

**ROSEBUD.** Beautiful large flowers of a bright shining rose with a suffusion of bronze throughout the standard. Oz. 50 cts.; ¼ lb. $1.50; lb. $5.00.

**ZVOLANEK'S ROSE.** This is a widely known variety with large flowers and bold stems. Color a rich rose. Oz. 80 cts.; ¼ lb. $2.40; lb. $8.00.

**SPLENDOR.** A magnificent deep rose self with a distinct white blotch at the base of standard and wings. Oz. 50 cts.; ¼ lb. $1.50; lb. $5.00.

### CRIMSON

**EARLY KING.** The finest early flowering crimson with flowers of great size and perfect form averaging fully 2 inches in diameter. Oz. 60 cts.; ¼ lb. $1.80; lb. $6.00.

**ROSY MORN.** A pleasing shade of rose with crimson-scarlet standard. Oz. 50 cts.; ¼ lb. $1.50; lb. $5.00.

### ORANGE-SCARLET

**GLITTERS.** No variety we know of approaches Glitters in richness, brightness and five-like effect. The large bold flowers are rich orange-scarlet. Oz. $1.00; ¼ lb. $3.00; lb. $10.00.

### ORANGE

**BURPEE'S ORANGE.** A glistening pure orange. Fully described under "Novelties." Trade Packet $1.00; oz. $5.00; ¼ lb. $15.00; lb. $50.00.

**ORANGE BEAUTY.** Glowing orange, suffused scarlet in the standard and softer colored wings. A free and early bloomer. ¼ lb. 80 cts.; ¼ lb. $2.40; lb. $8.00.

**FLAMINGO.** A particularly attractive and pleasing shade of light orange with a suffusion of bright salmon and orange-pink wings. Oz. $1.00; ¼ lb. $3.00; lb. $10.00.

### SALMON

**MRS. KERR. "The Best Early Flowering Salmon."** Fully described under "Novelties." Trade Packet 50 cts.; oz. $2.00; ¼ lb. $6.00; lb. $18.00.

**APRICOT.** Glowing deep salmon self with a faint suffusion of orange Oz. 80 cts.; ¼ lb. $2.40; lb. $8.00.

### CERISE

**FIRE KING.** Scorching cerise-scarlet of very largest size Oz. 70 cts.; ¼ lb $2.10; lb. $7.00.

**GORGEOUS.** A charming soft salmon-cerise self of very good size. Oz. 60 cts.; ¼ lb. $1.80; lb. $6.00.

**ILLUMINATION.** Glowing salmon-cerise with a suspicion of orange Vigorous and strong. Oz. 80 cts.; ¼ lb. $2.40; lb. $8.00.

**CHERRY RIPE.** A particularly bright and charming cherry or salmon-cerise. Oz. 60 cts.; ¼ lb. $1.80; lb. $6.00.

### LAVENDER

**LAVENDER KING.** A rich, true deep lavender of large size and beautiful form. Oz. 60 cts.; ¼ lb. $1.80; lb. $6.00.

**PRIMROSE.** A vigorous grower of a lovely shade of soft lavender suffused with mauve. Oz. 70 cts.; ¼ lb. $2.10; lb. $7.00.

**ZEPHYR.** This is a delightful shade of soft lavender. Oz. 50 cts.; ¼ lb. $1.50; lb. $5.00.

### BLUE

**MRS. WARREN G. HARDING. "The Harding Blue."** Fully described under "Novelties." Trade Packet 50 cts.; oz. $2.50; ¼ lb. $7.50; lb $25.00.

**BLUE BIRD.** A true self blue of large size carried on long stems. Oz 60 cts.; ¼ lb. $1.80; lb. $6.00.

**TRUE BLUE.** A charming shade of true blue. Strong and vigorous. Oz 80 cts.; ¼ lb $2.40; lb. $8.00.

### DARK BLUE

## HORTICULTURAL TARIFFS

### Senate Rates Lower Than Those Of The House

Office of William F. Gude,
National Representative,
S. A. F. and O. H.,
Washington, D. C.

The Senate without debate on Saturday, July 1, adopted the rates of duty on horticultural products that had previously been recommended by the Senate Finance Committee. These rates are considerably lower than those that had been previously adopted by the House of Representatives. The paragraphs in question are as follows:

"Par. 751. Tulip, lily, and narcissus bulbs, and lily of the valley pips, $2 per thousand; hyacinth bulbs, $4 per thousand; crocus bulbs, $1 per thousand; all other bulbs and roots, root stocks, clumps, corms, tubers, and herbaceous perennials, imported for horticultural purposes, 30 per centum ad valorem; cut flowers, fresh or preserved, 40 per centum ad valorem.

"Par. 752. Seedlings and cuttings of Manetti, multiflora, brier, rugosa, and other rose stock, all the foregoing not more than three years old, $2 per thousand; rose plants, budded, grafted, or grown on their own roots, 4 cents; cuttings, seedlings, and grafted or budded plants of other deciduous or evergreen ornamental trees, shrubs or vines, and all nursery or greenhouse stock, not specially provided for, 30 per centum ad valorem.

"Par. 753. Seedlings, layers, and cuttings of apple, cherry, pear, plum, quince, and other fruit stocks, $2 per thousand; grafted or budded fruit trees, cuttings and seedlings of grapes, currants, gooseberries, or other fruit vines, plants or bushes, 30 per centum ad valorem.

"Par. 761. Grass seeds: Alfalfa, 4 cents per pound; alsike clover, 4 cents per pound; crimson clover, 1 cent per pound; red clover, 4 cents per pound; white clover, 3 cents per pound; clover, not specially provided for, 2 cents per pound; millet, 1 cent per pound; timothy, 2 cents per pound; hairy vetch, 2 cents per pound; spring vetch, 1 cent per pound; all other grass seeds, not specially provided for, 2 cents per pound: Provided, That no allowance shall be made for dirt or other impurities in seeds provided for in this paragraph."

The seed rates are materially higher than the rates adopted by the House of Representatives. Whether or not these rates will prevail when the bill is sent to conference, as it is called at the Capitol, when representatives of the Senate and of the House meet to iron out the differences that will have arisen as a result of the changes made by the Senate in the rates previously adopted by the House, cannot be foretold.

I have learned that the prospects for the passage of the tariff bill by August 15 are good. It will take several weeks to bring about an agreement between the two branches of Congress, but the bill should reach the President for his signature some time in September. This statement is based on statements made to me by prominent senators.

On Saturday it was decided to postpone action on paragraph 752 of the tariff bill covering other garden and field seeds.

## THE KANSAS CITY CONVENTION

Arrangements for the 1922 Convention of the Society, to be held in Kansas City, August 15, 16 and 17, are rapidly approaching completion, and a most successful gathering is looked for. The convention is to be housed in one of the finest buildings in the country adapted for such purposes, Convention Hall, located at the corner of 13th Street and Central Ave. The building is replete with conveniences, and will provide for both meetings and Trade Exhibition.

### Railroad Arrangements

As previously announced, all members will be able to travel to Kansas City with the advantage of a rate of one fare and a half for the round trip on the certificate plan. To add still further to conveniences in this direction the Secretary has arranged with the trunk line associations for the privilege of sending certificates in advance to every member of the Society, so that personal applications for them need not be made. These certificates are all numbered and recorded so as to render them traceable in the event that they are used by others than members of the Society, the reduced fares applying only to bona fide members of the Society.

### The Trade Exhibition

Already about fifty-five exhibitors have made reservations of space in the Trade Exhibition, and many prospective exhibitors are in correspondence with the Secretary's office in regard to space. It looks as though every foot of available space will be taken up.

The Kansas City brethren are well organized, and have about eighteen committees working upon local details of arrangements, and the resulting plans for the comfort and convenience of visitors will shortly be announced. Without doubt, the attendance will be of record character.

### Membership Dues

Recently, from the Secretary's office, bills were mailed to all members in arrears for dues, and these members are urged to make prompt remittances. The Society is in need of these funds, as they are applied wholly to the expenses of the Society, which, necessarily, are quite large. Immediately on receipt of cheques for dues membership cards are issued to those sending them, which must be presented by all in attendance at the Convention.

## NATIONAL PUBLICITY CAMPAIGN

It is pleasing to record that quite a number of subscribers to the Campaign Fund have, in the last week or so, responded with cheques covering the memorandums of subscription indebtedness recently sent out from the Secretary's office. Still, very many have not yet responded to the appeal for immediate payment of pledges. It should not be necessary to further remind delinquents that the Publicity Committee needs the money pledged to them for the carrying on of the Campaign. Progress is made only in proportion to the funds available, and, unless sufficient money is in hand to cover advertising contracts at the time they should be made, the committee is sadly handicapped, and much of their work goes for nothing.

Among the subscriptions recorded at this time, it is pleasing to note one of $500 from Bassett & Washburn, of Chicago, who have the success of the Campaign very much at heart; another of $200 from J. F. Wilcox & Sons, Council Bluffs, Ia.; and still others of $100 each from A. Washburn & Sons, Bloomington, Ill., and Jackson & Perkins Co., Newark, N. Y.

JOHN YOUNG, Secretary,
48 West 18th St., New York.

# -HORTICULTURE-

Entered as second-class matter December 8, 1904, at the Post Office at Boston, Mass., under the Act of Congress of March 3, 1879.

Vol. XXXVI JULY 10, 1922 No. 1

## THE TALK OF THE TRADE

Florists who have a little land available might use it to advantage by planting glodiolus corms now. It is not too late to plant gladioli, at least for flowers, although many people seem to think that all planting should be finished by the middle of June. In point of fact, a good crop of flowers can usually be obtained from bulbs put into the ground as late as July 20, and these flowers will be ready at a time when the glut is over and when prices are high again. Gladioli are not especially tender. They will stand one or two light frosts. From the point of view of the man who sells flowers "glads" coming into the market extra late will be a good investment. It is different with the man who is growing bulbs for increase. Earlier planting should be his rule. There will be very little increase, if any, from corms which go into the ground now.

John C. Robinson, of Ballstown Spa, N. Y., is one grower who realizes the dangers of careless saving of geranium stock. The finest lot of geraniums in his houses was a lot saved and marked "sold" and these were the ones for his own propagating purposes. He has the right idea.

Among the many New York state florists building or planning to build are Mohawk Greenhouses, Schenectady; Frank Hotaling, Amsterdam; Fred A. Danker, Albany; and George Nagengast, proprietor of the Flowerdale Greenhouses, Albany.

Henry Schrade of Saratoga Springs, N. Y., has had wonderful spring business. His three sons each fit into his individual department, store, greenhouse, and perennial and nursery stock, and are carrying on a prosperous business in a way that promises well for the future. They have a heavy call for window and porch boxes, and deserve high praise for the quality of their boxes. Large quantities of ferns are used, and a Schrade box spells quality.

L. C. Stroh & Sons, of Batavia, N. Y., have a new rose house recently erected for them by the American Greenhouse Co., of Chicago, and are particularly pleased because they got it finished early enough to give them a good start with their roses for the coming season. The new house is entirely in keeping with the balance of their up-to-date establishment.

An explosion in a factory at Acton, Mass., recently broke some forty lights of glass in the big greenhouse of Leonard Cousins at Concord Junction. Soon after, however, a check came along at the rate of a dollar for each light broken, which was equal to insurance. It wasn't very pleasant, however, to be obliged to take the time from a busy season to set the glass. All in all, though, it has been a pretty good Spring for Mr. Cousins. Early in the season he decided to grow his carnations in a different location this year and chose a somewhat high spot near the greenhouses. With the great amount of rain that has fallen the spot has proved an ideal one and the plants are in splendid condition. Mr. Cousins has also had a good pansy crop and for some days past has been busy picking seed. He says that the yield this year has been a large one and if reports are true he has sold seed at excellent prices.

Scott, the Florist, has developed one of the handsomest stores in Providence. While it is not very large or very pretentious, it contains suggestions for many other florists who are seeking to make the interiors of their stores attractive. A lightly built pergola extends entirely across the store opposite the entrance, and merges at one end into a recessed grotto where there is a desk, lights and writing material. All the wood work is finished

LILIUM REGALE

in white, and the effect is most satisfactory. Mr. Scott has found an opportunity to do a large amount of planting for customers, and fills a great many window boxes. This is a line of work which can be developed to great advantage by florists having a location in suburban or residential communities.

Macnair, the Florist, of Providence, who has been in business for many years and now owns two stores, is a great believer in the advertising value of electric lights. For several years he has kept his store fully illuminated until two o'clock in the morning, when the lights are turned out by an automatic device. Mr. Macnair believes that this nightly display is worth as much to him as newspaper advertising. His store is situated in a section of the city where thousands of people pass it every night, and the bright glare coming through the many windows makes it stand out with remarkable prominence from all the surrounding stores which are in darkness. People get accustomed to looking into the windows at night, and as they constantly encounter the name, that name remains in their memories to serve its purpose whenever for any reason they feel the need for flowers.

Regal lilies coming into the Boston market have been taken up quickly. Of course, it is impossible to say what the demand would be should any large quantity be available. As it is firms like Carbone, which appeal to the most select trade, are finding it well worth carrying and are eager for the flowers. I believe that the demand will keep ahead of the supply. I understand that the lily is not taking very well in New York, but it has not been offered in sufficient quantities and in low enough prices to give it a fair test as yet. It certainly has the qualifications of a florist's flower.

What has become of all the large palms? There seems to be no one in New England who can supply them, and I am continually being asked if I know of any private growers from whom they can be obtained. One wholesaler remarked the other day that any palms which should happen to get into his place would be sold before he could turn around.

The Rosary Garden Shop, of Elmira, N. Y., is to be moved into a new building on North Main Street. The interior of this store is to be of special and attractive design.

# NURSERYMEN IN CONVENTION

**Officers Elected**

**President, Paul C. Lindley, Pomona, N. C.**

**Vice President, Harlan P. Kelsey, Salem, Mass.**

**Secretary, Charles Sizemore, Louisiana, Mo.**

**Treasurer, J. W. Hill, Des Moines, Iowa.**

**Directors, William Flemmer, Jr., J. L. Mays of Lewisburg, Tenn.**

Except for a hall which was too small and rather difficult to do business in and for somewhat unsatisfactory hotel accommodations, the convention of the American Association of Nurserymen at Detroit, June 28-30, was highly successful. The attendance was large, many important matters were considered and Pres. M. R. Cashman put the business grist through the convention mill at a rapid rate of speed.

The convention was made notable by drastic action taken in the cases of three firms charged with discreditable practices, such as sending out diseased or misnamed stock, misrepresentation, unfair dealings and failure to make restitution in certain instances. All of these charges were not made against one single firm, but were included in the general list.

The vigilance committee had reported adversely on these firms to the executive committee, which had concurred and submitted the matter to the entire convention. It was voted to expel these nurserymen from the association: Glen Bros. Nursery, Rochester, N. Y.; Leamon G. Tingle, Pittsville, Md.; Whiting Nursery, Geneva, N. Y. It was also voted that Orlando Harrison of Berlin, Md., be reprimanded for sending out nursery stock with root gall or other diseases. It was stated, in Mr. Harrison's case, that his offenses were believed not to be intentional, but due to carelessness on account of his being away on other business.

There was a lively race for the next convention. The South wanted it badly and bids were made by Hot Springs and West Baden Springs, but it was soon evident that the contest lay between Chicago and Des Moines. Delegates from the latter city came armed with invitations from the governor, the mayor and other prominent people, but Chicago finally won although by only eleven votes.

The election of officers with the result given above was very satisfactory. New England was glad to be represented by Mr. Kelsey, whose work on the nomenclature committee was warmly commended. Mr. Flemmer, elected to the executive committee, represents the younger element in the association. The new president is widely known as a man of ability, tact and energy.

The banquet was a feature of the convention and the entertainment, in charge of a committee directed by Paul V. Fortmiller of Jackson & Perkins, was unusually enjoyable.

The program of the convention was carried out practically as outlined in a previous issue of Horticulture and some excellent papers were given.

The nurserymen from New England who were present included Richard Wyman of Framingham, Donald Wyman of North Abington, Harlan P. Kelsey of Salem, A. E. Robinson of Lexington, John Kirkegaarde of Bedford, Edward Borst of Framingham, Walton G. Wyman of North Abington, C. R. Burr and Mr. Harris of Manchester, Conn., and W. E. Campbell of New Haven.

## IS THIS THE OLDEST PEONY?

Many people believe that the oldest peony in the country is to be found on the farm of J. B. Lord, in Parsonsfield near Biddeford, Me. The original root was taken to that town in 1778 from Methuen, Mass., by Mrs. Judith Moulton, who carried it on horseback. She planted the root in a clearing made by her husband where a log house was built and according to the reports of local residents the plant has blossomed each year ever since.

**IRIS AND PEONIES**

Having a large stock of the following Iris will quote special prices for early delivery as I wish to clear the ground:

**Darius, Dr. Bernice, Halfdan, Ingeborg, Loreley, Mme. Chereau, Mithras, Mrs. G. Darwin, Mrs. H. Darwin, Sherwin Wright, Walhalla, Walneriana.**

Ask for price list and see what my customers say about the service they receive. Thank you.

**GEO. N. SMITH, Wellesley Hills, 82, Mass.**

# THINKING OVER THE PEONY SHOW AT LONDON, ONT.

Mr. Lee R. Bonnewitz was in England at the time of the recent International Peony Show at London, Ontario, but his representatives have issued a bulletin reviewing the show and giving the impressions of Dr. J. H. Neeley of Paulding, Ohio. Among many things Dr. Neeley says:

"Mr. Casselman and Mr. Middleton of the Reception Committee met us at the station and very kindly assisted us to the Armories where the Show was to be held. There we opened our packages, put our peony blooms in water for the night, and learning that W. H. Thurlow had brought a refrigerator car full of blooms that would be delivered early in the morning, we went to our hotel and to bed, determined to be up by daylight in order to miss no part of the day's show.

"True to my resolve I was back to the Armories by five o'clock, only to find myself the first arrival of the day. The watchman asked if I were an American, and was apparently satisfied with my answer, for he soon afterwards left the building in my charge and went away. Hardly had he gone when a covered dray drew up to the back door and the unloading of the Thurlow exhibit was on.

"Mr. Thurlow, in his very pleasing manner, informed me that he had brought with him to the Show some four thousand blooms, that in the shipment were more than two hundred varieties, and that he had partitioned the car into compartments, each large enough to hold one of the stone jars in which the peonies were carried. As I watched his men filing by with the heavy jars full of blooms, I knew that whoever outclassed him that day in the Show would have to step some.

"While his several truck loads of blooms were being brought in, I passed the time studying the numerous other collections on hand, particularly the methods of the various growers in keeping and packing their flowers intended for the Show. Many had permitted the buds to become fully expanded before cutting, and in packing had merely rolled the blooms tightly in tissue paper. Some had given no protection at all, carrying the blooms loose in water. One large collection had been cut when the buds were about half open and then laid on a clean, dry basement floor to await exhibition time.

"I recalled that the late John M. Good had recommended this method, and I knew from experience that it would work, but as I looked upon the withered stems I could not but wonder whether flowers so treated would not revive too slowly for the hurry of the Show. The next few hours proved my fears were well grounded.

"The blooms from the Gardens of Lee R. Bonnewitz, Van Wert, Ohio, brought and exhibited by Paul Bonnewitz, a nephew of Lee R. Bonnewitz, had been labeled and sacked in the field, cut as soon as the buds showed expansion and placed in water in cold storage. After being thus held for nearly two weeks they had been taken out of storage on Wednesday morning, June 14th, and packed in pasteboard boxes (corset boxes being used), two blooms to each box.

"They had been carried more than three hundred miles to the Show, unpacked after thirty-six hours from storage, and yet when the stems were put again in water and the bags removed, the flowers, with scarce a bruise, opened out almost perfectly with a loss in number of less than ten per cent. The labels, placed on them in the field, went later right into the Show, thus saving much time and eliminating entirely the danger of getting varieties mixed. This is a method which seems to me worthy of further trial.

"For the first time in the history of the Society an admission fee was charged. This seemed to stimulate, rather than reduce, attendance, especially as it was known that the money received was to go to the War Orphans' Memorial Hospital Fund which the good women of the city are financing. Light refreshments were served by the same organization, and it was not deemed at all improper to nibble an ice cream cone and enjoy the flowers at the same time."

## PEONY NOTES

Mr. W. A. Peterson of Peterson's Nurseries, Chicago, believes in advertising which will make the general public familiar with the peony in its various lovely forms. He distributed a great many blooms this year in a way which will be to the advantage of the entire trade.

Mr. T. F. Donahue of Newton Lower Falls, Mass., was one of the prominent amateurs at the London convention and had some excellent flowers. He won second instead of third prize as given out in Class No. 30. His peony garden has won a wide reputation.

It is understood that Dutch interests have purchased land near Victoria, B. C., and will introduce the bulb growing industry there.

Albert Haas, the florist of College Point, N. Y., was recently married to Miss A. Frazen of Sound Beach, Conn. The couple have been enjoying a honeymoon at Atlantic City.

Page and half page space, not consecutive, rates on application.

SUBSCRIPTION RATES:

One Year, in advance, $1.00; To Foreign Countries, $2.00; To Canada, $1.50.

**Why Not Sell Books?** Is there any reason why florists should not sell books? Many of them already handle a long line of articles which are not of a floral nature, although associated perhaps in some ways with flowers. Garden ornaments, seats, baskets, vases, gold fish and aquariums, birds and bird cages are among the miscellaneous materials which are found on sale in florists' shops.

To be sure, there are men in the business who claim that none of these things have a rightful place in a store which is established to retail flowers. Nevertheless, there are few flower stores in which something besides flowers is not sold. Not long ago we found an attractive line of gift cards in a well kept flower shop and they did not seem out of place. They were the kind of cards which might well accompany a gift of flowers, and we have no doubt that many patrons of the store were glad to find them there.

Now there are books almost without number on gardens and the making of gardens. There are other books, although fewer in number, about the care of house plants. And there are a few books which discuss the arrangement and handling of cut flowers. It seems to us quite fitting that books of this nature should be offered in a store where flowers and garden materials are sold. It is not unusual for a customer to ask that a book of the kind mentioned be recommended. Sometimes questions are asked which might readily be answered from such a book.

Of course, no great amount of space should be used. It would not do to turn the florist's store into a book shop. A few books, however, perhaps held in position by book ends, might have a place on a table. Or a book case of the trough variety, which holds the books so that the backs with the titles are uppermost, might be given a prominent position near the door. We believe that the experiment would be a profitable one, at least during the Spring and Summer months.

---

**Kansas City** It is to be hoped that a large number of florists from the Eastern states are planning to attend the convention of the S. A. F., at Kansas City in August. Without doubt there will be a very large attendance from the West, and it should be realized that this is an additional reason why the Easterners should go. When East meets West, the results are sure to be beneficial in many ways. Kansas City will have a royal welcome for the visitors. Her florists are a live lot of people and they will be on their mettle until the convention is over.

There will be no lack of entertainment, but what is of more importance, there will be no lack of worthwhile, money-making business ideas. Delegates need have no fear for lack of accommodations. Neither need they be afraid of the weather conditions. It is going to be a big, broad, breezy convention, and one not to be missed if attendance is possible. That plan originated in New York to have a Great Lakes excursion in connection with the convention sounds good, too. It will make an ideal vacation trip.

---

## EDITORIAL BRIEFS

There is nothing slow about the Dutch florists, as many American florists have already learned. Their latest achievement is the shipping of flowers by aeroplane. The American trade commission at The Hague sends word that the blooms are cut at night, packed early the next morning, sent by motor car to the aerodrome near Rotterdam and put aboard the airship. They reach England at half past one, and go immediately to the London florists by motor car. With this arrangement, Boskoop flowers are put on sale simultaneously in Dutch and London shops.

---

"Woolgatherer" in the Florists' Exchange had his wits about him when he criticized a contribution relating to the origin of the rambler rose. Mr. Rust in his letter set the matter right, but now comes an English friend of the rose who points out one or two slight errors in Mr. Rust's letter. Such an interchange of opinions is well worth while. It helps to bring out the whole truth about a matter.

---

It may be that we shall be buying many of our bulbs from Canada instead of from Europe in years to come. It appears that a number of Dutch farmers now in the East Indies are seeking for a settlement in British Columbia, where they believe the soil and climate to be suitable for the development of a big bulb industry.

# THE GLADIOLUS TRADE

## Forcing in Cold Frames Profitable—Mansfield Quarantined

Forcing gladiolus in cold frames for early sales seems to be entirely feasible. The Saunders Gardens in No. Scituate, R. I., have had very good success this year. On March 19, 2,500 bulbs were planted in frames, and the first cut was made June 18. The first gladiolus to bloom was Pink Beauty. Other kinds planted were Pearl, Halley, Pink Progress, Lily White and some of the Primulinus hybrids. The crop from the Saunders Gardens is sold almost entirely in Providence. A light truck is used for making deliveries, so that orders can be filled very quickly.

Apparently gladioli are coming along a little later this year than last season. The first flowers appeared about the first of July last summer, but in many sections are at least three weeks later this year.

Although only three specimens of corn borer are said to have been found in Mansfield, Mass., the entire town has been quarantined. This, of course, is unpleasant news for the Mansfield growers, many of whom ship to the Boston market. Foxboro, the adjoining town, is outside the quarantine, so that flowers can be shipped from there without a permit. There is always a difficulty, though, because with so many quarantines there is danger that people who buy by the roadside will have their flowers taken away from them in any event. It may be, though, that the Foxboro growers will be able to use a tag of some kind giving them immunity.

Of course there will be no difficulty in sending cut flowers from Mansfield to the Boston market, as both places are in the quarantine district. The difficulties of the wholesalers and shippers in Boston will be increased, though, because the flowers cannot be sent to any place outside the district without special permits. A lot of extra labor is involved. The quality of the flowers coming from Mansfield is so high that several of the buyers in Boston began to bid for the blooms long ago.

### PACKING IRIS BUDS IN COTTON

Irises are difficult flowers to exhibit in good form. It is almost useless to go out into the garden and cut a number of flowering spikes, for it is impossible to carry them to the exhibition without crushing and mangling the flowers beyond recognition. Yet this is possibly the only method of dealing with large numbers of varieties and stems. Another drawback of the method is that the flowers which develop later from buds are always undersized when they open after the stems have been cut some forty-eight hours or even longer.

A writer in the Gardener's Chronicle (England) says: "There is another and somewhat laborious method, which is to choose only stems on which fully developed buds are about to open and to tie these buds with wool before cutting the stems. These can then be packed much more closely and the buds should open into perfect flowers as soon as the wool is cut, when the stems are placed in water on their arrival. It is best to cut the stems in the late afternoon, and to put them in water for some hours before they are packed for the journey."

The beautiful estate of Mrs. L. M. Sargent at Prides Crossing, Mass.

R. E. Jones, Gardener, and A. F. Christianson, Assistant Gardener, on the Mrs. L. M. Sargent estate

# "Trees have shown a wonderful response"

## —*the tribute of Sargent Estate Gardeners to Davey Tree Surgery*

Prides Crossing, Mass.

The Davey Tree Expert Co., Inc.,
Kent, Ohio.
Gentlemen:

The trees on Mrs. Sargent's estate have been well taken care of during the past four years by experts furnished by The Davey Tree Expert Co., and we heartily recommend the Davey Co. to any one desiring honest, conscientious tree service. The trees on this estate have shown a wonderful response to the treatment rendered by Davey's skilled experts, and we have every reason to believe that numbers of years have been added to the lives of some of our trees which under less skillful care would have been lost.

Sincerely Yours,
Raymond J. Eland, *Gardener.*
Carl F. Christianson, *Ass't Gardener.*

An example of sectional filling work done by Davey Tree Surgeons on the Mrs. L. M. Sargent estate

Every gardener and estate superintendent has a most important work in the saving of trees under his care.

Davey Tree Surgery brings to his aid the highest development of science plus a generation of experience. A careful examination of your trees will be made by appointment.

THE DAVEY TREE EXPERT CO., INC., 4107A Elm St., Kent, Ohio

Branch offices with telephone connections: New York, Astor Trust Bldg., Fifth Ave. and 42nd St.; Boston, Massachusetts Trust Bldg.; Philadelphia, Land Title Bldg.; Baltimore, American Bldg.; Pittsburgh, 331 Fourth Ave.; Buffalo, 110 Franklin St.; Cleveland, Hippodrome Bldg.; Detroit, Arcadia, Motors Bldg.; Cincinnati, Mercantile Library Bldg.; Chicago, Westminster Bldg.; St. Louis, Central National Bank Bldg.; Kansas City, Scarrit Bldg.; Montreal, 252 Laugeuchitere, West.

Davey Tree Surgeons are near you—if you are between Boston and Kansas City. They are easily available and handle operations of any size, large or small. Write or wire Kent, or nearest office.

JOHN DAVEY
Father of Tree Surgery

# DAVEY TREE SURGEONS

Every real Davey Tree Surgeon is in the employ of The Davey Tree Expert Co., Inc., and the public is cautioned against those falsely representing themselves. An agreement made with the Davey Company and not with an individual is certain evidence of genuineness. Protect yourself from impostors. If anyone solicits the care of your trees who is not directly in our employ, and claims to be a Davey man, write Headquarters for his record. Save yourself from loss and your trees from harm.

## BOSTON OUTDONE

### Gude Brothers Co. Have 116 Shower Bouquets in One Order

Gentlemen:—

On page 295 of Horticulture under date of June 26, 1922, we find an item "Twenty Three Showers in One Order" of white and lavender peas.

It might be interesting for you to know that on May 29th we furnished one hundred and sixteen shower bouquets in one order for the graduation of National Park Seminary, all of white and lavender peas, and to assure you that they are pleased with our work is the fact that we have been furnishing these for more than ten years, never less than seventy-five and on one occasion as high as one hundred and twenty-three. The one hundred and twenty-three shower bouquets were made of red roses.

In addition to furnishing the one hundred and sixteen shower bouquets for the one order, we had several other commencements on the same day, in addition to which we furnished one hundred and forty two wreaths with thirty or more flowers in each for the District of Columbia Firemen's graves. This in addition to several hundred wreaths for Arlington Cemetery on the following day, anad our regular Decoration Day business and numerous commencements which were not small by any means.

So from the above it will be seen that there is some business in Washington as well as in Boston.

Very truly yours,
GUDE BROTHERS COMPANY.

## RAMBLER ROSE ORIGIN

### Mr. Brunton Comments on David Rust's Letter

Dear Sir:—

When I read the statements regarding the origin of rambler rose, May 25th, page 245, I was inclined to write but allowed the opportunity to pass. On June 10th, page 269, David Rust puts matters in a truer light. Three of the four persons named by David Rust I personally knew and can vouch for the statements regarding origin. I saw the rose in its early days at Edinburgh, Scotland, Dyke, Lincolnshire, England, and at Slough, England.

There are one or two misstatements on page 269, hence this note. "Mr. Jeuner in England" should read "Mr. Jenner in Edinburgh, Scotland." I believe David Rust, like myself, has Scottish blood in his veins, and he will agree with me that an injustice to Scotland should not be allowed to pass unnoticed. Mr. Jenner was an amateur horticulturist with a very remarkable collection of rare plants.

J. S. BRUNTON,
Barnsley, England.

RAIN WHEN YOU WANT IT

A Lifetime Dry Weather Insurance

A lifetime insurance against dry weather crop losses, that's exactly what the Skinner System of watering is.
When your crop is cut short, because of dry weather, it costs you money.
Costs you real money. The Skinner System of watering not only insures crops like asters, carnations, cannas, gladioli and dahlias, but it greatly improves their quality and surprisingly multiplies the quantity.
Don't think you have to buy a big, expensive equipment. You can have a Portable sectional line 50 feet long, that waters 2500 square feet, for even so little as $19.75. Or a 200-foot Portable line that waters 10,000, for $79.75. Four moves of it waters a whole acre. Two men can set it up in 20 minutes, hook on the hose and the watering starts. Just as easy to take down and move.
Can ship at once.
Lower price equipment gladly quoted.

The Skinner Irrigation Co.
100 CANAL STREET TROY, OHIO
SKINNER SYSTEM OF IRRIGATION

## SWEET PEA SHOW

While it is true that at the Sweet Pea Show held by the American Society in Boston, June 24 & 25, was very small compared with many previous exhibits, it can not be said that the sweet pea has lost its popularity, or the members of the society their enthusiasm. Conditions have been unfavorable for the last few years, but the sweet pea remains one of the most popular of flowers. One thing is true, the quality of many blooms shown in Boston was remarkably good. As was to be expected all the officers were re-elected, and it was voted to hold the annual meeting and show in Boston next year. Mr. W. A. Sperling of New York, re-elected as president, said that he expected to see the sweet pea make rapid development, and believed that the Society would soon regain much of its old time prominence.

## ACID PHOSPHATE FOR FLOWERS

Much new information is being obtained about the value of acid phosphate in growing flowers, as well as vegetables. In a recent talk, Prof. P. A. Lehenbauer of the University of Illinois spoke about experiments made at his station, showing the great value of this fertilizer for greenhouse roses. He said: "No fewer than 1,152 rose plants were dealt with in the trial, and those treated with acid phosphate gave an increased production of slightly over three blooms per plant. This increase of 4,800 flowers was produced at a cost of $5.60 for the fertilizers." It was claimed, also, that the average stem length of each variety was slightly increased, which is of especial value in the case of roses grown for market. Experiments with two varieties of carnations showed similar results, although the increase was not quite so large, the additional flowering being just over one bloom per plant. Acid phosphate can be applied in the soil before planting in quantities sufficient for the entire growing season, for it is not readily washed out of the ground."

# BURPEE'S SWEET PEAS

The Burpee Early Flowering Sweet Peas are recognized as leaders in their various colors and they are grown extensively by all florists who demand the very best.

The careful hybridization work carried on at Burpee's Fordhook Farms in Pennsylvania, the growing of the seed crops on Burpee's Floradale Farms in California, and our extensive indoor and outdoor trials give us a unique opportunity to supply the florists with the very best that can be had in Sweet Peas. Everything possible is done to insure the quality of Burpee's Sweet Peas.

## NOVELTIES

**BURPEE'S ORANGE.** In every way a beautiful variety of true glowing orange self with standard and wings of immense size. Awarded Certificate of Merit at the International Flower Show, New York, March, 1921. Trade Packet **$1.00**; oz. **$5.00**; ¼ lb **$15.00**; lb **$50.00.**

**CHEERFUL.** The large pinkish cerise flowers are an entirely new shade in the Early or Winter Flowering Sweet Peas. The flowers are of enormous size and excellent form. Awarded Certificate of Merit at the International Flower Show, New York, March, 1921. Trade Packet **$1.00**; oz. **$5.00**; ¼ lb. **$15.00**; lb **$50.00.**

**SUNBURST IMPROVED.** The color is a pleasing and attractive shade of rich salmon-pink. The large flowers, which are borne on long stems grow vigorously and bloom freely. Oz. **$1.00**; ¼ lb **$3.00**; lb. **$10.00.**

**MRS. WARREN G. HARDING. "The Harding Blue."** A deep shade of silvery blue, pure throughout with no suspicion of mauve or rose. The flowers are immense in size with a broad and much frilled standard. Trade Packet **50 cts.**; oz **$2.50**; ¼ lb **$7.50**; lb **$25.00.**

**MRS. KERR. "The Best Early Flowering Salmon."** Mrs. Kerr has created a sensation whenever exhibited as it is a flower of wonderful size in a most popular shade of clear and rich salmon. Trade Packet **50 cts.**; oz. **$2.00**; ¼ lb. **$6.00**; lb. **$18.00.**

**WHITE STAR.** A first-class black-seeded white without any suspicion of pink or other coloring. Beautiful, large flowers borne in fours on long stems. Trade Packet **50 cts.**; oz. **$2.00**; ¼ lb. **$6.00**; lb. **$18.00.**

## WHITE

**IMPROVED SNOWSTORM.** The flowers are very large, of excellent form, and pure white in color. Oz. **80 cts.**; ¼ lb **$2.10**; lb. **$8.00.**

**EARLY SANKEY.** A black seeded white which was awarded a Special Silver Medal. Oz. **60 cts.**; ¼ lb **$1.80**; lb. **$6.00.**

## CREAM

**LEMON BEAUTY.** A pale lemon-colored variety with standard and wings softly tinted amber. Oz. **$1.00**; ¼ lb. **$3.00**; lb. **$10.00.**

**PRIMROSE BEAUTY.** Deep primrose flushed with rose. Grown under glass this variety attains a height of only 5 to 6 feet. Oz. **50 cts.**; ¼ lb. **$1.50**; lb. **$5.00.**

**CANARY BIRD.** A splendid rich deep cream with flowers of great size beautifully waved and borne four on a stem. Oz **50 cts.**; ¼ lb. **$1.50**; lb **$5.00.**

## PICOTEE

**DAINTINESS.** A strong grower with flowers of largest size. Pure white edged with rose. Oz. **60 cts.**; ¼ lb. **$1.80**; lb. **$6.00.**

**EXQUISITE.** The ground color is a soft shade of primrose picoteed with deep rose-pink. Oz. **50 cts.**; ¼ lb. **$1.50**; lb. **$5.00.**

## CREAM PINK

**DAYBREAK.** A pleasing shade of rich rose-pink on cream ground, slightly suffused with salmon. Oz. **60 cts.**; ¼ lb. **$1.80**; lb. **$6.00.**

**RISING SUN.** Rose-pink on cream. A bright and most attractive flower. Grown under glass the plants attain a height of only 5 to 6 feet. Oz. **50 cts.**; ¼ lb **$1.50**; lb. **$5.00.**

## LIGHT PINK

**LOVELINESS.** The large flowers have a white ground, suffused soft pink and distinctly picoteed with rose-pink. Oz. **60 cts.**; ¼ lb. **$1.80**; lb. **$6.00.**

**PEACH BLOSSOM.** A large and distinct shade of pale amaranth-pink deepening toward the edges of the wings. Oz **$1.00**; ¼ lb **$3.00**; lb **$10.00.**

**SWEET BRIAR.** Color a lovely shade of pink throughout, with a soft suffusion of salmon or amber. Grown under glass this variety attains a height of only 5 to 6 feet. Oz. **60 cts.**; ¼ lb. **$1.80**; lb. **$6.00.**

## DEEP PINK

**CHEERFUL.** The very finest pink we have. Fully described under "Novelties." Trade Packet **$1.00**; oz. **$5.00**; ¼ lb **$15.00**; lb. **$50.00.**

**ENCHANTRESS.** A bright rose-pink, becoming deeper toward the edges of standard and wings. Large, well-waved flowers growing in fours on strong stems. Oz. **60 cts.**; ¼ lb. **$1.80**; lb. **$6.00.**

**PINK BEAUTY.** The color is a soft rose-pink on white ground, deepening toward the edges. Oz. **50 cts.**; ¼ lb. **$1.50**; lb. **$5.00.**

**ROSE QUEEN.** A pleasing shade of rich pink with a suffusion of rose. Blooms early and profusely. Oz. **60 cts.**; ¼ lb. **$1.80**; lb. **$6.00.**

## ROSE

**FORDHOOK ROSE IMPROVED.** A charming shade of rosy carmine with flowers of largest size borne in fours on long stiff stems. Oz. **50 cts.**; ¼ lb. **$1.50**; lb **$5.00.**

**ROSEBUD.** Beautiful large flowers of a bright shining rose with a suffusion of bronze throughout the standard. Oz. **50 cts.**; ¼ lb. **$1.50**; lb. **$5.00.**

**ZVOLANEK'S ROSE.** This is a widely known variety with large flowers and bold stems. Color a rich rose. Oz. **80 cts.**; ¼ lb. **$2.10**; lb. **$8.00.**

**SPLENDOR.** A magnificent deep rose self with a distinct white blotch at the base of standard and wings. Oz. **50 cts.**; ¼ lb. **$1.50**; lb. **$5.00.**

## CRIMSON

**EARLY KING.** The finest early flowering crimson with flowers of great size and perfect form averaging fully 2 inches in diameter. Oz. **60 cts.**; ¼ lb. **$1.80**; lb. **$6.00.**

**ROSY MORN.** A pleasing shade of rose with crimson-scarlet standard. Oz. **50 cts.**; ¼ lb. **$1.50**; lb. **$5.00.**

## ORANGE-SCARLET

**GLITTERS.** No variety we know of approaches Glitters in richness, brightness and live-fire effect. The large, bold flowers are rich orange-scarlet. Oz. **$1.00**; ¼ lb **$3.00**; lb. **$10.00.**

## ORANGE

**BURPEE'S ORANGE.** A glistening pure orange. Fully described under "Novelties." Trade Packet **$1.00**; oz. **$5.00**; ¼ lb. **$15.00**; lb. **$50.00.**

**ORANGE BEAUTY.** Glowing orange, suffused scarlet in the standard and softer colored wings. A free and early bloomer. Oz. **80 cts.**; ¼ lb. **$2.10**; lb. **$8.00.**

**FLAMINGO.** A particularly attractive and pleasing shade of light orange with a suffusion of bright salmon and orange-pink wings. Oz. **$1.00**; ¼ lb. **$3.00**; lb. **$10.00.**

## SALMON

**MRS. KERR. "The Best Early Flowering Salmon."** Fully described under "Novelties." Trade Packet **50 cts.**; oz. **$2.00**; ¼ lb **$6.00**; lb. **$18.00.**

**APRICOT.** Glowing deep salmon self with a faint suffusion of orange. Oz. **80 cts.**; ¼ lb. **$2.10**; lb. **$8.00.**

## CERISE

**FIRE KING.** Scorching cerise-scarlet of very largest size. Oz. **70 cts.**; ¼ lb. **$2.10**; lb. **$7.00.**

**GORGEOUS.** A charming soft salmon-cerise self of very good size. Oz. **60 cts.**; ¼ lb. **$1.80**; lb. **$6.00.**

**ILLUMINATION.** Glowing salmon-cerise with a suspicion of orange. Vigorous and strong. Oz. **80 cts.**; ¼ lb. **$2.10**; lb. **$8.00.**

**CHERRY RIPE.** A particularly bright and charming cherry or salmon-cerise. Oz. **60 cts.**; ¼ lb. **$1.80**; lb. **$6.00.**

## LAVENDER

**LAVENDER KING.** A rich, true deep lavender of large size and beautiful form. Oz. **60 cts.**; ¼ lb. **$1.80**; lb. **$6.00.**

**PRINCESS.** A vigorous grower of a lovely shade of soft lavender suffused with mauve. Oz. **70 cts.**; ¼ lb. **$2.10**; lb. **$7.00.**

**ZEPHYR.** This is a delightful shade of soft lavender. Oz. **50 cts.**; ¼ lb. **$1.50**; lb **$5.00.**

## BLUE

**MRS. WARREN G. HARDING. "The Harding Blue."** Fully described under "Novelties." Trade Packet **50 cts.**; oz. **$2.50**; ¼ lb. **$7.50**; lb. **$25.00.**

**BLUE BIRD.** A true self blue of large size carried on long stems. Oz. **60 cts.**; ¼ lb. **$1.80**; lb. **$6.00.**

**TRUE BLUE.** A charming shade of true blue. Strong and vigorous. Oz. **80 cts.**; ¼ lb. **$2.40**; lb. **$8.00.**

## DARK BLUE

**BLUE JACKET.** A rich navy blue self with flowers borne on long stems. Oz. **80 cts.**; ¼ lb. **$2.40**; lb. **$8.00.**

## MAUVE

**MAUVE BEAUTY.** The color is a pleasing shade of rosy mauve. Flowers large and well waved. Oz. **60 cts.**; ¼ lb. **$1.80**; lb. **$6.00.**

## PURPLE

**GLORIOUS.** An early-flowering Royal Purple. Oz. **50 cts.**; ¼ lb. **$1.50**; lb. **$5.00.**

## MAROON

**MAROON PRINCE.** Rich, glowing reddish maroon. The flowers are very large and beautifully shaped. Oz. **60 cts.**; ¼ lb. **$1.80**; lb. **$6.00.**

## ART SHADES

**FAIRY QUEEN.** A most pleasing pastel or art shade. Blush pink with pale salmon suffusion and dark veinings of rose. Oz. **60 cts.**; ¼ lb. **$1.80**; lb. **$6.00.**

## BICOLOR

**FAIRY.** Rich cream, the standard being suffused pinkish apricot. Oz. **60 cts.**; ¼ lb. **$1.80**; lb. **$6.00.**

**YARRAWA.** Bright rose-pink with clear cream base. Oz. **50 cts.**; ¼ lb. **$1.50**; lb. **$5.00.**

**FAVORITE.** Rosy pink standard and blush wings. Oz. **50 cts.**; ¼ lb. **$1.50**; lb. **$5.00.**

**FORDHOOK PINK AND WHITE.** Bright rosy pink standard; creamy white wings suffused rose. Oz. **50 cts.**; ¼ lb. **$1.50**; lb. **$5.00.**

**COLUMBIA.** The flowers have a bright rose-pink standard. The wings are a soft shade of rose on a cream ground. Oz **80 cts.**; ¼ lb. **$2.40**; lb. **$8.00.**

## STRIPED

**AURORA.** Rich orange-scarlet flakes on a white ground. Oz. **80 cts.**; ¼ lb. **$2.10**; lb. **$8.00.**

**COLUMBINE.** Rich rose flakes on a white ground. Oz. **50 cts.**; ¼ lb. **$1.50**; lb. **$5.00.**

**FANTASY.** Striped and marbled with rich rose-pink on a creamy white ground. Oz. **50 cts.**; ¼ lb. **$1.50**; lb. **$5.00.**

**HARLEQUIN.** Light heliotrope ground, striped and flaked deep chocolate and carmine. Oz. **60 cts.**; ¼ lb. **$1.80**; lb. **$6.00.**

## MIXED

**SUNRISE MIXTURE.** A carefully composed blend of the finest Early Flowering Specimens. Oz. **40 cts**; ¼ lb. **$1.20**; lb **$4.00.**

**SPECIAL MIXTURE OF LIGHT SHADES.** This contains only the light and delicate shades. Oz. **45 cts.**; ¼ lb. **$1.35**; lb **$4.50.**

**All the Burpee Sweet Peas will be sent postpaid at the prices listed above.**

## SHADING GREENHOUSES

### Result of Experiments Made at the Missouri Botanical Garden

In the last bulletin of the Missouri Botanical Garden there is an interesting account of experiments made in shading greenhouses. Much of the information obtained should be of benefit to growers in other sections. The article reads as follows:

Various preparations, such as mud spray, lime and salt spray, whitening, etc., all of which were costly and unsatisfactory as well as unsightly, have been tried for shading the greenhouses at the Garden. Until recently the formula used was: white lead, whiting, and shutter green, mixed with benzine to form a spray. The use of this preparation required over 300 gallons of benzine annually to cover the entire glass area, and the spray was both costly and unpleasant to apply. Frequently too much white lead would be used or the solution would not be sufficiently agitated and permanent splotches would result which it was necessary to scrape off for the winter season.

Recent experiments have resulted in a much cheaper and more satisfactory spray which will withstand heavy rainy periods but nevertheless will wash off by fall. Water is used instead of benzine and potassium bichromate and powdered glue are substituted for white lead. The following is the formula used, the shutter green being omitted if a white shade is desired:

| | | |
|---|---|---|
| Water | 1 | gallon |
| Whiting | 1 | pound |
| Shutter green (dry) | 2½ | ounces |
| Powdered glue | 3 | ounces |
| Bichromate of potassium | 1½ | ounces |

In preparation, the powdered glue and the potassium bichromate are dissolved by boiling in separate containers. The whiting is dissolved in cold water. The glue and bichromate of potassium should not be mixed with the water and whiting until just before using, and after mixing the solution should be kept from the sun to prevent premature setting or hardening.

This solution, after screening, will pass readily through a hand spray or barrel pump. At the Garden the small hand syringe is used in applying the spray to the small houses, and if a sharp jerky movement is used an even shade will result, but the ordinary movement produces an irregular shade. In spraying the large conservatories the power spray supplied with Bordeaux nozzle is used to advantage.

## ARGEMONE MEXICANA

Among the wild flowers of California which we have raised successfully at Hillcrest is the beautiful Argemone or Pricklepoppy. Last season we planted it in the bed with our Feijou, where it seeded itself and has made strong plants this season. These self-sown plants are stronger than the ones from the cold frames.

The shape of the leaves suggests the Acanthus of the Corinthian columns. They are beautifully veined with a lighter shade of green, but their many thorny prickles would render them a nuisance in our fields and orchards if they were allowed to naturalize there.

The light yellow or white blossoms form shallow cups, two inches or more across, being larger than those of the celandine or bloodroot to which they are related. The Argemone is an immigrant from Mexico and gives a pretty tropical effect to our gardens, but it should be kept under control.

M. R. CASE.

Hillcrest Gardens,
July 2nd, 1922.

A large greenhouse is being erected on the property of Frank Herron at Norristown, Pa.

## McMANMON SELLS RETAIL STORE

John J. McManmon, one of the best known florists in Lowell, Mass., has sold his retail business to John J. Maloney, another Lowell business man. The transfer has aroused considerable interest, as Mr. McManmon has carried on his retail business for thirty years. Mr. McManmon will continue his nursery and wholesale work, and Mrs. McManmon, who has spent most of her time in the store of late years, will have more leisure. For some years Mr. McManmon has been developing his nurseries on the Lawrence road, and will now devote all his time to that branch.

## NEW ROSE GARDEN AT NEW HAVEN

A new and elaborate rose garden is being laid out in East Rock Park, New Haven, Conn. It will contain an acre and a half. Trellises will be erected over the walks leading to the center of the garden and climbing roses will be grown on them. In many ways the garden will be similar to the one at Elizabeth Park, Hartford, and will include a large number of standards. It is expected that this new rose garden will be one of the finest in the country.

# RAMBLING OBSERVATIONS OF A ROVING GARDENER

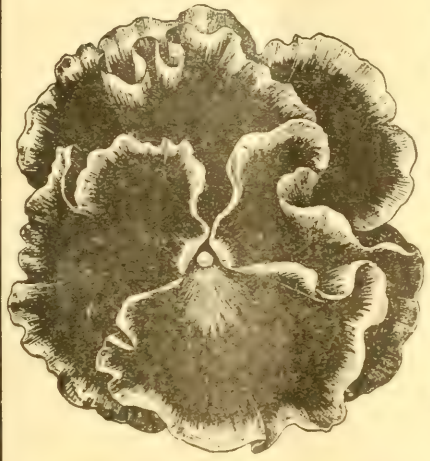
This has been a wonderful year for climbing roses and especially for certain varieties. I have never seen Silver Moon flower so freely and Dr. Van Fleet has done extremely well. Climbing American Beauty, while lovely when it first opens, soon turns purple. If it dropped its petals quickly like Christine Wright, this would not be such a serious fauts, but on the contrary it holds them with a persistence which is aggravating. I am sorry that this is so, for Climbing American Beauty blooms very early and is exceptionally hardy.

Without a doubt Paul's Scarlet Climber has proven itself the finest red in its class. In fact, one can almost put it in a class by itself. It keeps its color remarkably well, it has a long blooming period, it is excellent for cutting, its foliage is good and it flowers freely. What more can be asked of a rose? I imagine, though, that it will never grow very tall. Probably eight feet will be about the limit.

For covering a post I have yet to find anything equalling Excelsa, and for training over an arbor nothing beats American Pillar. In point of fact, American Pillar is obviously the favorite with everybody who comes into my garden. This year it made a wonderful showing. Aunt Harriet, which Conard & Jones also put out, was the first climber to flower in my garden this season, barring a pink variety from the late Jackson Dawson and which he called, I think, Mayflower, because of its early flowering habit.

The season closed with the flowering of Dorothy Perkins and its sport Elizabeth Ziegler, which I obtained from A. N. Pierson, Inc. This last named rose is the best of the smaller flowering pink varieties in my estimation. The blooms are borne in great clusters and with the utmost freedom, while they have a curious crinkled appearance which is delightful. It is a rose worthy of wide distribution.

A rose which I saw growing at Dr. E. K. Butler's place in Jamaica Plain, Mass., pleased me very much. It is called Graf Zeppelin, and looked extremely well growing on bamboo stakes in the fashion which Dr. Butler has adopted for all his climbers.



---

Rose bugs are curious creatures. In some localities they have hardly been seen at all this season. In others they have appeared in swarms. I have been interested to get reports on the success of Meltrosine in dealing with these pests. I have been told that results

THE CLIMBING ROSE SILVER MOON

# The KENILWORTH Giant Pansy Seed

No.

28. **GIANT MASTERPIECE.** A remarkable type, the curled wavy petals giving the flower a double appearance; large flowers of great substance, on long, strong stems. Trade pkt., 45c; 1-8 oz., $1.10; ¼ oz., $2.00; ½ oz., $3.80; 1 oz., $7.50; 4 oz., $27.00.

30. **GIANT THREE AND FIVE BLOTCHED.** The petals being distinctly marked with three or five large, dark blotches. Trade pkt., 40c; 1-8 oz., 90c; ¼ oz., $1.65; ½ oz., $3.10; 1 oz., $6.00; 4 oz., $21.50.

32. **GIANT PARISIAN.** The flowers are of enormous size and beautifully marbled, mostly five dark blotches on white and yellow grounds; an unusually showy mixture. Trade pkt., 40c; 1-8 oz., 90c; ¼ oz., $1.65; ½ oz., $3.10; 1 oz., $6.00; 4 oz., $21.50.

31. **GIANT BRONZE.** A fine mixture of all shades of velvety brown bronze, Havana brown, mahogany and copper shades. Trade pkt., 40c; 1-8 oz., 90c; ¼ oz., $1.65; ½ oz., $3.10; 1 oz., $6.00; 4 oz., $21.50.

36. **TRIUMPH OF GIANT.** The plants are of a robust growth and form compact bushes of a round shape. Trade pkt., 40c; 1-8 oz., 90c; ¼ oz., $1.65; ½ oz., $3.10; 1 oz., $6.00; 4 oz., $21.50.

10. **GIANT BATH'S EMPRESS.** The finest of fancy English Pansies. Trade pkt., 45c; 1-8 oz., $1.10; ¼ oz., $2.00; ½ oz., $3.80; 1 oz., $7.50.

70. **ORCHID-FLOWERED, Mixed.** A dwarf, free bloomer, with a range of delicate colors that do not exist in any other Pansies, a remarkable combination of light rose, shell pink, blush mauve, fawn, light brown, orange and chamois. Trade pkt., 35c; 1-8 oz., 75c; ¼ oz., $1.35; ½ oz., $2.60; 1 oz., $5.00; 4 oz., $18.00.

## New Early Flowering Giant Pansies

They are three to four weeks earlier than other Pansies in coldframes or beds, each plant bearing four or five large blossoms, when other Pansies planted at the same time are only showing bud. The richly colored, large, wavy edged flowers on stiff stems are very fragrant.

**TRY SOME AND YOU WILL BE SATISFIED**

4. **Jove.** Lower petals violet, upper one light blue.
5. **Mars.** Cornflower blue.
6. **North Pole.** Pure snow white.
7. **Woden.** Quite black.
8. **Helios.** Pure yellow.

10. **KENILWORTH GIANT EXHIBITION** is the very finest complete mixture ever sold. Seed carefully saved only from mother plants of the best varieties and the largest and best colored flowers are selected originally. It is impossible to convey an adequate idea of the delightful variations in color and markings of this unrivaled mixture. Trade pkt. 60c; 1-8 oz. $1.35; ¼ oz. $2.60; ½ oz. $5.00; 1 oz. $10.00; 4 oz. $37.00.

12. **KENILWORTH GIANT PRIZE.** The enormous flowers are of perfect form and of great substance. Petals undulated and ruffled. They are of the richest markings and many shades, some flowers being almost self-colored. Trade pkt. 60c; 1-8 oz. $1.25; ¼ oz. $2.40; ½ oz. $4.60; 1 oz. $8.50; 4 oz. $32.00.

19. **TRIMARDEAU GIANT PANSY,** improved. It is the largest and finest strain of Trimardeau that is sold. It is a very large flowered race of Pansies, compact growth. Flowers of immense size, of perfect form, beautifully ruffled, fringed, margined, etc. Trade pkt. 45c; 1-8 oz. 75c; ¼ oz. $1.45; ½ oz. $2.80; 1 oz. $5.00; 4 oz. $18.00.

20. **PRINCESS, the New Upright Pansy.** This strain is entirely distinct from all others. It is a dwarf, very compact grower. The flowers are massive, blotched and bi-colored and the Masterpiece of novel form and variety ever tested. Every strain carried was grown true to type and characterized by the brilliancy of its colors. Trade pkt. 40c; 1-8 oz. 90c; ¼ oz. $1.65; ½ oz. $3.10; 1 oz. $6.00.

22. **GIANT KENILWORTH STRAIN.** The flowers are of perfect form and substance, many of the immense flowers are 3 inch. It is a strain of exceptional beauty, blue colors and markings, dark with masses of red in many of the markings and many others too beautiful to mention. Light tones of every kind. Trade pkt. 40c; 1-8 oz. 90c; ¼ oz. $1.65; ½ oz. $3.10; 1 oz. $6.00; 4 oz. $21.50.

24. **GIANT KENILWORTH SHOW** is generally the largest flowered Pansy in the world, the immense flowers are of circular form. A beautiful succession of colors and markings. Trade pkt. 40c; 1-8 oz. $1.10; ¼ oz. $2.00; ½ oz. $3.80; 1 oz. $7.50; 4 oz. $27.00.

26. **GIANT KENILWORTH CUT FLOWER MIXTURE.** Is a distinct race by itself surpassing all other strains as a cut flower for the size of blooms and long stems. Flowers are carried erect above the foliage on long stems and are among the most graceful in shape and stand the hot, dry weather well. Trade pkt. 35c; 1-8 oz., $1.10; ¼ oz., $2.00; ½ oz., $3.80; 1 oz., $7.50; 4 oz., $27.00.

11. **Winter Sun.** Golden yellow, with dark eye.
15. **Ice King.** Silvery white, with dark blue eye.
16. **Celestial Queen.** Light or sky blue.
17. **Charm of March.** Dark velvety blue.
18. **Mixed.** The above nine colors. Trade pkt. 35c; 1-8 oz., 75c; ¼ oz., $1.35; ½ oz., $2.60; 1 oz., $5.00.

**GIANT PANSY SEED**

**In Separate Colors**

Trade pkt. 35c; 1-8 oz., 75c; ¼ oz., $1.35; ½ oz., $2.60; 1 oz., $5.00.

38. **Mme. Perret.** Red and wine shades.
42. **Adonis.** Light blue, dark center.
44. **Black.** Almost coal black.
48. **Lord Beaconsfield.** Purple, shaded white.
50. **Goliath.** Large, curled yellow, blotched.
54. **Pres. Grant.** White, five blue blotches.
56. **Light Blue Shades.**
58. **Indigo Blue.** Deep velvety blue.
60. **Hortensia-Red.** Light rose.
62. **Prince Henry.** Dark blue.
65. **Ruby King.** Superb crimson and red.
64. **Snow Queen.** Beautiful satiny white.
66. **Almond Blossom.** Delicate rose.
68. **Andromeda.** Curled apple blossom.
72. **Orchid Flowered Mammoth.**
74. **Sunlight.** Yellow, with brown blotches.
78. **Bridesmaid.**
80. **Purple.** Large, rich deep color.
82. **Giant Peacock.** Rich ultramarine blue.
84. **Mercury.** New. A deep blackish purple.
88. **Emp. Franz Joseph.** White, blotched blue.
90. **Vulcan.** Dark red, with five blotches.
92. **Victoria.** Blood red, violet blotches.
98. **Psyche.** Curled white, with five blotches.
100. **Yellow.** With dark blotch.
102. **Yellow.** Large golden yellow.
104. **White.** With violet blotch.
106. **White.** Large satiny white.
108. **Emp. William.** Ultramarine blue.
110. **The preceding 29 colors mixed.**

## Free Offer of Kenilworth Grown Pansy Seed

**THE BONUS MIXTURE**

**I have a surplus of the four best selling varieties due to the unusually good season for growing Pansy Seed. I will give it as a bonus with all orders for Pansy Seed at the rate of 1,000 seeds for every dollar's worth of seed and with other amounts in like proportion.**

**THIS IS A TIP-TOP MIXTURE**

**and is sure to please YOU. THIS OFFER HOLDS GOOD AS LONG AS I HAVE A SURPLUS OF THE ABOVE VARIETIES.**

**Chas. Frost**
**35 Cross St.**
**Kenilworth, N.J.**

have been satisfactory where the bugs have not appeared in large numbers but that it has proved of no avail where they have come in hordes. In one place, I understand, the pests covered not only roses but peonies as well, and seemed immune to Meltrosine in spite of repeated applications. Fortunately visitations like this are not common.

At the recent rose and sweet pea show in Boston Dr. Robert Huey of Philadelphia gave a very interesting lecture on roses and their care, through the generosity of Miss Marian Robey Case. Dr. Huey was very emphatic in his championship of budded stock, declaring that with but few exceptions much freer blooming and longer lived plants were to be obtained than when own root stock was used. He described experiments in which roses of the same varieties but grown in the two ways were planted in adjoining beds and said that the own root plants were so much better that there was really no comparison. He told his audience that they could readily grow their own roses by plant-

Another New England Wholesale House

Consignments Solicited

ing multiflora seed and budding with the varieties desired.

Dr. Huey spoke of using peat moss as a mulch, saying that it saved much labor and gave good results. In this connection I was interested to read in an English paper that one gardener had been using this moss in quite a general way, spreading it around his snapdragons and using it mixed with equal parts of sand on the lily of the valley beds.

It seems to me that this should be an excellent practice where the weather is likely to be dry for a long time, and where the ground readily bakes and cracks. Dr. Huey said that the hose could be allowed to run in the moss until it was saturated, but that in a few hours it would look entirely dry on top, although the ground would be moist and cool.

I have sometimes wondered if the perennial borders could not be mulched to equal advantage with the prepared litter which is used in poultry houses and which, I think, is composed of peat. After being removed from the houses in the Spring, it should make an ideal litter, it seems to me. Has anybody tried it, I wonder?

## SEAVEY'S NEW GREENHOUSE

G. S. Seavey & Sons of Bangor, Me., are about to build a new Hitchings greenhouse 60 by 25 ft. The new house is to be stocked with ferns, primroses, cyclamen, geraniums and other miscellaneous plants in which the Seaveys do a large business. The Seaveys have been very successful and have learned how to develop trade in the surrounding towns. They have agencies in at least ten places. Three years ago Mr. Seavey and his son began featuring bulbs and bought 6000 tulips. This year they have purchased 50,000 bulbs, and the end is not yet.

## MR. GRATON'S BOOK

Mr. Louis Graton's little volume, just off the press, entitled "Intensive Strawberry Growing," is reviewed with much pleasure. Mr. Graton knows strawberries thoroughly, and, moreover, he knows how to tell what he knows, which is an accomplishment many men lack. Both commercial growers and amateurs will find much profitable information in the little book. Perhaps the amateur will benefit most, but the professional will at least find food for thought in some of Mr. Graton's ideas.

## A NEW WELCH WHOLESALE HOUSE

On the first of July Edward J. Welch opened a new and handsomely appointed wholesale establishment at 288 Devonshire street under the name of "Welch's." The store is painted white throughout and contains a very large and modern chest as well as the other necessary furnishings. It is strictly up-to-date in every way. The firm has arranged for a steady inflow of stock and will also put in a line of garden accessories, baskets, and similar supplies. Mr. Welch is the son of the late Patrick Welch and has had a lifetime of experience in the florist's business. He starts out with the right good wishes of his friends.

The Rosary flower shop has been opened at Mechanicville, N. Y., by Fenton & Daurey of North Troy.

## BOSTON FLOWER MARKET

### Option on Broadway Site Taken—Stock Being Sold

Much to the regret of many florists the directors of the Boston Flower Exchange, Inc., have been unable to obtain the old Cyclorama building on Tremont St. for a flower market at a price which they were willing to pay. The owners demanded a sum which was deemed much too high.

As a second best choice an option has been taken on the Broadway site, which is located between Washington street and Harrison avenue. This is a much less desirable section in many ways, but the property contains 13,000 square feet and has ample room in the rear for parking purposes. It will be necessary to tear down the present building and erect a new one. While the option is to run for thirty days, it has not been definitely decided to take this site.

The transfer of shares from the Cooperative Market members is now going on. It is only necessary to make an indorsement on the back and send it to the president.

The first block of stock in the Boston Flower Exchange, Inc., since the increase of capital to $250,000 was authorized, is now being placed on the market. It is being offered to growers only, and the price is twenty dollars a share. At a recent meeting, Mr. Thomas Roland handed his check for $5,000 to the treasurer, and said he considered it the best investment he ever made. The Flower Exchange has been paying regular dividends for years and undoubtedly will keep on doing so. Several other growers are expected to take good size blocks.

## E. H. WILSON'S RETURN

It had been generally expected that E. H. Wilson, assistant director of the Arnold Arboretum, would return to this country the latter part of last month. It has now been learned, however, that he will not be back until late in July. He is going to France from England instead of returning directly to America. Mr. Wilson's trip has taken him to many parts of the world, including Australia and India. He has sent a large amount of material to the Arnold Arboretum, and has made a great many photographs which will undoubtedly be of great value. Plans are being made by the Horticultural Club of Boston, of which he is president, to give him a fine reception upon his return.

## George Watson's Corner

"You in your small corner and me in mine."

Charles B. Mills of the O. M. Scott & Sons Co., Marysville, Ohio, called on us recently, and we made a pleasant acquaintance. His company does a big business in soy beans and lawn formulas—even if the town is only rated 4 in the Almanac. Mr. Mills has travelled all over the world: Europe, Asia, Africa, etc. We forgot to ask him about Timbuctoo; but no doubt he has been there. Ah hah! You thought I was going to add the too, to it; but I didn't. Nice boy. He will be heard from later. Treat him right.

The S. A. F. annual report for 1921 arrived June 17, 1922. A little late but better late than never.

The peony growers in nearby Philadelphia seem to be well satisfied with their returns from the wholesalers for Memorial Day business. It is not so many years ago when the wholesalers refused to handle peonies at all. Too bulky. Too much work. Too little money. But things have changed around since then, and now there is quite a raft of them being handled. And everybody seems to take them as a staple and established cut flower standby. Chester County is a big shipper—so also is New Jersey.

The Sesqui-Centennial is coming and we are just beginning to wake up. We haven't elected a boss yet but Rodman Wanamaker sounds good.

There's a young friend of mine, an employee earning a good salary as a salesman; but he says: "Can't I make something on the side. We've got twelve acres of good land and a lot of sash. Now, what is the best thing to grow to make a little money." This was a pretty hard proposition, so we passed it up, and said—we didn't know; but would think it over. We asked a bright lad who has tried a lot of things and he said tell him to grow **perennial phlox**—the named varieties; also the **peonies**—the named sorts, of the up-to-date varieties. May not get so much out of the cut flower end of it; but then there is the young plant end to push—which is all velvet. There is a good thought in that, so I pass it along for what it is worth.

There's nothing like good clean sport for keeping the youngsters in trim:—physically, mentally and every other way. Glad to hear the florists are to have their usual bit of fun during the summer months. Al Swan announces that the representatives of the various teams had a preliminary meeting, June 12th.

This is the second season for the Champion Campbell trophy, which was won last year by the Pennock team. Some changes have taken place in the personnel of the various teams contesting since last year, and the outcome may be looked forward to with interest. Go to it, boys, blow off that steam, and may the best bunch win. But play straight. No funny business.

Among our recent visitors was J. J. Fallon of Lynchburg, Va., who tells us he has taken over and is now operating the O'Quinn place at Raleigh, N. C., in addition to his home establishment.

When the Lancaster County boys and girls blow in for a visit, you want to have your wits about you. The Herr's, and the Weaver's and all the rest of them are "Keeners," all right; and nothing much passes them. It was

a delightful experience, on June 8th, 4.38 p. m. (Phila. Time), and we will not soon forget it. They had a regular bunch of autos, and had been to Riverton, and lots of other places, before they struck into 1614 Ludlow. Samuel was delighted to meet them, and handed out his Presidential smile, in the true Parisian manner, which comes from his recent trip through Europe. We trust they were duly impressed, but we doubt it. The Lancaster folks are a bit grim about London and Paris and such places. They have a firm idea that the center of the universe is right around Lancaster.

I suppose I must have been about nine years old. Anyway, the other schoolboys seemed to think I was too pacific. I'd never had a fight with any other boy. Looked bad to them. They had seen me try the bogie-roll tobacco in a clay pipe back of the school house —and get very sick. But a fight. No, that supreme delight for them, had held back. George was quiet and friendly with all his pals. So they had to arrange it. Jimmy Clark was the challenger. I don't know what happened to Jimmy; but I remember coming out of it with a sprained thumb. Well, all these schoolday thoughts came back to me when I met Sam Pennock, Junior, in the smoker this morning. Do you smoke, Sam? Oh, I take a little whiff once in a while. Gosh! I've had a change of mind. Sam's no kid any more. He's a man! Cornell ain't so bad, after all.

Recent visitors include: George G. Parker, Phillipsburg, Pa.; A. Engelmann, Tyrone, Pa.; Mrs. W. E. Murrah, Augusta, Georgia.

## NEW ENGLAND NEWS

John T. Allen and William Gray of Newport, R. I., will be judges at the Narragansett Pier flower show August 16.

Robert P. Holmes, son of Eber Holmes, superintendent of Halifax Gardens, was recently married to Miss Hazel E. Dutton. Mr. Holmes is in charge of several large greenhouses at St. Bruno, about 14 miles from Montreal. The wedding took place in Halifax.

The W. & C. Nursery, now at Westfield, Mass., is to locate at Leominster, where it has purchased a large tract of land and a good sized house. The proprietors of the nursery are J. A. White and Howard A. Cady. The work of transferring the stock will be completed this fall. It is expected that a large business will be built up at the new location.

Arnold Fisher and Christian B. Johnson of Woburn, Mass., contributed thousands of flowers to an industrial exposition recently held in their city, and did much to help make it a remarkable success, with about $4000 net profit.

## BOSTON NOTES

Albert Neddy, for a long time connected with Welch Bros. Co. on Devonshire street, has now gone with N. F. McCarthy. Mr. Neddy is very well known and has many friends.

Gustave Thommen, the well known and highly popular correspondent of the Florist's Exchange, is taking a much needed vacation and has gone on a trip to Florida.

Charles Boyle, president of Thos. Galvin, Inc., is taking a month's vacation, but was very careful not to say where he was going.

Otto Goodwin has left the employ of The Rosary on Boylston street.

At a recent meeting in Boston of the committees appointed to make arrangements for the Gardeners' convention to be held in Boston next September, several plans were talked over. It was decided to have a banquet, probably on the second night, and to use two days for visiting estates around Boston, including the famous Crane estate at Ipswich, of which Pres. Robert Cameron is superintendent.

James Wheeler of Natick, who has won fame with his Godfrey callas, is now to have a special house for his pets. It will be 300 ft. x 24 ft. and of King construction, and is designed wholly for callas, which he grows in beds instead of benches and which are always in demand at top prices.

The Freedonia, N. Y., Seed Co., has acquired the Joe Camello property and it is understood will put up a new plant there.

Mr. C. A. Hall is putting up a greenhouse at Fort Edward, N. Y. Mr. Hall was formerly in business at Able Park and West Sand Lake. The new greenhouse will be 26 by 10 ft. and is to be opened about October 1st.

# NOW READY---NEW EDITION OF
## DR. L. H. BAILEY'S
# Standard Cyclopedia of Horticulture

Six large quarto volumes. More than 3,600 pages. 24 full page exquisite color plates. 96 beautiful full page halftones. More than 4,000 text engravings. 500 Collaborators. Approximately 4,000 genera, 20,000 species and 40,000 plant names.

**IMPORTANT NEW FEATURES**

**KEY TO IDENTIFICATION OF PLANTS.** This is a device to enable one to find the name of a plant. The name thus found is quickly referred to under its alphabetical location, where full information will be found in regard to it.

**SYNOPSIS OF PLANT KINGDOM.** This is one of the most important features of the new edition. It constitutes a general running account of the classes, orders, and groups of plants, with a brief sketch or characterization of 215 of the leading families comprising those that yield practically all the cultivated plants. These family descriptions give the botanical characters; the number of genera and species and the ranges; a list of the important genera; brief statements in regard to the useful plants; and diagrammatic illustrations.

**ILLUSTRATIONS.** There are 24 colored plates; 96 full page half-tones; and more than 4,000 engravings which serve as guides in the text.

**TRANSLATION AND PRONUNCIATION OF LATIN NAMES.** In Volume I is inserted a list of between 2,000 and 3,000 Latin words used as species—names of plants, giving the English equivalent or translation and the pronunciation.

**CLASS ARTICLES.** Special effort has been made to secure the best cultural advices for the plants requiring peculiar or particular handling. Here are some of the titles of these articles; Ants; Autumn Gardening; Bedding; Diseases; Drainage; Floral Designs; Formal Gardening; Hotbeds and Coldframes; Insects; Landscape Gardening; Lawn Planting; Orchards; Rock Gardening; Subtropical Gardening; Tools and Implements; Village Improvements; Window Boxes, etc.

# Who is to Blame?

Last fall several owners of ranges had to suddenly change their growing plans, because of delays in finishing the overhauling of their heating.

**Who was to blame?**

A number of others one a notably big range came near losing their entire crop because of last-minute boiler trouble that the owners knew was likely to happen almost any time, and still had put off doing anything about.

**Who was to blame?**

You remember early last spring how we commenced urging florists to start in overhauling their heating systems the very day firing stopped?

You remember how a lot didn't do it, thinking that pipe and other things would be lower?

**But they were not!**

So they had to pay the price for pipe, besides the extra cost of a last-minute rush job—which is **always** mighty expensive.

Instead of saving money, they actually gave a lot of money away, **for which they got no real benefit.**

So this season, the same as last, we urge growers to have their heating overhauled at once.

Send for us to come and look it over, make recommendations, and submit an estimate.

After which, don't put off giving us the go-ahead order until the last minute and then expect us to do the impossible.

### MONEY COMING IN WELL FOR BOSTON MARKET

At a recent meeting of the General Committee of the Boston Flower Market it was reported that rapid progress was being made in the disposal of the stock. At that time $81,920 in actual cash had been paid in, leaving only $18,000 to be raised before taking the next step. It had been determined that nothing further should be done until $100,000 had been raised. With that amount on hand the committee will be ready to make a definite decision as to a site for the new market house. Several sites are still under consideration, there being a difference of opinion among the members of the committee as to which is the most advantageous. As soon as the site has been definitely settled upon, however, all the members will co-operate in pushing the work so that the new market will be ready for occupancy the first of next February.

### FIFTY QUACKERS IN PENN'S WINDOW

Henry Penn has again scored a hit with his annual window display of a miniature farm, including a pond with a large number of ducklings. The window is particularly well done this year, the waterfalls, mill wheel and other accessories making a delightful picture. The floor of the window is carpeted with moss, over which the ducklings, of which there are fully half a hundred, waddle to the pond. The ducklings are secured by Mr. Penn from a farm in Duxbury, being received when they are three days old. As soon as they grow too big to be cunning they are returned to the farm. Mr. Penn expects to continue this display until the end of August, at it makes a remarkably successful summer feature.

### HOFFMAN'S HOTEL DECORATIONS

Sydney Hoffman has won new laurels as a result of his work in decorating the Copley Plaza Hotel on the occasion of the recent convention of hotel men. Rambler roses were used for the most part, and in a remarkably effective way. There were two huge rose arbors illuminated with Japanese lanterns extending the entire length of the ball room. In addition to the roses, there were hundreds of potted plants. The guests were seated beneath and between the arbors. The small hall at the entrance was transformed into a palm garden, while the orchestra in the foyer was almost concealed with flowers and plants. Many of the visiting hotel men said that the decorations were by far the most lavish and successful of any they had ever seen.

### BOSTON NOTES

Fishelson, the Florist, of Charles Street, has closed his store for the months of July and August.

Seavey, the Florist, has been obliged to give up his store in the Copley Theatre for the time being, as the theatre is being moved to a new location on Stuart Street. He is maintaining his office in a neighboring building during the summer, but expects to open his store in the fall.

Allan Peirce of Waltham has installed a soil pulverizing machine in his establishment which he reports is doing very good work.

The New England Florist Supply Co. has changed its location. It is now at 262 Devonshire St. in the basement under the store of Welch Bros. Co. The location is a particularly good one as the entrance is directly opposite the Co-operative Flower Market.

## Regal Lily Bulbs

LILIUM REGALE
for Fall delivery

Large bulbs, 6-9 in., $40.00 per 100.

Large flowering bulbs, 4-6 in., $30.00 per 100.

Small flowering bulbs, 3-4 in., $20.00 per 100.

C. P. HORSFORD
CHARLOTTE VERMONT

# -HORTICULTURE-

Entered as second-class matter December 8, 1904, at the Post Office at Boston, Mass., under the Act of Congress of March 3, 1879.

Vol. XXXVI JULY 25, 1922 No. 2

## THE TALK OF THE TRADE

In the last issue I spoke about the growing popularity of the Regal lily. Since then I have been interested to learn that C. P. Horsford, the nurseryman of Charlotte, Vt., has been very successful in growing these bulbs, which he is now putting on the market. If they can be grown to advantage in Vermont, there can be no question about their absolute hardiness for practically any part of the country.

I find that many nurserymen in various places are beginning to experiment with these bulbs, and are finding them very easy to handle. It may be of interest to describe briefly the methods which Mr. Horsford has found satisfactory. His first stock of seedlings was grown under glass, but now he plants the seeds in frames, using burlap as shade. The plants are left in the frames two years before they are transplanted in the open ground. Mr. Horsford has found that cutting the

Lilium Willmottiae Grown as a Pot Plant

flowers seems to result in larger bulbs. This gives a double profit, too, because no difficulty is found in selling all the flowers that can be produced. There are few lilies which increase so rapidly by offsets or are grown as easily from seed, provided one knows how to handle them.

I believe that florists in small towns who have some land available but do a retail trade will find the Regal lily among the most profitable plants which they can grow. They will have no difficulty in selling the flowers at a good price, and the flowers themselves would inevitably create a demand for the bulbs. Planting can be done either in the fall or in the spring, which is a great advantage when selling to a retail trade, because bulbs sold early and planted out in the spring will bloom the same year.

Mr. Horsford expects about 15,000 bulbs to sell this year, although it is a little early to tell yet how many will reach the size of six inches in circumference, which is now considered right for first size bulbs.

I was very much interested to find that Mr. Horsford also has several thousand large bulbs of Lilium Willmottiae, which are going onto the market this fall. This lily is not very well known as yet, but has great possibilities. Probably it will never be used to any such extent as the Regal lily for cutting, but it is an admirable garden flower, and any florist growing it will be sure to meet with a demand for stock. This lily was discovered by Mr. E. H. Wilson, of the Arnold Arboretum, in the Province of Hupeh, China. It is remarkably floriferous, as many as 28 blooms sometimes being borne on a single plant.

The color is best described as a shade of orange, while the recurved petals have numerous brown spots. In good soil it grows to a height of four feet, but in England, where it is proving popular, it has been known to reach a height of six or seven feet, with sixty flowers on a stem. The flowers themselves are about three inches across. The slender foliage is a deep rich green, and the whole plant has a very distinctive and graceful habit.

---

Mr. Horsford has demonstrated the fact that this lily is perfectly hardy. He says, in fact, that it is as hardy as the Tiger lily, which will grow anywhere in New England. He has also found that it grows very readily from seed. Lilium Willmottiae has also been grown as a pot plant. Whether or not it will ever become a florist plant when forced I cannot tell, but certainly it will prove an admirable addition to the contents of private greenhouses.

---

According to reports from France, Paper White Narcissi will make a very short crop this year, owing to long drought. This will naturally mean higher prices and likewise that the larger size bulbs will be particularly scarce. It might be said, though, that growers have learned that the matter of size is not of so much importance in forcing bulbs as used to be supposed. Firmness and general quality mean much more.

There are also reports that Freesia bulbs in California are going to be short, but such reports are quite common as a rule at this time of year and too much credence should not be given them. It is interesting to have a report from F. Rynveld & Sons that their plantings of gladioli on Long Island are producing a tremendous crop.

---

On a recent visit to Alonzo J. Bryan, the well known grower of Washington, N. J., I was surprised at the tremendous number of small chrysanthemum plants which he was growing, both for the trade and for his own use. I knew, of course, that Mr. Bryan had made a wide reputation for his chrysanthemums, but did not realize that he had gone into this branch of the business so heavily. Mr. Bryan is also exceptionally successful with cannas, of which he grows several acres, which were in bloom on the occasion of my visit and made a splendid show. Some florists find but little money in cannas, but Mr. Bryan seems to do well in them.

It seems quite a natural thing, that having seen his greenhouse business grow from a single house to a range of ten large houses, Mr. Bryan should now venture into the retail field in a more extensive way than he could do at his range. He is now remodeling a building on East Washington St. where a retail store will be established.

---

H. H. Barrows, the veteran fern grower of Whitman, Mass., thinks a lot of the new Dwarf Boston. When I recently visited his large and very interesting establishment, I found a considerable stock of this fern in the benches, and certainly it looked good. It has the characteristic appearance of the Boston fern, but is more compact, with shorter fronds. It has a most thrifty look, too, and increases at a remarkably rapid rate. Mr. Barrows said that no other dwarf fern could approach it in this respect. He has been obliged to cut back heavily to keep the beds open. Mr. Barrows has some nice benches of Macawii and likes it, but calls the Dwarf Boston its superior, all things considered. Perhaps I am giving away a secret, for Mr. Barrows has not yet begun to advertise the Dwarf Boston, although he has been selling some cuttings. Certainly, however, he will be able to put it out in a more free handed way before long.

Apparently the fern business has been extraordinarily good this season. Mr. Barrows has not yet caught up with his orders for propagating stock and reports a remarkable demand from Canada, where the call for ferns seems to be insatiable.

---

A. Rolfs, of Randolph, has been especially successful in growing Helichrysum. He devotes more space to this than any other grower in New England, and has succeeded in getting flowers of the colors most wanted. It is evident that the demand for these everlastings is constantly growing because Mr. Rolfs has largely increased his planting this year, enabling him to supply several additional retailers. He maintains the quality of his flowers by selecting the best blooms which he finds during the summer and allowing them to produce seed.

---

Mr. J. Costello, who has opened a florist store in Brighton, Mass., after having been in the Elliott greenhouses for many years, has worked up an excellent trade in the planting of flower gardens, the filling of flower boxes and similar work. This is a side line which seems capable of wide development in suburban towns. Apparently it is going to be an important part of Mr. Costello's business.

**IRIS AND PEONIES**

Having a large stock of the following Iris will quote special prices for early delivery as I wish to clear the ground:

**Darius, Dr. Bernice, Halfdan, Ingeborg, Loreley, Mme. Chereau, Mithras, Mrs. G. Darwin, Mrs. H. Darwin, Sherwin Wright, Walhalla, Walneriana.**

Ask for price list and see what my customers say about the service they receive. Thank you.

**GEO. N. SMITH, Wellesley Hills, 82, Mass.**

# KANSAS CITY CONVENTION

## A Program of Unusual Interest—Many Important Papers

**The official program for the S. A. F. Convention, August 15, 16 and 17, is in the printers' hands. Summarized, it is about as follows:**

### FIRST DAY

**Tuesday, August 15, 2 P. M.**
**Convention Hall**
**13th Street & Central Avenue**

INVOCATION, by Rev. Burris A. Jenkins.
CONVENTION CALLED TO ORDER by Samuel Murray, Vice-President S. A. F. and O. H.
ADDRESS OF WELCOME, by Hon. Frank H. Cromwell, Mayor of Kansas City.
ADDRESS OF WELCOME, by T. J. Noll, President Kansas City Florists' Club.
RESPONSE, by Hon. Philip Breitmeyer, Detroit, Mich.
PRESIDENT S. S. PENNOCK'S ADDRESS.
READING MINUTES, EXECUTIVE BOARD.
REPORT OF THE SECRETARY.
REPORT OF THE TREASURER.
REPORT OF WILLIAM F. GUDE, Washington Representative.
REPORT OF J. C. VAUGHAN, National Councilor, Chamber of Commerce, U. S. A.
REPORTS OF STATE VICE-PRESIDENTS.
REPORTS OF STANDING COMMITTEES.
(a) Committee on Tariff and Legislation—James McHutchison, Chairman.
(b) Committee on Development of American Product—Fred E. Pierson, Chairman.
(c) Committee on School Gardens—Benjamin Hammond, Chairman.
(d) Committee on Nomenclature—J. Horace McFarland, ——, ——.
(The National Publicity Committee and the National Flower Show committee will report at subsequent sessions.)
(e) Auditing Committee—Percy B. Rigby, Chairman.
(f) Finance Committee—Herman P. Knoble, Chairman.
REPORTS OF SPECIAL COMMITTEES.
(a) Committee on Education, Fred A. Wilson, Chairman.
(b) Committee on Annual Report—Chas. H. Totty, Chairman.
(c) Committee on Revision of By-Laws—Thomas Roland, Chairman.
(d) Committee on Publication of Index, prepared by J. J. Dale, of Greenhouse and Garden, Chairman Secretary J. Fred Ammann.
(e) Committee to arrange with College Students of Floriculture for Visitation with the S. A. F., J. Fred Ammann, Chairman.
REPORT OF THE BOTANIST—Prof. E. A. White, Cornell University, Ithaca, N. Y.
REPORT OF THE PATHOLOGIST—Dr. Wm. H. Martin, N. J. Agricultural Experiment Station, New Brunswick, N. J.
REPORT OF THE ENTOMOLOGIST—Prof. H. C. Irish, St. Louis, Mo.
CONSIDERATION OF INVITATIONS for selection of next place of meeting.
MISCELLANEOUS BUSINESS.
JUDGING TRADE EXHIBITS.

**Evening Session, 8:30 P. M.**

PRESIDENT'S RECEPTION. The function will take place in the Hotel Muehlebach. President Pierce requests that this reception be entirely informal. It is suggested, therefore, that the most comfortable clothing will be the most appropriate for the occasion.
BALLOT FOR NEXT PLACE OF MEETING.

### SECOND DAY

**Wednesday, August 16, 9 A. M.**

REFRIGERATION FOR FLORISTS. This subject will be presented from the viewpoint of the grower, retailer and wholesaler.
(a) The Grower—Otto Amling, Maywood, Ill.
(b) The Wholesaler—P. B. Rigby, New York, N. Y.
(c) The Retailer—Herman P. Knoble, Chicago.
(d) The Retailer—George Weinhoeber, Chicago.
Discussion.
NOMINATIONS FOR OFFICERS FOR 1923.
AMENDMENTS: To be read, placed on the official ballot, and voted on at the Thursday morning session.
THE RECOMMENDATIONS OF THE EXECUTIVE BOARD that $2,500 be appropriated from the General Fund to the National Publicity Fund will also be placed on the official ballot to be voted on?
11:00 A. M.—ADDRESS: "The Coal Situation," by H. N. Taylor, President of the Southwestern Interstate Coal Operators' Association.
QUESTION BOX.

**Afternoon Session**

2:00 P. M.—Meeting of the Florists' Hail Association.
3:00 P. M.—Report of the National Publicity Committee, Herbert Pierce, Boston, Mass., Chairman. Report of the Chairman of the Finance Committee of the Publicity Committee, George Asmus, Chicago, Ill.
ADDRESS: "Co-operative Advertising," by Samuel M. Kinney, Division of Commerce, Research of the Advertising Dept. of the Curtis Publishing Co., of Philadelphia.
ADDRESS: "National Publicity for Flowers," by Major P. F. O'Keefe, Boston, Mass.

**Evening Session**

8:00 P. M.—ADDRESS: "Advantages of a Florist Display Garden," by David L. Tingley, Manufacturing Chemist, Architect, Manufacturer and Florist, Hartford, Conn.
Selection of place for next meeting.
Wednesday's session adjourned.
Thursday's session—Convention called to order by President Pierce.
ADDRESS: "What Agriculture [illegible] for Floriculture," by [illegible].
2:00 P. M.—[illegible]ion.
ADDRESS: "Floricultural Training for Young Men from the Employer's point," by Thomas Roland.
3:30 P. M.—ADDRESS: "A Complete System of Accounting for Florists," by H. T. Sperry, New York.

### THIRD DAY

**Thursday, August 17, 9 A. M.**
**Morning Session**

9:30 A. M.—Report of the Committee on President's Address.
ELECTION OF OFFICERS FOR 1923, VOTING ON PROPOSED AMENDMENTS, AND APPROPRIATION TO THE NATIONAL PUBLICITY FUND. Polls open from 10:00 A. M. to 11:00 A. M., or until all in line have voted. Voting will be conducted under the new system. There will be five voting places. "A" to "D" inclusive, "E" to "K" inclusive, "L" to "P" inclusive, "Q" to "T" inclusive, "U" to "Z" inclusive. Please vote promptly. Only members in good standing can vote.
REPORT OF JUDGES ON TRADE EXHIBITS.
REPORT OF THE NATIONAL FLOWER SHOW COMMITTEE, George Asmus, Chairman, Chicago, Ill.
Discussion.
MEDAL OF HONOR: At the last annual meeting held in Washington, D. C., the Society voted unanimously to re-establish the Society's Gold Medal as a Medal of Honor, to be awarded by the Board of Directors, annually, to the man or woman, firm or institution, in the United States or elsewhere, who has done the most in recent years to promote Horticulture, using the phrase in its broadest meaning. Members of our Society to be eligible for this medal, for meritorious service of the same kind. It may be awarded once in five years to the member of the S. A. F. and O. H. who, during the preceding five years, shall have rendered services best calculated to advance the largest interest in this Society. At the meeting of the Executive Board held in Indianapolis, March 28, the Board by unanimous vote awarded this Medal of Honor to Mr. George Asmus, of Chicago, Ill., and at this time, 12 Noon, the Medal will be presented to Mr. Asmus for distinguished service to the Society. President S. S. Pennock making the presentation.

**Afternoon Session**

2:00 P. M.—Report of the Judges of the Trade Exhibit.
Report of Tellers of Election.
Miscellaneous Business.
Unfinished Business.
2:00 P. M.—Conference of the Florists' Telegraph Delivery Association.
5:00 P. M.—Report of Committee on Resolutions—Michael Barker, Chairman.
FINAL RESOLUTIONS.
ADJOURNMENT.

Alpho Floral Co.'s Store, One of Kansas City's Many Handsome Flower Shops

—HORTICULTURE—

Established by William J. Stewart in 1904

VOL. XXXVI. July 25, 1922 No. 2

PUBLISHED SEMI-MONTHLY BY

HORTICULTURE PUBLISHING COMPANY

739 Boylston Street, Boston, Mass.

EDWARD I. FARRINGTON, Editor

SUBSCRIPTION RATES:

One Year, in advance, $1.00; To Foreign Countries, $2.00; To Canada, $1.50.

**Quarantine Endorsement** Just as we go to press there comes to our desk a bulky package from the Federal Horticultural Board at Washington. It consists of forty-two typewritten pages containing what is set forth as a "Record of Endorsement of Quarantine 37." It starts off by saying: "The public support of Quarantine 37 normally does not appear in evidence, but the misrepresentation which characterized much of the opposition has stimulated a very emphatic endorsement of the quarantine. It seems only just that this country-wide support should be made a matter of record."

The Board evidently has been encouraged to present this document in its own behalf by the whitewash given it in the report of the special committee consisting of the late Prof. J. C. Whitten, Mr. M. R. Cashman and Dr. A. F. Woods, who made a report on the recent conference. This report is made a part of the document which the Board has sent out, and which includes the following very flattering statements:

"In our opinion the Board is properly constituted as to membership and exercises unusual care to get expert opinion and advice. There is every evidence that the Board intends to render every possible assistance to the trade and to individuals in making introductions.

"With reference to the act (Quarantine 37) itself and the regulations under it, we believe no material changes are necessary."

The record of endorsement being sent out by the Board includes a great number of complimentary letters from state and college officials throughout the country. In addition it has several pages given over to names of individuals and nurseries who are said to have heartily endorsed Quarantine 37. In this list we find nurserymen from every section, some of them among the best known in the country. In the list is also the Florists' Exchange, its presence being based on extracts from an article which it published by "John Kingdon Smith." Several dahlia growers as well as rose growers and growers of general ornamentals are included.

Altogether it is a very impressive document, and is put up with an air of assurance which seems to indicate that whoever may have expected a modification in the Board's rulings is likely to be disappointed, while nurserymen who have hoped for a continuation of the present situation will be encouraged to go ahead in the propagation of plants formerly imported, feeling full confidence that they will not suffer financial loss by having the bars let down again and European material admitted at a lower price than they can grow it.

---

**The Ten Commandments of Horticulture** The basic principles for success in the flower business are the same as in any other business. In the Garden of Eden nothing was wanted. So there was no buying nor selling. But the Idyllic Eden having been closed by divine command, the folks had to find food and shelter elsewhere. So one stayed home and kept house, and the other went fishing. That was a fair exchange. By and bye, the tailor emerged, and he exchanged a flowing robe for comfort and beauty, in exchange for a horse. In course of time, all the other modern industries arrived and exchanged; but last and on top of them all came the ornamental industries. One of the most important of the latter class is the horticultural industry, to which class the flower business is a subsidiary but important section.

The great difference between the fish business and the flower business is that the one caters to the necessities of humanity while the other caters to its sentiments. The fish business does not need pushing. They have to have them. But the flower business, while it may have to be conducted on the same basic principles as to profit and loss, needs pushing. That is to say—you must appeal to sentiment, not to appetite. So the florist must have a bit of the poet in his make-up, if he is going to be a big success.

All this being taken for granted, the basics of profit and loss applying to us as to any other business, then we come to the supplementary part—which we may term: how to increase a love of flowers among the people. There are thousands of things we can do. A few of the most important are:—

1. Make a good showing in your store windows—the same inside.

2. Have your place in the country so attractive that every passerby will stop, look and admire.

3. Support all the flower shows. Exhibit if you can. If none in your neighborhood—get up one. It's easy—with your neighbors' co-operation.

4. Be cordial with the newspaper folk whether amateur or professional. Every word they say means sunshine for your business in countless thousands of receptive minds the world over.

5. Encourage the neighbors to keep their lawns and grounds in good shape. And always remind them that their spring bulbs should be planted in the fall. This seems superfluous but an experience of half a century says different. Half of them never think of it until they see their neighbors' lovely and fragrant blossoms—and then it's too late!

6. The sixth commandment in the Bible is—Thou shalt not tell a lie. This applies to everything; but it is especially important in horticulture. If you don't know—just admit it. There are millions of things none of us know, and never will know. Cut out the bluff. Be truthful, above all things.

7. Never substitute something "just as good"—and try to get away with it.

8. Charge a fair profit but don't get tempted when a "newly rich" person is slinging it around.

9. Never run down your competitor. He has troubles enough of his own—and your time is better expended elsewhere.

10. Be cheerful. Covet nobody. Boost all you can. And give the world something new if possible.

—GEORGE C. WATSON.

### THE ORIGINAL CRIMSON RAMBLER

Dear Sir:

I have been much interested in the notes appearing in your journal regarding the history of the crimson rambler rose.

I always understood that the late Mr. Charles Jenner of Edinburgh was the man who really brought this rose to the knowledge of the horticultural world.

Mr. Jenner had a large dry goods store in Princes St., Edinburgh, and it is still there today under the name of Jenners and is one of the largest stores in Edinburgh of its kind.

His country place was at a place called Joppa on the outskirts of the city, and here he had a fine place where he had collected a very complete collection of very rare hardy plants.

During the years between 1893 and 1900 I was then foreman in the hardy plant department of the Royal Botanic Garden of Edinburgh, and as Mr. Jenner's place was the Mecca of all hardy plant men I very frequently visited there

He had many plants of crimson rambler on the place but there was one large plant that his gardener who had been with him for a number of years used to always point out as the original parent plant that came from China.

I remember this plant was growing on an old dead spruce or pine tree and its long canes were intertwined amongst the dead branches.

I also remember that when I was a young journeyman my father purchasing a young plant from Turner of what was then known as Turner's crimson rambler.

It was a small plant in a four inch pot and my father said it had cost a guinea. We thought then that this was a big price for a young rose plant, almost as much as the weekly wage then of the average head gardener.

W. H. WAITE.

Rumson, N. J.

### A FRINGED PETALLED ROSE

Among the roses which have given pleasure at Hillcrest Gardens this summer is the dainty little F. J. Grootendorst or fringed petalled rose. No shade in Ridgway's color chart quite gives it. It is a little deeper red than the Excelsa. The blossoms come in clusters on a bush, and somewhat resemble a small carnation. The foliage is of the Rugosa type, being rather courser than is pleasing. We planted it this spring on the rose bank. It was a litle slow to start but has kept in good bloom, and next season we mean to plant it as a shrub on the lawn.

Other roses with which we have had interesting experiences this summer are the blanda alba from Deerfield and a striped red and white rose from an old graveyard not many miles from Weston. Both these roses have deepened in color in the good soil of our garden, so that we have taken a root of the Deerfield rose and planted it in our wild garden where it has already made a good start. With the striped red and white rose, which in our propagating beds has lost its white stripes, we hope to experiment both with suckers and seeds.

M. R. CASE.

Hillcrest Gardens, Weston,
July 13, 1922.

Librizzi's new floral shop and greenhouses at New London, Ct., have been opened for business. They are well equipped, and in charge of experienced men.

# RAMBLING OBSERVATIONS OF A ROVING GARDENER

One of the few gardens devoted exclusively to Japanese Iris is owned by Dr. Harris Kennedy of Milton, Mass. Dr. Kennedy's garden is the leading feature of a large estate, and is so arranged as to simulate a garden in Japan. The irises are grown in a massed bed, with an elevated plank walk running through the middle in the Japanese fashion. There is an interesting Japanese pagoda at one end, while Japanese lanterns, a pool spanned by a miniature arched bridge, and other features help to make the garden complete. There are about two thousand plants in the collection, with a hundred varieties.

---

On a recent visit to the Joseph Kidder estate in East Milton, Mass., I was much interested to find an enormous specimen of the Japanese tree, Cercidiphyllum. It is a tree not often seen in private gardens, although well known to frequenters of the Arnold Arboretum, where there are some fine specimens. This tree on the Kidder place was planted by the head gardener, W. J. Martin, nearly forty years ago. Of course Mr. Martin has taken great satisfaction in seeing it grow until it has become a tree of great proportions. If I am not mistaken it is the largest specimen to be found in New England. It looks, however, as though it had about reached a decadent period. Some of the limbs are beginning to break, and it is a question if the tree will survive many years longer.

---

In a recent issue of Horticulture mention was made of the new begonia, Frau Helen Harms, being put out by Joseph Breck & Sons, Boston. Confirmation of what was said comes to me from Mr. Eric H. Wetterlow, the well known superintendent of the Leland estate on the North Shore.

Mr. Wetterlow says:

"Frau Helen Harms, although yellow if grown under glass, will turn to a beautiful yellow orange; when planted outside it grows 8 inches high and can be planted in the open without any shade, in fact it is a great companion to plant in the border or beds in the garden along with heliotrope, using lobelias for edging. It is a splendid grower and flowers profusely up to frost and as a pot plant for the house and conservatory it has no equal and by starting the plants late and grown in a rather cool temperature they can be had in bloom for Thanksgiving. There are other seedlings of this same type which in color range from white, deep pink, light yellow, orange and red."

---

I am very glad that this begonia is being distributed this season. Without doubt it is one of the finest bedding begonias ever put out. Because of its small leaves and flowers, the latter being about an inch in diameter and of the semi-double type, it can be planted anywhere in the garden. While it will endure shade, it is at its best if planted right in full sunshine.

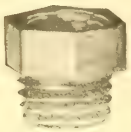
The Japanese Iris Garden of Dr. Harris Kennedy at Milton, Mass.

## TRAINING OF GARDENERS

### First Course in America to be Opened This Fall

The Massachusetts Agricultural College is announcing a co-operative arrangement with the National Association of Gardeners whereby a special course in the training of gardeners is to be established. The first pupils on this arrangement will be admitted with the opening of the fall term, September 27.

This course of training is planned with the expectation of fitting men for practical gardening, either as commercial gardeners, florists or nurserymen conducting productive business enterprises of their own, or as gardeners on estates, foremen and superintendents in parks or cemeteries, or as gardeners, florists or nurserymen in the employ of commercial establishments.



The general plan of instruction is based upon the two-year course already in successful operation at Massachusetts Agricultural College. Students fitted to take the course will be admitted each year in September, and will remain in residence at the college for six months. During this time they will pursue general studies in fruit growing, flower growing, vegetable growing, forestry, general horticulture and such elementary subjects as may be necessary.

These classes will close the last week in March and students will be sent to various commercial establishments and private estates for a summer of practical work. Every effort will be made to see that pupils are advantageously placed so as to secure the best possible experience; and this summer's apprenticeship will be supervised by a committee representing jointly the Massachusetts Agricultural College and the National Association of Gardeners.

At the end of the summer students will return to the college for an additional period of nine months' study. They will thus complete this part of the course in the following June, and if successful will receive a certificate from the college. From this point they will enter upon an apprenticeship of two years, to be arranged and supervised by the National Association of Gardeners. At the end of this time they will be examined by a special board and if successful will receive the diploma of the National Association of Gardeners.

The National Association of Gardeners is represented for the present by the following members of its Executive Committee, Mr. Robert Cameron, Ipswich, Mass., Mr. William N. Craig, Brookline, Mass., and Mr. M. C. Ebel, New York. The immediate direction of instruction will be in the hands of Professor Frank A. Waugh, Amherst, Mass., to whom may be addressed all correspondence regarding these matters.

RAIN WHEN YOU WANT IT

The Portable lines are all equipped with the famous Silver Stream Nozzles which give the water a wonderful throw and come close to being non-clogging—an exclusive Skinner System feature.

Last Call For Carnation Lifting

Wire at once for a 100 or 200 feet Portable Sectional watering line, so you can have both your plants and soil at their best for lifting time.
You can thoroughly water the whole field in advance; and then a row at a time as you lift.
You can make sure of having absolutely right conditions. No need to tell you what that means in dollars.

The little the Portable line costs, doesn't cut any figure in proportion to the dollars it will make for you.
Two men can put up a complete line in an hour and have it working.
Same two can move it in 20 minutes.
Four moves of a 200 foot line waters an acre.
Don't write, wire. We'll ship at once.

## PEAT MOSS FOR MULCHING

Dear Sir:—

In your last issue the Roving Gardener spoke of the use of peat moss as a mulch in gardens. Referring to this matter, I would say that 35 or 40 years ago my father used it extensively in Great Britain in making of compost for rhododendron beds (I refer to the material which had been used in stables and had been well soaked with urine) and rhododendrons surely made wonderful growth in it. So did liliums like auratum, speciosum and giganteum, the latter growing 10 to 12 feet high.

W. N. CRAIG.

Brookline, Mass.

## MARKET GARDEN FIELD DAY.

There are many florists who have an interest in vegetables, and so find it worth their while to attend the annual field day held at the Market Garden Station in Lexington, Mass., each summer. August 2 is the date fixed for this year's field day, and a splendid program has been prepared. Those attending will see many kinds of tools in use, and will receive much information about the value of different fertilizers, insecticides, fungicides and the like.

The Park Department of Poughkeepsie, N. Y., is to erect a new greenhouse at College Hill Park, to be used as a propagating house. It is to be constructed by the Lord & Burnham Company, and will be completed and ready for use this fall.

# GROWING GLADIOLI

## Medium Sized Bulbs Give Best Flowers—The Primulinus Hybrids

By B. Hammond Tracy

The more I see of the Primulinus Hybrids the better I like them. They have a wide range of usefulness and should prove the most satisfactory to use for florists' purposes. The original Primulinus is a small yellow flower, very much hooded, the hood being developed to protect it from the spray around Victoria Falls where it originated. At about the third crossing it loses its hood, and the crosses give very many delicate and charming colors. The Primulinus Hybrids bloom in about sixty days out of doors.

The Lemoine Nanciana type—the first of the large type—is now almost extinct; it sems to have been weak. Baron Hulet is one which is still strong, and is a fine blue flower today.

In about three years old bulbs go to pieces—big bulbs degenerate first. The third year from the bulblet gives the finest bloom—in sandy soil the second year may be the best. I do not believe in standardizing by size, but rather by age, especially as some varieties do not make large bulbs.

Storage is important, for the bulbs are fairly tender to conditions either too dry or too damp. I have observed that quick growing varieties out of doors do not necessarily force well or quickly under glass. I do not know why this is so. They may be forced for every month in the year.

For fertilizing I use mostly bone meal and nitrate of soda—but like stable manure if obtainable. Soot improves the foliage and lime prevents yellow tips.

To get a succession of bloom plant a variety of sizes of bulbs rather than succession planting; even a half inch bulb will bloom, but late in the season. Plant early to get good roots. Second plantings may bloom even before the first ones, but the root growth is much poorer.

In cutting leave at least three leaves to mature the bulbs. By constantly shortening the cut sprays as the bloom extends to the top, the unsightly bare stalks are avoided, and their decorative use extended to a fortnight.

In shipping, gladioli should be filled with water and then shipped dry. I have tried shipping wilted stalks, as practiced somewhat, but without success.

The Primulinus Hybrids give more spikes to the bulb than other types. Many throw four spikes—I have had as many as six—while the average is two and one-half.

I believe in low growing varieties and strong spikes. I have some growing five or six feet high but do not care for them.

Some varieties are good for garden use and not for cutting, and vice versa. Halley, for instance, is a fine cutting type, while Independence, nearly the same color, is best for garden use. Mojora, a buff, opens most of its florets at one time in the garden. In Primulinus Hybrids the flowers are never so heavy that the spike is too feeble. They do not keep as long because apt to bloom almost to the tip, so that florists cannot handle them so well as others.

It has been very difficult to give names to Primulinus Hybrids, with a few exceptions, such as Alice Tiplady, which is very distinct in its character. Some growers have begun naming varieties, but I have not done so. It seems best to put them out by colors. While some of the ruffled varieties of the gladiolus, such as White Glory, are very fine, many varieties go wilted, especially those in the yellow classes, and therefore are not especially desirable.

The land on my farm has always been considered very poor but I get along without trouble by the use of fertilizer which I broadcast. I plant my bulbs fairly deep, trying to have six inches at the top of the bulb.

I have great confidence in lime. In twenty-one years I have used sixty car loads of lime on my 27 acres. I prefer agricultural lime. Lime, I find, holds the moisture, which is important in my gravelly soil. I have used up to four tons an acre. I use a disc harrow to get the lime into the ground, and apply it in the spring rather than in the fall, as I have a quick leaching soil. I have used considerable cow manure in the past, but this year am using sheep manure. Just as the flowers form I make an application of nitrate of soda.

This year I am putting in seven million bulbs, including the small ones. The last planting will be done about

the middle of July. I have found that the later gladiolus bulbs are planted the faster they grow, but there is no gain in bulbs and no better flowers. It is by planting rather early that the greatest bulb increase is obtained. I have found that bulbs an inch and an inch and a quarter in diameter give the best flowers. Many people demand large bulbs, but are making a mistake. When about three years old a bulb is at its best, regardless of size. Then, though it may increase in size, the flowers will deteriorate in quality.

### INTERESTING JAPANESE INSECT FOUND IN CONNECTICUT NURSERY

The Bureau of Entomology of the United States Department of Agriculture has been interested to find an oriental beetle, which is ordinarily a sugar-cane pest, apparently established in a Connecticut nursery where miscellaneous flower and fruit stock is grown. Specimens have been collected in the nursery for two successive years. The insect seems to be doing no damage, and there is no reason for any concern over its presence.

It has been identified as Anomala orientalis Water, an insect which gave a great deal of trouble in Hawaii about 10 years ago. It is a native of Japan, and was probably introduced into Hawaii in soil on the roots of plants about 1908. At that time it atatacked sugar cane severely. The pest infested only a small area, but was extremely destructive. An organization of Hawaiian sugar planters obtained parasites from Japan in 1912 and controlled the infestation very successfully within the next seven years. The parasite has extended its diet in Hawaii to include the ordinary Japanese beetle of Hawaii as well as the Anomala.

### COMING "GLAD" SHOW IN NEW YORK

The Annual Gladiolus Exhibition of the Horticultural Society of New York, in co-operation with the New York Botanical Garden, will be held in the Museum Building, New York Botanical Garden, Bronx Park, New York City, on August 19-20, 1922.

The prize list for this year has been very much enlarged, and will include prizes for almost any variety of exhibits. Special prizes have been offered for both the ordinary and the Primulinus types, for displays arranged for effect, dinner table decorations, vases, baskets, etc.

Luncheon will be served to all exhibitors, and every facility placed at their disposal. Those who are unable to come in person may send their exhibits by express prepaid to the Museum Building, where they will be taken care of and staged.

The schedule of prizes is now ready, and may be had on application to the Secretary of the Exhibition Committee, Mrs. George V. Nash, New York Botanical Garden, Bronx Park, New York City.

# SWEET PEA SEED

During the past season we have made a special study of Sweet Peas and have selected varieties best for the commercial grower that the market affords, and we have every reason to believe that our seed is as true to name, color and type as any offered.

**WHITES**

**Early Lankey, Bridal Veil, White Orchid, Venus, Mrs. Spanolin,** oz., 75c; ¼ lb., $2.50; lb., $8.50.

### CARNATIONS ABROAD

Carnation growers of America will be interested in an American's impressions of carnations seen in England. Mr. John C. Wister of Philadelphia, writing in the Gardener's Chronicle about the recent Chelsea show, said:

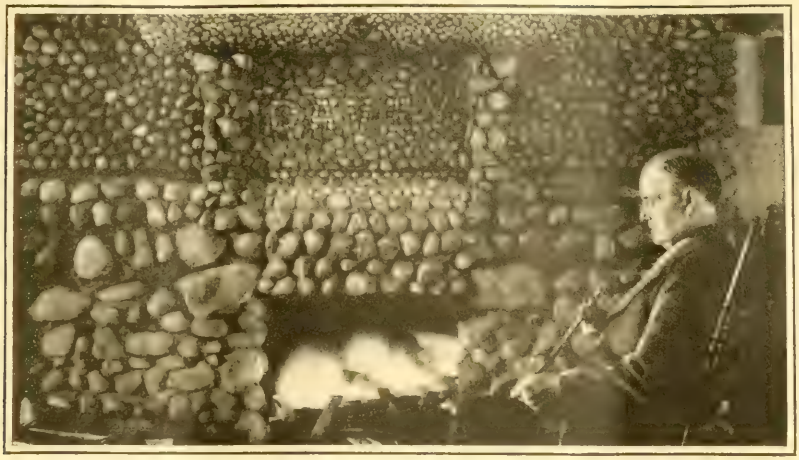
"Carnations surprised me, because I had always supposed the American carnation was far superior to those grown in Europe. True, there was a liberal sprinkling of American varieties like Enchantress Supreme, Beacon, Benora and White Wonder, all of excellent quality, and also a few of Laddie, which were not nearly so big as with us, but the British varieties seemed equally good. I made no notes on varieties, but Thor impressed me the most. We have no commercially important carnation of the color of Marion Wilson, which I liked very much. I was also impressed with the fact that at least one breeder was emphasizing the fragrance of his new varieties—a point forgotten by many American breeders in the race after size and productiveness."

### WHOLESALE DAHLIA GROWERS.

J. K. Alexander of East Bridgewater, president of the wholesale Dahlia Growers' Association, announces that the annual meeting will be held at Hotel Pennsylvania, New York City, Monday, August 14, beginning at 9.30 a. m. Minium wholesale and retail prices and means of marking surplus stock will be discussed, and a plan formulated for dealing with buyers who fail to pay their bills. Mr. Alexander will advocate a systematic discarding of inferior varieties.

# "Do it right, or not at all"

**The following letter was written by "Father John" Davey to the men in the Davey organization. It is reproduced here to give you an idea of the spirit behind these master Tree Surgeons**



DEAR "BOYS": "DO IT RIGHT, OR NOT AT ALL." It was my father's and has been my slogan for seventy-two years. Here is its history, as I know it: I was nearly four years old. My father was planting potatoes, in front of our neat little cottage, on a fine May evening. I asked him if I could plant some. He opened up a trench at the end nearest the house. Then took a potato and said: "If I let you plant it will you do it RIGHT?" "I will do what you tell me." Then, looking at me tenderly, he said, with a firm voice: "YOU MUST DO IT RIGHT, or NOT AT ALL." He then went into the house and brought out a big iron spoon, and remarked: "Here is your shovel; keep it clean." He then cut the potato in two, and made a mark for each piece, telling me I must put the **cut side** down, and went on to his work. I carefully laid the two halves in place, then took my **shovel** and looked at (what appeared to me) a **big ditch** that I had to fill.

Well, by sundown I had this huge hole filled, and father showed me where I could improve on the level, or grade. After saying my little prayers I retired, but father's voice was heard: "Do it RIGHT, or not at all." In the morning I awoke, and still that voice was ringing, "Do it RIGHT, or not at all."

Then came those long days of waiting. "Will they NEVER come up?" A heavy rain packed the ground. Then I was presented with a new garden implement, a steel table fork; but it must be kept clean. With it I must keep the soil stirred. Finally a gentle rain came and, next morning, the ground was cracking and mother told me, "two little **baby plants** will be born." And the next day; what a miracle! It was not **two** plants, but two groups of **triplets**, six new-born plants! Then came the instructions, "**never** let the ground **pack**, keep it loose, and give the plants water—in hot weather." I was shown how to push the fork into the soil and keep the ground loose, and, in hot weather, I would hear mother calling: "Johnnie, your plants are thirsty; come and give them a drink." Then she would give me a little pail with water, and a little tin cup, and oh! how my plants would **drink**! And they **grew** and went away ahead of any of dad's; and when the crop was dug, he had nothing that could compare with mine! I did it RIGHT!

Dear "Boys": Here is something you never had known, namely: THE SEED of The Davey Institute of Tree Surgery was sown 72 years ago, in front of the little cottage where I was born. That seed was: "Do it **right**, or not at all." That kindly but manly voice went with me through boyhood's days, and particularly through young manhood. As a result, I have never known what it was to be OUT OF WORK, but have frequently been in dire need of procuring others to help me execute what has been forced upon me. Notably was this true, 21 years ago, when I published the first

JOHN DAVEY  *Father of Tree Surgery*

*John Davey, founder of the Davey Tree Expert Company, as he is today at nearly 77 years of age, at home before the fireplace he built with his own hands*

issue of "The Tree Doctor." It bewildered my brain to find ways to procure efficient help to do the work I was called on to perform on "Sick Trees." Hundreds of young men wanted a "Job," but not one in ten knew HOW TO WORK; and worse yet they showed no inclination to LEARN.

Finally, after my son left college, and joined me, we decided to organize and form a training school; and we have been able to pick out the one-in-ten, or whatever proportion it has been, and under the management of this same son and his associates, to build up the wonderful organization to which you belong, and in which you, apparently, feel an honest pride, because you seem to have imbibed the spirit, "Do it RIGHT, or not at all."

I may here say that, in practicing this slogan from childhood, it has become an almost unconscious habit with me, in any and everything, to first learn the DO IT RIGHT, then add the speed. There are but few things more nauseating and disgusting than to see a young man shiftless and careless in his work. Personally, I would be unwilling to tolerate ANY one of such a character within our Organization. Such an one is a disgrace to himself and a positive damage to any concern that might keep him. But it gives me special pleasure to know that within our ranks there are very few, if any, of the class whose motto is, "GOOD ENOUGH!"

Your "Father John."

**Davey Tree Surgeons are near you—if you live between Boston and Kansas City. They are easily available and handle operations of any size, large or small. Write or wire Kent, or nearest office.**

*Every real Davey Tree Surgeon is in the employ of The Davey Tree Expert Co., Inc., and the public is cautioned against those falsely representing themselves. An agreement made with the Davey Company and not with an individual is certain evidence of genuineness. Protect yourself from imposters. If anyone solicits the care of your trees who is not directly in our employ, and claims to be a Davey man, write Headquarters for his record. Save yourself from loss and your trees from harm.*

## CAPLAN'S NEW STORE

### It Will Have a Greenhouse and a Bird House Attached

Caplan, the Florist, will soon move to a new store at 140 Massachusetts Ave., Boston, a few doors from his present location, where he will have one of the finest flower shops in New England. The work of remodeling the store is now under way, and this work is to be finished about the first of August. The store itself will be 75 feet deep, with a 22-foot front, but in addition there will be a greenhouse 60x14 feet, one section of which will be divided off for a bird house, 20x14 feet. The greenhouse is to be put up by the Hitchings Co., and will be of the most modern design. It should be completed early in September.

Mr. Caplan will possess the only store in Boston having a greenhouse attachment and he expects that it will be a strong drawing card. The greenhouse is to be kept filled with plants, while the space under the benches will be used for goldfish. Mr. Caplan has been particularly successful with both goldfish and birds, of which he sells a large number. The bird house will be very unique. It is to contain no cages, but will be an open room where the birds can fly about at will.

The combination of plants, birds and ornamental fish will doubtless attract a great many visitors. These visitors will necessarily have to enter the greenhouse through the store itself. It will be on the same level as the store, and reached through an artistic opening. The store itself is to be finished in ivory and blue. At one side will be a large ice box lined with tile.

In the center of the store an oval fish pool, six feet long and three feet wide, will be constructed of beach stones set in cement. Near the front of the store a rest room for customers is being built. This room will have rugs on the floor and comfortable chairs. It will contain a desk, telephone and other conveniences.

The store will have two windows with tiled floors, and lighted by modern methods so as to give a suitable setting for the window creations which have given Mr. Caplan a wide reputation.

## LADIES' SOCIETY OF AMERICAN FLORISTS

The annual meeting of this Society will be held in the Muehlebach Hotel, Kansas City, Mo., on Wednesday, August 16, at 10.30 a. m. The Secretary Mrs. E. I. Herr, will have business quarters both at the Hotel and at Convention Hall.

---

The greenhouse property lately owned by A. C. Hendry at Oneonta, N. Y., was recently sold in foreclosure proceedings, being purchased for $9,000 by Antonio Angellilo, the holder of the mortgage.
